APPROXIMATE DATE OF PROPOSED PUBLIC OFFERING: As soon as practicable after the effective date of this Registration Statement.

If any of the securities being registered on this form are to be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box. []

It is proposed that this filing will become effective (check appropriate box):

[] when declared effective pursuant to Section 8(c)

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

| TITLE OF SECURITIES BEING REGISTERED | AMOUNT BEING REGISTERED (1) | PROPOSED MAXIMUM OFFERING PRICE PER UNIT (1) | PROPOSED MAXIMUM AGGREGATE OFFERING PRICE (1) | AMOUNT OF REGISTRATION FEES (1) (2) (3) |
|--|-----------------------------------|---|--|--|
| Common Shares of Beneficial Interest, \$0.01 par value | 50,000 | \$20.00 | \$1,000,000 | \$126.70 |

- (1) Estimated solely for purposes of calculating the registration fee, pursuant to Rule 457(o) under the Securities Act of 1933.
- (2) Includes Shares that may be offered to the Underwriters pursuant to an option to cover over-allotments.
- (3) A registration fee of \$126.70 was previously paid in connection with the initial filing filed on April 19, 2004.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(A) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATES AS THE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(A), MAY DETERMINE.

THE INFORMATION IN THIS PROSPECTUS IS INCOMPLETE AND MAY BE CHANGED. WE MAY NOT SELL THESE SECURITIES UNTIL THE REGISTRATION STATEMENT FILED WITH THE SECURITIES AND EXCHANGE COMMISSION IS EFFECTIVE. THIS PROSPECTUS IS NOT AN OFFER TO SELL THESE SECURITIES, AND WE ARE NOT SOLICITING OFFERS TO BUY THESE SECURITIES, IN ANY STATE WHERE THE OFFER OR SALE IS NOT PERMITTED.

PRELIMINARY PROSPECTUS SUBJECT TO COMPLETION December 7, 2004

[EATON VANCE LOGO] [] SHARES
 EATON VANCE SHORT DURATION DIVERSIFIED
 INCOME FUND

 COMMON SHARES

Eaton Vance Short Duration Diversified Income Fund (the "Fund") is a newly organized, diversified, closed-end management investment company. The Fund's investment objective is to provide a high level of current income. The Fund may,

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

as a secondary objective, also seek capital appreciation to the extent consistent with its primary goal of high current income.

Under normal market conditions, Eaton Vance Management, the Fund's investment adviser, expects the Fund to maintain a duration of no more than three years (including the effect of anticipated leverage). Initially, the Fund is expected to have a duration of approximately two years (including the effect of anticipated leverage). Under normal market conditions, the Fund expects to maintain a weighted average portfolio credit quality of investment grade (which is at least BBB- as determined by Standard & Poor's Ratings Group ("S&P") or Fitch Ratings ("Fitch"), or Baa3 as determined by Moody's Investors Service, Inc. ("Moody's") or, if unrated, determined to be of comparable quality by Eaton Vance Management).

The Fund pursues its objectives by investing its assets primarily in three distinct investment categories: 1) senior, secured floating rate loans made to corporate and other business entities ("Senior Loans"); 2) deposits of banks in foreign denominated currencies, short term debt obligations of foreign governmental issuers, as well as positions in foreign currencies and bonds and other debt obligations of foreign government, government agency and corporate issuers, including emerging market issuers, which are denominated in foreign currencies or U.S. dollars ("Foreign Obligations"); and 3) mortgage-backed securities that are issued, backed or otherwise guaranteed by the U.S. Government or its agencies or instrumentalities or that are issued by private issuers ("MBS"). Senior Loans in which the Fund invests are typically of below "investment grade" quality ("Non-Investment Grade Securities"), as may be certain Foreign Obligations in which the Fund invests. Non-Investment Grade Securities, commonly referred to as "junk" securities, are debt obligations that are rated below investment grade by each of the national rating agencies who cover the security, or, if unrated, are determined to be of comparable quality by the Adviser. S&P and Fitch consider securities rated below BBB- to be below investment grade and Moody's considers securities rated below Baa3 to be below investment grade. In addition to holding securities, the Fund may also obtain investment exposure to each of these three categories through the use of long or short derivative instruments. The Adviser has broad discretion to allocate the Fund's assets among these investment categories subject to the following guidelines. Under normal market circumstances, at least 80% of the Fund's gross assets will be invested in these categories collectively, including through the use of derivatives; and the Fund's exposure to each of these categories will equal at least 25% of the Fund's net assets.

The Fund's investment adviser is Eaton Vance Management ("Eaton Vance" or the "Adviser"). As of October 31, 2004, Eaton Vance and its subsidiaries managed approximately \$[] billion on behalf of funds, institutional clients and individuals.

(CONTINUED ON INSIDE COVER PAGE)

INVESTING IN SHARES INVOLVES CERTAIN RISKS. SEE "INVESTMENT OBJECTIVES, POLICIES AND RISKS" ON PAGE [] OF THIS PROSPECTUS.

| | PER SHARE | TOTAL (3) |
|--------------------------|-----------|-----------|
| | ----- | ----- |
| Public offering price | \$ _____ | \$ _____ |
| Sales load (1) | \$ _____ | \$ _____ |
| Proceeds to the Fund (2) | \$ _____ | \$ _____ |

(1) Eaton Vance (not the Fund) will pay certain additional compensation to qualifying underwriters. See "Underwriting" on page [] of this Prospectus.

(2) In addition to the sales load, the Fund will pay offering expenses of up to

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

[\$] per share, estimated to total \$[], which will reduce the "Proceeds to Fund" (above). Eaton Vance or an affiliate has agreed to pay the amount by which the aggregate of all of the Fund's offering costs (other than sales loads) exceeds \$[] per share. Eaton Vance or an affiliate has agreed to reimburse all Fund organizational costs.

- (3) The underwriters have an option to purchase up to an additional [] shares of the fund at the public offering price, less the sales load, within 45 days of the date of this Prospectus to cover any over-allotments. If the underwriters exercise this option in full, the total public offering price, sales load, and estimated offering expenses and proceeds, after expenses, to the fund will be [\$], [\$], [\$], and [\$], respectively. See "Underwriting" on page [] of this Prospectus.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR DETERMINED IF THIS PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

BECAUSE THE FUND IS NEWLY ORGANIZED, ITS COMMON SHARES HAVE NO HISTORY OF PUBLIC TRADING.

This Prospectus provides information that you should know about the Fund before investing. Please read this Prospectus carefully and keep it for future reference. Information required to be in the Fund's Statement of Additional Information is found in this Prospectus.

The Shares will be ready for delivery on or about [], 2005.

THE DATE OF THIS PROSPECTUS IS [] [], 2005

(CONTINUED FROM PREVIOUS PAGE)

The Fund intends to apply for the listing of its common shares on the [New York Stock Exchange] under the symbol "[]."

Because the Fund is newly organized, its common shares have no history of public trading. The shares of closed-end management investment companies frequently trade at a discount from their net asset value. The returns earned by holders of the Fund's common shares ("Common Shareholders") who purchase their shares in this offering and sell their shares below net asset value will be reduced.

The Fund's net asset value and distribution rate will vary and may be affected by several factors, including changes in the credit quality of issuers and interest rates and other market factors. Fluctuations in net asset value may be magnified as a result of the Fund's use of leverage, which is a speculative investment technique. An investment in the Fund may not be appropriate for all investors. There is no assurance that the Fund will achieve its investment objectives.

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

The Fund expects to use financial leverage, through derivative instruments, through the reinvestment of securities lending collateral, through borrowings and/or through the establishment of a commercial paper program, initially equal to between approximately 30%-40% of its total managed assets. The Adviser anticipates that the use of leverage will result in higher income to common shareholders over time. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks. There can be no assurance that a leveraging strategy will be utilized or will be successful. SEE "INVESTMENT OBJECTIVES, POLICIES AND RISKS--USE OF LEVERAGE AND RELATED RISKS" AT PAGE [] AND "DESCRIPTION OF CAPITAL STRUCTURE" AT PAGE [] OF THIS PROSPECTUS.

This Prospectus sets forth concisely information you should know before investing in the shares of the Fund. Please read and retain this Prospectus for future reference. A Statement of Additional Information dated [], 2005, has been filed with the Securities and Exchange Commission ("SEC") and can be obtained without charge by calling 1-800-225-6265 or by writing to the Fund. A table of contents to the Statement of Additional Information is located at page [] of this Prospectus. This Prospectus incorporates by reference the entire Statement of Additional Information. The Statement of Additional Information is available along with other Fund-related materials: at the SEC's public reference room in Washington, DC (call 1-202-942-8090 for information on the operation of the reference room); the EDGAR database on the SEC's internet site ([HTTP://WWW.SEC.GOV](http://www.sec.gov)); upon payment of copying fees by writing to the SEC's public reference section, 450 Fifth Street, NW, Washington, DC 20549-0102; or by electronic mail at PUBLICINFO@SEC.GOV. The Fund's address is The Eaton Vance Building, 255 State Street, Boston, Massachusetts 02109 and its telephone number is 1-800-225-6265.

The Fund's shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

YOU SHOULD RELY ONLY ON THE INFORMATION CONTAINED OR INCORPORATED BY REFERENCE IN THIS PROSPECTUS. THE FUND HAS NOT, AND THE UNDERWRITERS HAVE NOT, AUTHORIZED ANY OTHER PERSON TO PROVIDE YOU WITH DIFFERENT INFORMATION. IF ANYONE PROVIDES YOU WITH DIFFERENT OR INCONSISTENT INFORMATION, YOU SHOULD NOT RELY ON IT. THE FUND IS NOT, AND THE UNDERWRITERS ARE NOT, MAKING AN OFFER TO SELL THESE SECURITIES IN ANY JURISDICTION WHERE THE OFFER OR SALE IS NOT PERMITTED. YOU SHOULD NOT ASSUME THAT THE INFORMATION PROVIDED BY THIS PROSPECTUS IS ACCURATE AS OF ANY DATE OTHER THAN THE DATE ON THE FRONT OF THIS PROSPECTUS. THE FUND'S BUSINESS, FINANCIAL CONDITION AND RESULTS OF OPERATIONS MAY HAVE CHANGED SINCE THE DATE OF THIS PROSPECTUS.

Until [], 200[] (25 days after the date of this Prospectus), all dealers that buy, sell or trade the shares, whether or not participating in this offering, may be required to deliver a Prospectus. This is in addition to the dealers' obligation to deliver a Prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

SUMMARY OF TERMS

THE FOLLOWING PROVIDES A SUMMARY OF CERTAIN INFORMATION CONTAINED IN THIS PROSPECTUS RELATING TO THE EATON VANCE SHORT DURATION DIVERSIFIED INCOME FUND AND ITS SHARES AND DOES NOT CONTAIN ALL OF THE INFORMATION THAT YOU SHOULD CONSIDER BEFORE INVESTING IN THE FUND OR PURCHASING ITS SHARES. THE INFORMATION IS QUALIFIED IN ALL RESPECTS BY THE MORE DETAILED INFORMATION INCLUDED ELSEWHERE IN THIS PROSPECTUS AND IN THE APPROPRIATE REGISTRATION STATEMENTS FILED WITH THE U.S. SECURITIES AND EXCHANGE COMMISSION.

THE FUND Eaton Vance Short Duration Diversified Income Fund (the "Fund") is a newly organized, diversified, closed-end management investment company. The Fund offers investors the opportunity to receive a high level of current income from a diversified short duration portfolio. To the extent consistent with this objective, the Fund may also offer an opportunity for capital appreciation. Under normal market conditions, the Adviser expects to maintain a duration of no more than three years (including the effect of anticipated leverage). Initially, the Fund is expected to have a duration of approximately two years (including the effect of anticipated leverage). Investments are based on Eaton Vance Management's ("Eaton Vance" or the "Adviser") internal research and ongoing credit analysis, which is generally not available to individual investors. An investment in the Fund may not be appropriate for all investors. There is no assurance that the Fund will achieve its investment objectives.

THE OFFERING The Fund is offering [] common shares of beneficial interest, par value \$0.01 per share (the "Common Shares"), through a group of underwriters (the "Underwriters") led by [], [] and []. The Underwriters have been granted an option to purchase up to [] additional Common Shares solely to cover over-allotments, if any. The initial public offering price is \$[] per share. The minimum purchase in this offering is 100 Common Shares (\$[]). See "Underwriting." Eaton Vance or an affiliate has agreed to (i) reimburse all organizational costs and (ii) pay all offering costs (other than sales loads) that exceed \$[] per Share.

INVESTMENT OBJECTIVE AND POLICIES The Fund's investment objective is to provide a high level of current income. The Fund may, as a secondary objective, also seek capital appreciation to the extent consistent with its primary goal of high current income. The Fund pursues its objectives by investing its assets primarily in three distinct investment categories: 1) senior, secured floating rate loans made to corporate and other business entities ("Senior Loans"); 2) deposits of banks in foreign denominated currencies, short term debt obligations of foreign governmental issuers, as well as positions in foreign currencies and bonds and other debt obligations of

foreign government, government agency and corporate issuers, including emerging market issuers, which are denominated in foreign currencies or U.S. dollars ("Foreign Obligations"); and 3) mortgage-backed securities that are issued, backed or otherwise guaranteed by the U.S. Government or its agencies or instrumentalities or that are issued by private issuers ("MBS"). Senior Loans in which the Fund invests are typically of below "investment grade" quality ("Non-Investment Grade Securities"), as may be certain Foreign Obligations in which the Fund invests. Non-Investment Grade Securities, commonly referred to as "junk" securities, are debt obligations that are rated below investment grade by each of the national rating agencies who cover the security, or, if unrated, are determined to be of comparable quality by the Adviser. Standard & Poor's Ratings Group ("S&P") and Fitch Ratings ("Fitch") consider securities rated below BBB- to be below investment grade and Moody's Investors Service, Inc. ("Moody's") considers securities rated below Baa3 to be below investment grade. In addition to holding securities, the Fund may also obtain investment exposure to each of these three categories through the use of long or short derivative instruments. The Adviser has broad discretion to allocate the Fund's assets among these investment categories subject to the following guidelines. Under normal market circumstances, at least 80% of the Fund's gross assets will be invested in these categories collectively, including through the use of derivatives; and the Fund's exposure to each of these categories will equal at least 25% of the Fund's net assets.

Under normal market conditions, the Adviser expects to maintain a duration of no more than three years (including the effect of anticipated leverage). Initially, the Fund is expected to have a duration of approximately two years (including the effect of anticipated leverage). This duration policy may only be changed following provision of 60 days' prior written notice to holders of Common Shares ("Common Shareholders"). In comparison to maturity (which is the date on which a debt instrument ceases and the issuer is obligated to repay the principal amount), duration is a measure of the price volatility of a debt instrument as a result of changes in market rates of interest, based on the weighted average timing of the instrument's expected

1

principal and interest payments. Duration differs from maturity in that it considers a security's yield, coupon payments, principal payments and call features in addition to the amount of time until the security finally matures. As the value of a security changes over time, so will its duration. Prices of securities with longer durations tend to be more sensitive to interest rate changes than securities with shorter durations. In general, a portfolio of securities with a longer duration can be expected to be more sensitive to interest rate changes than a portfolio with a shorter duration.

A team of Eaton Vance investment professionals is responsible for the overall management of the Fund's investments as well as allocations between the Fund's three

principal investment categories. Individual members of this team with specialized experience are responsible for the day-to-day portfolio management within each of the Fund's main investment categories. The Fund's investments are actively managed, and securities may be bought or sold on a daily basis.

The Adviser's staff monitors the credit quality and price of securities held by the Fund, as well as other securities that are available to the Fund. Under normal market conditions, the Fund expects to maintain a weighted average portfolio credit quality of investment grade (which is at least BBB- as determined by S&P or Fitch, or Baa3 as determined by Moody's or, if unrated, determined to be of comparable quality by the Adviser). For this purpose, when a security is rated by more than one of these rating agencies, the Adviser generally will use the highest rating. Within this general guideline, the Fund may invest in individual securities of any credit quality. Although the Adviser considers ratings when making investment decisions, it performs its own credit and investment analysis and does not rely primarily on the ratings assigned by the rating services. In evaluating the quality of a particular security, whether rated or unrated, the Adviser will normally take into consideration, among other things, the issuer's financial resources and operating history, its sensitivity to economic conditions and trends, the ability of its management, its debt maturity schedules and borrowing requirements, and relative values based on anticipated cash flow, interest and asset coverage, and earnings prospects. The Adviser will attempt to reduce the risks of investing in lower rated or unrated debt instruments through active portfolio management, credit analysis and attention to current developments and trends in the economy and the financial markets. When purchasing and selling MBS, the Adviser focuses on the expected principal payments of an MBS security, as well as current and anticipated market conditions.

As stated above, the Fund will normally have substantial exposure to Foreign Obligations. The Adviser believes that a portfolio of carefully selected Foreign Obligations may earn attractive rates of return relative to U.S. instruments of comparable duration and credit quality. In current market circumstances, the Adviser believes that desired exposures to prevailing interest rates in certain foreign countries may best be obtained through forward foreign currency contracts with respect to such countries' currencies. The Adviser believes that this approach reduces the credit risk associated with investment in the debt of foreign sovereign and corporate issuers. In addition, utilizing forward foreign currency contracts reduces the transaction costs of obtaining this exposure as compared to investment in foreign debt obligations. Through its investments in non-dollar denominated Foreign Obligations, the Fund may have substantial exposure to fluctuations in the values of foreign currencies. The Adviser intends to select currencies for both long and short investment based upon such factors as a country's (i) economic and political structure, (ii) long run economic and productivity gain, (iii) fiscal and monetary policies, (iv) inflation and interest rates, (v) balance of payments and terms of trade, and (vi) other

factors such as flow of funds.

The Fund's investments may have significant exposure to certain sectors of the economy and thus may react differently to political or economic developments than the market as a whole.

The Fund may purchase or sell derivative instruments (which derive their value from another instrument, security or index) for investment purposes, such as obtaining investment exposure to foreign currencies; risk management purposes, such as hedging against fluctuations in securities prices or interest rates; diversification purposes; or changing the duration of the Fund. Transactions in derivative instruments may include, but not limited to, the purchase or sale of foreign currency forward contracts, futures contracts on securities, currencies, indices and other financial instruments, credit-linked notes, tranches of collateralized loan obligations, options on futures contracts, and exchange-traded and over-the-counter options on securities, currencies or indices, and currency, interest rate, total return and credit default swaps.

LISTING

The Fund will apply for the listing of its common shares on the [New York Stock Exchange] under the symbol "[]."

2

LEVERAGE

The Fund expects to use financial leverage. The Fund expects initially to obtain financial leverage as soon as practicable after the completion of the offering of the Common Shares through derivative instruments, the reinvestment of securities lending collateral and through borrowings and/or the establishment of a commercial paper program. The Fund initially to have financial leverage of between approximately 30%-40% of its total managed assets. The Fund reserves the right in the future to adjust the amount of leverage used and/or to leverage exclusively through a single method. In the future, the Fund, in its sole discretion, may also employ other forms of financial leverage, including the issuance of debt securities or preferred shares. The Adviser anticipates that the use of leverage should result in higher total return to Common Shareholders over time. Use of financial leverage creates an opportunity for increased return for Common Shareholders, but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of the Common Shares), and there can be no assurance that a leveraging strategy will be successful during any period in which it is employed. During periods in which the Fund is using leverage, the fees paid to Eaton Vance for investment advisory services will be higher than if the Fund did not use leverage because the fees paid will be calculated on the basis of the Fund's gross assets, including the notional value of all long and short foreign exposures created by forward foreign currency contracts or other derivatives on foreign exposures and other assets purchased with financial leverage. When there is a long and short position in the same foreign exposure with settlement dates within less than one year of each other they will be netted for purposes of determining gross assets. See

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

"Investment objectives, policies and risks--Use of leverage and related risks" and "Management of the Fund--The Adviser."

INVESTMENT ADVISER AND ADMINISTRATOR Eaton Vance, an indirect wholly-owned subsidiary of Eaton Vance Corp., is the Fund's investment adviser and administrator. The Adviser and its subsidiaries manage approximately \$[] billion on behalf of funds, institutional clients and individuals as of October 31, 2004. [Twenty-six] of the funds are closed-end. See "Management of the Fund."

DISTRIBUTIONS Commencing with the Fund's first dividend, the Fund intends to make regular monthly cash distributions to Common Shareholders of substantially all net investment income of the Fund, after payment of interest on any outstanding borrowings. The amount of each monthly distribution will vary depending on a number of factors, including interest payable on debt or other costs of financial leverage. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could change. The Fund intends to include in certain of its distributions amounts attributable to the imputed interest represented by the difference between the foreign currency spot rate and foreign currency forward rate or the imputed interest derived from certain derivative transactions. In certain circumstances, this practice may result in a return of capital to Common Shareholders for federal income tax purposes as discussed below. The Board may modify this distribution policy at any time without obtaining the approval of Common Shareholders. Over time, the Fund will distribute all of its net investment income. The initial distribution is expected to be declared approximately 45 days and paid approximately 60 to 90 days after the completion of this offering, depending on market conditions. See "Distributions and taxes."

The investment income of the Fund will consist of all interest income accrued on portfolio investments, short-term capital gain (including short-term gains on terminated option positions and gains on the sale of portfolio investments held for one year or less) in excess of long-term capital loss and income from certain hedging transactions, less all expenses of the Fund. Expenses of the Fund will be accrued each day. Over time, all of the Fund's investment company taxable income will be distributed. In addition, at least annually, the Fund intends to distribute any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss). To the extent that that Fund's net investment income and net capital gain for any year exceed the total monthly distributions paid during the year, the Fund will make a special distribution at or near year-end of such excess amount as may be required. If the Fund's total monthly distributions in any year exceed the amount of its net investment income and net capital gain for the year, any such excess would be characterized as a return of capital for federal income tax purposes. Under the 1940 Act, for any distribution that includes amounts from sources other than net income, the Fund is required to provide Common Shareholders a written statement regarding the components of such distribution.

Common Shareholders may elect automatically to reinvest some or all of their distributions in additional Common Shares

3

under the Fund's dividend reinvestment plan. See "Dividend reinvestment plan."

DIVIDEND
REINVESTMENT PLAN

The Fund has established a dividend reinvestment plan (the "Plan"). Under the Plan, a Shareholder may elect to have all dividend and capital gain distributions automatically reinvested in additional Common Shares either purchased in the open market, or newly issued by the Fund if the Common Shares are trading at or above their net asset value. Common Shareholders may elect to participate in the Plan by completing the dividend reinvestment plan application form. Common Shareholders who do not elect to participate in the Plan will receive all distributions in cash paid by check mailed directly to them by PFPC Inc., as dividend paying agent. Common Shareholders who intend to hold their Common Shares through a broker or nominee should contact such broker or nominee to determine whether or how they may participate in the Plan. See "Dividend reinvestment plan."

CLOSED-END
STRUCTURE

Closed-end funds differ from open-end management investment companies (commonly referred to as mutual funds) in that closed-end funds generally list their shares for trading on a securities exchange and do not redeem their shares at the option of the shareholder. By comparison, mutual funds issue securities redeemable at net asset value at the option of the shareholder and typically engage in a continuous offering of their shares. Mutual funds are subject to continuous asset in-flows and out-flows that can complicate portfolio management, whereas closed-end funds generally can stay more fully invested in securities consistent with the closed-end fund's investment objectives and policies. In addition, in comparison to open-end funds, closed-end funds have greater flexibility in the employment of financial leverage and in the ability to make certain types of investments, including investments in illiquid securities. However, shares of closed-end funds frequently trade at a discount from their net asset value. In recognition of the possibility that the Common Shares might trade at a discount to net asset value and that any such discount may not be in the interest of Common Shareholders, the Fund's Board of Trustees (the "Board"), in consultation with Eaton Vance, from time to time may review possible actions to reduce any such discount. The Board might consider open market repurchases or tender offers for Common Shares at net asset value. There can be no assurance that the Board will decide to undertake any of these actions or that, if undertaken, such actions would result in the Common Shares trading at a price equal to or close to net asset value per Common Share. The Board might also consider the conversion of the Fund to an open-end mutual fund. The Board believes, however, that the closed-end structure is desirable, given the Fund's investment objectives and policies. Investors should assume, therefore, that it is highly unlikely that the Board would vote to convert the Fund to an open-end investment company. Investors should note that the anticipated incurrence of

debt to provide investment leverage could make a conversion to open-end form more difficult because of the costs of retiring debt and other factors. See "Description of capital structure."

SPECIAL RISK
CONSIDERATIONS

NO OPERATING HISTORY. The Fund is a closed-end investment company with no history of operations and is designed for long-term investors and not as a trading vehicle.

Income Risk. The income investors receive from the Fund is based primarily on the interest it earns from its investments, which can vary widely over the short and long-term. If prevailing market interest rates drop, investors' income from the Fund over time could drop as well. The Fund's income could also be affected adversely when prevailing short-term interest rates increase and the Fund is utilizing leverage, although this risk is mitigated by the Fund's investment in Senior Loans.

CREDIT RISK. Credit risk is the risk that one or more debt obligations in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the obligation experiences a decline in its financial status. For MBS, credit risk involves two types: delinquency and default. Delinquency refers to interruptions in the payment of interest and principal. Default refers to the potential for unrecoverable principal loss from the sale of foreclosed collateral or the Fund's inherent right to forgive principal or modify a debt instrument. For MBS, factors contributing to these risks include the effects of general and local economic conditions on home values, the financial conditions of homeowners, and other market factors. This risk is mitigated by a U.S. government agency's or instrumentality's guarantee of the underlying debt obligation. For corporate debt securities and Senior Loans, credit risk refers to default risk, which typically means the nonpayment of interest and/or principal when it is due.

PREPAYMENT RISK. During periods of declining interest rates or for other purposes, the borrowers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is

4

known as call or prepayment risk. Non-Investment Grade Securities frequently have call features that allow the issuer to redeem the security at dates prior to its stated maturity at a specified price only if certain prescribed conditions are met ("call protection"). An issuer may redeem a Non-Investment Grade Security if, for example, the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. Senior Loans and MBS typically have no such call protection. Senior Loans' prepayment risk is mitigated by the floating-rate characteristic of Senior Loans. For premium bonds and loans (bonds or loans acquired at prices that exceed their par or principal value) purchased by the Fund, prepayment risk may be enhanced.

ISSUER RISK. The value of corporate income-producing securities may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods and services.

SENIOR LOANS RISK. The risks associated with Senior Loans are similar to the risks of Non-Investment Grade Securities, although Senior Loans are typically senior and secured in contrast to other types of Non-Investment Grade Securities, which are often subordinated and unsecured. Senior Loans' higher standing has historically resulted in generally higher recoveries relative to those on unsecured, subordinate debt in the event of a corporate reorganization. In addition, because their interest rates are adjusted for changes in short-term interest rates, Senior Loans generally have less interest rate risk than other types of Non-Investment Grade Securities described below and foreign debt obligations, which are typically fixed rate. The Fund's investments in Senior Loans are typically below investment grade and are considered speculative because of the credit risk of their issuers. Such companies are more likely to default on their payments of interest and principal owed to the Fund, and such defaults could reduce the Fund's net asset value and income distributions. An economic downturn generally leads to a higher non-payment rate, and a debt obligation may lose significant value before a default occurs. Moreover, any specific collateral used to secure a loan may lose a portion or all of its value or become illiquid, which would adversely affect the loan's value.

Economic and other events (whether real or perceived) can reduce the demand for certain Senior Loans or Senior Loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted.

Loans and other debt securities are also subject to the risk of price declines and to increases in prevailing interest rates, although floating-rate debt instruments are substantially less exposed to this risk than fixed-rate debt instruments. Interest rate changes may also increase prepayments of debt obligations and require the Fund to invest assets at lower yields. No active trading market may exist for certain loans, which may impair the ability of the Fund to realize full value in the event of the need to liquidate such assets. Adverse market conditions may impair the liquidity of some actively traded loans.

CURRENCY RISK. Common Shares are denominated and sold on the [New York] Stock Exchange in U.S. dollars. Since the Fund may have substantial exposure to foreign currencies, the Fund will be affected by changes in foreign currency exchange rates (and exchange control regulations), which affect the value of investments in the Fund and the accrued income and appreciation or depreciation of the investments in U.S. dollars. Accordingly, the value of such assets in U.S. dollars may be affected favorably or unfavorably by fluctuations in currency rates and therefore the Fund is necessarily subject to foreign exchange risks.

Foreign currency exchange rates may fluctuate significantly

over short periods of time. They generally are determined by the forces of supply and demand in the foreign exchange markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors. Currency exchange rates also can be affected unpredictably by intervention (or the failure to intervene) by U.S. or foreign governments or central banks, or by currency controls or political developments in the U.S. or abroad. Currencies in which the Fund holds long positions or in which portfolio assets are denominated may depreciate against the U.S. dollar, resulting in a loss to the Fund. Currencies in which the Fund holds short positions may appreciate against the U.S. dollar, also resulting in a loss to the Fund. In certain countries, the central bank manages the currency rate against a basket of one or more index currencies of other major countries. In some of these countries, the Fund may employ a strategy seeking to limit exposure to the index currencies while retaining exposure to the local currency. In such a situation, the Fund's strategy could fail if a country changes the announced or implied components of the index currencies against which the Fund has hedged its exposure.

The Fund may buy or sell foreign currencies or may deal in forward foreign currency contracts, that is, agree to buy or

5

sell a specified currency at a specified price and future date. The Fund may use forward contracts 1) for obtaining long or short investment exposures to foreign currencies, 2) for hedging, or 3) for currency risk management. Currency risk management may include taking active currency positions relative to the Fund's securities portfolio.

Other risks involved in currency investments include the dependence on the Adviser's ability to forecast movements in exchange rates and imperfect correlations between movements in exchange rates. Currency investments could be adversely affected by delays in, or a refusal to grant, repatriation of funds or conversions of certain currencies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and significant devaluation may occur subsequent to investments in these currencies by the Fund.

Certain currency investments, including that of emerging market countries, may be highly volatile, and movement in these instruments may result in substantial loss to the Fund.

Certain currency related investments may be acquired in the "over-the-counter" or "interdealer" markets, where participants typically are not subject to credit evaluation and regulatory oversight as are members of "exchange based" markets. In the absence of a regulated market to facilitate settlement, the Fund is subject to the risk that a counterparty will not settle a transaction (such as a forward currency contract) in accordance with its terms and conditions because of a dispute over the terms of contract or because of a credit or liquidity problem.

A portion of the Fund's currency investments may be or become illiquid. This is a result of the small quantities in which some of these securities are issued and lower trading volumes in the securities markets and/or currencies of certain countries. If currency investments need to be liquidated quickly, the Fund could sustain significant transaction costs.

FOREIGN SECURITY RISK. The Fund may have substantial exposure to foreign securities.

Foreign government securities include securities issued or guaranteed by foreign governments (including political subdivisions) or their authorities, agencies or instrumentalities or by supra-national agencies. Foreign government securities have different kinds of government support. For example, some foreign government securities are supported by the full faith and credit of a foreign national government or political subdivision and some are not. In the case of certain countries, foreign government securities may involve varying degrees of credit risk as a result of financial or political instability in such countries and the possible inability of the Fund to enforce its rights against the foreign government issuer. Like other fixed income securities, foreign government securities are subject to market risk and their market values fluctuate as interest rates change. Thus, for example, the value of an investment in the Fund which holds foreign government securities may fall during times of rising interest rates. Yields on foreign government securities tend to be lower than those of corporate securities of comparable maturities.

Investment in foreign issuers or securities principally traded overseas may involve certain special risks due to foreign economic, political and legal developments, including favorable or unfavorable changes in currency exchange rates, exchange control regulations (including currency blockage), expropriation or nationalization of assets, imposition of withholding taxes on dividend or interest payments, and possible difficulty in obtaining and enforcing judgments against foreign entities. Furthermore, issuers of foreign securities are subject to different, often less comprehensive, accounting, reporting and disclosure requirements than domestic issuers. The securities of some foreign governments and companies and foreign securities markets are less liquid and at times more volatile than comparable U.S. securities and securities markets. Foreign brokerage commissions and other fees are also generally higher than in the United States. The laws of some foreign countries may limit the Fund's ability to invest in securities of certain issuers located in these foreign countries. There are also special tax considerations which apply to securities of foreign issuers and securities principally traded overseas. Investors should also be aware that under certain circumstances, markets which are perceived to have similar characteristics to troubled markets may be adversely affected whether or not similarities actually exist.

The risks described above apply to an even greater extent to investments in emerging markets. The securities markets of emerging countries are generally smaller, less developed,

less liquid, and more volatile than the securities markets

6

of the U.S. and developed foreign markets. Disclosure and regulatory standards in many respects are less stringent than in the U.S. and developed foreign markets. There also may be a lower level of monitoring and regulation of securities markets in emerging market countries and the activities of investors in such markets, and enforcement of existing regulations has been extremely limited. Many emerging countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue to have very negative effects on the economies and securities markets of certain emerging countries. Economies in emerging markets generally are heavily dependent upon international trade and, accordingly, have been and may continue to be affected adversely by trade barriers, exchange controls, managed adjustments in relative currency values, and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be adversely affected by economic conditions in the countries in which they trade. The economies of countries with emerging markets may also be predominantly based on only a few industries or dependent on revenues from particular commodities. In addition, custodial services and other costs relating to investment in foreign markets may be more expensive in emerging markets than in many developed foreign markets, which could reduce the Fund's income from such securities. Finally, because publicly traded debt instruments of emerging markets represent a relatively recent innovation in the world debt markets, there is little historical data or related market experience concerning the attributes of such instruments under all economic, market and political conditions.

In many cases, governments of emerging countries continue to exercise significant control over their economies, and government actions relative to the economy, as well as economic developments generally, may affect the capacity of issuers of emerging country debt instruments to make payments on their debt obligations, regardless of their financial condition. In addition, there is a heightened possibility of expropriation or confiscatory taxation, imposition of withholding taxes on interest payments, or other similar developments that could affect investments in those countries. There can be no assurance that adverse political changes will not cause the Fund to suffer a loss of any or all of its investments in such countries, or, in the case of fixed-income securities, interest thereon.

MORTGAGE-BACKED SECURITIES RISK. The value of Fund shares may be adversely affected by fluctuations in interest rates and the prepayment of the mortgage loans underlying the MBS held by the Fund. Mortgage loans are most likely to be prepaid in a declining interest rate environment and when MBS are trading at a substantial premium. Prepayment may reduce the Fund's coupon distributions because the proceeds of a prepayment may be invested in lower-yielding

securities. In a rising interest rate environment, a declining prepayment rate will extend the average life of many MBS which in turn would lengthen the duration of the Fund's portfolio. This possibility is often referred to as extension risk. Extending the average life of an MBS increases the risk of depreciation due to future increases in market interest rates. The value of Fund Common Shares can also be adversely affected by the existence of premiums on the price of MBS it acquires.

Certain government agencies or instrumentalities, such as the Government National Mortgage Association ("GNMA"), the Federal National Mortgage Association ("FNMA"), and the Federal Home Loan Mortgage Corporation ("FHLMC"), provide a guarantee as to timely payment of principal and interest for MBS each entity issues, backs or otherwise guarantees. Guarantees may not be backed by the full faith and credit of the U.S. government.

NON-INVESTMENT GRADE SECURITIES RISK. Most of the Fund's investments in Senior Loans are of below investment grade quality, as may be certain Foreign Obligations in which the Fund invests. Non-Investment Grade Securities are considered predominantly speculative because of the credit risk of their issuers. While offering a greater potential opportunity for capital appreciation and higher yields, Non-Investment Grade Securities typically entail greater potential price volatility and may be less liquid than higher-rated securities. Issuers of Non-Investment Grade Securities are more likely to default on their payments of interest and principal owed to the Fund, and such defaults will reduce the Fund's net asset value and income distributions. The prices of these lower rated obligations are more sensitive to negative developments than higher rated securities. Adverse business conditions, such as a decline in the issuer's revenues or an economic downturn, generally lead to a higher non-payment rate. In addition, a security may lose significant value before a default occurs as the market adjusts to expected higher non-payment rates.

DERIVATIVES RISK. Derivative transactions (such as forward contracts, futures contracts and options thereon, options,

7

swaps and short sales) may subject the Fund to substantial loss of principle in relation to the Fund's investment amount. The Fund also will be subject to credit risk with respect to the counterparties to the derivatives contracts purchased by the Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

EFFECTS OF LEVERAGE. There can be no assurance that a leveraging strategy will be utilized by the Fund or that, if utilized, it will be successful during any period in which

it is employed. Leverage creates risks for Common Shareholders, including the likelihood of greater volatility of net asset value and market price of the Common Shares and the risk that fluctuations in borrowing costs may affect the return to Common Shareholders. To the extent the income derived from securities purchased with financial leverage exceeds the cost of leverage, the Fund's distributions will be greater than if leverage had not been used. Conversely, if the income from the securities purchased with such proceeds is not sufficient to cover the cost of leverage, the amount available for distribution to Common Shareholders as dividends and other distributions will be less than if leverage had not been used. If the value of the assets purchased or investment exposures created with leverage decline and are less than the repayment value of securities lending collateral at the time such collateral must be returned, the principal owed on borrowings or under a commercial paper program at the time principal payment is due and/or the settlement obligation under a derivative investment at the time of settlement, financial leverage will result in a reduction of the value of the Fund's net assets. Eaton Vance in its best judgment may nevertheless determine to maintain the Fund's leveraged position if it deems such action to be appropriate. The costs of any borrowing/commercial paper program will be borne by Common Shareholders and consequently will result in a reduction of the net asset value of Common Shares.

As discussed in detail under "Management of the Fund," the fee paid to Eaton Vance will be calculated on the basis of the Fund's average daily gross assets, including the notional value of all long and short foreign exposures created by forward foreign currency contracts or other derivatives on foreign exposures and other assets purchased with financial leverage. When there is a long and short position in the same foreign exposure with settlement dates within less than one year of each other they will be netted for purposes of determining gross assets. See "Investment objectives, policies and risks--Use of Leverage and Related Risks

The Fund intends to manage its use of financial leverage through derivatives and the reinvestment of securities lending collateral so that these arrangements will not be considered to create a "senior security" within the meaning of the Investment Company Act. In this regard, in accordance with guidelines established by the SEC, the Fund's custodian on a daily basis will segregate in the Fund's custody account liquid portfolio assets equal to the then current 1) settlement value of the Fund's obligations under derivative instruments used to create leverage; and 2) rebate value of any securities lending collateral that has been reinvested to create financial leverage. In addition, the SEC has established guidelines that restrict a registered investment company from loaning portfolio securities in excess of one third of its total assets. Accordingly, this restriction places a practical limit on the amount of financial leverage that may be obtained through reinvestment of securities lending collateral.

To the extent that the Fund in the future engages in borrowing, establishes a commercial paper program and/or

issues debt securities to create financial leverage, under the Investment Company Act its obligations in respect thereof would be subject to a 3 to 1 asset coverage requirement. To the extent that the Fund in the future issues preferred shares to create financial leverage, under the Investment Company Act its obligations in respect thereof would be subject to a 2 to 1 asset coverage requirement. In addition, borrowing/commercial paper program covenants and/or the terms of debt securities or preferred shares issued may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the Investment Company Act. The Fund would only utilize such additional methods of financial leverage if it anticipated that these asset coverage requirement, covenants or guidelines would not significantly impede Eaton Vance in managing the Fund's portfolio in accordance with its investment objectives and policies. See "Description of capital structure."

Financial leverage achieved through the purchase of derivative instruments such forward foreign currency

8

contracts and reverse repurchase agreements exposes the Fund to special risks. See "Investment objectives, policies and risks--Additional Investment Practices" and "Investment objectives, policies and risks--Additional Risk Considerations."

INTEREST RATE RISK. The value of Fund shares will usually change in response to interest rate fluctuations. When interest rates decline, the value of fixed-rate securities already held by the Fund can be expected to rise. Conversely, when interest rates rise, the value of existing fixed-rate portfolio securities can be expected to decline. Because market interest rates are currently near their lowest levels in many years, there is a greater than normal risk that the Fund's portfolio will decline in value due to rising interest rates. Fluctuations in the value of fixed-rate securities will not affect interest income on existing securities but will be reflected in the Fund's net asset value. Fixed-rate securities with longer durations tend to be more sensitive to changes in interest rates than securities with shorter durations, usually making them more volatile. Because the Fund will normally have a dollar-weighted average duration of approximately one and a half years (including the effects of anticipated leverage), the Common Shares' net asset value and market price per Share will tend to fluctuate more in response to changes in market interest rates than if the Fund invested mainly in short-term debt securities and less than if the Fund invested mainly in longer-term debt securities. The Fund may utilize certain strategies, including taking positions in futures or interest rate swaps, for the purpose of reducing the interest rate sensitivity of the portfolio and decreasing the Fund's exposure to interest rate risk, although there is no assurance that it will do so or that such strategies will be successful. The Fund is intended to have a relatively low level of interest rate risk.

LIQUIDITY RISK. The Fund may invest without limitation in securities for which there is no readily available trading market or which are otherwise illiquid, including many Senior Loans. The Fund may not be able to readily dispose of such securities at prices that approximate those at which the Fund could sell such securities if they were more widely traded and, as a result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. In addition, the limited liquidity could affect the market price of the debt securities, thereby adversely affecting the Fund's net asset value and ability to make dividend distributions.

REINVESTMENT RISK. Income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called debt obligations into lower yielding instruments. A decline in income could affect the Common Shares' distribution rate and their overall return.

INFLATION RISK. Inflation risk is the risk that the value of assets or income from investment will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions thereon can decline. In addition, during any periods of rising inflation, rebate rates on securities loans and interest rates in a borrowing program would likely increase, which would tend to further reduce returns to Common Shareholders. This risk is mitigated to some degree by the Fund's investments in Senior Loans.

MARKET PRICE OF SHARES. The shares of closed-end management investment companies often trade at a discount from their net asset value, and the Fund's Common Shares may likewise trade at a discount from net asset value. The trading price of the Fund's Common Shares may be less than the public offering price. This risk may be greater for investors who sell their Common Shares in a relatively short period after completion of the public offering.

MANAGEMENT RISK. The Fund is subject to management risk because it is an actively managed portfolio. Eaton Vance and the individual portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

MARKET DISRUPTION. The terrorist attacks in the United States on September 11, 2001 had a disruptive effect on the securities markets. The Fund cannot predict the effects of similar events in the future on the U.S. economy. These terrorist attacks and related events, including the war in Iraq, its aftermath, and continuing occupation of Iraq by coalition forces, have led to increased short-term market volatility and may have long-term effects on U.S. and world economies and markets. A similar disruption of the financial markets could impact interest rates, auctions, secondary trading, ratings, credit risk, inflation and other factors relating to the Common Shares. In particular Senior Loans tend to be more volatile than higher rated fixed income securities so that these events and any actions resulting

from them may have a greater impact on the prices and

9

volatility on Senior Loans than on higher rated fixed income securities.

ANTI-TAKEOVER PROVISIONS. The Fund's Agreement and Declaration of Trust includes provisions that could have the effect of limiting the ability of other persons or entities to acquire control of the Fund or to change the composition of its Board. See "Description of capital structure--Anti-takeover provisions in the Declaration of Trust."

10

SUMMARY OF FUND EXPENSES

The purpose of the table below is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. The following table assumes leverage in an amount equal to []% after preferred shares issuance of the Fund's total assets, and shows Fund expenses as a percentage of net assets attributable to Common Shares

| | |
|--|---------|
| Shareholder Transaction Expenses | |
| Maximum Sales Load (as a percentage of offering price) | % |
| Offering Expenses borne by the Fund..... | %(1) |
| Dividend Reinvestment Plan Fees..... | None(3) |

PERCENTAGE OF NET ASSETS
ATTRIBUTABLE
TO COMMON SHARES
(ASSUMING LEVERAGING) (4)

| | |
|--|---------|
| Annual Expenses | |
| Investment Advisory Fee..... | % |
| Other Expenses..... | %(5) |
| Total Annual Expenses..... | % |
| Fee and Expense Reimbursements (years 1-5).... | ()%(6) |
| Net Annual Expenses (years 1-5)..... | %(6) |

-
- (1) Eaton Vance or an affiliate has agreed to reimburse all organizational costs and pay all offering costs (other than sales load) that exceed \$0.04 per Common Share (% of the offering price).
 - (2) You will be charged a \$5.00 service charge and pay brokerage charges if you direct the plan agent to sell your Common Shares held in a dividend reinvestment account.
 - (3) Stated as percentages of net assets attributable to Common Shares assuming no leverage, the Fund's expenses would be estimated to be as follows:

PERCENTAGE OF NET ASSETS
ATTRIBUTABLE
TO COMMON SHARES
(ASSUMING NO LEVERAGE)

Annual expenses

| | |
|---|------------|
| Investment advisory fee..... | % |
| Other expenses..... | %(5) |
| Total annual expenses..... | % |
| Fee and expense reimbursements (years 1-5)... | (____)%(6) |
| Net annual expenses (years 1-5)..... | %(6) |
| | === |

- (4) Estimated expenses based on the current fiscal year.
- (5) Eaton Vance has contractually agreed to reimburse the Fund for fees and other expenses in the amount of % of average daily total assets of the Fund for the first 5 full years of the Fund's operations, % of average daily total assets of the Fund in year 6, % in year 7 and % in year 8. For this purpose, total assets (and gross assets in "Management of the Fund--The Adviser") shall be calculated by deducting accrued liabilities of the Fund not including the principal amount of any indebtedness for money borrowed or the value of securities lending collateral received by the Fund. Without the reimbursement, net annual expenses would be estimated to be % of average daily net assets (or, assuming borrowings, % of average daily net assets) attributable to Common Shares. Eaton Vance may voluntarily reimburse additional fees and expenses but is under no obligation to do so. Any such voluntary reimbursements may be terminated at any time.

The expenses shown in the table are based on estimated amounts for the Fund's first year of operations and assume that the Fund issues approximately Common Shares. See "Management of the Fund" and "Dividend reinvestment plan."

EXAMPLE

The following Example illustrates the expenses that you would pay on a \$1,000 investment in Common Shares (including the sales load of \$, estimated offering expenses of this offering of \$), assuming (1) total net annual expenses of % of net assets attributable to Common Shares in years 1 through 5 increasing to % in years 9 and 10 and (2) a 5% annual return(1):

| | | | |
|--------|---------|---------|-------------|
| 1 YEAR | 3 YEARS | 5 YEARS | 10 YEARS(2) |
| \$ | \$ | \$ | \$ |

THE EXAMPLE SHOULD NOT BE CONSIDERED A REPRESENTATION OF FUTURE EXPENSES. ACTUAL EXPENSES MAY BE HIGHER OR LOWER.

- (1) The example assumes that the estimated Other expenses set forth in the Annual expenses table are accurate, that fees and expenses increase as described in note 2 below and that all dividends and distributions are reinvested at net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.
- (2) Assumes reimbursement of fees and expenses of % of average daily total assets of the Fund in year 6, % in year 7 and % in year 8 and no reimbursement of fees or expenses in years 9 and 10. Eaton Vance has not agreed to reimburse the Fund for any portion of its fees and expenses beyond 2014.

THE FUND

The Fund is a newly organized, diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Massachusetts business trust on April 15, 2004 pursuant to a Declaration of Trust governed by the laws of The Commonwealth of Massachusetts and has no operating history. The Fund's principal office is located at The Eaton Vance Building, 255 State Street, Boston, Massachusetts 02109 and its telephone number is 1-800-225-6265.

This Prospectus relates to the initial public offering of the Fund's common shares of beneficial interest, \$0.01 par value (the "Common Shares"). See "Underwriting."

USE OF PROCEEDS

The net proceeds of this offering of Common Shares will be approximately \$[] (or \$[] assuming exercise of the Underwriters' over-allotment option in full), which, after payment of the estimated offering expenses, will be invested IN accordance with the Fund's investment objectives and policies as soon as practicable, but, in no event, under normal market conditions, later than three months after the receipt thereof. Pending such investment, the proceeds may be invested in high-quality, short-term debt securities. Eaton Vance or an affiliate has agreed to (i) reimburse all organizational costs and (ii) pay all offering costs of the Fund (other than sales loads) that exceed \$[] per Share.

INVESTMENT OBJECTIVES, POLICIES AND RISKS

INVESTMENT OBJECTIVES

The Fund's investment objective is to provide a high level of current income. The Fund may, as a secondary objective, also seek capital appreciation to the extent consistent with its primary goal of high current income. The Fund pursues its objectives by investing its assets primarily in three distinct investment categories: 1) senior, secured floating rate loans made to corporate and other business entities ("Senior Loans"); 2) deposits of banks in foreign denominated currencies, short term debt obligations of foreign governmental issuers, as well as positions in foreign currencies and bonds and other debt obligations of foreign government, government agency and corporate issuers, including emerging market issuers, which are denominated in foreign currencies or U.S. dollars ("Foreign Obligations"); and 3) mortgage-backed securities that are issued, backed or otherwise guaranteed by the U.S. Government or its agencies or instrumentalities or that are issued by private issuers ("MBS"). Senior Loans in which the Fund invests are typically of below "investment grade" quality ("Non-Investment Grade Securities"), as may be certain Foreign Obligations in which the Fund invests. Non-Investment Grade Securities, commonly referred to as "junk" securities, are debt obligations that are rated below investment grade by each of the national rating agencies who cover the security, or, if unrated, are determined to be of comparable quality by the Adviser. Standard & Poor's Ratings Group ("S&P") and Fitch Ratings ("Fitch") consider securities rated below BBB- to be below investment grade and Moody's Investors Service, Inc. ("Moody's") considers securities rated below Baa3 to be below investment grade. In addition to holding securities, the Fund may also obtain investment exposure to each of these three categories through the use of long or short derivative instruments. The Adviser has broad discretion to allocate the Fund's assets among these investment categories subject to the following guidelines. Under normal market circumstances, at least 80% of the Fund's gross assets will be invested in these categories collectively, including through the use of derivatives; and the Fund's exposure to each of these categories will equal at least 25% of the

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

Fund's net assets.

PRIMARY INVESTMENT POLICIES

GENERAL COMPOSITION OF THE FUND

A team of Eaton Vance investment professionals is responsible for the overall management of the Fund's investments as well as allocations between the Fund's three principal investment categories. Individual members of this team with specialized expertise are responsible for the day-to-day portfolio management within each of the Fund's three main investment categories. The Fund's investments are actively managed, and securities may be bought or sold on a daily basis. The Adviser attempts to manage yield through timely trading.

13

Under normal market conditions, the Adviser expects to maintain a duration of no more than three years (including the effect of anticipated leverage). Initially, the Fund is expected to have a duration of approximately two years (including the effect of anticipated leverage). This duration policy may only be changed following provision of 60 days' prior written notice to Common Shareholders. In comparison to maturity (which is the date on which a debt instrument ceases and the issuer is obligated to repay the principal amount), duration is a measure of the price volatility of a debt instrument as a result in changes in market rates of interest, based on the weighted average timing of the instrument's expected principal and interest payments. Duration differs from maturity in that it considers a security's yield, coupon payments, principal payments and call features in addition to the amount of time until the security finally matures. As the value of a security changes over time, so will its duration. Prices of securities with longer durations tend to be more sensitive to interest rate changes than securities with shorter durations. In general, a portfolio of securities with a longer duration can be expected to be more sensitive to interest rate changes than a portfolio with a shorter duration.

The Adviser's staff monitors the credit quality and the price of securities held by the Fund, as well as other securities that are available to the Fund. Under normal market conditions, the Fund will invest significantly in MBS that are expected to be of the highest quality (generally AAA as determined by S&P or Fitch, Aaa as determined by Moody's, or, if unrated determined to be of comparable quality by the Adviser) and significantly in Senior Loans (which are typically below investment grade quality) and certain Foreign Obligations that may be of below investment grade quality. Under normal market conditions, the Fund will structure and seek to maintain its portfolio of high quality MBS and certain high quality foreign debt obligations and lower quality Senior Loans (and any lower-quality foreign debt obligations) in such a manner so that the Fund has an average dollar weighted portfolio quality of investment grade (which is BBB- as determined by S&P or Fitch, or Baa as determined by Moody's, or, if unrated determined to be of comparable quality by the Adviser). Within this general guideline, the Fund may invest in securities of any credit quality. In order to maintain compliance with this policy, the Fund's holdings of Senior Loans and Foreign Obligations of below investment grade quality generally will be offset by investments in MBS of the highest quality and certain high quality Foreign Obligations. The extremely high credit quality of the MBS (and potentially certain Foreign Obligations) will substantially raise the average portfolio credit quality on a dollar-weighted basis. For purposes of the Fund's policy on credit quality, when a security is rated by more than one of these rating agencies, the Adviser generally will use the highest rating. The Fund will monitor and adjust its portfolio on an ongoing basis in order to remain in compliance with this credit quality policy.

A "barbell" portfolio, such as the Fund, that achieves a weighted average

investment grade credit quality by investing substantially in below investment grade securities and very high quality securities involves certain risk characteristics that differ from fixed income securities with credit ratings equivalent to the portfolio average or from a portfolio of similar average quality consisting mostly of securities of a quality near this average. Most notably, the Fund's portfolio will contain a higher percentage of assets of lower quality that each individually involve a higher degree of credit risk and may be considered to be speculative in nature. For a description of these risk characteristics, see "Investment objectives, policies and risks -- "Primary Investment Policies -- Non-investment Grade Securities.

Although the Adviser considers ratings when making investment decisions, it performs its own credit and investment analysis and does not rely primarily on the ratings assigned by the rating services. In evaluating the quality of a particular security, whether rated or unrated, the Adviser will normally take into consideration, among other things, the issuer's financial resources and operating history, its sensitivity to economic conditions and trends, the ability of its management, its debt maturity schedules and borrowing requirements, and relative values based on anticipated cash flow, interest and asset coverage, and earnings prospects. The Adviser will attempt to reduce the risks of investing in lower rated or unrated debt instruments through active portfolio management, credit analysis and attention to current developments and trends in the economy and the financial markets. When purchasing and selling MBS, the Adviser focuses on the expected principal payments on an MBS as well as current and anticipated market conditions.

Subject to its obligation on a portfolio wide basis to remain in ongoing compliance with the weighted average portfolio credit policy discussed above, the Fund is not required to dispose of a security in the event that a Rating Agency downgrades its assessment of the credit characteristics of a particular issue or withdraws its assessment, including in the event of a default. In determining whether to retain or sell such a security, Eaton Vance may consider such factors as Eaton Vance's assessment of the credit quality of the issuers of such security, the price at which such security could be sold and the rating, if any, assigned to such security by other Rating Agencies.

As stated above, the Fund will normally have substantial exposure to Foreign Obligations. The Adviser believes that a portfolio of carefully selected Foreign Obligations may earn attractive rates of return relative to U.S. instruments of comparable duration and credit quality. In current market circumstances, the Adviser believes that desired exposures to prevailing interest rates in certain foreign countries may best be obtained through forward foreign currency contracts with respect to such countries' currencies. The Adviser believes that this approach reduces the credit risk associated with investment in the debt of foreign sovereign and corporate issuers. In addition, utilizing forward foreign currency contracts reduces the transaction costs of obtaining this exposure as compared to investment in foreign debt obligations. Through its investments in

14

non-dollar denominated Foreign Obligations, the Fund may have substantial exposure to fluctuations in the values of foreign currencies.

The Fund's investments may have significant exposure to certain sectors of the economy and thus may react differently to political or economic developments than the market as a whole.

SENIOR LOANS

Senior Loans hold the most senior position in the capital structure of a business entity (the "Borrower"), are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to

that held by subordinated debt holders and stockholders of the Borrower. The proceeds of Senior Loans primarily are used to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, refinancings, dividends and to finance internal growth and for other corporate purposes. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium or credit spread. These base lending rates are primarily the London-Interbank Offered Rate ("LIBOR"), and secondarily the prime rate offered by one or more major United States banks (the "Prime Rate") and the certificate of deposit ("CD") rate or other base lending rates used by commercial lenders. The Senior Loans held by the Fund will have a dollar-weighted average period until the next interest rate adjustment of approximately 90 days or less. In the experience of the Adviser over the last decade, because of prepayments the average life of Senior Loans has been two to four years.

The Fund may also purchase unsecured loans, other floating rate debt securities such as notes, bonds and asset-backed securities (such as special purpose trusts investing in bank loans), credit-linked notes, synthetic lease financings, tranches of collateralized loan obligations, investment grade fixed income debt obligations and money market instruments, such as commercial paper.

Senior Loans and other floating-rate debt instruments are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the net asset value of the Fund. There can be no assurance that the liquidation of any collateral securing a loan would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated. In the event of bankruptcy of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a Senior Loan. The collateral securing a Senior Loan may lose all or substantially all of its value in the event of bankruptcy of a Borrower. Some Senior Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such Senior Loans to presently existing or future indebtedness of the Borrower or take other action detrimental to the holders of Senior Loans including, in certain circumstances, invalidating such Senior Loans or causing interest previously paid to be refunded to the Borrower. If interest were required to be refunded, it could negatively affect the Fund's performance.

Many Senior Loans in which the Fund will invest may not be rated by a Rating Agency, will not be registered with the Securities and Exchange Commission or any state securities commission and will not be listed on any national securities exchange. The amount of public information available with respect to Senior Loans will generally be less extensive than that available for registered or exchange listed securities. In evaluating the creditworthiness of Borrowers, the Adviser will consider, and may rely in part, on analyses performed by others. Borrowers may have outstanding debt obligations that are rated below investment grade by a Rating Agency. Many of the Senior Loans in the Fund will have been assigned ratings typically below investment grade by independent rating agencies. In the event Senior Loans are not rated, they are likely to be the equivalent of below investment grade quality. Because of the protective features of Senior Loans, the Adviser believes that Senior Loans tend to have more favorable loss recovery rates as compared to more junior types of below investment grade debt obligations. The Adviser does not view ratings as the determinative factor in its investment decisions and relies more upon its credit analysis abilities than upon ratings.

No active trading market may exist for some loans and some loans may be subject to restrictions on resale. A secondary market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods, which may impair the ability to realize full value and thus cause a material

decline in the Fund's net asset value. During periods of limited supply and liquidity of Senior Loans, the Fund's yield may be lower.

When interest rates decline, the value of a fund invested in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a fund invested in fixed-rate obligations can be expected to decline. Although changes in prevailing interest rates can be expected to cause some fluctuations in the value of Senior Loans (due to the fact that floating rates on Senior Loans only reset periodically), the value of Senior Loans is substantially less sensitive to changes in market interest rates than fixed-rate instruments. As a result, the Adviser expects the Fund's policy of investing a portion of its assets in floating-rate Senior Loans will make the Fund less volatile and less sensitive to changes in market interest rates than if the Fund invested exclusively in fixed-rate obligations. Similarly, a sudden and significant increase in market interest rates may cause a decline in the value

15

of these investments and in the Fund's net asset value. Other factors (including, but not limited to, rating downgrades, credit deterioration, a large downward movement in stock prices, a disparity in supply and demand of certain securities or market conditions that reduce liquidity) can reduce the value of Senior Loans and other debt obligations, impairing the Fund's net asset value.

The Fund may purchase and retain in its portfolio a Senior Loan where the Borrower has experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy reorganization proceedings or other forms of debt restructuring. Such investments may provide opportunities for enhanced income as well as capital appreciation. At times, in connection with the restructuring of a Senior Loan either outside of bankruptcy court or in the context of bankruptcy court proceedings, the Fund may determine or be required to accept equity securities or junior debt securities in exchange for all or a portion of a Senior Loan.

SENIOR LOAN ASSIGNMENTS AND PARTICIPATIONS. The Fund expects to primarily purchase Senior Loans by assignment from a participant in the original syndicate of lenders or from subsequent assignees of such interests. The Fund may also purchase participations in the original syndicate making Senior Loans. Loan participations typically represent direct participations in a loan to a corporate borrower, and generally are offered by banks or other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing loan participations, the Fund assumes the credit risk associated with the corporate borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The participation interests in which the Fund intends to invest may not be rated by any nationally recognized rating service. Given the current structure of the markets for loan participations and assignments, the Fund expects to treat these securities as illiquid.

SENIOR LOAN VALUATION. The Adviser uses an independent pricing service to value most loans and other debt securities at their market value. The Adviser may use the fair value method to value loans or other securities if market quotations for them are not readily available or are deemed unreliable, or if events occurring after the close of a securities market and before the Fund values its assets would materially affect net asset value. Because foreign securities trade on days when the Common Shares are not priced, net asset value can change at a time when Common Shares cannot be redeemed.

SAMIS AND OTHER SENIOR LOAN BASED DERIVATIVES. As discussed above, the Fund may obtain exposure to senior of loans and baskets of senior loans through the use of derivative instruments. Such derivative instruments have recently become

increasingly available. The Adviser reserves the right to utilize these instruments and similar instruments that may be available in the future. The Fund currently intends to invest in a derivative instrument known as the Select Aggregate Market Index ("SAMI") which provides investors with exposure to a reference basket of Senior Loans. SAMIs are structured as floating rate instruments. SAMIs consists of a basket of credit default swaps whose underlying reference securities are baskets of senior secured loans. While investing in SAMIs will increase the universe of floating rate debt securities to which the Fund is exposed, such investments entail risks that are not typically associated with investments in other floating rate debt securities. The liquidity of the market for SAMIs will be subject to liquidity in the secured loan and credit derivatives markets. Investment in SAMIs involves many of the risks associated with investments in derivative instruments discussed generally below. The Fund may also be subject to the risk that the counterparty in a derivative transaction will default on its obligations. Derivative transactions, generally involve the risk of loss due to unanticipated adverse changes in securities prices, interest rates, the inability to close out a position, imperfect correlation between a position and the desired hedge, tax constraints on closing out positions; and portfolio management constraints on securities subject to such transactions. The potential loss on derivative instruments may be substantial relative to the initial investment therein.

FOREIGN OBLIGATIONS

The Adviser believes that a portfolio of carefully selected Foreign Obligations may earn attractive rates of return relative to U.S. instruments of comparable duration and credit quality. In current market circumstances, the Adviser believes that desired exposures to prevailing interest rates in certain foreign countries may best be obtained through forward foreign currency contracts with respect to such countries' currencies. The Adviser believes that this approach reduces the credit risk associated with investment in the debt of foreign sovereign and corporate issuers. In addition, utilizing forward foreign currency contracts reduces the transaction costs of obtaining this exposure as compared to investment in foreign debt obligations. Through its investments in non-dollar denominated Foreign Obligations, the Fund may have substantial exposure to fluctuations in the values of foreign currencies.

FOREIGN CURRENCIES. As stated above, the Fund may invest substantially in debt securities denominated in foreign currencies and in foreign currency forward

16

contracts and other currency related instruments. Accordingly, the Fund may have substantial exposure to fluctuations in the values of foreign currencies. The Adviser intends to select currencies for both long and short investment based upon such factors as a country's (i) economic and political structure, (ii) long run economic and productivity gain, (iii) fiscal and monetary policies, (iv) inflation and interest rates, (v) balance of payments and terms of trade, and (vi) other factors such as flow funds.

In making long or short currency investments, the Fund may buy or sell foreign currencies or may deal in forward foreign currency contracts, that is, agree to buy or sell a specified currency at a specified price and future date. In addition to obtaining long or short investment exposure to foreign currencies, the Fund may use forward contracts and other currency related investments for hedging, or for currency risk management. Currency risk management may include taking active currency positions relative to the Fund's securities portfolio.

Common Shares are denominated and sold on the [New York] Stock Exchange in U.S. dollars. Since the Fund may seek substantial exposure to foreign currencies, the

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

Fund will be affected by changes in foreign currency exchange rates (and exchange control regulations), which affect the value of investments in the Fund and the accrued income and appreciation or depreciation of the investments in U.S. dollars. Accordingly, the value of such assets in U. S. dollars may be affected favorably or unfavorably by fluctuations in currency rates and therefore the Fund is necessarily subject to foreign exchange risks.

The value of foreign assets as measured in U.S. dollars may be affected favorably or unfavorably by changes in foreign currency rates and exchange control regulations. Foreign currency exchange rates may fluctuate significantly over short periods of time. They generally are determined by the forces of supply and demand in the foreign exchange markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors. Currency exchange rates also can be affected unpredictably by intervention (or the failure to intervene) by U.S. or foreign governments or central banks, or by currency controls or political developments in the U.S. or abroad. Currencies in which the Fund invests or in which its portfolio assets are denominated may be devalued against the U.S. dollar, resulting in a loss to the Fund. In certain countries, the central bank manages the currency rate against a basket of one or more index currencies of other major countries. In some of these countries, the Fund may employ a strategy seeking to limit exposure to the index currencies while retaining exposure to the local currency. In such a situation, the Fund's strategy could fail if a country changes the announced or implied components of the index currencies against which the Fund has hedged its exposure.

Other risks involved in currency investments include the dependence on the Adviser's ability to predict movements in exchange rates and imperfect correlations between movements in exchange rates. Currency investments could be adversely affected by delays in, or a refusal to grant, repatriation of funds or conversions of certain currencies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and significant devaluation may occur subsequent to investments in these currencies by the Fund.

Forward foreign currency exchange contracts are individually negotiated and privately traded so they are dependent upon the creditworthiness of the counterparty. Certain currency related investments may be acquired in the "over-the-counter" or "interdealer" markets, where participants typically are not subject to credit evaluation and regulatory oversight as are members of "exchange based" markets. In the absence of a regulated market to facilitate settlement, the Fund is subject to the risk that a counterparty will not settle a transaction (such as a forward currency contract) in accordance with its terms and conditions because of a dispute over the terms of contract or because of a credit or liquidity problem. Moreover, certain Currency investments, that of emerging markets, may be highly volatile, and movement in these instruments may result in substantial loss to the Fund.

A portion of the Fund's currency related investments may be or become illiquid. This is a result of the small quantities in which some of these securities are issued and lower trading volumes in the securities markets and/or currencies of certain countries. If currency investments need to be liquidated quickly, the Fund could sustain significant transaction costs.

Currency transactions are subject to the risk of a number of complex political and economic factors applicable to the countries issuing the underlying currencies. Furthermore, unlike trading in most other types of instruments, there is no systematic reporting of last sale information with respect to the foreign currencies underlying the derivative currency transactions. As a result, available information may not be complete. In an over-the-counter trading environment, there are no daily price fluctuation limits. There may be no liquid secondary market to close out options purchased or written, or forward contracts entered into, until their exercise, expiration or maturity. There is also the

risk of default by, or the bankruptcy of, the financial institution serving as a counterparty.

The Fund may but is not obligated to engage in transactions to hedge against changes in foreign currencies, and will use such hedging techniques when the

17

Adviser deems appropriate. The Fund may enter into forward contracts or other currency related investments for hedging in several circumstances. First, when the Fund enters into a contract for the purchase or sale of a security denominated in a foreign currency, it may desire to "lock in" the U.S. dollar price of the security. By entering into a forward contract for the purchase or sale, for a fixed amount of dollars, of the amount of foreign currency involved in the underlying security transaction, the Fund will be able to protect itself against a possible loss resulting from an adverse change in the relationship between the U.S. dollar and the subject foreign currency during the period between the date on which the security is purchased or sold and the date on which payment is made or received.

Second, when the Investment Adviser believes that the currency of a particular foreign country may suffer a substantial decline against the U.S. dollar, it may enter into a forward contract to sell, for a fixed amount of dollars, the amount of foreign currency approximating the value of some or all of the Fund's portfolio securities denominated in such foreign currency. Maintaining a match between the forward contract amounts and the value of the securities involved will not generally be possible since the future value of such securities in foreign currencies will change as a consequence of market movements in the value of those securities between the date the forward contract is entered into and the date it matures.

Third, the Fund may engage in currency "cross hedging" when, in the opinion of, the historical relationship among foreign currencies suggests that the Fund may achieve the same protection for a foreign security at reduced cost through the use of a forward foreign currency contract relating to a currency other than the U.S. dollar or the foreign currency in which the security is denominated. By engaging in cross hedging transactions, the Fund assumes the risk of imperfect correlation between the subject currencies. These practices may present risks different from or in addition to the risks associated with investments in foreign currencies.

The Fund is not required to enter into such transactions with regard to its foreign currency-denominated securities and will not do so unless deemed appropriate by the Adviser. By entering into the above hedging transactions, the Fund may be required to forego the benefits of advantageous changes in the exchange rates.

The Fund may also enter into foreign currency forward contracts to give fixed income securities denominated in one currency (generally the U.S. dollar) the risk characteristics of similar securities denominated in another currency or for risk management or investment in a manner similar to the Fund's use of futures contracts and related options.

When the Fund uses currency instruments for investment and currency risk management, the foreign currency exposure of the Fund may differ substantially from the currencies in which the Fund's investment securities are denominated. The Fund may therefore be subject to the risk of adverse currency movements.

FOREIGN GOVERNMENT SECURITIES. Foreign government securities include securities issued or guaranteed by foreign governments (including political subdivisions) or their authorities, agencies or instrumentalities or by supra-national

agencies. Foreign government securities have different kinds of government support. For example, some foreign government securities are supported by the full faith and credit of a foreign national government or political subdivision and some are not. In the case of certain countries, foreign government securities may involve varying degrees of credit risk as a result of financial or political instability in such countries and the possible inability of the Fund to enforce its rights against the foreign government issuer.

Supra-national agencies are agencies whose member nations make capital contributions to support the agencies' activities, and include such entities as the International Bank for Reconstruction and Development (the World Bank), the Asian Development Bank, the European Coal and Steel Community and the Inter-American Development Bank.

Like other fixed income securities, foreign government securities are subject to market risk and their market values fluctuate as interest rates change. Thus, for example, the value of an investment in the Fund which holds foreign government securities may fall during times of rising interest rates. Yields on foreign government securities tend to be lower than those of corporate securities of comparable maturities.

In addition to investing directly in foreign government securities, the Fund may purchase certificates of accrual or similar instruments evidencing undivided ownership interests in interest payments or principal payments, or both, in foreign government securities. These certificates of accrual and similar instruments may be more volatile than other government securities.

FOREIGN SECURITIES GENERALLY. The Fund may have substantial exposure to foreign securities. Investment in foreign issuers or securities principally traded overseas may involve certain special risks due to foreign economic, political and legal developments, including favorable or unfavorable changes in currency exchange rates, exchange control regulations (including currency blockage), expropriation or nationalization of assets, imposition of withholding taxes on

18

dividend or interest payments, and possible difficulty in obtaining and enforcing judgments against foreign entities. Furthermore, issuers of foreign securities are subject to different, often less comprehensive, accounting, reporting and disclosure requirements than domestic issuers. The securities of some foreign governments and companies and foreign securities markets are less liquid and at times more volatile than comparable U.S. securities and securities markets. Foreign brokerage commissions and other fees are also generally higher than in the United States. The laws of some foreign countries may limit the Fund's ability to invest in securities of certain issuers located in these foreign countries. There are also special tax considerations which apply to securities of foreign issuers and securities principally traded overseas. Investors should also be aware that under certain circumstances, markets which are perceived to have similar characteristics to troubled markets may be adversely affected whether or not similarities actually exist.

EMERGING MARKETS. The risks described above apply to an even greater extent to investments in emerging markets. The securities markets of emerging countries are generally smaller, less developed, less liquid, and more volatile than the securities markets of the U.S. and developed foreign markets. Disclosure and regulatory standards in many respects are less stringent than in the U.S. and developed foreign markets. There also may be a lower level of monitoring and regulation of securities markets in emerging market countries and the activities of investors in such markets, and enforcement of existing regulations has been extremely limited. Many emerging countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and

rapid fluctuations in inflation rates have had and may continue to have very negative effects on the economies and securities markets of certain emerging countries. Economies in emerging markets generally are heavily dependent upon international trade and, accordingly, have been and may continue to be affected adversely by trade barriers, exchange controls, managed adjustments in relative currency values, and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be adversely affected by economic conditions in the countries in which they trade. The economies of countries with emerging markets may also be predominantly based on only a few industries or dependent on revenues from particular commodities. In addition, custodial services and other costs relating to investment in foreign markets may be more expensive in emerging markets than in many developed foreign markets, which could reduce the Fund's income from such securities. Finally, because publicly traded debt instruments of emerging markets represent a relatively recent innovation in the world debt markets, there is little historical data or related market experience concerning the attributes of such instruments under all economic, market and political conditions.

In many cases, governments of emerging countries continue to exercise significant control over their economies, and government actions relative to the economy, as well as economic developments generally, may affect the capacity of issuers of emerging country debt instruments to make payments on their debt obligations, regardless of their financial condition. In addition, there is a heightened possibility of expropriation or confiscatory taxation, imposition of withholding taxes on interest payments, or other similar developments that could affect investments in those countries. There can be no assurance that adverse political changes will not cause the Fund to suffer a loss of any or all of its investments in such countries, or, in the case of fixed-income securities, interest thereon.

MORTGAGE-BACKED SECURITIES

The Fund typically invests in MBS that are backed by a guarantee of the U.S. Government (or one of its agencies or instrumentalities), although certain of these instruments may be privately issued. MBS represent participation interests in pools of fixed-rate, hybrid and adjustable-rate mortgage loans. Unlike conventional debt obligations, MBS provide monthly payments derived from the monthly interest and principal payments (including any prepayments) made by the individual borrowers on the pooled mortgage loans. [The Adviser expects that under current market conditions many of the MBS held by the Fund will be premium bonds acquired at prices that exceed their par or principal value.]

The mortgage loans underlying MBS are generally subject to a greater rate of principal prepayments in a declining interest rate environment and to a lesser rate of principal prepayments in an increasing interest rate environment. Under certain interest and prepayment rate scenarios, the Fund will fail to recover the full amount of investment in MBS purchased at a premium, notwithstanding any direct or indirect governmental or agency guarantee. Because faster than expected prepayments must usually be invested in lower yielding securities, MBS are less effective than conventional bonds in "locking in" a specified interest rate. Additionally, the value of Fund Common Shares may be adversely affected by fluctuations in interest rates underlying the MBS held by the Fund. In a rising interest rate environment, a declining prepayment rate will extend the average life of many MBS, which in turn would lengthen the duration of the Fund's portfolio. This possibility is often referred to as extension risk. Extending the average life of a mortgage-backed security increases the risk of depreciation due to future increases in market interest rates. MBS that are purchased at a premium generate current income that exceeds market rates for comparable investments but tend to decrease in value as they mature, which may cause a resulting decrease in the Fund's net asset value.

The Fund may also invest in classes of collateralized mortgage obligations ("CMOs") and various other MBS. In choosing among CMO classes, the Adviser will evaluate the total income potential of each class and other factors. See "Additional investment practices--Securitized interests."

Certain government agencies or instrumentalities, such as GNMA, FNMA and FHLMC provide a guarantee as to timely payment of principal and interest for MBS each entity issues but may or may not be backed by the full faith and credit of the U.S. Government.

SECURITIES LENDING

As discussed above, the Fund expects to utilize the reinvestment of securities lending collateral as a source of financial leverage. In this regard, the Fund may seek to earn income on securities loans by reinvesting cash collateral in any investments consistent with its investment objectives and policies, seeking to invest at rates that are higher than the "rebate" rate that it normally will pay to the borrower with respect to such cash collateral. Securities loans may result in delays in recovering, or a failure of the borrower to return, the loaned securities. The defaulting borrower ordinarily would be liable to the Fund for any losses resulting from such delays or failures, and the collateral provided in connection with the loan normally would also be available for that purpose. Securities loans normally may be terminated by either the Fund or the borrower at any time. Upon termination and the return of the loaned securities, the Fund would be required to return the related cash or securities collateral to the borrower and it may be required to liquidate longer term portfolio securities in order to do so. To the extent that such securities have decreased in value, this may result in the Fund realizing a loss at a time when it would not otherwise do so. The Fund also may incur losses if it is unable to reinvest cash collateral at rates higher than applicable rebate rates paid to borrowers and related administrative costs. These risks are substantially the same as those incurred through other forms of financial leverage, and will be subject to the investment policies, restrictions and risk considerations described in the Prospectus and in this Statement of Additional Information.

The Fund intends to manage its use of financial leverage through the reinvestment of securities lending collateral so that this arrangement will not be considered to create a "senior security" within the meaning of the Investment Company Act. In this regard, in accordance with guidelines established by the SEC, the Fund's custodian on a daily basis will segregate in the Fund's custody account liquid portfolio assets equal to the rebate value of any securities lending collateral that has been reinvested to create financial leverage. In addition, the SEC has established guidelines that restrict a registered investment company from loaning portfolio securities in excess of one third of its total assets. Accordingly, this restriction places a practical limit on the amount of financial leverage that may be obtained through reinvestment of securities lending collateral.

In addition to providing a source of financial leverage, the Fund may seek to earn income by lending portfolio securities to broker-dealers or other institutional borrowers. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the securities loaned if the borrower of the securities fails financially. In the judgment of the Adviser, the loans will be made only to organizations whose credit quality or claims paying ability is considered to be at least investment grade and when the expected returns, net of administrative expenses and any finders' fees, justifies the attendant risk. Loans will be made only to organizations whose credit quality or claims paying ability is considered by the Adviser to be at least

investment grade. All securities loans will be collateralized on a continuous basis by cash or U.S. government securities having a value, marked to market daily, of at least 100% of the market value of the loaned securities. The Fund may receive loan fees in connection with loans that are collateralized by securities or on loans of securities for which there is special demand.

The Fund will receive amounts equivalent to any interest or other distributions paid on securities while they are on loan, and the Fund will not be entitled to exercise any voting or other beneficial rights on loaned securities. The Fund will exercise its right to terminate loans and thereby regain these rights whenever the Adviser considers it to be in the Fund's interest to do so, taking into account the related loss of reinvestment income and other factors.

ADDITIONAL INVESTMENT PRACTICES

OTHER GOVERNMENT SECURITIES

U.S. Government securities include (1) U.S. Treasury obligations, which differ in their interest rates, maturities and times of issuance: U.S. Treasury bills (maturities of one year or less), U.S. Treasury notes (maturities of one year to ten years) and U.S. Treasury bonds (generally maturities of greater than ten years) and (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities which are supported by any of the following: (a) the full faith and credit of the U.S. Treasury, (b) the right of the issuer to borrow an

20

amount limited to a specific line of credit from the U.S. Treasury, (c) discretionary authority of the U.S. Government to purchase certain obligations of the U.S. Government agency or instrumentality or (d) the credit of the agency or instrumentality. The Fund may also invest in any other security or agreement collateralized or otherwise secured by U.S. Government securities. Agencies and instrumentalities of the U.S. Government include but are not limited to: Federal Land Banks, Federal Financing Banks, Banks for Cooperatives, Federal Intermediate Credit Banks, Farm Credit Banks, Federal Home Loan Banks, FHLMC, FNMA, GNMA, Student Loan Marketing Association, United States Postal Service, Small Business Administration, Tennessee Valley Authority and any other enterprise established or sponsored by the U.S. Government. Because the U.S. Government generally is not obligated to provide support to its instrumentalities, the Fund will invest in obligations issued by these instrumentalities only if the Adviser determines that the credit risk with respect to such obligations is minimal.

The principal of and/or interest on certain U.S. Government securities which may be purchased by the Fund could be (a) payable in foreign currencies rather than U.S. dollars or (b) increased or diminished as a result of changes in the value of the U.S. dollar relative to the value of foreign currencies. The value of such portfolio securities denominated in foreign currencies may be affected favorably by changes in the exchange rate between foreign currencies and the U.S. dollar.

SECURITIZED INTERESTS

The Fund may invest in certain asset-backed securities as discussed below. Asset-backed securities are payment claims that are securitized in the form of negotiable paper that is issued by a financing company (generically called a Special Purpose Vehicle or "SPV"). These securitized payment claims are, as a rule, corporate financial assets brought into a pool according to specific diversification rules. The SPV is a company founded solely for the purpose of securitizing these claims and its only asset is the risk arising out of this diversified asset pool. On this basis, marketable securities are issued which, due to the diversification of the underlying risk, generally represent a lower level of risk than the original assets. The redemption of the securities issued by the SPV takes place at maturity out of the cash flow generated by the

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

collected claims. Asset-backed securities may be issued by the U.S. government, its agencies or instrumentalities, or by non-governmental issuers.

CMOS. The CMO classes in which the Fund may invest include sequential and parallel pay CMOS, including planned amortization class and target amortization class securities. CMOS are debt securities issued by either the U.S. government (or one of its agencies or instrumentalities) or private issuers. The key feature of the CMO structure is the prioritization of the cash flows from a pool of mortgages among the several classes of CMO holders, thereby creating a series of obligations with varying rates and maturities appealing to a wide range of investors. CMOS generally are secured by an assignment to a trustee under the indenture pursuant to which the bonds are issued of collateral consisting of a pool of mortgages. Payments with respect to the underlying mortgages generally are made to the trustee under the indenture. CMOS are issued in two or more classes or series with varying maturities and stated rates of interest determined by the issuer. Senior CMO classes will typically have priority over residual CMO classes as to the receipt of principal and/or interest payments on the underlying mortgages. Because the interest and principal payments on the underlying mortgages are not passed through to holders of CMOS, CMOS of varying maturities may be secured by the same pool of mortgages, the payments on which are used to pay interest to each class and to retire successive maturities in sequence. CMOS are designed to be retired as the underlying mortgages are repaid. In the event of sufficient early prepayments on such mortgages, the class or series of CMO first to mature generally will be retired prior to maturity. Therefore, although in most cases the issuer of CMOS will not supply additional collateral in the event of such prepayments, there will be sufficient collateral to secure CMOS that remain outstanding. Currently, the Adviser will consider privately issued CMOS or other mortgage-backed securities as possible investments for the Fund only when the mortgage collateral is insured, guaranteed or otherwise backed by the U.S. Government or one or more of its agencies or instrumentalities (e.g., insured by the Federal Housing Administration or Farmers Home Administration or guaranteed by the Administrator of Veterans Affairs or consisting in whole or in part of U.S. Government securities).

COLLATERALIZED DEBT OBLIGATIONS ("CDOS"). The Fund may invest in CDOs. A CDO is a structured credit security issued by a special purpose entity that was created to reapportion the risk and return characteristics of a pool of assets. The assets, typically non-investment grade bonds, leveraged loans, and other asset-backed obligations, are used as collateral supporting the various debt and equity tranches issued by the special purpose entity. CDOs operate similarly to CMOS and CLOs and are subject to the same inherent risks.

COLLATERALIZED LOAN OBLIGATIONS ("CLOS"). A CLO is a type of CDO that invests primarily in leveraged loans as collateral underlying the obligations of the special purpose entity. CLOs operate similarly to CMOS and are subject to the same inherent risks.

SUB-PRIME MORTGAGES

Sub-prime mortgages are mortgages rated below "A" by S&P, Moody's or Fitch. Historically, sub-prime loans have been made to borrowers with blemished (or non-existent) credit records, and the borrower is charged a higher interest rate to compensate for the greater risk of delinquency and the higher costs of loan servicing and collection. Sub-prime mortgages are subject to both state and

federal anti-predatory lending statutes that carry potential liability to secondary market purchasers such as the Fund. A partial list of certain characteristics of sub-prime mortgages addressed by certain of these laws are: (1) late fees assessed for late mortgage payments; (2) loan flipping - typically

a lender-solicited refinancing of a relatively new mortgage that yields no "tangible" benefit for the borrower; (3) balloon payments that occur when a repayment schedule does not fully amortize the outstanding principal balance, leaving an unpaid principal amount when the loan reaches maturity; (4) repayment ability that requires the lender to document that the borrower's monthly loan payments will not exceed a stated percentage of gross monthly income; and (5) negative amortization (I.E., an increase in the amount of principal owed on a loan as payments are made). Individually, most of the above features are not necessarily predatory. Used appropriately and fairly disclosed by responsible lenders, these features can easily work in the borrower's favor. They become predatory when used to generate unnecessary fees or borrowers are misled about the implications they present. Sub-prime mortgages have certain characteristics and associated risks similar Non-Investment Grade Securities, including a higher degree of credit risk, and MBS, including prepayment risk. SEE INVESTMENT OBJECTIVE, POLICIES AND RISKS--ADDITIONAL RISK CONSIDERATIONS."

SECOND LIEN LOANS AND DEBT SECURITIES

The Fund may invest in loans and other debt securities that rank below Senior Loans and other non-securitized bank debt in liquidation and interest rate preferences within an issuer's debt structure but that are generally senior in such respects to Non-Investment Grade Securities and other forms of subordinated debt. Such "second tier" loans and securities like senior loans like many Senior Loans typically have adjustable floating rate interest payments. Because such investments are subordinate to Senior Loans and other forms of senior debt they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. Such investments [generally] are of below investment grade quality. Other than their subordinated status, such investments have many characteristics and risks similar to senior loans discussed above. In addition, because they are generally of below investment grade quality they also possess many of the risk characteristics of Non-Investment Grade Securities discussed above.

MORTGAGE ROLLS

The Fund may enter into mortgage "dollar rolls" in which the Fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (same type, coupon and maturity) securities on a specified future date. During the roll period, the Fund forgoes principal and interest paid on the mortgage-backed securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the "drop") as well as by the interest earned on the cash proceeds of the initial sales. A "covered roll" is a specific type of dollar roll for which there is an offsetting cash position or a cash equivalent security position which matures on or before the forward settlement date of the dollar roll transaction. The Fund will only enter into covered rolls. Covered rolls are not treated as a borrowing or other senior security and will be excluded from the calculation of the Fund's borrowings and other senior securities.

INDEXED SECURITIES AND DERIVATIVES

The Fund may also invest in indexed securities, also known as structured notes or derivatives based on indices or financial indicators. Indexed Securities are securities the redemption values and/or the coupons of which are indexed to the prices of a specific instrument or statistic. Indexed securities typically, but not always, are debt securities or deposits whose value at maturity or coupon rate is determined by reference to inflation, other securities, securities indices, currencies, or other financial indicators such as economic statistics and pre-payment rates, provided however each of these indices or financial indicators may also be used to invest through the use of derivative instruments. Inflation-indexed securities, for example, typically provide for a maturity value that depends on the rate of inflation, resulting in a security whose price tends to rise and fall together with the rate of inflation. Currency-indexed

securities typically are short-term to intermediate-term debt securities whose maturity values or interest rates are determined by reference to the values of one or more specified foreign currencies, and may offer higher yields than U.S. Dollar-denominated securities of equivalent issuers. Currency-indexed securities may be positively or negatively indexed; that is, their maturity value may increase when the specified currency value increases, resulting in a security that performs similarly to a foreign-denominated instrument, or their maturity value may decline when foreign currencies increase, resulting in a security whose price characteristics are similar to a put on the underlying currency. Currency-indexed securities may also have prices that depend on the values of a number of different foreign currencies relative to each other. The performance of indexed securities depends to a great extent on the rate of inflation or the performance of the security, currency, or other instrument to which they are indexed, and may also be influenced by interest rate changes in the U.S. and abroad. At the same time, indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline if the issuer's creditworthiness deteriorates. Recent issuers of indexed securities have included banks, corporations, and certain U.S. government agencies.

INFLATION-INDEXED SECURITIES: The Fund may invest in inflation indexed securities issued by the U.S. Treasury, by foreign governments or by corporate

22

entities, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation in the U.S. or another reference country. The interest rate on these bonds is fixed at issuance, but over the life of the bond this interest may be paid on an increasing or decreasing principal value which has been adjusted for inflation. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation indexed bonds, even during a period of deflation. However, the current market value of the bonds is not guaranteed, and will fluctuate. The Fund may also invest in other bonds which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

The value of inflation indexed bonds is expected to fluctuate in response to changes in real interest rates, which are in turn tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation indexed bonds.

The periodic adjustment of U.S. inflation indexed bonds is tied to the Consumer Price Index for Urban Consumers ("CPI-U"), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index, calculated by that government. No assurance can be given that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. In addition, no assurance can be given that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

Coupon payments received by the Fund from inflation indexed bonds will be includable in the Fund's gross income in the period in which they accrue. In addition, any increase in the principal amount of an inflation indexed bond will

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

be considered taxable ordinary income, even though investors do not receive their principal until maturity.

The Fund's investments in indexed securities, including inflation indexed securities, may create taxable income in excess of the cash they generate. In such cases, the Fund may be required to sell assets to generate the cash necessary to distribute as dividends to its Shareholders all of its income and gains and therefore to eliminate any tax liability at the Fund level.

CREDIT-LINKED NOTES

The Fund may invest in credit-linked notes ("CLN"). A CLN is a derivative instrument. It is a synthetic obligation between two or more parties where the payment of principal and/or interest is based on the performance of some obligation (a reference obligation). In addition to credit risk of the reference obligation and interest rate risk, the buyer/seller of the CLN is subject to counterparty risk.

COMMERCIAL PAPER

Commercial paper represents short-term unsecured promissory notes issued in bearer form by corporations such as banks or bank holding companies and finance companies. The rate of return on commercial paper may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

WHEN-ISSUED SECURITIES AND FORWARD COMMITMENTS

Securities may be purchased on a "forward commitment" or "when-issued" basis (meaning securities are purchased or sold with payment and delivery taking place in the future) in order to secure what is considered to be an advantageous price and yield at the time of entering into the transaction. However, the yield on a comparable security when the transaction is consummated may vary from the yield on the security at the time that the forward commitment or when-issued transaction was made. From the time of entering into the transaction until delivery and payment is made at a later date, the securities that are the subject of the transaction are subject to market fluctuations. In forward commitment or when-issued transactions, if the seller or buyer, as the case may be, fails to consummate the transaction the counterparty may miss the opportunity of obtaining a price or yield considered to be advantageous. Forward commitment or when-issued transactions may be expected to occur a month or more before delivery is due. However, no payment or delivery is made until payment is received or delivery is made from the other party to the transaction. Forward commitment or when-issued transactions are not entered into for the purpose of investment leverage.

ILLIQUID SECURITIES

The Fund may invest without limitation in securities for which there is no readily available trading market or are otherwise illiquid. Illiquid securities include securities legally restricted as to resale, such as commercial paper issued pursuant to Section 4(2) of the Securities Act of 1933, as amended, and

securities eligible for resale pursuant to Rule 144A thereunder. Section 4(2) and Rule 144A securities may, however, be treated as liquid by the Adviser pursuant to procedures adopted by the Board, which require consideration of factors such as trading activity, availability of market quotations and number of dealers willing to purchase the security. If the Fund invests in Rule 144A securities, the level of portfolio illiquidity may be increased to the extent that eligible buyers become uninterested in purchasing such securities.

It may be difficult to sell such securities at a price representing the fair value until such time as such securities may be sold publicly. Where

registration is required, a considerable period may elapse between a decision to sell the securities and the time when it would be permitted to sell. Thus, the Fund may not be able to obtain as favorable a price as that prevailing at the time of the decision to sell. The Fund may also acquire securities through private placements under which it may agree to contractual restrictions on the resale of such securities. Such restrictions might prevent their sale at a time when such sale would otherwise be desirable.

SWAPS

Swap contracts may be purchased or sold to obtain investment exposure and/or to hedge against fluctuations in securities prices, currencies, interest rates or market conditions, to change the duration of the overall portfolio, or to mitigate default risk. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) to be exchanged or "swapped" between the parties, which returns are calculated with respect to a "notional amount," I.E., the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a "basket" of securities representing a particular index.

INTEREST RATE SWAPS. The Fund will enter into interest rate and total return swaps only on a net basis, I.E., the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (E.G., an exchange of fixed rate payments for floating rate payments). The Fund will only enter into interest rate swaps on a net basis (I.E., the two payment streams are netted out with the Fund receiving or paying, as the case may be, only the net amount of the two payments). If the other party to an interest rate swap defaults, the Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive. The net amount of the excess, if any, of the Fund's obligations over its entitlements will be maintained in a segregated account by the Fund's custodian. The Fund will not enter into any interest rate swap unless the claims-paying ability of the other party thereto is considered to be investment grade by the Adviser. If there is a default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction. These instruments are traded in the over-the-counter market.

The Fund may use interest rate swaps for risk management purposes and as a speculative investment. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interests (E.G., an exchange of fixed rate payments for floating rate payments). The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If the Adviser is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would be unfavorably affected.

TOTAL RETURN SWAPS. As stated above, the Fund will enter into total return swaps only on a net basis. Total return swaps are contracts in which one party agrees to make payments of the total return from the underlying asset(s) which may include securities, baskets of securities, or securities indices during the specified period, in return for payments equal to a fixed or floating rate of interest or the total return from other underlying asset(s).

CURRENCY SWAPS. The Fund may enter into currency swap contracts and baskets thereof for risk management purposes and as a speculative investment. Currency swaps involve the exchange of the two parties' respective commitments to pay or receive fluctuations with respect to a notional amount of two different currencies (E.G., an exchange of payments with respect to fluctuations in the value of the U.S. dollar relative to the Japanese yen). The use of currency swaps is a highly specialized activity which involves investment techniques and

risks different from those associated with ordinary portfolio securities transactions. If the Adviser is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would be unfavorably affected.

CREDIT DEFAULT SWAPS. The Fund may enter into credit default swap contracts and baskets thereof for investment and risk management purposes, including diversification. When the Fund is the buyer of a credit default swap contract, the Fund is entitled to receive the par (or other agreed-upon) value of a referenced debt obligation from the counterparty to the contract in the event of a default by a third party, such as a U.S. or foreign corporate issuer, on the debt obligation. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would have spent the stream of payments and received no benefit from the contract. When the Fund is the seller of a credit default swap contract, it receives the stream of payments but is obligated to pay upon default of the referenced debt obligation. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. These transactions involve certain

24

risks, including the risk that the seller may be unable to fulfill the transaction.

FUTURES AND OPTIONS ON FUTURES

The Fund may purchase and sell various kinds of financial futures contracts and options thereon to obtain investment exposure and/or to seek to hedge against changes in interest rates or for other risk management purposes. Futures contracts may be based on various debt securities and securities indices (such as the Municipal Bond Index traded on the Chicago Board of Trade). Such transactions involve a risk of loss or depreciation due to unanticipated adverse changes in securities prices, which may exceed the fund's initial investment in these contracts. The Fund will only purchase or sell futures contracts or related options in compliance with the rules of the Commodity Futures Trading Commission. These transactions involve transaction costs. There can be no assurance that Eaton Vance's use of futures will be advantageous to the Fund. Financial covenants related to borrowings may limit use of these transactions.

BORROWINGS

The Fund may borrow money to the extent permitted under the 1940 Act as interpreted, modified or otherwise permitted by the regulatory authority having jurisdiction. The Fund may from time to time borrow money to add financial leverage to the portfolio, although it has no current intention to use borrowings for this purpose. The Fund may also borrow money for temporary administrative purposes.

The Fund currently expects that it will enter into definitive agreements with respect to a credit facility and/or a commercial paper program after the closing of the offer and sale of the Common Shares offered hereby. The Fund intends to arrange a senior revolving credit facility/commercial paper program pursuant to which the Fund expects to be entitled to borrow an amount up to between approximately % and % of the Fund's total assets as of the closing of the offer and sale of the Common Shares offered hereby. Any such borrowings would constitute financial leverage. The terms of any agreements relating to such a credit facility/commercial paper program have not been determined and are subject to definitive agreement and other conditions but the Fund anticipates that such a credit facility/commercial paper program would have terms substantially similar to the following: (i) a final maturity not expected to exceed three years subject to possible extension by the Fund; (ii) with respect

to each draw under the facility/program, an interest rate equal to the lesser of LIBOR plus a stated premium or an alternate rate on the outstanding amount of each such draw, reset over periods ranging from one to six months; and (iii) payment by the Fund of certain fees and expenses including an underwriting fee, a commitment fee on the average undrawn amount of the facility/program, an ongoing administration fee and the expenses of the lenders under the facility/program incurred in connection therewith; subject to the market conditions which may cause the cost to be more or less, the Fund currently expects that the aggregate annualized cost to the Fund over the life of the facility/program of the interest rate and fees referred to in clauses (ii) and (iii) will not exceed an amount equal to the stated principal amount of the facility/program times an amount equal to []. Individual draws on the facility/program may have maturities ranging from seven days to one year. The facility/program is not expected to be convertible into any other securities of the Fund, outstanding amounts are expected to be prepayable by the Fund prior to final maturity without significant penalty and there are not expected to be any sinking Fund or mandatory retirement provisions. Outstanding amounts would be payable at maturity or such earlier times as required by the agreement. The Fund may be required to prepay outstanding amounts under the facility/program or incur a penalty rate of interest in the event of the occurrence of certain events of default. The Fund expects to indemnify the lenders under the facility/program against liabilities they may incur in connection with the facility/program. In addition the Fund expects that such a credit facility/commercial paper program would contain covenants which, among other things, likely will limit the Fund's ability to pay dividends in certain circumstances, incur additional debt, change its fundamental investment policies and engage in certain transactions including mergers and consolidations, and may require asset coverage ratios in addition to those required by the 1940 Act. The Fund may be required to maintain a portion of its assets in cash or high-grade securities as a reserve against interest or principal payments and expenses. The Fund expects that any credit facility/commercial paper program would have customary covenant, negative covenant and default provisions. There can be no assurance that the Fund will enter into an agreement for a credit facility/commercial paper program on terms and conditions representative of the foregoing, or that additional material terms will not apply. In addition, if entered into, any such credit facility/paper program may in the future be replaced or refinanced by one or more credit facilities/commercial paper programs having substantially different terms or by the issuance of preferred shares or debt securities.

REVERSE REPURCHASE AGREEMENTS

The Fund may enter into reverse repurchase agreements. Under a reverse repurchase agreement, the Fund temporarily transfers possession of a portfolio instrument to another party, such as a bank or broker-dealer, in return for

25

cash. At the same time, the Fund agrees to repurchase the instrument at an agreed upon time (normally within seven days) and price, which reflects an interest payment. The Fund may enter into such agreements when it is able to invest the cash acquired at a rate higher than the cost of the agreement, which would increase earned income.

When the Fund enters into a reverse repurchase agreement, any fluctuations in the market value of either the securities transferred to another party or the securities in which the proceeds may be invested would affect the market value of the Fund's assets. As a result, such transactions may increase fluctuations in the market value of the Fund's assets. While there is a risk that large fluctuations in the market value of the Fund's assets could affect net asset value, this risk is not significantly increased by entering into reverse repurchase agreements, in the opinion of the Adviser. Because reverse repurchase

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

agreements may be considered to be the practical equivalent of borrowing funds, they constitute a form of leverage. Such agreements will be treated as subject to investment restrictions regarding "borrowings." If the Fund reinvests the proceeds of a reverse repurchase agreement at a rate lower than the cost of the agreement, entering into the agreement will lower the Fund's yield.

PORTFOLIO TURNOVER

The Fund cannot accurately predict its portfolio turnover rate, but the annual turnover rate may exceed 100% (excluding turnover of securities having a maturity of one year or less). A high turnover rate (100% or more) necessarily involves greater expenses to the Fund and may result in a realization of net short-term capital gains. The Fund may engage in active short-term trading to benefit from yield disparities among different issues of securities or among the markets for fixed income securities of different countries, to seek short-term profits during periods of fluctuating interest rates, or for other reasons. Such trading will increase the Fund's rate of turnover and may increase the incidence of net short-term capital gains which, upon distribution by the Fund, are taxable to Fund Common Shareholders as ordinary income.

USE OF LEVERAGE AND RELATED RISKS

The Fund expects to use financial leverage. The Fund expects initially to obtain financial leverage immediately after the completion of the offering of the Common Shares through derivative instruments, through the reinvestment of securities lending collateral, through borrowings and/or through the establishment of a commercial paper program. The Fund expects initially to have financial leverage of between approximately 30%-40% of its total managed assets. The Fund reserves the right in the future to adjust its use of these methods of leverage and/or to leverage exclusively through only one of these methods. In the future, the Adviser, in its sole discretion, may employ other forms of financial leverage, including the issuance of debt securities or preferred shares. The Fund also may borrow money as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions, which otherwise might require untimely dispositions of Fund securities. The Adviser anticipates that the use of leverage should result in higher total return to Common Shareholders over time.

Use of financial leverage creates an opportunity for increased return for Common Shareholders, but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of the Common Shares), and there can be no assurance that a leveraging strategy will be successful during any period in which it is employed. There is a risk that fluctuations in interest rates on borrowings may adversely affect the return to the holders of Common Shares. If the income from the securities purchased with such funds is not sufficient to cover the cost of leverage, the return on the Fund will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders as dividends and other distributions will be reduced. The Adviser in its best judgment nevertheless may determine to maintain the Fund's leveraged position if it deems such action to be appropriate in the circumstances.

Changes in the value of the Fund's portfolio (including investments bought with financial leverage) will be borne entirely by the Common Shareholders. If there is a net decrease (or increase) in the value of the Fund's investment portfolio, the leverage will decrease (or increase) the net asset value per share to a greater extent than if the Fund were not leveraged. During periods in which the Fund is using leverage, the fees paid to Eaton Vance for investment advisory services will be higher than if the Fund did not use leverage because the fees paid will be calculated on the basis of the Fund's average daily gross assets, including the notional value of all long and short foreign exposures created by forward foreign currency contracts or other derivatives on foreign exposures and other assets purchased with financial leverage, so the fees will be higher when

leverage is utilized. When there is a long and short position in the same foreign exposure with settlement dates within less than one year of each other they will be netted for purposes of determining gross assets.

See "Management of the Fund" for a detailed description of the calculation of the advisory fee.

In utilizing securities lending for financial leverage, the Fund will seek to earn income on securities loans by reinvesting cash collateral in securities consistent with its investment objectives and policies, seeking to invest at

26

rates that are higher than the "rebate" rate that it normally will pay to the borrower with respect to such cash collateral. Securities loans may result in delays in recovering, or a failure of the borrower to return, the loaned securities. The defaulting borrower ordinarily would be liable to the Fund for any losses resulting from such delays or failures, and the collateral provided in connection with the loan normally would also be available for that purpose. Securities loans normally may be terminated by either the Fund or the borrower at any time. Upon termination and the return of the loaned securities, the Fund would be required to return the related cash or securities collateral to the borrower and it may be required to liquidate longer term portfolio securities in order to do so. To the extent that such securities have decreased in value, this may result in the Fund realizing a loss at a time when it would not otherwise do so. The Fund also may incur losses if it is unable to reinvest cash collateral at rates higher than applicable rebate rates paid to borrowers and related administrative costs. These risks are substantially the same as those incurred through other forms of financial leverage.

The Fund intends to manage its use of financial leverage through the reinvestment of securities lending collateral and through derivatives so that these arrangements will not be considered to create a "senior security" within the meaning of the Investment Company Act. In this regard, in accordance with guidelines established by the SEC, the Fund's custodian on a daily basis will segregate in the Fund's custody account liquid portfolio assets equal to the then current 1) settlement value of the Fund's obligations under derivative instruments used to create leverage; and 2) rebate value of any securities lending collateral that has been reinvested to create financial leverage. In addition, the SEC has established guidelines that restrict a registered investment company from loaning portfolio securities in excess of one third of its total assets. Accordingly, this restriction places a practical limit on the amount of financial leverage that may be obtained through reinvestment of securities lending collateral.

Capital raised through forms of financial leverage other than the reinvestment of securities lending collateral will be subject to dividend or interest payments, which may exceed the income and appreciation on the assets purchased. The commencement of a borrowing or commercial paper program involves expenses and other costs and may limit the Fund's freedom to pay dividends on Common Shares or to engage in other activities. The incurrence of borrowings having priority over the Fund's Common Shares creates an opportunity for greater return per Common Share, but at the same time such leveraging is a speculative technique in that it will increase the Fund's exposure to capital risk. Unless the income and appreciation, if any, on assets acquired with leverage proceeds exceed the associated costs of borrowings and/or reinvestment of securities lending collateral (and other Fund expenses), the use of leverage will diminish the investment performance of the Fund's Common Shares compared with what it would have been without leverage.

Under the Investment Company Act, the Fund is not permitted to incur debt obligations, including borrowings, unless immediately after such issuance the

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

total asset value of the Fund's portfolio is at least 300% of the liquidation value of the outstanding debt (I.E., such liquidation value may not exceed 33 1/3% of the Fund's total assets). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the net asset value of the Fund's portfolio (determined after deducting the amount of such dividend or other distribution) is at least 300% of such liquidation value. When debt obligations are incurred, the Fund intends, to the extent possible, to retire such obligations, as necessary, to maintain coverage of any debt obligations of at least 300%.

In addition, borrowing/commercial paper program covenants and/or the terms of debt securities or preferred shares issued may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the Investment Company Act. The Fund would only utilize such additional methods of financial leverage if it anticipated that these asset coverage requirement, covenants or guidelines would not significantly impede Eaton Vance in managing the Fund's portfolio in accordance with its investment objectives and policies. See "Description of capital structure."

To qualify for federal income taxation as a "regulated investment company," the Fund must distribute in each taxable year at least 90% of its net investment income (including net interest income and net short-term gain). The Fund also will be required to distribute annually substantially all of its income and capital gain, if any, to avoid imposition of a nondeductible 4% federal excise tax. If the Fund is precluded from making distributions on the Common Shares because of any applicable asset coverage requirements, the terms of a borrowing facility may provide that any amounts so precluded from being distributed, but required to be distributed for the Fund to meet the distribution requirements for qualification as a regulated investment company, will be paid to the lenders. Such a payment can be expected to decrease the principal amount of debt owed to such lenders.

The Fund's willingness to utilize financial leverage for investment purposes, and the amount the Fund will use, will depend on many factors, the most important of which are market conditions and interest rates. Successful use of a leveraging strategy may depend on the Adviser's ability to predict correctly interest rates and market movements, and there is no assurance that a leveraging strategy will be successful during any period in which it is employed.

27

Assuming the utilization of financial leverage in the amount of []% of the Fund's gross assets and a blended interest/collateral rebate rate of []% payable on such financial leverage based on market rates as of the date of this Prospectus, the additional income that the Fund must earn (net of expenses) in order to cover such rebate payments is %. The Fund's actual cost of leverage will be based on market rates at the time the Fund undertakes a leveraging strategy, and such actual cost of leverage may be higher or lower than that assumed in the previous example.

The following table is designed to illustrate the effect on the return to a holder of the Fund's Common Shares of leverage in the amount of approximately []% of the Fund's gross assets, assuming hypothetical annual returns of the Fund's portfolio of minus 10% to plus 10%. As the table shows, leverage generally increases the return to Common Shareholders when portfolio return is positive and greater than the cost of leverage and decreases the return when the portfolio return is negative or less than the cost of leverage. The figures appearing in the table are hypothetical and actual returns may be greater or less than those appearing in the table.

Corresponding Common Share return assuming [%]
leverage..... ()% ()% ()% %

Until the Fund enters into derivative transactions involving leverage, reinvests securities lending collateral, and/or borrows through a credit facility and/or a commercial paper program, the Common Shares will not be leveraged, and the risks and special considerations related to leverage described in this Prospectus will not apply. Such leveraging of the Common Shares cannot be achieved until the securities lending collateral and borrowings have been invested in accordance with the Fund's investment objectives and policies and/or the Fund has entered into Currency Commitments.

Financial leverage achieved through the purchase of derivative instruments such as forward foreign currency contracts and reverse repurchase agreements exposes the Fund to special risks. See "Investment objectives, policies and risks--Additional Investment Practices" and "Investment objectives, policies and risks--Additional Risk Considerations."

ADDITIONAL RISK CONSIDERATIONS

NO OPERATING HISTORY

The Fund is a closed-end management investment company with no history of operations and is designed for long-term investors and not as a trading vehicle.

INCOME RISK

The income investors receive from the Fund is based primarily on the interest it earns from its investments, which can vary widely over the short and long-term. If prevailing market interest rates drop, investors' income from the Fund over time could drop as well. The Fund's income could also be affected already when prevailing short-term interest rates increase and the Fund is utilizing leverage, although this risk is mitigated by the Fund's investment in Senior Loans.

CREDIT RISK

Credit risk is the risk that one or more debt obligations in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the obligation experiences a decline in its financial status. For MBS, credit risk involves two types: delinquency and default. Delinquency refers to interruptions in the payment of interest and principal. Default refers to the potential for unrecoverable principal loss from the sale of foreclosed collateral or the Fund's inherent right to forgive principal or modify a debt instrument. For MBS, factors contributing to these risks include the effects of general and local economic conditions on home values, the financial conditions of homeowners, and other market factors. This risk is mitigated by a U.S. government agency's or instrumentality's guarantee of the underlying debt obligation. For corporate debt securities and Senior Loans, credit risk refers to default risk, which typically means the nonpayment of interest and/or principal when it is due.

PREPAYMENT RISK

During periods of declining interest rates or for other purposes, the borrowers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk. Non-Investment Grade Securities frequently have call features that allow the issuer to redeem the security at dates prior to its stated maturity at a specified price only if certain prescribed conditions are met ("call protection"). An issuer may redeem a Non-Investment Grade Security if, for example, the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. Senior Loans and MBS typically have no such call protection. For premium bonds and loans (bonds or loans acquired at prices that exceed their par or principal value) purchased by the Fund, prepayment risk may be enhanced.

ISSUER RISK

The value of corporate income-producing securities may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods and services.

SENIOR LOANS RISK

The risks associated with Senior Loans are similar to the risks of Non-Investment Grade Securities, although Senior Loans are typically senior and secured in contrast to other types of Non-Investment Grade Securities, which are often subordinated and unsecured. Senior Loans' higher standing has historically resulted in generally higher recoveries relative to those on unsecured, subordinate debt in the event of a corporate reorganization. In addition, because their interest rates are adjusted for changes in short-term interest rates, Senior Loans generally have less interest rate risk than other types of Non-Investment Grade Securities and foreign debt obligations, which are typically fixed rate. The Fund's investments in Senior Loans are typically below investment grade and are considered speculative because of the credit risk of their issuers. Such companies are more likely to default on their payments of interest and principal owed to the Fund, and such defaults could reduce the Fund's net asset value and income distributions. An economic downturn generally leads to a higher non-payment rate, and a debt obligation may lose significant value before a default occurs. Moreover, any specific collateral used to secure a loan may lose a portion or all of its value or become illiquid, which would adversely affect the loan's value.

Economic and other events (whether real or perceived) can reduce the demand for certain Senior Loans or Senior Loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted.

Loans and other debt securities are also subject to the risk of price declines and to increases in prevailing interest rates, although floating-rate debt instruments are substantially less exposed to this risk than fixed-rate debt instruments. Interest rate changes may also increase prepayments of debt obligations and require the Fund to invest assets at lower yields. No active trading market may exist for certain loans, which may impair the ability of the Fund to realize full value in the event of the need to liquidate such assets. Adverse market conditions may impair the liquidity of some actively traded loans.

CURRENCY RISK

Common Shares are denominated and sold on the [New York] Stock Exchange in U.S. dollars. Since the Fund may have substantial exposure to foreign currencies, the Fund will be affected by changes in foreign currency exchange rates (and exchange control regulations), which affect the value of investments in the Fund and the accrued income and appreciation or depreciation of the investments in U.S. dollars. Accordingly, the value of such assets in U. S. dollars may be affected favorably or unfavorably by fluctuations in currency rates and therefore the Fund is necessarily subject to foreign exchange risks.

Foreign currency exchange rates may fluctuate significantly over short periods of time. They generally are determined by the forces of supply and demand in the foreign exchange markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors. Currency exchange rates also can be affected unpredictably by intervention (or the failure to intervene) by U.S. or foreign governments or central banks, or by currency controls or political developments in the U.S. or abroad. Currencies in which the Fund holds long positions or in which portfolio

assets are denominated may depreciate against the U.S. dollar, resulting in a loss to the Fund. Currencies in which the Fund holds short positions may appreciate against the U.S. dollar, also resulting in a loss to the Fund. In certain countries, the central bank manages the currency rate against a basket of one or more index currencies of other major countries. In some of these countries, the Fund may employ a strategy seeking to limit exposure to the index currencies while retaining exposure to the local currency. In such a situation, the Fund's strategy could fail if a country changes the announced or implied components of the index currencies against which the Fund has hedged its exposure.

The Fund may buy or sell foreign currencies or may deal in forward foreign currency contracts, that is, agree to buy or sell a specified currency at a specified price and future date. The Fund may use forward contracts 1) for obtaining long or short investment exposures to foreign currencies, 2) for hedging, or 3) for currency risk management. Currency risk management may include taking active currency positions relative to the Fund's securities portfolio.

Other risks involved in currency investments include the dependence on the Adviser's ability to forecast movements in exchange rates and imperfect correlations between movements in exchange rates. Currency investments could be adversely affected by delays in, or a refusal to grant, repatriation of funds or conversions of certain currencies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and significant devaluation may occur subsequent to investments in these currencies by the Fund.

Certain currency related investments, including that of emerging market countries, may be highly volatile, and relatively small price movement in these instruments may result in substantial loss to the Fund.

29

Currency related investments may be acquired in the "over-the-counter" or "interdealer" markets, where participants typically are not subject to credit evaluation and regulatory oversight as are members of "exchange based" markets. In the absence of a regulated market to facilitate settlement, the Fund is subject to the risk that a counterparty will not settle a transaction (such as a forward currency contract) in accordance with its terms and conditions because of a dispute over the terms of contract or because of a credit or liquidity problem.

A portion of the Fund's currency investments may be or become illiquid. This is a result of the small quantities in which some of these securities are issued and lower trading volumes in the securities markets and/or currencies of certain countries. If currency investments need to be liquidated quickly, the Fund could sustain significant transaction costs.

FOREIGN SECURITY RISK

The Fund may have substantial exposure to foreign securities.

Foreign government securities include securities issued or guaranteed by foreign governments (including political subdivisions) or their authorities, agencies or instrumentalities or by supra-national agencies. Foreign government securities have different kinds of government support. For example, some foreign government securities are supported by the full faith and credit of a foreign national government or political subdivision and some are not. In the case of certain countries, foreign government securities may involve varying degrees of credit risk as a result of financial or political instability in such countries and the possible inability of the Fund to enforce its rights against the foreign government issuer. Like other fixed income securities, foreign government

securities are subject to market risk and their market values fluctuate as interest rates change. Thus, for example, the value of an investment in the Fund which holds foreign government securities may fall during times of rising interest rates. Yields on foreign government securities tend to be lower than those of corporate securities of comparable maturities.

Investment in foreign issuers or securities principally traded overseas may involve certain special risks due to foreign economic, political and legal developments, including favorable or unfavorable changes in currency exchange rates, exchange control regulations (including currency blockage), expropriation or nationalization of assets, imposition of withholding taxes on dividend or interest payments, and possible difficulty in obtaining and enforcing judgments against foreign entities. Furthermore, issuers of foreign securities are subject to different, often less comprehensive, accounting, reporting and disclosure requirements than domestic issuers. The securities of some foreign governments and companies and foreign securities markets are less liquid and at times more volatile than comparable U.S. securities and securities markets. Foreign brokerage commissions and other fees are also generally higher than in the United States. The laws of some foreign countries may limit the Fund's ability to invest in securities of certain issuers located in these foreign countries. There are also special tax considerations which apply to securities of foreign issuers and securities principally traded overseas. Investors should also be aware that under certain circumstances, markets which are perceived to have similar characteristics to troubled markets may be adversely affected whether or not similarities actually exist.

The risks described above apply to an even greater extent to investments in emerging markets. The securities markets of emerging countries are generally smaller, less developed, less liquid, and more volatile than the securities markets of the U.S. and developed foreign markets. Disclosure and regulatory standards in many respects are less stringent than in the U.S. and developed foreign markets. There also may be a lower level of monitoring and regulation of securities markets in emerging market countries and the activities of investors in such markets, and enforcement of existing regulations has been extremely limited. Many emerging countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue to have very negative effects on the economies and securities markets of certain emerging countries. Economies in emerging markets generally are heavily dependent upon international trade and, accordingly, have been and may continue to be affected adversely by trade barriers, exchange controls, managed adjustments in relative currency values, and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be adversely affected by economic conditions in the countries in which they trade. The economies of countries with emerging markets may also be predominantly based on only a few industries or dependent on revenues from particular commodities. In addition, custodial services and other costs relating to investment in foreign markets may be more expensive in emerging markets than in many developed foreign markets, which could reduce the Fund's income from such securities. Finally, because publicly traded debt instruments of emerging markets represent a relatively recent innovation in the world debt markets, there is little historical data or related market experience concerning the attributes of such instruments under all economic, market and political conditions.

In many cases, governments of emerging countries continue to exercise significant control over their economies, and government actions relative to the economy, as well as economic developments generally, may affect the capacity of

issuers of emerging country debt instruments to make payments on their debt

obligations, regardless of their financial condition. In addition, there is a heightened possibility of expropriation or confiscatory taxation, imposition of withholding taxes on interest payments, or other similar developments that could affect investments in those countries. There can be no assurance that adverse political changes will not cause the Fund to suffer a loss of any or all of its investments in such countries, or, in the case of fixed-income securities, interest thereon.

MORTGAGE-BACKED SECURITIES RISK

The value of Fund shares may be adversely affected by fluctuations in interest rates and the prepayment of the mortgage loans underlying the MBS held by the Fund. Mortgage loans are most likely to be prepaid in a declining interest rate environment. Prepayment may reduce the Fund's coupon distributions because the proceeds of a prepayment may be invested in lower-yielding securities. In a rising interest rate environment, a declining prepayment rate will extend the average life of many MBS which in turn would lengthen the duration of the Fund's portfolio. This possibility is often referred to as extension risk. Extending the average life of an MBS increases the risk of depreciation due to future increases in market interest rates. The value of Fund Common Shares can also be adversely affected by the existence of premiums on the price of MBS it acquires.

Certain government agencies or instrumentalities, such as GNMA, FNMA, and FHLMC, provide a guarantee as to timely payment of principal and interest for MBS each entity issues, backs or otherwise guarantees. Guarantees may not be backed by the full faith and credit of the U.S. government.

NON-INVESTMENT GRADE SECURITIES RISK

Most of the Fund's investments in Senior Loans are of below investment grade quality, as may be certain Foreign Obligations in which the Fund invests. Non-Investment Grade Securities are considered predominantly speculative because of the credit risk of their issuers. While offering a greater potential opportunity for capital appreciation and higher yields, Non-Investment Grade Securities typically entail greater potential price volatility and may be less liquid than higher-rated securities. Issuers of Non-Investment Grade Securities are more likely to default on their payments of interest and principal owed to the Fund, and such defaults will reduce the Fund's net asset value and income distributions. The prices of these lower rated obligations are more sensitive to negative developments than higher rated securities. Adverse business conditions, such as a decline in the issuer's revenues or an economic downturn, generally lead to a higher non-payment rate. In addition, a security may lose significant value before a default occurs as the market adjusts to expected higher non-payment rates.

DERIVATIVES RISK

Derivative transactions (such as forward contracts, futures contracts and options thereon, swaps and short sales) may subject the Fund to substantial loss of principle in relation to the Fund's investment amount. The Fund also will be subject to credit risk with respect to the counterparties to the derivatives contracts purchased by the Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

MANAGEMENT RISK

The Fund is subject to management risk because it is an actively managed portfolio. Eaton Vance and the individual portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

LIQUIDITY RISK

The Fund may invest without limitation in securities for which there is no readily available trading market or which are otherwise illiquid, including many Senior Loans. The Fund may not be able to readily dispose of such securities at prices that approximate those at which the Fund could sell such securities if they were more widely traded and, as a result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. In addition, the limited liquidity could affect the market price of the debt securities, thereby adversely affecting the Fund's net asset value and ability to make dividend distributions.

REINVESTMENT RISK

Income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called debt obligations into lower yielding instruments. A decline in income could affect the Common Shares' distribution rate and their overall return.

31

INFLATION RISK

Inflation risk is the risk that the value of assets or income from investment will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions thereon can decline. In addition, during any periods of rising inflation, rebate rates on securities loans and interest rates on borrowings would likely increase, which would tend to further reduce returns to Common Shareholders. This risk is mitigated to some degree by the Fund's investments in Senior Loans.

MARKET PRICE OF SHARES

The shares of closed-end management investment companies often trade at a discount from their net asset value, and the Fund's Common Shares may likewise trade at a discount from net asset value. The trading price of the Fund's Common Shares may be less than the public offering price. This risk may be greater for investors who sell their Common Shares in a relatively short period after completion of the public offering.

INTEREST RATE RISK

The value of Fund shares will usually change in response to interest rate fluctuations. When interest rates decline, the value of fixed-rate securities already held by the Fund can be expected to rise. Conversely, when interest rates rise, the value of existing fixed-rate portfolio securities can be expected to decline. Because market interest rates are currently near their lowest levels in many years, there is a greater than normal risk that the Fund's portfolio will decline in value due to rising interest rates. Fluctuations in the value of fixed-rate securities will not affect interest income on existing securities but will be reflected in the Fund's net asset value. Fixed-rate securities with longer durations tend to be more sensitive to changes in interest rates than securities with shorter durations, usually making them more volatile. Because the Fund will normally have a dollar-weighted average duration of between approximately one and a half years (including the effects of anticipated leverage), the Common Shares' net asset value and market price per Share will tend to fluctuate more in response to changes in market interest rates than if the Fund invested mainly in short-term debt securities and less than if the Fund invested mainly in longer-term debt securities. The Fund may utilize certain strategies, including taking positions in futures or interest rate swaps, for the purpose of reducing the interest rate sensitivity of the portfolio and decreasing the Fund's exposure to interest rate risk, although there is no assurance that it will do so or that such strategies will be successful. The Fund is intended to have a relatively low level of interest rate risk.

MARKET DISRUPTION

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

The terrorist attacks in the United States on September 11, 2001 had a disruptive effect on the securities markets. The Fund cannot predict the effects of similar events in the future on the U.S. economy. These terrorist attacks and related events, including the war in Iraq, its aftermath, and the continuing occupation of Iraq by coalition forces, have led to increased short-term market volatility and may have long-term effects on U.S. and world economies and markets. A similar disruption of the financial markets could impact interest rates, auctions, secondary trading, ratings, credit risk, inflation and other factors relating to the Common Shares. In particular, Senior Loans tend to be more volatile than higher rated fixed income securities so that these events and any actions resulting from them may have a greater impact on the prices and volatility on Senior Loans than on higher rated fixed income securities.

ANTI-TAKEOVER PROVISIONS

The Fund's Agreement and Declaration of Trust includes provisions that could have the effect of limiting the ability of other persons or entities to acquire control of the Fund or to change the composition of its Board. See "Description of capital structure--Anti-takeover provisions in the Declaration of Trust."

MANAGEMENT OF THE FUND

BOARD OF TRUSTEES

The management of the Fund, including general supervision of the duties performed by the Adviser under the Advisory Agreement (as defined below), is the responsibility of the Fund's Board under the laws of The Commonwealth of Massachusetts and the 1940 Act.

THE ADVISER

Eaton Vance acts as the Fund's investment adviser under an Investment Advisory Agreement (the "Advisory Agreement"). The Adviser's principal office is located at The Eaton Vance Building, 255 State Street, Boston, MA 02109. Eaton Vance, its affiliates and predecessor companies have been managing assets of

32

individuals and institutions since 1924 and of investment companies since 1931. Eaton Vance (or its affiliates) currently serves as the investment adviser to investment companies and various individual and institutional clients with combined assets under management of approximately \$[] billion as of October 31, 2004. Eaton Vance is an indirect, wholly-owned subsidiary of Eaton Vance Corp., a publicly-held holding company, which through its subsidiaries and affiliates engages primarily in investment management, administration and marketing activities.

Under the general supervision of the Fund's Board, the Adviser will carry out the investment and reinvestment of the assets of the Fund, will furnish continuously an investment program with respect to the Fund, will determine which securities should be purchased, sold or exchanged, and will implement such determinations. The Adviser will furnish to the Fund investment advice and office facilities, equipment and personnel for servicing the investments of the Fund. The Adviser will compensate all Trustees and officers of the Fund who are members of the Adviser's organization and who render investment services to the Fund, and will also compensate all other Adviser personnel who provide research and investment services to the Fund.

In return for these services, facilities and payments, the Fund has agreed to pay the Adviser as compensation under the Advisory Agreement a fee in the amount of []% of the average daily gross assets of the Fund, subject to the expense reimbursement agreement described below. Eaton Vance has contractually agreed to reimburse the Fund for fees and other expenses in the amount of []% of average

daily total assets of the Fund for the first [] full years of the Fund's operations, []% of average daily total assets of the Fund in year [], []% in year [] and []% in year []. Eaton Vance may voluntarily reimburse additional fees and expenses but is under no obligation to do so. Any such voluntary reimbursements may be terminated at any time. Gross assets of the Fund means total assets of the Fund, including the notional value of all long and short exposure to any currency or issue or securities created by forward foreign currency contracts or other derivatives on foreign exposures and other assets purchased with financial leverage, minus all accrued expenses incurred in the normal course of operations, but not excluding any liabilities or obligations attributable to any future investment leverage obtained through (i) indebtedness of any type (including, without limitation, borrowing through a credit facility/commercial paper program or the issuance debt securities), (ii) the issuance of preferred shares or other similar preference securities, (iii) the reinvestment of collateral received for securities loaned in accordance with the Fund's investment objectives and policies, and/or (iv) any other means. When there is a long and short position in the same foreign exposure, with settlement dates within one year of each other, they will be netted for purposes of determining gross assets. For example, if the Fund is long \$10 million Euro and short \$5 million Euro under forward the notional foreign currency exposure represented by these contracts for purposes of calculating gross assets would be \$5 million. During periods in which the Fund is using leverage, the fees paid to Eaton Vance for investment advisory services will be higher than if the Fund did not use leverage because the fees paid will be calculated on the basis of the Fund's gross assets, including leverage from derivatives investments, securities lending and the proceeds from any borrowings and from the issuance of preferred shares.

Mark Venezia, Susan Schiff, Christine Johnston, Scott H. Page, Payson F. Swaffield, Michael Weilheimer, and other Eaton Vance investment professionals comprise the investment team responsible for the overall management of the Fund's investments as well as allocations between the Fund's three principal investment categories. The following individual members of this team are responsible for the day-to-day management with each of the Fund's two main asset classes:

MBS. Ms. Schiff is responsible for the day-to-day management of the Fund's MBS strategy. Ms. Schiff, has been an Eaton Vance portfolio manager since 1991, and is a Vice President of Eaton Vance. Among other portfolios, she currently manages Eaton Vance Government Obligations Fund, a registered open-end fund, which employs an investment strategy primarily focused on MBS. In addition, Ms Schiff co-manages Eaton Vance Limited Duration Income Fund, a multi-sector closed-end income fund, which has MBS as one of its three principal investment categories. As of October 31, 2004, this fund had assets of \$[] billion.

SENIOR LOANS. Mr. Page and Mr. Swaffield are responsible for the day-to-day management of the Fund's Senior Loan strategy. Among other portfolios, Mr. Page and Mr. Swaffield have each been Eaton Vance portfolio managers since 1996, and are Vice Presidents of Eaton Vance. They currently co-manage Eaton Vance Prime Rate Reserves, a registered closed-end interval fund, Eaton Vance Classic Senior Floating-Rate Fund, a registered closed-end interval fund, Eaton Vance Floating-Rate Fund, a registered open-end fund, Eaton Vance Floating-Rate High Income Fund, a registered open-end fund, Eaton Vance Senior Income Trust, a registered closed-end fund listed on the New York Stock Exchange, and Eaton Vance Senior Floating-Rate Trust, a registered closed-end fund listed on the New York Stock Exchange, all of which employ investment strategies primarily focused on Senior Loans. In addition, Mssrs. Page and Swaffield co-manage Eaton Vance Limited Duration Income Fund, a multi-sector closed-end income fund, which has Senior Loans as one of its three principal investment categories. .As of October 31, 2004, these funds had combined assets of \$[] billion. See "Additional investment information and restrictions -- Litigation involving Eaton Vance" in the SAI for further information.

FOREIGN OBLIGATIONS. Mr. Venezia is responsible for the day-to-day management of the Fund's Foreign Obligations strategy. Mr. Venezia has been an Eaton Vance

33

portfolio manager since 1984, and is a Vice President of Eaton Vance. He currently manages the Eaton Vance Strategic Income Fund, a registered open-end fund, which invests in part in a strategy that utilizes currency and foreign debt securities. In addition, Mr. Venezia is head of Eaton Vance's Global Bond Department, which uses global economic and political analysis to search for debt securities and currency investment ideas.

The Fund and the Adviser have adopted a Code of Ethics relating to personal securities transactions. The Code of Ethics permits Adviser personnel to invest in securities (including securities that may be purchased or held by the Fund) for their own accounts, subject to certain pre-clearance, reporting and other restrictions and procedures contained in such Code of Ethics.

THE ADMINISTRATOR

Eaton Vance serves as administrator of the Fund but currently receives no compensation for providing administrative services to the Fund. Under an Administration Agreement with the Fund ("Administration Agreement"), Eaton Vance is responsible for managing the business affairs of the Fund, subject to the supervision of the Fund's Board. Eaton Vance will furnish to the Fund all office facilities, equipment and personnel for administering the affairs of the Fund. Eaton Vance's administrative services include record keeping, preparation and filing of documents required to comply with federal and state securities laws, supervising the activities of the Fund's custodian and transfer agent, providing assistance in connection with the Trustees' and shareholders' meetings, providing service in connection with any repurchase offers and other administrative services necessary to conduct the Fund's business.

DISTRIBUTIONS

Commencing with the Fund's first dividend, the Fund intends to make regular monthly cash distributions to Common Shareholders of substantially all net investment income of the Fund, after payment of interest on any outstanding borrowings. The amount of each monthly distribution will vary depending on a number of factors, including interest payable on debt or other costs of financial leverage. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could change. The Fund intends to include in certain of its distributions amounts attributable to the imputed interest represented by the difference between the foreign currency spot rate and foreign currency forward rate or the imputed interest derived from certain derivative transactions. In certain circumstances, this practice may result in a return of capital to Common Shareholders for federal income tax purposes as discussed below. The Board may modify this distribution policy at any time without obtaining the approval of Common Shareholders. The initial distribution is expected to be declared approximately 45 days and paid approximately 60 to 90 days after the completion of this offering, depending on market conditions. See "Distributions and taxes."

The investment income of the Fund will consist of all interest income accrued on portfolio investments, short-term capital gain (including short-term gains on terminated option positions and gains on the sale of portfolio investments held for one year or less) in excess of long-term capital loss and income from certain hedging transactions, less all expenses of the Fund. Expenses of the Fund will be accrued each day. Over time, all of the Fund's investment company taxable income will be distributed. In addition, at least annually, the Fund

intends to distribute any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss). To the extent that that Fund's net investment income and net capital gain for any year exceed the total monthly distributions paid during the year, the Fund will make a special distribution at or near year-end of such excess amount as may be required. If the Fund's total monthly distributions in any year exceed the amount of its net investment income and net capital gain for the year, any such excess would be characterized as a return of capital for federal income tax purposes. Under the 1940 Act, for any distribution that includes amounts from sources other than net income, the Fund is required to provide Common Shareholders a written statement regarding the components of such distribution.

If, for any calendar year, as discussed above, the total distributions made under the Fund's policy exceed the Fund's net investment taxable income and net capital gain, the excess will, for federal income tax purposes, be treated as a tax-free return of capital to each Common Shareholder (up to the amount of the Common Shareholder's basis in his or her Common Shares) and thereafter as gain from the sale of Common Shares. The amount treated as a tax-free return of capital will reduce the Common Shareholder's adjusted basis in his or her Common Shares, thereby increasing his or her potential gain or reducing his or her potential loss on the subsequent sale of his or her Common Shares. To the extent the Fund's distribution policy results in distributions in excess of its net investment taxable income and net capital gain, such distributions will decrease its total assets and increase its expense ratio to a greater extent than would have been the case if distributions were limited to these amounts. Distributions in any year may or may not include a substantial return of capital component.

The Fund has applied for an order from the SEC granting exemption from Section 19(b) of the Investment Company Act, and Rule 19b-1 thereunder to permit the

34

Fund to include realized long-term capital gains as a part of its regular distributions to Common Shareholders more frequently than would otherwise be permitted by the Investment Company Act. The Fund will not pursue this distribution policy until it receives such an exemptive order. There is no guarantee that the SEC will grant such exemptive relief. However, if the Fund fails to receive the requested relief and the Fund is unable to include realized capital gains in regular distributions more frequently than would otherwise be permitted by the Investment Company Act, the Adviser does not believe that the distribution policy, as set forth above, will otherwise be adversely affected.

Common Shareholders may elect automatically to reinvest some or all of their distributions in additional Common Shares under the Fund's dividend reinvestment plan. See "Dividend reinvestment plan."

FEDERAL INCOME TAX MATTERS

The following discussion of federal income tax matters is based on the advice of Kirkpatrick & Lockhart LLP, counsel to the Fund.

The Fund intends to make monthly distributions of net investment income after payment of interest on any outstanding borrowings. The Fund will distribute at least annually any net short-term capital gain (which are taxable as ordinary income) and any net capital gain. Distributions of the Fund's net capital gains ("capital gain dividends"), if any, are taxable to Common Shareholders as long-term capital gains, regardless of the length of time Common Shares have been held by Common Shareholders. Distributions, if any, in excess of the Fund's earnings and profits will first reduce the adjusted tax basis of a holder's Common Shares and, after that basis has been reduced to zero, will constitute capital gains to the Shareholder (assuming the Common Shares are held as a

capital asset). See below for a summary of the maximum tax rates applicable to capital gains (including capital gain dividends). Dividends will not qualify for a dividends received deduction generally available to corporate Common Shareholders.

The Fund will inform Common Shareholders of the source and tax status of all distributions promptly after the close of each calendar year.

Selling Common Shareholders will generally recognize gain or loss in an amount equal to the difference between the Shareholder's adjusted tax basis in the Common Shares sold and the amount received. If the Common Shares are held as a capital asset, the gain or loss will be a capital gain or loss. The maximum tax rate applicable to net capital gains recognized by individuals and other non-corporate taxpayers is (i) the same as the maximum ordinary income tax rate for gains recognized on the sale of capital assets held for one year or less, or (ii) 15% for gains recognized on the sale of capital assets held for more than one year (as well as certain capital gain dividends) (5% for individuals in the 10% or 15% tax brackets). Any loss on a disposition of Common Shares held for six months or less will be treated as a long-term capital loss to the extent of any capital gain dividends received with respect to those Common Shares. For purposes of determining whether Common Shares have been held for six months or less, the holding period is suspended for any periods during which the Shareholder's risk of loss is diminished as a result of holding one or more other positions in substantially similar or related property, or through certain options or short sales. Any loss realized on a sale or exchange of Common Shares will be disallowed to the extent those Common Shares are replaced by other Common Shares within a period of 61 days beginning 30 days before and ending 30 days after the date of disposition of the Common Shares (whether through the reinvestment of distributions, which could occur, for example, if the Shareholder is a participant in the Plan (as defined below) or otherwise). In that event, the basis of the replacement Common Shares will be adjusted to reflect the disallowed loss.

An investor should be aware that, if Common Shares are purchased shortly before the record date for any taxable dividend (including a capital gain dividend), the purchase price likely will reflect the value of the dividend and the investor then would receive a taxable distribution likely to reduce the trading value of such Common Shares, in effect resulting in a taxable return of some of the purchase price. Taxable distributions to individuals and certain other non-corporate Common Shareholders, including those who have not provided their correct taxpayer identification number and other required certifications, may be subject to "backup" federal income tax withholding at the fourth lowest rate of tax applicable to a single individual (in 2004, 30%).

The foregoing briefly summarizes some of the important federal income tax consequences to Common Shareholders of investing in Common Shares, reflects the federal tax law as of the date of this Prospectus, and does not address special tax rules applicable to certain types of investors, such as corporate and foreign investors. Investors should consult their tax advisors regarding other federal, state or local tax considerations that may be applicable in their particular circumstances, as well as any proposed tax law changes.

DIVIDEND REINVESTMENT PLAN

Pursuant to the Fund's dividend reinvestment plan (the "Plan"), a Common Shareholder may elect to have all distributions (including all capital gain dividends) automatically reinvested in Common Shares. Common Shareholders may elect to participate in the Plan by completing the dividend reinvestment plan application form. Common Shareholders electing not to participate in the Plan

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

will receive all distributions in cash paid by check mailed directly to them by PFPC Inc., as dividend paying agent.

PFPC Inc. (the "Plan Agent") serves as agent for the Common Shareholders in administering the Plan. Common Shareholders who elect not to participate in the Plan will receive all Fund distributions in cash paid by check mailed directly to the Common Shareholder of record (or if the Common Shares are held in street or other nominee name, then to the nominee) by PFPC Inc., as disbursing agent. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by written notice if received by the Plan Agent prior to any distribution record date.

Common Shares will be acquired by the Plan Agent or an independent broker-dealer for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional previously authorized but unissued Common Shares from the Fund ("newly issued Common Shares") or (ii) by purchase of outstanding Common Shares on the open market ("open-market purchases") on the New York Stock Exchange or elsewhere. If, on the payment date for the distribution, the net asset value per Common Share is equal to or less than the market price per Common Share plus estimated brokerage commissions (such condition being referred to herein as "market premium"), the Plan Agent will invest the distribution amount in newly issued Common Shares on behalf of the participants. The number of newly issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the distribution by the net asset value per Common Share on the date the Common Shares are issued, provided that the maximum discount from the then current market price per Common Share on the date of issuance may not exceed 5%. If on the distribution payment date the net asset value per Common Share is greater than the market value plus estimated brokerage commissions (such condition being referred to herein as "market discount"), the Plan Agent will invest the distribution amount in Common Shares acquired on behalf of the participants in open-market purchases.

In the event of a market discount on the distribution payment date, the Plan Agent will have up to 30 days after the distribution payment date to invest the distribution amount in Common Shares acquired in open-market purchases. If, before the Plan Agent has completed its open-market purchases, the market price of a Common Share exceeds the net asset value per Common Share, the average per Common Share purchase price paid by the Plan Agent may exceed the net asset value of the Fund's Common Shares, resulting in the acquisition of fewer Common Shares than if the distribution had been paid in newly issued Common Shares on the distribution payment date. Therefore, the Plan provides that if the Plan Agent is unable to invest the full distribution amount in open-market purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Agent will cease making open-market purchases and will invest the uninvested portion of the distribution amount in newly issued Common Shares.

The Plan Agent maintains all Common Shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by Common Shareholders for tax records. Common Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each Common Shareholder proxy will include those Common Shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for Common Shares held pursuant to the Plan in accordance with the instructions of the participants. In the case of Common Shareholders such as banks, brokers or nominees that hold Common Shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record Common Shareholder's name and held for the account of beneficial owners who participate in the Plan.

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

There will be no brokerage charges with respect to Common Shares issued directly by the Fund as a result of distributions payable either in Common Shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open-market purchases in connection with the reinvestment of distributions.

Common Shareholders participating in the Plan may receive benefits not available to Common Shareholders not participating in the Plan. If the market price (plus commissions) of the Fund's Common Shares is above their net asset value, participants in the Plan will receive Common Shares of the Fund at less than they could otherwise purchase them and will have Common Shares with a cash value greater than the value of any cash distribution they would have received on their Common Shares. If the market price plus commissions is below the net asset value, participants will receive distributions in Common Shares with a net asset value greater than the per Common Share value of any cash distribution they would have received on their Common Shares. However, there may be insufficient

36

Common Shares available in the market to make distributions in Common Shares at prices below the net asset value. Also, since the Fund does not redeem its Common Shares, the price on resale may be more or less than the net asset value.

Experience under the Plan may indicate that changes are desirable. Accordingly, upon 30 days' notice to Plan participants, the Fund reserves the right to amend or terminate the Plan. A Plan participant will be charged a \$5.00 service charge and pay brokerage charges whenever he or she directs the Plan Agent to sell Common Shares held in a dividend reinvestment account.

All correspondence concerning the Plan should be directed to the Plan Agent at PFPC Inc., P.O. Box 43027, Providence, Rhode Island 02940-3027. Please call 1-800-331-1710 between the hours of 9:00 a.m. and 5:00 p.m. Eastern Standard Time if you have questions regarding the Plan.

DESCRIPTION OF CAPITAL STRUCTURE

The Fund is an unincorporated business trust established under the laws of The Commonwealth of Massachusetts by an Agreement and Declaration of Trust dated April 15, 2004 and filed with the Secretary of The Commonwealth on April 16, 2004 (the "Declaration of Trust"). The Declaration of Trust provides that the Trustees of the Fund may authorize separate classes of shares of beneficial interest. The Trustees have authorized an unlimited number of Common Shares. The Fund intends to hold annual meetings of Common Shareholders in compliance with the requirements of the [New York Stock Exchange].

COMMON SHARES

The Declaration of Trust permits the Fund to issue an unlimited number of full and fractional Common Shares of beneficial interest, \$0.01 par value per Share. Each Share represents an equal proportionate interest in the assets of the Fund with each other Share in the Fund. Holders of Common Shares will be entitled to the payment of dividends when, as and if declared by the Board. The 1940 Act or the terms of any borrowings or preferred shares may limit the payment of dividends to the holders of Common Shares. Each whole Common Share shall be entitled to one vote as to matters on which it is entitled to vote pursuant to the terms of the Declaration of Trust on file with the SEC. Upon liquidation of the Fund, after paying or adequately providing for the payment of all liabilities of the Fund including the all outstanding borrowings and collateral from securities lending that the Fund is obligated to return to securities lending counterparties, and the liquidation preference with respect to any

outstanding preferred shares, and upon receipt of such releases, indemnities and refunding agreements as they deem necessary for their protection, the Trustees may distribute the remaining assets of the Fund among the holders of the Common Shares. The Declaration of Trust provides that Common Shareholders are not liable for any liabilities of the Fund, requires inclusion of a clause to that effect in every agreement entered into by the Fund and indemnifies shareholders against any such liability. Although shareholders of an unincorporated business trust established under Massachusetts law, in certain limited circumstances, may be held personally liable for the obligations of the Fund as though they were general partners, the provisions of the Declaration of Trust described in the foregoing sentence make the likelihood of such personal liability remote.

While there are any borrowings outstanding, the Fund may not be permitted to declare any cash dividend or other distribution on its Common Shares, unless at the time of such declaration, (i) all accrued interest on borrowings have been paid and (ii) the value of the Fund's total assets (determined after deducting the amount of such dividend or other distribution), less all liabilities and indebtedness of the Fund not represented by senior securities, is at least 200% of the aggregate amount of such securities representing indebtedness. In addition to the requirements of the 1940 Act, the Fund may be required to comply with other asset coverage requirements as a condition of the Fund pursuant to financial covenants associated with a borrowing/commercial paper program. These requirements may include an asset coverage test more stringent than under the 1940 Act. This limitation on the Fund's ability to make distributions on its Common Shares could in certain circumstances impair the ability of the Fund to maintain its qualification for taxation as a regulated investment company for federal income tax purposes. The Fund intends, however, to the extent possible to reduce borrowings from time to time to maintain compliance with such asset coverage requirements. See "Investment objectives, policies and risks" and "Distributions and taxes." Depending on the timing of any such repayment, the Fund may be required to pay a premium in addition to the liquidation preference to lenders under a borrowing/commercial paper program.

The Fund has no present intention of offering additional Common Shares, except as described herein. Other offerings of its Common Shares, if made, will require approval of the Board. Any additional offering will not be sold at a price per Share below the then current net asset value (exclusive of underwriting discounts and commissions) except in connection with an offering to existing Common Shareholders or with the consent of a majority of the Fund's outstanding Common Shares. The Common Shares have no preemptive rights.

37

The Fund generally will not issue Share certificates. However, upon written request to the Fund's transfer agent, a share certificate will be issued for any or all of the full Common Shares credited to an investor's account. Share certificates that have been issued to an investor may be returned at any time.

CREDIT FACILITY/COMMERCIAL PAPER PROGRAM

In leveraging through borrowings/commercial paper, the Fund expects to enter into definitive agreements with respect to a credit facility/commercial paper program or other borrowing program. The Fund may negotiate with commercial banks to arrange a credit facility/commercial paper program pursuant to which the Fund would expect to be entitled to borrow an amount up to between approximately % to % of the Fund's total assets (inclusive of the amount borrowed) as of the closing of the offer and sale of the Common Shares offered hereby. Any such borrowings would constitute financial leverage. Such a facility/commercial paper program is not expected to be convertible into any other securities of the Fund, outstanding amounts are expected to be prepayable by the Fund prior to final maturity without significant penalty and there are not expected to be any

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

sinking fund or mandatory retirement provisions. Outstanding amounts would be payable at maturity or such earlier times as required by the agreement. The Fund may be required to prepay outstanding amounts under the facility/program or incur a penalty rate of interest in the event of the occurrence of certain events of default. The Fund would be expected to indemnify the lenders under the facility/program against liabilities they may incur in connection with the facility/program.

In addition, the Fund expects that such a credit facility/program would contain covenants that, among other things, likely will limit the Fund's ability to pay dividends in certain circumstances, incur additional debt, change its fundamental investment policies and engage in certain transactions, including mergers and consolidations, and may require asset coverage ratios in addition to those required by the 1940 Act. The Fund may be required to pledge its assets and to maintain a portion of its assets in cash or high-grade securities as a reserve against interest or principal payments and expenses. The Fund expects that any credit facility/program would have customary covenant, negative covenant and default provisions. There can be no assurance that the Fund will enter into an agreement for a credit facility/program on terms and conditions representative of the foregoing, or that additional material terms will not apply. In addition, if entered into, any such credit facility/program may in the future be replaced or refinanced by one or more credit facilities having substantially different terms or by the issuance of preferred shares or debt securities.

REPURCHASE OF COMMON SHARES AND OTHER DISCOUNT MEASURES

Because shares of closed-end management investment companies frequently trade at a discount to their net asset values, the Board has determined that from time to time it may be in the interest of Common Shareholders for the Fund to take corrective actions. The Board, in consultation with Eaton Vance, will review at least annually the possibility of open market repurchases and/or tender offers for the

Common Shares and will consider such factors as the market price of the Common Shares, the net asset value of the Common Shares, the liquidity of the assets of the Fund, effect on the Fund's expenses, whether such transactions would impair the Fund's status as a regulated investment company or result in a failure to comply with applicable asset coverage requirements, general economic conditions and such other events or conditions which may have a material effect on the Fund's ability to consummate such transactions. There are no assurances that the Board will, in fact, decide to undertake either of these actions or if undertaken, that such actions will result in the Fund's Common Shares trading at a price which is equal to or approximates their net asset value. In recognition of the possibility that the Common Shares might trade at a discount to net asset value and that any such discount may not be in the interest of Common Shareholders, the Board, in consultation with Eaton Vance, from time to time may review possible actions to reduce any such discount.

PREFERRED SHARES

The Declaration of Trust authorizes the issuance of an unlimited number of shares of beneficial interest with preference rights, including preferred shares (the "preferred shares"), having a par value of \$0.01 per share, in one or more series, with rights as determined by the Board, by action of the Board without the approval of the Common Shareholders. The Fund has no current intention of issuing preferred shares. However, it is possible that preferred shares could be issued at some future time as an additional method of obtaining financial leverage or as a replacement to other forms of financial leverage such as borrowing and/or the reinvestment of securities lending collateral.

Under the requirements of the 1940 Act, if preferred shares are ever issued, the Fund must, immediately after the issuance of any such preferred shares, have an "asset coverage" of at least 200%. Asset coverage means the ratio which the value of the total assets of the Fund, less all liability and indebtedness not represented by senior securities (as defined in the 1940 Act), bears to the aggregate amount of senior securities representing indebtedness of the Fund, if any, plus the aggregate liquidation preference of the preferred shares. If the Fund seeks a rating of the preferred shares, asset coverage requirements, in addition to those set forth in the 1940 Act, may be imposed. The liquidation value of the preferred shares is expected to equal their aggregate original purchase price plus redemption premium, if any, together with any accrued and unpaid dividends thereon (on a cumulative basis), whether or not earned or declared. The terms of the preferred shares, including their dividend rate, voting rights, liquidation preference and redemption provisions, will be determined by the Board (subject to applicable law and the Fund's Declaration of Trust) if and when it authorizes the preferred shares. The Fund may issue preferred shares that provide for the periodic redetermination of the dividend rate at relatively short intervals through an auction or remarketing procedure, although the terms of the preferred shares may also enable the Fund to lengthen such intervals. At times, the dividend rate as redetermined on the Fund's preferred shares may approach or exceed the Fund's return after expenses on the investment of proceeds from the preferred shares and the Fund's leverage structure would result in a lower rate of return to Common Shareholders than if the Fund were not so structured.

In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Fund, the terms of any preferred shares may entitle the holders of preferred shares to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus redemption premium, if any, together with accrued and unpaid dividends, whether or not earned or declared and on a cumulative basis) before any distribution of assets is made to holders of Common Shares. After payment of the full amount of the liquidating distribution to which they are entitled, the preferred shareholders would not be entitled to any further participation in any distribution of assets by the Fund.

Holders of preferred shares, voting as a class, shall be entitled to elect two of the Fund's Trustees. Under the 1940 Act, if at any time dividends on the preferred shares are unpaid in an amount equal to two full years' dividends thereon, the holders of all outstanding preferred shares, voting as a class, will be allowed to elect a majority of the Fund's Trustees until all dividends in default have been paid or declared and set apart for payment. In addition, if required by the Rating Agency rating the preferred shares or if the Board determines it to be in the best interests of the Common Shareholders, issuance of the preferred shares may result in more restrictive provisions than required by the 1940 Act being imposed. In this regard, holders of the preferred shares may be entitled to elect a majority of the Fund's Board in other circumstances, for example, if one payment on the preferred shares is in arrears.

If the Fund were ever to determine to issue preferred shares it likely would need to seek a AAA credit rating for the preferred shares from one or more Rating Agencies. In such event, as long as any such preferred shares are outstanding, the composition of the Fund's portfolio will reflect guidelines established by such Rating Agency. The Fund anticipates that the guidelines with respect to any preferred shares will establish a set of tests for portfolio composition and asset coverage that supplement (and in some cases are more restrictive than) the applicable requirements under the 1940 Act. The Fund currently anticipates that such guidelines would include asset coverage requirements which are more restrictive than those under the 1940 Act, restrictions on certain portfolio investments and investment practices, requirements that the Fund maintain a portion of its assets in short-term,

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

high-quality, fixed-income securities and certain mandatory redemption requirements relating to the preferred shares. No assurance can be given that the guidelines actually imposed with respect to the preferred shares by such Rating Agency will be more or less restrictive than as described in this Prospectus.

ANTI-TAKEOVER PROVISIONS IN THE DECLARATION OF TRUST

The Declaration of Trust includes provisions that could have the effect of limiting the ability of other entities or persons to acquire control of the Fund or to change the composition of its Board, and could have the effect of depriving Common Shareholders of an opportunity to sell their Common Shares at a premium over prevailing market prices by discouraging a third party from seeking to obtain control of the Fund. These provisions may have the effect of discouraging attempts to acquire control of the Fund, which attempts could have the effect of increasing the expenses of the Fund and interfering with the normal operation of the Fund. The Board is divided into four classes, with the term of one class expiring at each annual meeting of Common Shareholders. At each annual meeting, one class of Trustees is elected to a three-year term. This provision could delay for up to two years the replacement of a majority of the Board. A Trustee may be removed from office only for cause by a written instrument signed by the remaining Trustees or by a vote of the holders of at least two-thirds of the class of shares of the Fund that elected such Trustee and are entitled to vote on the matter.

In addition, the Declaration of Trust requires the favorable vote of the holders of at least 75% of the outstanding shares of each class of the Fund, voting as a

39

class, then entitled to vote to approve, adopt or authorize certain transactions with 5%-or-greater holders of a class of shares and their associates, unless the Board shall by resolution have approved a memorandum of understanding with such holders, in which case normal voting requirements would be in effect. For purposes of these provisions, a 5%-or-greater holder of a class of shares (a "Principal Shareholder") refers to any person who, whether directly or indirectly and whether alone or together with its affiliates and associates, beneficially owns 5% or more of the outstanding shares of any class of beneficial interest of the Fund. The transactions subject to these special approval requirements are: (i) the merger or consolidation of the Fund or any subsidiary of the Fund with or into any Principal Shareholder; (ii) the issuance of any securities of the Fund to any Principal Shareholder for cash; (iii) the sale, lease or exchange of all or any substantial part of the assets of the Fund to any Principal Shareholder (except assets having an aggregate fair market value of less than \$1,000,000, aggregating for the purpose of such computation all assets sold, leased or exchanged in any series of similar transactions within a twelve-month period); or (iv) the sale, lease or exchange to the Fund or any subsidiary thereof, in exchange for securities of the Fund, of any assets of any Principal Shareholder (except assets having an aggregate fair market value of less than \$1,000,000, aggregating for the purposes of such computation all assets sold, leased or exchanged in any series of similar transactions within a twelve-month period).

The Board has determined that provisions with respect to the Board and the 75% voting requirements described above, which voting requirements are greater than the minimum requirements under Massachusetts law or the 1940 Act, are in the best interest of Common Shareholders generally. Reference should be made to the Declaration of Trust on file with the SEC for the full text of these provisions.

CONVERSION TO OPEN-END FUND

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

The Fund may be converted to an open-end management investment company at any time if approved by the lesser of (i) two-thirds or more of the Fund's then outstanding Common Shares and preferred shares (if any), each voting separately as a class, or (ii) more than 50% of the then outstanding Common Shares and preferred shares (if any), voting separately as a class if such conversion is recommended by at least 75% of the Trustees then in office. If approved in the foregoing manner, conversion of the Fund could not occur until 90 days after the shareholders' meeting at which such conversion was approved and would also require at least 30 days' prior notice to all shareholders. Conversion of the Fund to an open-end management investment company also would require the redemption of any outstanding preferred shares and could require the repayment of borrowings, which would eliminate the leveraged capital structure of the Fund with respect to the Common Shares. In the event of conversion, the Common Shares would cease to be listed on the [New York Stock Exchange] or other national securities exchange or market system. The Board believes, however, that the closed-end structure is desirable, given the Fund's investment objectives and policies. Investors should assume, therefore, that it is unlikely that the Board would vote to convert the Fund to an open-end management investment company. Common Shareholders of an open-end management investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less such redemption charge, if any, as might be in effect at the time of a redemption. If the Fund were to convert to an open-end investment company, the Fund expects it would pay all such redemption requests in cash, but would likely reserve the right to pay redemption requests in a combination of cash or securities. If such partial payment in securities were made, investors may incur brokerage costs in converting such securities to cash. If the Fund were converted to an open-end fund, it is likely that new Common Shares would be sold at net asset value plus a sales load.

40

UNDERWRITING

The Fund intends to offer the shares through the underwriters. [] is acting as representative of the underwriters named below. Subject to the terms and conditions contained in a purchase agreement between the Fund and Eaton Vance and the underwriters, the Fund has agreed to sell to the underwriters, and each underwriter named below has severally agreed to purchase from the Fund, the number of shares listed opposite their names below.

| UNDERWRITER | NUMBER OF SHARES |
|-------------|---------------------|
| _____ | _____ |
| Total | |

The underwriters have agreed to purchase all of the shares sold pursuant to the purchase agreement if any of these shares are purchased. If an underwriter defaults, the purchase agreement provides that the purchase commitments of the nondefaulting underwriters may be increased or the purchase agreement may be terminated.

The Fund and Eaton Vance have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act of 1933, or to contribute to payments the underwriters may be required to make in respect of

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

those liabilities.

The underwriters are offering the shares, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of legal matters by their counsel, including the validity of the shares, and other conditions contained in the purchase agreement, such as the receipt by the underwriters of officer's certificates and legal opinions. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

COMMISSIONS AND DISCOUNTS

The underwriters have advised the Fund that they propose initially to offer the shares to the public at the initial public offering price on the cover page of this prospectus and to dealers at that price less a concession not in excess of \$[] per share. The underwriters may allow, and the dealers may realow, a discount not in excess of \$[] per share to other dealers. There is a sales charge or underwriting discount of \$[] per share, which is equal to []% of the initial public offering price per share. After the initial public offering, the public offering price, concession and discount may be changed. Investors must pay for the shares of common stock purchased in the offering on or before, [] 2005.

The following table shows the public offering price, underwriting discount and proceeds before expenses to the Fund. The information assumes either no exercise or full exercise by the underwriters of their overallotment option.

| | PER SHARE | WITHOUT OPTION | WITH OPTION |
|--|------------|-------------------|-------------|
| | _____ | _____ | _____ |
| Public offering price | \$ [_____] | \$ [_____] | \$ [_____] |
| Underwriting discount | \$ [_____] | \$ [_____] | \$ [_____] |
| Proceeds, before expenses, to the Fund | \$ [_____] | \$ [_____] | \$ [_____] |

The expenses of the offering, excluding underwriting discount, are estimated at \$[] and are payable by the Fund. The Fund has agreed to pay the underwriters \$[] per share of common stock as a partial

41

reimbursement of expenses incurred in connection with the offering. The amount paid by the Fund as this partial reimbursement to the underwriters will not exceed []% of the total price to the public of the shares of common stock sold in this offering. Eaton Vance has agreed to pay the amount by which the offering costs (other than the underwriting discount, but including the \$[] per share partial reimbursement of expenses to the underwriters) exceed \$[] per share of common stock ([]% of the offering price). [Eaton Vance has agreed to pay all of the Fund's organizational expenses.]

OVERALLOTMENT OPTION

The Fund has granted the underwriters an option to purchase up to [] additional shares at the public offering price less the underwriting discount. The underwriters may exercise the option from time to time for 45 days from the date of this prospectus solely to cover any overallotments. If the underwriters exercise this option, each will be

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

obligated, subject to conditions contained in the purchase agreement, to purchase a number of additional shares proportionate to that underwriter's initial amount reflected in the above table.

PRICE STABILIZATION, SHORT POSITIONS AND PENALTY BIDS

Until the distribution of the shares is completed, SEC rules may limit the underwriters and selling group members from bidding for and purchasing the Fund's shares. However, the representative may engage in transactions that stabilize the price of the shares, such as bids or purchases to peg, fix or maintain that price.

If the underwriters create a short position in the shares in connection with the offering, I.E., if they sell more shares than are listed on the cover of this prospectus, the representative may reduce that short position by purchasing shares in the open market. The representative also may elect to reduce any short position by exercising all or part of the over-allotment option described above. Purchases of the shares to stabilize its price or to reduce a short position may cause the price of the shares to be higher than it might be in the absence of such purchases.

The representative also may impose a penalty bid on underwriters and selling group members. This means that if the representative purchases shares in the open market to reduce the underwriters' short position or to stabilize the price of such shares, they may reclaim the amount of the selling concession from the underwriters and the selling group members who sold those shares. The imposition of a penalty bid also may affect the price of the shares in that it discourages resales of those shares.

Neither the Fund nor any of the underwriters makes any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of the shares. In addition, neither the Fund nor any of the underwriters makes any representation that the representative will engage in such transactions or that such transactions, once commenced, will not be discontinued without notice.

42

CUSTODIAN AND TRANSFER AGENT

Investors Bank & Trust Company ("IBT"), 200 Clarendon Street, Boston, Massachusetts 02116 is the custodian of the Fund and will maintain custody of the securities and cash of the Fund. IBT maintains the Fund's general ledger and computes net asset value per share daily. IBT also attends to details in connection with the sale, exchange, substitution, transfer and other dealings with the Fund's investments and receives and disburses all funds. IBT also assists in preparation of shareholder reports and the electronic filing of such reports with the SEC.

PFPC Inc., P.O. Box 43027, Providence, Rhode Island 02940-3027 is the transfer agent and dividend disbursing agent of the Fund.

LEGAL OPINIONS

Certain legal matters in connection with the Common Shares will be passed upon for the Fund by Kirkpatrick & Lockhart LLP, Boston, Massachusetts, and for the Underwriters by [], [].

REPORTS TO SHAREHOLDERS

The Fund will send to Common Shareholders unaudited semi-annual and audited

annual reports, including a list of investments held.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

[], Boston, Massachusetts are the independent registered public accounting firm for the Fund and will audit the Fund's financial statements.

ADDITIONAL INFORMATION

The Prospectus and the Statement of Additional Information do not contain all of the information set forth in the Registration Statement that the Fund has filed with the SEC. The complete Registration Statement may be obtained from the SEC upon payment of the fee prescribed by its rules and regulations. The Statement of Additional Information can be obtained without charge by calling 1-800-225-6265.

Statements contained in this Prospectus as to the contents of any contract or other documents referred to are not necessarily complete, and, in each instance, reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement of which this Prospectus forms a part, each such statement being qualified in all respects by such reference.

MAY NOT BE SOLD UNTIL THE REGISTRATION STATEMENT FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ("SEC") IS EFFECTIVE. THIS SAI, WHICH IS NOT A PROSPECTUS, IS NOT AN OFFER TO SELL THESE SECURITIES AND IS NOT SOLICITING AN OFFER TO BUY THESE SECURITIES IN ANY STATE WHERE THE OFFER OR SALE IS NOT PERMITTED.

PORTFOLIO TRADING

Capitalized terms used in this SAI and not otherwise defined have the meanings given them in the Fund's Prospectus.

ADDITIONAL INVESTMENT INFORMATION AND RESTRICTIONS

Primary investment strategies are described in the Prospectus. The following is a description of the various investment policies that may be engaged in, whether as a primary or secondary strategy, and a summary of certain attendant risks. Eaton Vance may not buy any of the following instruments or use any of the following techniques unless it believes that doing so will help to achieve the Fund's investment objectives.

MORTGAGE-BACKED SECURITIES

GENERAL

The Fund's investments in mortgage-backed securities may include conventional mortgage pass-through securities, floating rate mortgage-backed securities and certain classes of multiple class CMOs (as described below). Mortgage-backed securities differ from bonds in that the principal is paid back by the borrower over the length of the loan rather than returned in a lump sum at maturity. Government National Mortgage Association ("GNMA") Certificates and Federal National Mortgage Association ("FNMA") Mortgage-Backed Certificates are mortgage-backed securities representing part ownership of a pool of mortgage loans. GNMA loans -- issued by lenders such as mortgage bankers, commercial banks and savings and loan associations -- are either insured by the Federal Housing Administration or guaranteed by the Veterans Administration. A "pool" or group of such mortgages is assembled and, after being approved by GNMA, is offered to investors through securities dealers. Once such pool is approved by GNMA, the timely payment of interest and principal on the Certificates issued representing such pool is guaranteed by the full faith and credit of the U.S. Government. FNMA, a federally chartered corporation owned entirely by private stockholders, purchases both conventional and federally insured or guaranteed residential mortgages from various entities, including savings and loan associations, savings banks, commercial banks, credit unions and mortgage bankers, and packages pools of such mortgages in the form of pass-through securities generally called FNMA Mortgage-Backed Certificates, which are guaranteed as to timely payment of principal and interest by FNMA but are not backed by the full faith and credit of the U.S. Government. GNMA Certificates and FNMA Mortgage-Backed Certificates are called "pass-through" securities because a pro rata share of both regular interest and principal payments, as well as unscheduled early prepayments, on the underlying mortgage pool is passed through monthly to the holder of the Certificate (i.e., the Fund). The Fund may purchase GNMA Certificates, FNMA Mortgage-Backed Certificates and various other mortgage-backed securities on a when-issued basis subject to certain limitations and requirements.

The Federal Home Loan Mortgage Corporation ("FHLMC"), a corporate instrumentality of the U.S. Government created by Congress for the purposes of increasing the availability of mortgage credit for residential housing, issues participation certificates ("PCs") representing undivided interest in FHLMC'S mortgage portfolio. While FHLMC guarantees the timely payment of interest and

ultimate collection of the principal of its PCs, its PCs are not backed by the full faith and credit of the U.S. Government. FHLMC PCs differ from GNMA Certificates in that the mortgages underlying the PCs are monthly "conventional" mortgages rather than mortgages insured or guaranteed by a federal agency or instrumentality. However, in several other respects, such as the monthly pass-through of interest and principal (including unscheduled prepayments) and the unpredictability of future unscheduled prepayments on the underlying mortgage pools, FHLMC PCs are similar to GNMA Certificates.

While it is not possible to accurately predict the life of a particular issue of a mortgage-backed "pass-through" security held by the Fund, the actual life of any such security is likely to be substantially less than the average final maturities of the mortgage loans underlying the security. This is because unscheduled early prepayments of principal on the security owned by the Fund will result from the prepayment, refinancings or foreclosure of the underlying mortgage loans in the mortgage pool. The Fund, when the monthly payments (which may include unscheduled prepayments) on such a security are passed through to it, may be able to reinvest them only at a lower rate of interest. Because of the regular scheduled payments of principal and the early unscheduled prepayments of principal, the mortgage-backed "pass-through" security is less effective than other types of obligations as a means of "locking-in" attractive long-term interest rates. As a result, this type of security may have less potential for capital appreciation during periods of declining interest rates than other U.S. Government securities of comparable maturities, although many issues of mortgage-backed "pass-through" securities may have a comparable risk of decline in market value during periods of rising interest rates. If such a security has been purchased by the Fund at a premium above its par value, both a scheduled payment of principal and an unscheduled prepayment of principal, which would be made at par, will accelerate the realization of a loss equal to that portion of the premium applicable to the payment or prepayment. If such a security has been purchased by the Fund at a discount from its par value, both

2

PORTFOLIO TRADING

a scheduled payment of principal and an unscheduled prepayment of principal will increase current returns and will accelerate the recognition of income, which, when distributed to Fund shareholders, will be taxable as ordinary income.

COLLATERALIZED MORTGAGE OBLIGATIONS ("CMOS")

The CMO classes in which the Fund may invest include sequential and parallel pay CMOs, including planned amortization class and target amortization class securities. CMOs are debt securities issued by the FHLMC and by financial institutions and other mortgage lenders which are generally fully collateralized by a pool of mortgages held under an indenture. The key feature of the CMO structure is the prioritization of the cash flows from a pool of mortgages among the several classes of CMO holders, thereby creating a series of obligations with varying rates and maturities appealing to a wide range of investors. CMOs generally are secured by an assignment to a trustee under the indenture pursuant to which the bonds are issued of collateral consisting of a pool of mortgages. Payments with respect to the underlying mortgages generally are made to the trustee under the indenture. Payments of principal and interest on the underlying mortgages are not passed through to the holders of the CMOs as such (that is, the character of payments of principal and interest is not passed through and therefore payments to holders of CMOs attributable to interest paid and principal repaid on the underlying mortgages do not

necessarily constitute income and return of capital, respectively, to such holders), but such payments are dedicated to payment of interest on and repayment of principal of the CMOs. CMOs are issued in two or more classes or series with varying maturities and stated rates of interest determined by the issuer. Senior CMO classes will typically have priority over residual CMO classes as to the receipt of principal and/or interest payments on the underlying mortgages. Because the interest and principal payments on the underlying mortgages are not passed through to holders of CMOs, CMOs of varying maturities may be secured by the same pool of mortgages, the payments on which are used to pay interest to each class and to retire successive maturities in sequence. CMOs are designed to be retired as the underlying mortgages are repaid. In the event of sufficient early prepayments on such mortgages, the class or series of CMO first to mature generally will be retired prior to maturity. Therefore, although in most cases the issuer of CMOs will not supply additional collateral in the event of such prepayments, there will be sufficient collateral to secure CMOs that remain outstanding. Currently, the Adviser will consider privately issued CMOs or other mortgage-backed securities as possible investments for the Fund only when the mortgage collateral is insured, guaranteed or otherwise backed by the U.S. Government or one or more of its agencies or instrumentalities (e.g., insured by the Federal Housing Administration or Farmers Home Administration or guaranteed by the Administrator of Veterans Affairs or consisting in whole or in part of U.S. Government securities).

RISKS OF CERTAIN MORTGAGE-BACKED AND INDEXED SECURITIES

Although not mortgage-backed securities, index amortizing notes and other callable securities are subject to extension risk resulting from the issuer's failure to exercise its option to call or redeem the notes before their stated maturity date. The residual classes of CMOs are subject to both prepayment and extension risk.

Other types of floating rate derivative debt securities present more complex types of interest rate risks. For example, range floaters are subject to the risk that the coupon will be reduced to below market rates if a designated interest rate floats outside of a specified interest rate band or collar. Dual index or yield curve floaters are subject to depreciation in the event of an unfavorable change in the spread between two designated interest rates. The market values of currency-linked securities may be very volatile and may decline during periods of unstable currency exchange rates.

SENIOR LOANS

STRUCTURE OF SENIOR LOANS

A Senior Loan is typically originated, negotiated and structured by a U.S. or foreign commercial bank, insurance company, finance company or other financial institution (the "Agent") for a group of loan investors ("Loan Investors"). The Agent typically administers and enforces the Senior Loan on behalf of the other Loan Investors in the syndicate. In addition, an institution, typically but not always the Agent, holds any collateral on behalf of the Loan Investors.

Senior Loans primarily include senior floating rate loans to corporations and secondarily institutionally traded senior floating rate debt obligations issued by an asset-backed pool, and interests therein. Loan interests primarily take the form of assignments purchased in the primary or secondary market. Loan interests may also take the form of participation interests in a Senior Loan. Such loan interests may be acquired from U.S. or foreign commercial banks, insurance companies, finance companies or other financial institutions who have made loans or are Loan Investors or from other investors in loan interests.

The Fund typically purchases "Assignments" from the Agent or other Loan Investors. The purchaser of an Assignment typically succeeds to all the rights and obligations under the Loan Agreement of the assigning Loan Investor and

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

becomes a Loan Investor under the Loan Agreement with the same rights and obligations as the assigning Loan Investor. Assignments may, however, be

PORTFOLIO TRADING

arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an Assignment may differ from, and be more limited than, those held by the assigning Loan Investor.

The Fund also may invest in "Participations." Participations by the Fund in a Loan Investor's portion of a Senior Loan typically will result in the Fund having a contractual relationship only with such Loan Investor, not with the Borrower. As a result, the Fund may have the right to receive payments of principal, interest and any fees to which it is entitled only from the Loan Investor selling the Participation and only upon receipt by such Loan Investor of such payments from the Borrower. In connection with purchasing Participations, the Fund generally will have no right to enforce compliance by the Borrower with the terms of the loan agreement, nor any rights with respect to any funds acquired by other Loan Investors through set-off against the Borrower and the Fund may not directly benefit from the collateral supporting the Senior Loan in which it has purchased the Participation. As a result, the Fund may assume the credit risk of both the Borrower and the Loan Investor selling the Participation. In the event of the insolvency of the Loan Investor selling a Participation, the Fund may be treated as a general creditor of such Loan Investor. The selling Loan Investors and other persons interpositioned between such Loan Investors and the Fund with respect to such Participations will likely conduct their principal business activities in the banking, finance and financial services industries. Persons engaged in such industries may be more susceptible to, among other things, fluctuations in interest rates, changes in the Federal Open Market Committee's monetary policy, governmental regulations concerning such industries and concerning capital raising activities generally and fluctuations in the financial markets generally.

The Fund will only acquire Participations if the Loan Investor selling the Participation, and any other persons interpositioned between the Fund and the Loan Investor, at the time of investment has outstanding debt or deposit obligations rated investment grade (BBB or A-3 or higher by Standard & Poor's Ratings Group ("S&P") or Baa or P-3 or higher by Moody's Investors Service, Inc. ("Moody's") or comparably rated by another nationally recognized rating agency) or determined by the Adviser to be of comparable quality. Securities rated Baa by Moody's have speculative characteristics. Long-term debt rated BBB by S&P is regarded by S&P as having adequate capacity to pay interest and repay principal and debt rated Baa by Moody's is regarded by Moody's as a medium grade obligation, i.e., it is neither highly protected nor poorly secured. Commercial paper rated A-3 by S&P indicates that S&P believes such obligations exhibit adequate protection parameters but that adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation and issues of commercial paper rated P-3 by Moody's are considered by Moody's to have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Indebtedness of companies whose creditworthiness is poor involves substantially greater risks, and may be highly speculative. Some companies may never pay off their indebtedness, or may pay only a small fraction of the amount owed. Consequently, when investing in indebtedness of companies with poor credit, the Fund bears a substantial risk of losing the entire amount invested.

LOAN COLLATERAL

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

In order to borrow money pursuant to a Senior Loan, a Borrower will frequently, for the term of the Senior Loan, pledge collateral, including but not limited to, (i) working capital assets, such as accounts receivable and inventory; (ii) tangible fixed assets, such as real property, buildings and equipment; (iii) intangible assets, such as trademarks and patent rights (but excluding goodwill); and (iv) security interests in shares of stock of subsidiaries or affiliates. In the case of Senior Loans made to non-public companies, the company's shareholders or owners may provide collateral in the form of secured guarantees and/or security interests in assets that they own. In many instances, a Senior Loan may be secured only by stock in the Borrower or its subsidiaries. Collateral may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets would satisfy fully a Borrower's obligations under a Senior Loan.

CERTAIN FEES PAID TO THE FUND

In the process of buying, selling and holding Senior Loans, the Fund may receive and/or pay certain fees. These fees are in addition to interest payments received and may include facility fees, commitment fees, amendment fees, commissions and prepayment penalty fees. When the Fund buys a Senior Loan it may receive a facility fee and when it sells a Senior Loan it may pay a facility fee. On an ongoing basis, the Fund may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a Senior Loan. In certain circumstances, the Fund may receive a prepayment penalty fee upon the prepayment of a Senior Loan by a Borrower. Other fees received by the Fund may include covenant waiver fees and covenant modification fees.

BORROWER COVENANTS

A Borrower must comply with various restrictive covenants contained in a loan agreement or note purchase agreement between the Borrower and the holders of the Senior Loan (the "Loan Agreement"). Such covenants, in addition to requiring the scheduled payment of interest and principal, may include restrictions on dividend payments and other distributions to stockholders, provisions requiring the Borrower to maintain specific minimum financial ratios, and limits on total debt. In addition, the Loan Agreement may contain a

4

PORTFOLIO TRADING

covenant requiring the Borrower to prepay the Loan with any free cash flow. Free cash flow is generally defined as net cash flow after scheduled debt service payments and permitted capital expenditures, and includes the proceeds from asset dispositions or sales of securities. A breach of a covenant which is not waived by the Agent, or by the Loan Investors directly, as the case may be, is normally an event of acceleration; i.e., the Agent, or the Loan Investors directly, as the case may be, has the right to call the outstanding Senior Loan. The typical practice of an Agent or a Loan Investor in relying exclusively or primarily on reports from the Borrower to monitor the Borrower's compliance with covenants may involve a risk of fraud by the Borrower. In the case of a Senior Loan in the form of a Participation, the agreement between the buyer and seller may limit the rights of the holder to vote on certain changes which may be made to the Loan Agreement, such as waiving a breach of a covenant. However, the holder of the Participation will, in almost all cases, have the right to vote on certain fundamental issues such as changes in principal amount, payment dates and interest rate.

ADMINISTRATION OF LOANS

In a typical Senior Loan the Agent administers the terms of the Loan Agreement. In such cases, the Agent is normally responsible for the collection of

principal and interest payments from the Borrower and the apportionment of these payments to the credit of all institutions which are parties to the Loan Agreement. The Fund will generally rely upon the Agent or an intermediate participant to receive and forward to the Fund its portion of the principal and interest payments on the Senior Loan. Furthermore, unless under the terms of a Participation Agreement the Fund has direct recourse against the Borrower, the Fund will rely on the Agent and the other Loan Investors to use appropriate credit remedies against the Borrower. The Agent is typically responsible for monitoring compliance with covenants contained in the Loan Agreement based upon reports prepared by the Borrower. The seller of the Senior Loan usually does, but is often not obligated to, notify holders of Senior Loans of any failures of compliance. The Agent may monitor the value of the collateral and, if the value of the collateral declines, may accelerate the Senior Loan, may give the Borrower an opportunity to provide additional collateral or may seek other protection for the benefit of the participants in the Senior Loan. The Agent is compensated by the Borrower for providing these services under a Loan Agreement, and such compensation may include special fees paid upon structuring and funding the Senior Loan and other fees paid on a continuing basis. With respect to Senior Loans for which the Agent does not perform such administrative and enforcement functions, the Fund will perform such tasks on its own behalf, although a collateral bank will typically hold any collateral on behalf of the Fund and the other Loan Investors pursuant to the applicable Loan Agreement.

A financial institution's appointment as Agent may usually be terminated in the event that it fails to observe the requisite standard of care or becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership, or, if not FDIC insured, enters into bankruptcy proceedings. A successor Agent would generally be appointed to replace the terminated Agent, and assets held by the Agent under the Loan Agreement should remain available to holders of Senior Loans. However, if assets held by the Agent for the benefit of the Fund were determined to be subject to the claims of the Agent's general creditors, the Fund might incur certain costs and delays in realizing payment on a Senior Loan, or suffer a loss of principal and/or interest. In situations involving intermediate participants similar risks may arise.

PREPAYMENTS

Senior Loans will usually require, in addition to scheduled payments of interest and principal, the prepayment of the Senior Loan from free cash flow, as defined above. The degree to which Borrowers prepay Senior Loans, whether as a contractual requirement or at their election, may be affected by general business conditions, the financial condition of the Borrower and competitive conditions among Loan Investors, among others. As such, prepayments cannot be predicted with accuracy. Upon a prepayment, either in part or in full, the actual outstanding debt on which the Fund derives interest income will be reduced. However, the Fund may receive both a prepayment penalty fee from the prepaying Borrower and a facility fee upon the purchase of a new Senior Loan with the proceeds from the prepayment of the former. Prepayments generally will not materially affect the Fund's performance because the Fund typically is able to reinvest prepayments in other Senior Loans that have similar yields and because receipt of such fees may mitigate any adverse impact on the Fund's yield.

OTHER INFORMATION REGARDING SENIOR LOANS

From time to time the Adviser and its affiliates may borrow money from various banks in connection with their business activities. Such banks may also sell interests in Senior Loans to or acquire them from the Fund or may be intermediate participants with respect to Senior Loans in which the Fund owns interests. Such banks may also act as Agents for Senior Loans held by the Fund.

The Fund may acquire interests in Senior Loans which are designed to provide temporary or "bridge" financing to a Borrower pending the sale of identified

assets or the arrangement of longer-term loans or the issuance and sale of debt obligations. The Fund may also invest in Senior Loans of Borrowers that have obtained bridge loans from other parties. A Borrower's use of bridge loans involves a risk that the Borrower may be unable to locate permanent financing to replace the bridge loan, which may impair the Borrower's perceived creditworthiness.

PORTFOLIO TRADING

The Fund will be subject to the risk that collateral securing a loan will decline in value or have no value. Such a decline, whether as a result of bankruptcy proceedings or otherwise, could cause the Senior Loan to be undercollateralized or unsecured. In most credit agreements there is no formal requirement to pledge additional collateral. In addition, the Fund may invest in Senior Loans guaranteed by, or secured by assets of, shareholders or owners, even if the Senior Loans are not otherwise collateralized by assets of the Borrower; provided, however, that such guarantees are fully secured. There may be temporary periods when the principal asset held by a Borrower is the stock of a related company, which may not legally be pledged to secure a Senior Loan. On occasions when such stock cannot be pledged, the Senior Loan will be temporarily unsecured until the stock can be pledged or is exchanged for or replaced by other assets, which will be pledged as security for the Senior Loan. However, the Borrower's ability to dispose of such securities, other than in connection with such pledge or replacement, will be strictly limited for the protection of the holders of Senior Loans and, indirectly, Senior Loans themselves.

If a Borrower becomes involved in bankruptcy proceedings, a court may invalidate the Fund's security interest in the loan collateral or subordinate the Fund's rights under the Senior Loan to the interests of the Borrower's unsecured creditors or cause interest previously paid to be refunded to the Borrower. If a court required interest to be refunded, it could negatively affect the Fund's performance. Such action by a court could be based, for example, on a "fraudulent conveyance" claim to the effect that the Borrower did not receive fair consideration for granting the security interest in the loan collateral to the Fund. For Senior Loans made in connection with a highly leveraged transaction, consideration for granting a security interest may be deemed inadequate if the proceeds of the Loan were not received or retained by the Borrower, but were instead paid to other persons (such as shareholders of the Borrower) in an amount which left the Borrower insolvent or without sufficient working capital. There are also other events, such as the failure to perfect a security interest due to faulty documentation or faulty official filings, which could lead to the invalidation of the Fund's security interest in loan collateral. If the Fund's security interest in loan collateral is invalidated or the Senior Loan is subordinated to other debt of a Borrower in bankruptcy or other proceedings, the Fund would have substantially lower recovery, and perhaps no recovery on the full amount of the principal and interest due on the Loan.

The Fund may acquire warrants and other equity securities as part of a unit combining a Senior Loan and equity securities of a Borrower or its affiliates. The acquisition of such equity securities will only be incidental to the Fund's purchase of a Senior Loan. The Fund may also acquire equity securities or debt securities (including non-dollar denominated debt securities) issued in exchange for a Senior Loan or issued in connection with the debt restructuring or reorganization of a Borrower, or if such acquisition, in the judgment of the Adviser, may enhance the value of a Senior Loan or would otherwise be consistent with the Fund's investment policies.

DEBTOR-IN-POSSESSION FINANCING

The Fund may invest in debtor-in-possession financings (commonly called "DIP financings"). DIP financings are arranged when an entity seeks the protections

of the bankruptcy court under chapter 11 of the U.S. Bankruptcy Code. These financings allow the entity to continue its business operations while reorganizing under chapter 11. Such financings are senior liens on unencumbered security (I.E., security not subject to other creditors claims). There is a risk that the entity will not emerge from chapter 11 and be forced to liquidate its assets under chapter 7 of the Bankruptcy Code. In such event, the Fund's only recourse will be against the property securing the DIP financing.

LITIGATION INVOLVING EATON VANCE

On October 15, 2001, an amended consolidated complaint was filed in the United States District Court for the District of Massachusetts against four Eaton Vance closed-end interval funds (the "Interval Funds"); their Trustees and certain officers of the Interval Funds; Eaton Vance, the Interval Funds' administrator; Boston Management and Research, the Interval Funds' investment adviser; and Eaton Vance Corp., the parent of Eaton Vance and Boston Management and Research. The Complaint, framed as a class action, alleges that for the period between May 25, 1998 and March 5, 2001, the Interval Funds' assets were incorrectly valued and certain matters were not properly disclosed, in violation of the federal securities laws. The Complaint seeks unspecified damages. The named defendants believe that the Complaint is without merit and are vigorously contesting the lawsuit. Eaton Vance believes that the lawsuit is not likely to have a material adverse affect on its ability to render services to the Fund.

REGULATORY CHANGES

To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in connection with highly leveraged transactions, the availability of Senior Loans for investment may be adversely affected. Further, such legislation or regulation could depress the market value of Senior Loans.

6

PORTFOLIO TRADING

CREDIT QUALITY

Many Senior Loans in which the Fund may invest are of below investment grade credit quality. Accordingly, these Senior Loans are subject to similar or identical risks and other characteristics described below in relation to Non-Investment Grade Bonds.

NON-INVESTMENT GRADE SECURITIES

Investments in non-investment grade securities generally provide greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and principal and income risk, including the possibility of issuer default and bankruptcy. Non-investment grade securities are regarded as predominantly speculative with respect to the issuer's continuing ability to meet principal and interest payments. Debt securities in the lowest investment grade category also may be considered to possess some speculative characteristics by certain rating agencies. In addition, analysis of the creditworthiness of issuers of non-investment grade securities may be more complex than for issuers of higher quality securities.

Non-investment grade securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in non-investment grade

securities prices because the advent of recession could lessen the ability of an issuer to make principal and interest payments on its debt obligations. If an issuer of non-investment grade securities defaults, in addition to risking payment of all or a portion of interest and principal, the Fund may incur additional expenses to seek recovery. In the case of non-investment grade securities structured as zero-coupon, step-up or payment-in-kind securities, their market prices will normally be affected to a greater extent by interest rate changes, and therefore tend to be more volatile than securities which pay interest currently and in cash. Eaton Vance seeks to reduce these risks through diversification, credit analysis and attention to current developments in both the economy and financial markets.

The secondary market on which non-investment grade securities are traded may be less liquid than the market for investment grade securities. Less liquidity in the secondary trading market could adversely affect the net asset value of the Shares. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of non-investment grade bonds, especially in a thinly traded market. When secondary markets for non-investment grade bonds are less liquid than the market for investment grade securities, it may be more difficult to value the securities because such valuation may require more research, and elements of judgment may play a greater role in the valuation because there is no reliable, objective data available. During periods of thin trading in these markets, the spread between bid and asked prices is likely to increase significantly and the Fund may have greater difficulty selling these securities. The Fund will be more dependent on Eaton Vance's research and analysis when investing in non-investment grade bonds. Eaton Vance seeks to minimize the risks of investing in all securities through in-depth credit analysis and attention to current developments in interest rate and market conditions.

A general description of the ratings of securities by S&P, Fitch and Moody's is set forth in Appendix A to this Statement of Additional Information. Such ratings represent these rating organizations' opinions as to the quality of the securities they rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. Consequently, debt obligations with the same maturity, coupon and rating may have different yields while obligations with the same maturity and coupon may have the same yield. For these reasons, the use of credit ratings as the sole method of evaluating non-investment grade securities can involve certain risks. For example, credit ratings evaluate the safety or principal and interest payments, not the market value risk of non-investment grade securities. Also, credit rating agencies may fail to change credit ratings in a timely fashion to reflect events since the security was last rated. Eaton Vance does not rely solely on credit ratings when selecting securities for the Fund, and develops its own independent analysis of issuer credit quality.

In the event that a rating agency or Eaton Vance downgrades its assessment of the credit characteristics of a particular issue, the Fund is not required to dispose of such security. In determining whether to retain or sell a downgraded security, Eaton Vance may consider such factors as Eaton Vance's assessment of the credit quality of the issuer of such security, the price at which such security could be sold and the rating, if any, assigned to such security by other rating agencies. However, analysis of the creditworthiness of issuers of non-investment grade securities may be more complex than for issuers of high quality debt securities.

OTHER INVESTMENTS

FIXED INCOME SECURITIES

Fixed income securities include preferred, preference and convertible securities, equipment lease certificates, equipment trust certificates and conditional sales contracts. Preference stocks are stocks that have many

characteristics of preferred stocks, but are typically junior to an existing class of preferred stocks. Equipment lease certificates are debt obligations secured by leases on equipment (such as railroad cars, airplanes or office

PORTFOLIO TRADING

equipment), with the issuer of the certificate being the owner and lessor of the equipment. Equipment trust certificates are debt obligations secured by an interest in property (such as railroad cars or airplanes), the title of which is held by a trustee while the property is being used by the borrower. Conditional sales contracts are agreements under which the seller of property continues to hold title to the property until the purchase price is fully paid or other conditions are met by the buyer.

Fixed-rate bonds may have a demand feature allowing the holder to redeem the bonds at specified times. These bonds are more defensive than conventional long-term bonds (protecting to some degree against a rise in interest rates) while providing greater opportunity than comparable intermediate term bonds, since they may be retained if interest rates decline. Acquiring these kinds of bonds provides the contractual right to require the issuer of the bonds to purchase the security at an agreed upon price, which right is contained in the obligation itself rather than in a separate agreement or instrument. Since this right is assignable only with the bond, it will not be assigned any separate value.

Certain securities may permit the issuer at its option to "call," or redeem, the securities. If an issuer were to redeem securities during a time of declining interest rates, the Fund may not be able to reinvest the proceeds in securities providing the same investment return as the securities redeemed.

The rating assigned to a security by a rating agency does not reflect assessment of the volatility of the security's market value or of the liquidity of an investment in the securities. Credit ratings are based largely on the issuer's historical financial condition and the rating agency's investment analysis at the time of rating, and the rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition. Credit quality in the high yield, high risk bond market can change from time to time, and recently issued credit ratings may not fully reflect the actual risks posed by a particular high yield security. In addition to lower rated securities, the Fund also may invest in higher rated securities. For a description of corporate bond ratings, see Appendix A.

REPURCHASE AGREEMENTS

The Fund may enter into repurchase agreements (the purchase of a security coupled with an agreement to resell at a higher price) with respect to its permitted investments. In the event of the bankruptcy of the other party to a repurchase agreement, the Fund might experience delays in recovering its cash. To the extent that, in the meantime, the value of the securities the Fund purchased may have decreased, the Fund could experience a loss. Repurchase agreements which mature in more than seven days will be treated as illiquid. The Fund's repurchase agreements will provide that the value of the collateral underlying the repurchase agreement will always be at least equal to the repurchase price, including any accrued interest earned on the agreement, and will be marked to market daily.

ZERO COUPON BONDS

Zero coupon bonds are debt obligations which do not require the periodic payment of interest and are issued at a significant discount from face value. The discount approximates the total amount of interest the bonds will accrue

and compound over the period until maturity at a rate of interest reflecting the market rate of the security at the time of issuance. The Fund is required to accrue income from zero coupon bonds on a current basis, even though it does not receive that income currently in cash and the Fund is required to distribute its income for each taxable year. Thus, the Fund may have to sell other investments to obtain cash needed to make income distributions.

INDEXED SECURITIES AND DERIVATIVES

The Fund's investments in indexed securities and derivatives as described in the Prospectus may include to a limited extent indexed securities or derivatives that are based upon the value of indices of foreign fixed-income/debt securities and/or, foreign equity securities. The investment value of such a security or derivative may change positively or inversely in relation to one or more these indices or other financial indicators described in the prospectus ("reference prices"). An indexed security or derivative may be leveraged to the extent that the magnitude of any change in the interest rate, principal or other payment payable on an indexed security is a multiple of the change in the reference price. Thus, indexed securities and derivatives may decline in value due to adverse market changes in reference prices. Because indexed securities derive their value from another instrument, security or index, they are considered derivative debt securities, and are subject to different combinations of prepayment, extension, interest rate and/or other market risks.

SHORT SALES

The Fund may utilize short sales for hedging, risk management and speculative purposes. A short sale is affected by selling a security which the Fund does not own, or, if the Fund does own the security, is not to be delivered upon consummation of the sale. The Fund may engage in short sales "against the box" (I.E., short sales of securities the Fund already owns) for hedging, risk management and speculative purposes. If the price of the security in the short sale decreases, the Fund will realize a profit to the extent that the short sale price for the security exceeds the market price. If the price of the security increases, the Fund will realize a loss to the extent that the market

8

PORTFOLIO TRADING

price exceeds the short sale price. Selling securities short runs the risk of losing an amount greater than the initial investment therein.

Purchasing securities to close out the short position can itself cause the price of the securities to rise further, thereby exacerbating the loss. Short-selling exposes the Fund to unlimited risk with respect to that security due to the lack of an upper limit on the price to which an instrument can rise. Although the Fund reserves the right to utilize short sales, the Adviser is under no obligation to utilize shorts at all.

FOREIGN INVESTMENTS

The Fund may have substantial exposure to foreign securities. Because foreign companies are not subject to uniform accounting, auditing and financial reporting standards, practices and requirements comparable to those applicable to U.S. companies, there may be less publicly available information about a foreign company than about a domestic company. Volume and liquidity in most foreign debt markets is less than in the United States and securities of some foreign companies are less liquid and more volatile than securities of comparable U.S. companies. There is generally less government supervision and regulation of securities exchanges, broker-dealers and listed companies than in

the United States. Mail service between the United States and foreign countries may be slower or less reliable than within the United States, thus increasing the risk of delayed settlements of portfolio transactions or loss of certificates for portfolio securities. Payment for securities before delivery may be required. In addition, with respect to certain foreign countries, there is the possibility of expropriation or confiscatory taxation, political or social instability, or diplomatic developments which could affect investments in those countries. Moreover, individual foreign economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. Foreign securities markets, while growing in volume and sophistication, are generally not as developed as those in the United States, and securities of some foreign issuers (particularly those located in developing countries) may be less liquid and more volatile than securities of comparable U.S. companies.

American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs) may be purchased. ADRs, EDRs and GDRs are certificates evidencing ownership of shares of a foreign issuer and are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, they continue to be subject to many of the risks associated with investing directly in foreign securities. These risks include foreign exchange risk as well as the political and economic risks of the underlying issuer's country. ADRs, EDRs and GDRs may be sponsored or unsponsored. Unsponsored receipts are established without the participation of the issuer. Unsponsored receipts may involve higher expenses, they may not pass-through voting or other shareholder rights, and they may be less liquid.

OPTIONS

Call options may be purchased to provide exposure to increases in the market (E.G., with respect to temporary cash positions) or to hedge against an increase in the price of securities or other investments that the Fund intends to purchase or has sold short. Similarly, put options may be purchased for speculative purposes or to hedge against a decrease in the market generally or in the price of securities or other investments held by the Fund. Buying options may reduce the Fund's returns, but by no more than the amount of the premiums paid for the options.

The Fund may write covered and uncovered call options (I.E., where the Fund owns the security or other investment that is subject to the call) to enhance returns when the Adviser perceives that the option premium offered is in excess of the premium that the Adviser would expect to be offered under existing market conditions, or if the exercise price of the option is in excess of the price that the Adviser expects the security or other underlying investment to reach during the life of the option. Writing covered call options may limit the Fund's gain on portfolio investments if the option is exercised because the Fund will have to sell the underlying investments below the current market price. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary market risks.

SHORT-TERM TRADING

Securities may be sold in anticipation of market decline (a rise in interest rates) or purchased in anticipation of a market rise (a decline in interest rates) and later sold. In addition, a security may be sold and another purchased at approximately the same time to take advantage of what the Adviser believes to be a temporary disparity in the normal yield relationship between the two securities. Yield disparities may occur for reasons not directly related to the investment quality of particular issues or the general movement of interest rates, such as changes in the overall demand for or supply of various types of fixed income securities or changes in the investment objectives of investors.

TEMPORARY INVESTMENTS

PORTFOLIO TRADING

The Fund may invest temporarily in cash or cash equivalents. Cash equivalents are highly liquid, short-term securities such as commercial paper, certificates of deposit, short-term notes and short-term U.S. Government obligations.

INVESTMENT RESTRICTIONS

The following investment restrictions of the Fund are designated as fundamental policies and as such cannot be changed without the approval of the holders of a majority of the Fund's outstanding voting securities, which as used in this SAI means the lesser of (a) 67% of the shares of the Fund present or represented by proxy at a meeting if the holders of more than 50% of the outstanding shares are present or represented at the meeting or (b) more than 50% of outstanding shares of the Fund. As a matter of fundamental policy the Fund may not:

- (1) Borrow money, except as permitted by the Investment Company Act of 1940 (the "1940 Act"). The 1940 Act currently requires that any indebtedness incurred by a closed-end investment company have an asset coverage of at least 300%;
- (2) Issue senior securities, as defined in the 1940 Act, other than (i) preferred shares which immediately after issuance will have asset coverage of at least 200%, (ii) indebtedness which immediately after issuance will have asset coverage of at least 300%, or (iii) the borrowings permitted by investment restriction (1) above. The 1940 Act currently defines "senior security" as any bond, debenture, note or similar obligation or instrument constituting a security and evidencing indebtedness, and any stock of a class having priority over any other class as to distribution of assets or payment of dividends. Debt and equity securities issued by a closed-end investment company meeting the foregoing asset coverage provisions are excluded from the general 1940 Act prohibition on the issuance of senior securities;
- (3) Purchase securities on margin (but the Fund may obtain such short-term credits as may be necessary for the clearance of purchases and sales of securities). The purchase of investment assets with the proceeds of a permitted borrowing or securities offering will not be deemed to be the purchase of securities on margin;
- (4) Underwrite securities issued by other persons, except insofar as it may technically be deemed to be an underwriter under the Securities Act of 1933 in selling or disposing of a portfolio investment;
- (5) Make loans to other persons, except by (a) the acquisition of loan interests, debt securities and other obligations in which the Fund is authorized to invest in accordance with its investment objectives and policies, (b) entering into repurchase agreements, and (c) lending its portfolio securities;
- (6) Purchase or sell real estate, although it may purchase and sell securities which are secured by interests in real estate and securities of issuers which invest or deal in real estate. The Fund reserves the freedom of action to hold and to sell real estate acquired as a result of the ownership of securities;
- (7) Purchase or sell physical commodities or contracts for the purchase or sale

of physical commodities. Physical commodities do not include futures contracts with respect to securities, securities indices or other financial instruments;

- (8) With respect to 75% of its total assets, invest more than 5% of its total assets in the securities of a single issuer or purchase more than 10% of the outstanding voting securities of a single issuer, except obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities and except securities of other investment companies; and
- (9) Invest 25% or more of its total assets in any single industry (other than securities issued or guaranteed by the U.S. government or its agencies or instrumentalities).

The Fund may borrow money as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities. The 1940 Act currently requires that the Fund have 300% asset coverage with respect to all borrowings other than temporary borrowings.

For purposes of construing restriction (8), securities of the U.S. Government, its agencies, or instrumentalities are not considered to represent industries. Municipal obligations backed by the credit of a governmental entity are also not considered to represent industries.

The Fund has adopted the following nonfundamental investment policy which may be changed by the Board without approval of the Fund's shareholders. As a matter of nonfundamental policy, the Fund may not make short sales of securities or maintain a short position, unless at all times when a short position is open it either owns an equal amount of such securities or owns

10

PORTFOLIO TRADING

securities convertible into or exchangeable, without payment of any further consideration, for securities of the same issue as, and equal in amount to, the securities sold short.

Upon the Board's approval, the Fund may invest more than 10% of its total assets in one or more other management investment companies (or may invest in affiliated investment companies) to the extent permitted by the 1940 Act and rules thereunder.

Whenever an investment policy or investment restriction set forth in the Prospectus or this SAI states a maximum percentage of assets that may be invested in any security or other asset or describes a policy regarding quality standards, such percentage limitation or standard shall be determined immediately after and as a result of the Fund's acquisition of such security or asset. Accordingly, any later increase or decrease resulting from a change in values, assets or other circumstances or any subsequent rating change made by a rating service (or as determined by the Adviser if the security is not rated by a rating agency) will not compel the Fund to dispose of such security or other asset. Notwithstanding the foregoing, the Fund must always be in compliance with the borrowing policies set forth above.

As described in the Prospectus, under normal market circumstances, the Fund expects to maintain a weighted average portfolio credit quality of investment grade. In determining the average credit quality of the Fund, Eaton Vance

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

intends to use a methodology, based structurally on the S&P or Moody's rating system (or both) described in Appendix A to this SAI, which assumes a linear relationship in the credit quality ratings for ratings between C and AAA (Aaa). Securities with a rating below C will not be assigned any value in the calculation of average credit quality. For the purpose of determining the Fund's average credit quality, when a security is rated by more than one nationally recognized statistical rating agency, the Adviser generally will use the highest rating available. Within this general guideline, the Fund may invest in individual securities of any credit quality. The Fund's holdings of Non-Investment Grade Bonds and Senior Loans with lower credit ratings generally will be offset by MBS with very high credit ratings. A "barbell" portfolio of lower rated and higher rated securities may have risk characteristics that differ from fixed income securities with credit ratings equivalent to the portfolio average.

PORTFOLIO TRADING

TRUSTEES AND OFFICERS

[The Trustees of the Fund are responsible for the overall management and supervision of the affairs of the Fund. The Trustees and officers of the Fund are listed below. Except as indicated, each individual has held the office shown or other offices in the same company for the last five years. The "noninterested Trustees" consist of those Trustees who are not "interested persons" of the Fund, as that term is defined under the 1940 Act. The business address of each Trustee and officer is The Eaton Vance Building, 255 State Street, Boston, Massachusetts 02109. As used in this SAI, "EVC" refers to Eaton Vance Corp., "EV" refers to Eaton Vance, Inc., "BMR" refers to Boston Management and Research, and "EVD" refers to Eaton Vance Distributors Inc. EVC and EV are the corporate parent and trustee, respectively, of Eaton Vance and BMR.]

The Board of Trustees of the Fund has several standing Committees, including the Governance Committee, the Audit Committee, and the Special Committee. Each such Committee is comprised of only noninterested Trustees.

The Governance Committee of the Board of Trustees of the Fund is comprised of the non-interested Trustees. [] currently serves as chairperson of the Governance Committee. The purpose of the Governance Committee is to consider, evaluate and make recommendations to the Board of Trustees with respect to the structure, membership and operation of the Board of Trustees and the Committees thereof, including the nomination and selection of non-interested Trustees and the compensation of non-interested Trustees.

The Governance Committee will, when a vacancy exists or is anticipated, consider any nominee for noninterested Trustee recommended by a shareholder if such recommendation is submitted to the Governance Committee, contains sufficient background information concerning the candidate and is received in a sufficiently timely manner.

Messrs. [] (Chairman), [] and [] and [] are members of the Audit Committee of the Board of Trustees of the Fund. The Board of Trustees has designated Messrs. [], [] and [], each a non-interested Trustee, as audit committee financial experts. The Audit Committee's purposes are to (i) oversee the Fund's accounting and financial reporting processes, its internal control over financial reporting, and, as appropriate, the internal control over financial reporting of certain service providers; (ii) oversee or, as appropriate, assist Board oversight of the quality and integrity of the Fund's financial statements and the independent audit thereof; (iii) oversee, or, as appropriate, assist Board oversight of, the Fund's compliance with legal and regulatory requirements that relate to the Fund's accounting and financial reporting, internal control over financial reporting and independent audits; (iv) approve prior to appointment the engagement and, when appropriate, replacement of the independent registered public accounting firm, and, if applicable, nominate the independent registered public accounting firm to be proposed for shareholder ratification in any proxy statement of the Fund; (v) evaluate the qualifications, independence and performance of the independent registered public accounting firm and the audit partner in charge of leading the audit; and (vi) prepare, as necessary, audit committee reports consistent with the requirements of Rule 306 of Regulation S-K for inclusion in the proxy statement of the Fund.

Messrs. [] (Chairman), [], [], [] and [] are currently members of the Special Committee of the Board of Trustees of the Fund. The purposes of the Special Committee are to consider, evaluate and make recommendations to the Board of Trustees concerning the following matters: (i) contractual arrangements with each service provider to the Fund, including advisory, sub-advisory, transfer agency, custodial and fund accounting, distribution services and administrative services; (ii) any and all other matters in which any of the Fund service providers (including Eaton Vance or any affiliated entity thereof) has an actual or potential conflict of interest with the interests of the Fund, or investors therein; and (iii) any other matter appropriate for review by the

PORTFOLIO TRADING

non-interested Trustees, unless the matter is within the responsibilities of the Audit Committee or the Governance Committee of the Fund.

As of the date of this SAI, the Governance Committee has [] times, the Audit Committee and Special Committee have met [] times.

When considering approval of the Advisory Agreement between the Fund and the Adviser, the Special Committee considered, among other things, the following:

- + A report comparing the fees and expenses of the Fund and certain profitability analyses prepared by Eaton Vance;
- + Information on the relevant peer group(s) of funds;
- + The economic outlook and the general investment outlook in the relevant investment markets;
- + Eaton Vance's results and financial condition and the overall organization of the Adviser and the Sub-Adviser;
- + Arrangements regarding the distribution of Fund shares;
- + The procedures used to determine the fair value of the Fund's assets;
- + The allocation of brokerage and the benefits received by the Adviser as the result of brokerage allocation; including allocations to soft dollar brokerage and allocations to firms that sell Eaton Vance fund shares;
- + Eaton Vance's management of the relationship with the custodian, subcustodians and fund accountants;
- + The resources devoted to Eaton Vance's compliance efforts undertaken on behalf of the funds it manages and the record of compliance with the investment policies and restrictions and with policies on personal securities transactions;
- + The quality, nature, cost and character of the administrative and other non-investment management services provided by Eaton Vance and its affiliates;
- + The terms of the Advisory Agreement, and the reasonableness and appropriateness of the particular fee paid by the Fund for the services described therein;
- + Operating expenses (including transfer agency expenses) to be paid to third parties; and
- + Information to be provided to investors, including the Fund's shareholders.

In evaluating the Advisory Agreement between the Fund and Eaton Vance, the Special Committee reviewed material furnished by Eaton Vance at the initial Board meeting held on [], 2004, including the above referenced considerations and information relating to the education, experience and number of investment professionals and other personnel who would provide services under the Advisory

Agreement and under the Sub-Advisory Agreement. The Special Committee also took into account the time and attention to be devoted by senior management to the Fund and the other funds in the complex. The Special Committee evaluated the level of skill required to manage the Fund and concluded that the human resources available at Eaton Vance were appropriate to fulfill effectively the duties of the Adviser on behalf of the Fund. The Special Committee also considered the business reputation of the Adviser, its financial resources and professional liability insurance coverage and concluded that Eaton Vance would be able to meet any reasonably foreseeable obligations under the Advisory Agreement.

The Special Committee received information concerning the investment philosophy and investment process to be applied by Eaton Vance in managing the Fund. In this regard, the Special Committee considered Eaton Vance's in-house research capabilities as well as other resources available to Eaton Vance personnel, including research services that may be available to Eaton Vance as a result of securities transactions effected for the Fund and other investment advisory clients. The Special Committee concluded that Eaton Vance's investment process, research capabilities and philosophy were well suited to the Fund, given the Fund's investment objective and policies.

In addition to the factors mentioned above, the Special Committee also reviewed the level of the Adviser's profits in respect of the management of the Eaton Vance funds, including the Fund. The Special Committee considered the other profits realized by Eaton Vance and its affiliates in connection with the

14

PORTFOLIO TRADING

operation of the Fund. The Special Committee also considered profit margins of Eaton Vance in comparison with available industry data. In addition, the Special Committee considered the fiduciary duty assumed by the Adviser in connection with the service rendered to the Fund and the business reputation of the Adviser, its financial resources and its professional liability insurance coverage.

The Special Committee did not consider any single factor as controlling in determining whether or not to approve the Advisory Agreement. Nor are the items described herein all encompassing of the matters considered by the Special Committee. In assessing the information provided by Eaton Vance and its affiliates, the Special Committee also took into consideration the benefits to shareholders of investing in a fund that is part of a large family of funds which provides a large variety of shareholder services.

Based on its consideration of all factors that it deemed material and assisted by the advice of its independent counsel, the Special Committee concluded that the approval of the Advisory Agreement, including the fee structure (described herein) is in the interests of shareholders. The Special Committee also considered that the Adviser would enter into a Shareholder Services Agreement with [], whereby the Adviser (and not the Fund) would pay [] to provide upon request certain market data and reports to support shareholder services pursuant to the agreement.

SHARE OWNERSHIP

The following table shows the dollar range of equity securities beneficially owned by each Trustee in the Fund and all Eaton Vance Funds overseen by the Trustee as of December 31, 200[].

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

|-----------------|---|---|
|-----------------|---|---|

 INTERESTED TRUSTEES

.....

NONINTERESTED TRUSTEES

.....

As of [_____], no noninterested Trustee or any of their immediate family members owned beneficially or of record any class of securities of EVC, EVD or any person controlling, controlled by or under common control with EVC or EVD.

During the calendar years ended December 31, 200[] and December 31, 200[], no noninterested Trustee (or their immediate family members) had:

1. Any direct or indirect interest in Eaton Vance, EVC, EVD or any person controlling, controlled by or under common control with EVC or EVD;
2. Any direct or indirect material interest in any transaction or series of similar transactions with (i) the Trust or any Fund; (ii) another fund managed by EVC, distributed by EVD or a person controlling, controlled by or under common control with EVC or EVD; (iii) EVC or EVD; (iv) a person controlling, controlled by or under common control with EVC or EVD; or (v) an officer of any of the above; or
3. Any direct or indirect relationship with (i) the Trust or any Fund; (ii) another fund managed by EVC, distributed by EVD or a person controlling, controlled by or under common control with EVC or EVD; (iii) EVC or EVD; (iv) a person controlling, controlled by or under common control with EVC or EVD; or (v) an officer of any of the above.

During the calendar years ended December 31, 200[] and December 31, 200[], no officer of EVC, EVD or any person controlling, controlled by or under common control with EVC or EVD served on the Board of Directors of a company where a noninterested Trustee of the Fund or any of their immediate family members served as an officer.

Trustees of the Fund who are not affiliated with the Adviser may elect to defer receipt of all or a percentage of their annual fees in accordance with the terms of a Trustees Deferred Compensation Plan (the "Trustees' Plan"). Under the Trustees' Plan, an eligible Trustee may elect to have his deferred fees invested by the Fund in the shares of one or more funds in the Eaton Vance Family of Funds, and the amount paid to the Trustees under the Trustees' Plan

PORTFOLIO TRADING

 will be determined based upon the performance of such investments. Deferral of Trustees' fees in accordance with the Trustees' Plan will have a negligible effect on the Fund's assets, liabilities, and net income per share, and will not obligate the Fund to retain the services of any Trustee or obligate the Fund to pay any particular level of compensation to the Trustee. The Fund does not have a retirement plan for its Trustees.

The fees and expenses of the Trustees of the Fund are paid by the Fund. (A

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

Trustee of the Fund who is a member of the Eaton Vance organization receives no compensation from the Fund.) During the Fund's fiscal year ending May 31, 2005 it is anticipated that the Trustees of the Fund will earn the following compensation in their capacities as Trustees. For the year ended December 31, 200[], the Trustees earned the compensation set forth below in their capacities as Trustees from the funds in the Eaton Vance fund complex(1).

(1) AS OF _____, 2004, THE EATON VANCE FUND COMPLEX CONSISTED OF [197] REGISTERED INVESTMENT COMPANIES OR SERIES THEREOF.

PROXY VOTING POLICY. The Fund is subject to the Eaton Vance Funds Proxy Voting Policy and Procedures (the "Fund Policy"), pursuant to which the Trustees have delegated proxy voting responsibility to the Adviser and adopted the Adviser's proxy voting policies and procedures (the "Policies") which are described below. The Trustees will review the Fund's proxy voting records from time to time and will annually consider approving the Policies for the upcoming year. In the event that a conflict of interest arises between the Fund's shareholders and the Adviser or any of its affiliates or any affiliate of the Fund, the Adviser will generally refrain from voting the proxies related to the companies giving rise to such conflict until it consults with the Board of the Fund, except as contemplated under the Fund Policy. The Board's Special Committee will instruct the Adviser on the appropriate course of action.

The Policies are designed to promote accountability of a company's management to its shareholders and to align the interests of management with those shareholders. The Adviser will generally support company management on proposals relating to environmental and social policy issues, on matters regarding the state of organization of the company and routine matters related to corporate administration which are not expected to have a significant economic impact on the company or its shareholders. On all other matters, the Adviser will review each matter on a case-by-case basis and reserves the right to deviate from the Policies' guidelines when it believes the situation warrants such a deviation. The Policies include voting guidelines for matters relating to, among other things, the election of directors, approval of independent auditors, executive compensation, corporate structure and anti-takeover defenses. The Adviser may abstain from voting from time to time where it determines that the costs associated with voting a proxy outweigh the benefits derived from exercising the right to vote.

In addition, the Adviser will monitor situations that may result in a conflict of interest between the Fund's shareholders and the Adviser or any of its affiliates or any affiliate of the Fund by maintaining a list of significant existing and prospective corporate clients. The Adviser's personnel responsible for reviewing and voting proxies on behalf of the Fund will report any proxy received or expected to be received from a company included on that list to members of senior management of the Adviser identified in the Policies. Such members of senior management will determine if a conflict exists. If a conflict does exist, the proxy will either be voted strictly in accordance with the Policies or the Adviser will seek instruction on how to vote from the Special Committee. Information on how the Fund voted proxies relating to portfolio securities during the 12 month period ended June 30, 2005 will be available (1)

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

without charge, upon request, by calling 1-800-262-1122, and (2) on the Securities and Exchange Commission's website at <http://www.sec.gov>.

INVESTMENT ADVISORY AND OTHER SERVICES

Eaton Vance, its affiliates and its predecessor companies have been managing assets of individuals and institutions since 1924 and of investment companies since 1931. They maintain a large staff of experienced fixed-income, senior loan and equity investment professionals to service the needs of their clients. The fixed-income group focuses on all kinds of taxable investment-grade and high-yield securities, tax-exempt investment-grade and high-yield securities, and U.S. Government securities. The senior loan group focuses on senior floating rate loans, unsecured loans and other floating rate debt securities such as notes, bonds and asset backed securities. The equity group covers stocks ranging from blue chip to emerging growth companies. Eaton Vance and its affiliates act

16

PORTFOLIO TRADING

as adviser to a family of mutual funds, and individual and various institutional accounts, including corporations, hospitals, retirement plans, universities, foundations and trusts.

The Fund will be responsible for all of its costs and expenses not expressly stated to be payable by Eaton Vance under the Advisory Agreement or Administration Agreement. Such costs and expenses to be borne by the Fund include, without limitation: custody and transfer agency fees and expenses, including those incurred for determining net asset value and keeping accounting books and records; expenses of pricing and valuation services; the cost of share certificates; membership dues in investment company organizations; expenses of acquiring, holding and disposing of securities and other investments; fees and expenses of registering under the securities laws, stock exchange listing fees and governmental fees; rating agency fees and preferred share remarketing expenses; expenses of reports to shareholders, proxy statements and other expenses of shareholders' meetings; insurance premiums; printing and mailing expenses; interest, taxes and corporate fees; legal and accounting expenses; compensation and expenses of Trustees not affiliated with Eaton Vance; expenses of conducting repurchase offers for the purpose of repurchasing Fund shares; and investment advisory and administration fees. The Fund will also bear expenses incurred in connection with any litigation in which the Fund is a party and any legal obligation to indemnify its officers and Trustees with respect thereto, to the extent not covered by insurance.

The Advisory Agreement with the Adviser continues in effect to [_____] and from year to year so long as such continuance is approved at least annually (i) by the vote of a majority of the noninterested Trustees of the Fund or of the Adviser cast in person at a meeting specifically called for the purpose of voting on such approval and (ii) by the Board of Trustees of the Fund or by vote of a majority of the outstanding interests of the Fund. The Fund's Administration Agreement continues in effect from year to year so long as such continuance is approved at least annually by the vote of a majority of the Fund's Trustees. Each agreement may be terminated at any time without penalty on sixty (60) days' written notice by the Trustees of the Fund or Eaton Vance, as applicable, or by vote of the majority of the outstanding shares of the Fund. Each agreement will terminate automatically in the event of its assignment. Each agreement provides that, in the absence of willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations or duties to the Fund under such agreements on the part of Eaton

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

Vance, Eaton Vance shall not be liable to the Fund for any loss incurred, to the extent not covered by insurance.

Eaton Vance is a business trust organized under Massachusetts law. EV serves as trustee of Eaton Vance. Eaton Vance and EV are subsidiaries of EVC, a Maryland corporation and publicly-held holding company. EVC through its subsidiaries and affiliates engages primarily in investment management, administration and marketing activities. The Directors of EVC are James B. Hawkes, John G. L. Cabot, Thomas E. Faust Jr., Leo I. Higdon, Jr., John M. Nelson, Vincent M. O'Reilly and Ralph Z. Sorenson. All shares of the outstanding Voting Common Stock of EVC are deposited in a voting trust, the voting trustees of which are Messrs. James B. Hawkes, Jeffrey P. Beale, Alan R. Dynner, Thomas E. Faust, Jr., Thomas J. Fetter, Scott H. Page, Duncan W. Richardson, William M. Steul, Payson F. Swaffield, Michael W. Weilheimer and Wharton P. Whitaker (all of whom are officers of Eaton Vance). The voting trustees have unrestricted voting rights for the election of Directors of EVC. All of the outstanding voting trust receipts issued under said voting trust are owned by certain of the officers of BMR and Eaton Vance who are also officers, or officers and Directors of EVC and EV. As indicated under "Trustees and Officers", all of the officers of the Fund (as well as Mr. Hawkes who is also a Trustee) hold positions in the Eaton Vance organization.

EVC and its affiliates and their officers and employees from time to time have transactions with various banks, including the custodian of the Fund, IBT. It is Eaton Vance's opinion that the terms and conditions of such transactions were not and will not be influenced by existing or potential custodial or other relationships between the Fund and such banks.

CODE OF ETHICS

The Adviser and the Fund have adopted a Code of Ethics governing personal securities transactions. Under the Code, Eaton Vance employees may purchase and sell securities (including securities held or eligible for purchase by the Fund) subject to certain pre-clearance and reporting requirements and other procedures.

The Code can be reviewed and copied at the Securities and Exchange Commission's public reference room in Washington, DC (call 1-202-942-8090 for information on the operation of the public reference room); on the EDGAR Database on the SEC's Internet site (<http://www.sec.gov>); or, upon payment of copying fees, by writing the SEC's public reference section, Washington, DC 20549-0102, or by electronic mail at publicinfo@sec.gov.

INVESTMENT ADVISORY SERVICES

Under the general supervision of the Fund's Board of Trustees, Eaton Vance will carry out the investment and reinvestment of the assets of the Fund, will furnish continuously an investment program with respect to the Fund, will determine which securities should be purchased, sold or exchanged, and will implement such determinations. Eaton Vance will furnish to the Fund investment advice and provide related office facilities and personnel for servicing the

PORTFOLIO TRADING

investments of the Fund. Eaton Vance will compensate all Trustees and officers of the Fund who are members of the Eaton Vance organization and who render investment services to the Fund, and will also compensate all other Eaton Vance personnel who provide research and investment services to the Fund.

ADMINISTRATIVE SERVICES

Under the Administration Agreement, Eaton Vance is responsible for managing the business affairs of the Fund, subject to the supervision of the Fund's Board of

Trustees. Eaton Vance will furnish to the Fund all office facilities, equipment and personnel for administering the affairs of the Fund. Eaton Vance will compensate all Trustees and officers of the Fund who are members of the Eaton Vance organization and who render executive and administrative services to the Fund, and will also compensate all other Eaton Vance personnel who perform management and administrative services for the Fund. Eaton Vance's administrative services include recordkeeping, preparation and filing of documents required to comply with federal and state securities laws, supervising the activities of the Fund's custodian and transfer agent, providing assistance in connection with the Trustees and shareholders' meetings, providing services in connection with quarterly repurchase offers and other administrative services necessary to conduct the Fund's business.

18

PORTFOLIO TRADING

DETERMINATION OF NET ASSET VALUE

The net asset value per Share of the Fund is determined no less frequently than weekly, generally on the last day of the week that the New York Stock Exchange (the "Exchange") is open for trading, as of the close of regular trading on the Exchange (normally 4:00 p.m. New York time). The Fund's net asset value per Share is determined by IBT, in the manner authorized by the Trustees of the Fund. Net asset value is computed by dividing the value of the Fund's total assets, less its liabilities by the number of shares outstanding.

The Trustees of the Fund have established the following procedures for fair valuation of the Fund's assets under normal market conditions. Marketable securities listed on foreign or U.S. securities exchanges generally are valued at closing sale prices or, if there were no sales, at the mean between the closing bid and asked prices therefor on the exchange where such securities are principally traded (such prices may not be used, however, where an active over-the-counter market in an exchange listed security better reflects current market value). Marketable securities listed in the NASDAQ National Market System are valued at the NASDAQ official closing price. Unlisted or listed securities for which closing sale prices are not available are valued at the mean between the latest bid and asked prices. An option is valued at the last sale price as quoted on the principal exchange or board of trade on which such option or contract is traded, or in the absence of a sale, at the mean between the last bid and asked prices.

The Adviser and the Valuation Committee may implement new pricing methodologies or expand mark-to-market valuation of debt securities whose market prices are not readily available in the future, which may result in a change in the Fund's net asset value per share. The Fund's net asset value per share will also be affected by fair value pricing decisions and by changes in the market for such debt securities. In determining the fair value of a debt security, the Adviser will consider relevant factors, data, and information, including: (i) the characteristics of and fundamental analytical data relating to the debt security, including the cost, size, current interest rate, period until next interest rate reset, maturity and base lending rate of the debt security, the terms and conditions of the debt security and any related agreements, and the position of the debt security in the borrower's debt structure; (ii) the nature, adequacy and value of the collateral, including the Fund's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the borrower, based on an evaluation of its financial condition, financial statements and information about the borrower's business, cash flows, capital structure and future prospects; (iv) information relating to the market for the

debt security, including price quotations for and trading in the debt security and interests in similar debt securities and the market environment and investor attitudes towards the debt security and interests in similar debt securities; (v) the experience, reputation, stability and financial condition of the agent and any intermediate participants in the debt security; and (vi) general economic and market conditions affecting the fair value of the debt security. The fair value of each debt security is reviewed and approved by the Adviser's Valuation Committee and the Fund's Trustees.

The Adviser uses an independent pricing service to value most loans, mortgage-backed securities (other than seasoned mortgage-backed securities) and other debt securities at their market value. Seasoned mortgage-backed securities are valued through the use of an independent matrix pricing system which takes into account bond prices, yield differentials, anticipated prepayment and interest rates provided by dealers. The Adviser may use the fair value method to value loans or other securities if market quotations for them are not readily available or are deemed unreliable, or if events occurring after the close of a securities market and before the Fund values its assets would materially affect net asset value. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures.

The Trustees have approved and monitor the procedures under which Senior Loans are valued. The Adviser and the Valuation Committee may implement new pricing methodologies or expand mark-to-market valuation of Senior Loans in the future, which may result in a change in the Fund's net asset value per share. The Fund's net asset value per share will also be affected by fair value pricing decisions and by changes in the market for Senior Loans. In determining the fair value of a Senior Loan, the Adviser will consider relevant factors, data, and information, including: (i) the characteristics of and fundamental analytical data relating to the Senior Loan, including the cost, size, current interest rate, period until next interest rate reset, maturity and base lending rate of the Senior Loan, the terms and conditions of the Senior Loan and any related agreements, and the position of the Senior Loan in the Borrower's debt structure; (ii) the nature, adequacy and value of the collateral, including the Fund's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the Borrower, based on an evaluation of its financial condition, financial statements and information about the Borrower's business, cash flows, capital structure and future prospects; (iv) information relating to the market for the Senior Loan, including price quotations for and trading in the Senior Loan and interests in similar Senior Loans and the market environment and investor attitudes towards the Senior Loan and interests in similar Senior Loans; (v) the experience, reputation, stability and financial condition of the Agent and any intermediate participants in the Senior Loan;

PORTFOLIO TRADING

and (vi) general economic and market conditions affecting the fair value of the Senior Loan. The fair value of each Senior Loan is reviewed and approved by the Adviser's Valuation Committee and the Fund's Trustees.

Non-loan holdings (other than debt securities, including short term obligations) may be valued on the basis of prices furnished by one or more pricing services which determine prices for normal, institutional-size trading units of such securities using market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders. In certain circumstances, portfolio securities will be valued at the last sale price on the exchange that is the primary market for such securities, or the average of the last quoted bid price and asked price for those securities for which the over-the-counter market is the primary market or

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

for listed securities in which there were no sales during the day. Marketable securities listed on the NASDAQ National Market System are valued at the NASDAQ official closing price. The value of interest rate swaps will be based upon a dealer quotation.

Debt securities for which the over-the-counter market is the primary market are normally valued on the basis of prices furnished by one or more pricing services at the mean between the latest available bid and asked prices. OTC options are valued at the mean between the bid and asked prices provided by dealers. Financial futures contracts listed on commodity exchanges and exchange-traded options are valued at closing settlement prices. Short-term obligations having remaining maturities of less than 60 days are valued at amortized cost, which approximates value, unless the Trustees determine that under particular circumstances such method does not result in fair value. As authorized by the Trustees, debt securities (other than short-term obligations) may be valued on the basis of valuations furnished by a pricing service which determines valuations based upon market transactions for normal, institutional-size trading units of such securities. Mortgage-backed "pass-through" securities are valued through use of an independent matrix pricing system applied by the Adviser which takes into account closing bond valuations, yield differentials, anticipated prepayments and interest rates provided by dealers. Securities for which there is no such quotation or valuation and all other assets are valued at fair value as determined in good faith by or at the direction of the Fund's Trustees.

Generally, trading in the foreign securities owned by the Fund is substantially completed each day at various times prior to the close of the Exchange. The values of these securities used in determining the net asset value of the Fund generally are computed as of such times. Occasionally, events affecting the value of foreign securities may occur between such times and the close of the New York Stock Exchange which will not be reflected in the computation of the Fund's net asset value (unless the Fund deems that such events would materially affect its net asset value, in which case an adjustment would be made and reflected in such computation). The Fund may rely on an independent fair valuation service in making any such adjustment. Foreign securities and currency held by the Fund will be valued in U.S. dollars; such values will be computed by the custodian based on foreign currency exchange rate quotations supplied by an independent quotation service.

All other securities are valued at fair value as determined in good faith by or at the direction of the Trustees.

20

PORTFOLIO TRADING

PORTFOLIO TRADING

Decisions concerning the execution of portfolio security transactions, including the selection of the market and the executing firm, are made by the Adviser. The Adviser is also responsible for the execution of transactions for all other accounts managed by it. The Adviser places the portfolio security transactions of the Fund and of all other accounts managed by it for execution with many firms. The Adviser uses its best efforts to obtain execution of portfolio security transactions at prices which are advantageous to the Fund and at reasonably competitive spreads or (when a disclosed commission is being charged) at reasonably competitive commission rates. In seeking such execution, the Adviser will use its best judgment in evaluating the terms of a transaction, and will give consideration to various relevant factors, including without limitation the full range and quality of the executing firm's services, the

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

value of the brokerage and research services provided, the responsiveness of the firm to the Adviser, the size and type of the transaction, the nature and character of the market for the security, the confidentiality, speed and certainty of effective execution required for the transaction, the general execution and operational capabilities of the executing firm, the reputation, reliability, experience and financial condition of the firm, the value and quality of the services rendered by the firm in this and other transactions, and the reasonableness of the spread or commission, if any.

The Fund will acquire Senior Loans from major international banks, selected domestic regional banks, insurance companies, finance companies and other financial institutions. In selecting financial institutions from which Senior Loans may be acquired, the Adviser will consider, among other factors, the financial strength, professional ability, level of service and research capability of the institution. While these financial institutions are generally not required to repurchase Senior Loans which they have sold, they may act as principal or on an agency basis in connection with their sale by the Fund.

Other fixed income obligations which may be purchased and sold by the Fund are generally traded in the over-the-counter market on a net basis (I.E., without commission) through broker-dealers or banks acting for their own account rather than as brokers, or otherwise involve transactions directly with the issuers of such obligations. The Fund may also purchase fixed income and other securities from underwriters, the cost of which may include undisclosed fees and concessions to the underwriters.

Transactions on stock exchanges and other agency transactions involve the payment of negotiated brokerage commissions. Such commissions vary among different broker-dealer firms, and a particular broker-dealer may charge different commissions according to such factors as the difficulty and size of the transaction and the volume of business done with such broker-dealer. Transactions in foreign securities often involve the payment of brokerage commissions, which may be higher than those in the United States. There is generally no stated commission in the case of securities traded in the over-the-counter markets, but the price paid or received usually includes an undisclosed dealer markup or markdown. In an underwritten offering the price paid often includes a disclosed fixed commission or discount retained by the underwriter or dealer.

Although spreads or commissions paid on portfolio security transactions will, in the judgment of the Adviser, be reasonable in relation to the value of the services provided, commissions exceeding those which another firm might charge may be paid to broker-dealers who were selected to execute transactions on behalf of the Adviser's clients in part for providing brokerage and research services to the Adviser.

As authorized in Section 28(e) of the Securities Exchange Act of 1934, a broker or dealer who executes a portfolio transaction on behalf of the Fund may receive a commission which is in excess of the amount of commission another broker or dealer would have charged for effecting that transaction if the Adviser determines in good faith that such compensation was reasonable in relation to the value of the brokerage and research services provided. This determination may be made on the basis of that particular transaction or on the basis of overall responsibilities which the Adviser and its affiliates have for accounts over which they exercise investment discretion. In making any such determination, the Adviser will not attempt to place a specific dollar value on the brokerage and research services provided or to determine what portion of the commission should be related to such services. Brokerage and research services may include advice as to the value of securities, the advisability of investing in, purchasing, or selling securities, and the availability of securities or purchasers or sellers of securities; furnishing analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy

and the performance of accounts; effecting securities transactions and performing functions incidental thereto (such as clearance and settlement); and the "Research Services" referred to in the next paragraph.

It is a common practice of the investment advisory industry and of the advisers of investment companies, institutions and other investors to receive research, analytical, statistical and quotation services, data, information and other services, products and materials which assist such advisers in the performance of their investment responsibilities ("Research Services") from broker-dealer

PORTFOLIO TRADING

firms which execute portfolio transactions for the clients of such advisers and from third parties with which such broker-dealers have arrangements. Consistent with this practice, the Adviser receives Research Services from many broker-dealer firms with which the Adviser places the Fund's transactions and from third parties with which these broker-dealers have arrangements. These Research Services include such matters as general economic, political, business and market information, industry and company reviews, evaluations of securities and portfolio strategies and transactions, proxy voting data and analysis services, technical analysis of various aspects of the securities market, recommendations as to the purchase and sale of securities and other portfolio transactions, financial, industry and trade publications, news and information services, pricing and quotation equipment and services, and research oriented computer hardware, software, data bases and services. Any particular Research Service obtained through a broker-dealer may be used by the Adviser in connection with client accounts other than those accounts which pay commissions to such broker-dealer. Any such Research Service may be broadly useful and of value to the Adviser in rendering investment advisory services to all or a significant portion of its clients, or may be relevant and useful for the management of only one client's account or of a few clients' accounts, or may be useful for the management of merely a segment of certain clients' accounts, regardless of whether any such account or accounts paid commissions to the broker-dealer through which such Research Service was obtained. The advisory fee paid by the Fund is not reduced because the Adviser receives such Research Services. The Adviser evaluates the nature and quality of the various Research Services obtained through broker-dealer firms and attempts to allocate sufficient portfolio security transactions to such firms to ensure the continued receipt of Research Services which the Adviser believes are useful or of value to it in rendering investment advisory services to its clients.

The Fund and the Adviser may also receive Research Services from underwriters and dealers in fixed-price offerings, which Research Services are reviewed and evaluated by the Adviser in connection with its investment responsibilities. The investment companies sponsored by the Adviser or its affiliates may allocate trades in such offerings to acquire information relating to the performance, fees and expenses of such companies and other mutual funds, which information is used by the Trustees of such companies to fulfill their responsibility to oversee the quality of the services provided by various entities, including the Adviser, to such companies. Such companies may also pay cash for such information.

Subject to the requirement that the Adviser shall use its best efforts to seek and execute portfolio security transactions at advantageous prices and at reasonably competitive spreads or commission rates, the Adviser is authorized to consider as a factor in the selection of any broker-dealer firm with whom portfolio orders may be placed the fact that such firm has sold or is selling shares of the Fund or of other investment companies sponsored by the Adviser. This policy is not inconsistent with a rule of the National Association of Securities Dealers, Inc. ("NASD"), which rule provides that no firm which is a

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

member of the NASD shall favor or disfavor the distribution of shares of any particular investment company or group of investment companies on the basis of brokerage commissions received or expected by such firm from any source.

Securities considered as investments for the Fund may also be appropriate for other investment accounts managed by the Adviser or its affiliates. Whenever decisions are made to buy or sell securities by the Fund and one or more of such other accounts simultaneously, the Adviser will allocate the security transactions (including "hot" issues) in a manner which it believes to be equitable under the circumstances. As a result of such allocations, there may be instances where the Fund will not participate in a transaction that is allocated among other accounts. If an aggregated order cannot be filled completely, allocations will generally be made on a pro rata basis. An order may not be allocated on a pro rata basis where, for example: (i) consideration is given to portfolio managers who have been instrumental in developing or negotiating a particular investment; (ii) consideration is given to an account with specialized investment policies that coincide with the particulars of a specific investment; (iii) pro rata allocation would result in odd-lot or de minimis amounts being allocated to a portfolio or other client; or (iv) where the Adviser reasonably determines that departure from a pro rata allocation is advisable. While these aggregation and allocation policies could have a detrimental effect on the price or amount of the securities available to the Fund from time to time, it is the opinion of the Trustees of the Fund that the benefits from the Adviser's organization outweigh any disadvantage that may arise from exposure to simultaneous transactions.

TAXES

The following discussion of federal income tax matters is based on the advice of Kirkpatrick & Lockhart LLP, counsel to the Fund. The Fund intends to elect to be treated and to qualify each year as a regulated investment company ("RIC") under the Internal Revenue Code of 1986, as amended (the "Code"). Accordingly, the Fund intends to satisfy certain requirements relating to sources of its income and diversification of its assets and to distribute substantially all of its net income and net short-term and long-term capital gains (after reduction by any available capital loss carryforwards) in accordance with the timing requirements imposed by the Code, so as to maintain its RIC status and to avoid paying any federal income or excise tax. To the extent it qualifies for treatment as a RIC and satisfies the above-mentioned

22

TAXES

distribution requirements, the Fund will not be subject to federal income tax on income paid to its shareholders in the form of dividends or capital gain distributions.

In order to avoid incurring a 4% federal excise tax obligation, the Code requires that the Fund distribute (or be deemed to have distributed) by December 31 of each calendar year an amount at least equal to the sum of (i) 98% of its ordinary income for such year and (ii) 98% of its capital gain net income (which is the excess of its realized net long-term capital gain over its realized net short-term capital loss), generally computed on the basis of the one-year period ending on October 31 of such year, after reduction by any available capital loss carryforwards, plus 100% of any ordinary income and capital gain net income from the prior year (as previously computed) that were not paid out during such year and on which the Fund paid no federal income tax. Under current law, provided that the Fund qualifies as a RIC for federal income tax purposes, the Fund

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

should not be liable for any income, corporate excise or franchise tax in The Commonwealth of Massachusetts.

If the Fund does not qualify as a RIC for any taxable year, the Fund's taxable income will be subject to corporate income taxes, and all distributions from earnings and profits, including distributions of net capital gain (if any), will be taxable to the shareholder as ordinary income. In addition, in order to requalify for taxation as a RIC, the Fund may be required to recognize unrealized gains, pay substantial taxes and interest, and make certain distributions.

Under the "JOBS AND GROWTH TAX RELIEF RECONCILIATION ACT OF 2003" (the "TAX ACT"), certain income distributions paid by the Fund (whether paid in cash or reinvested in additional Fund Shares) to individual taxpayers are taxed at rates applicable to net long-term capital gains (15%, or 5% for individuals in the 10% or 15% tax brackets). This tax treatment applies only if certain holding period requirements and other requirements are satisfied by the Common Shareholder and the dividends are attributable to QUALIFIED DIVIDEND INCOME received by the Fund itself. For this purpose, "QUALIFIED DIVIDEND INCOME" means dividends received by the Fund from United States corporations and "qualified foreign corporations," provided that the Fund satisfies certain holding period and other requirements in respect of the stock of such corporations. In the case of securities lending transactions, payments in lieu of dividends do not constitute qualified dividend income. Any dividends received by the Fund from REITs are qualified dividend income eligible for this lower tax rate only in limited circumstances. These special rules relating to the taxation of ordinary income dividends paid by RICs generally apply to taxable years beginning after December 31, 2002 and beginning before January 1, 2009. Thereafter, the Fund's dividends, other than capital gain dividends, will be fully taxable at ordinary income tax rates unless further Congressional action is taken. There can be no assurance that a portion of the Fund's income distributions will not be fully taxable as ordinary income.

Subject to certain exceptions, a "qualified foreign corporation" is any foreign corporation that is either (i) incorporated in a possession of the United States (the "possessions test"), or (ii) eligible for benefits of a comprehensive income tax treaty with the United States, which the Secretary of the Treasury determines is satisfactory for these purposes and which includes an exchange of information program (the "treaty test"). The Secretary of the Treasury has currently identified tax treaties between the United States and 52 other countries that satisfy the treaty test. Subject to the same exceptions, a foreign corporation that does not satisfy either the possessions test or the treaty test will still be considered a "qualified foreign corporation" with respect to any dividend paid by such corporation if the stock with respect to which such dividend is paid is readily tradable on an established securities market in the United States. The Treasury Department has issued a notice stating that common or ordinary stock, or an American Depositary Receipt in respect of such stock, is considered readily tradable on an established securities market in the United States if it is listed on a national securities exchange that is registered under section 6 of the Securities Exchange Act of 1934, as amended, or on the Nasdaq Stock Market. A qualified foreign corporation does not include any foreign corporation which for the taxable year of the corporation in which the dividend is paid, or the preceding taxable year, is a foreign personal holding company, a foreign investment company or a passive foreign investment company.

The TAX ACT, in amending certain Code provisions to provide that dividends paid by a RIC would be treated as "QUALIFIED DIVIDEND INCOME" to the extent that such dividends were derived from qualified dividend income received by the RIC, failed to make certain conforming amendments to other provisions of the Code. As a result, the Code contains certain contradictory provisions creating some ambiguity as to whether the Code authorizes the Fund to designate in certain

circumstances as qualified dividend income that portion of its dividends that is derived from dividends it has received from qualified foreign corporations. The Fund believes, however, that the intention of the TAX ACT was to authorize the Fund's designation of such dividends as qualified dividend income. Further, bills proposing to make technical corrections to the TAX ACT (the "Technical Corrections Bills") have been filed in both the Senate and the House of Representatives, and these Technical Corrections Bills would amend the Code to make it clear that a RIC's dividends can be designated qualified dividend income to the extent that they are derived from dividends received from qualified foreign corporations. The Fund cannot predict whether or in what form the Technical Corrections Bills will be enacted or, if enacted, when that will

TAXES

occur. Nevertheless, the Treasury Department and the IRS have announced that they will apply the provision of the Technical Corrections Bill relating to qualified dividend income in advance of the enactment of such legislation.

A dividend (whether paid in cash or reinvested in additional Fund shares) will not be treated as qualified dividend income (whether received by the Fund or paid by the Fund to a shareholder) if (1) the dividend is received with respect to any share held for fewer than 61 days during the 120-day period beginning on the date which is 60 days before the date on which such share becomes exdividend with respect to such dividend (the 120-day period would be expanded to a 121-day period under the Technical Corrections Bills), (2) to the extent that the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, or (3) if the shareholder elects to have the dividend treated as investment income for purposes of the limitation on deductibility of investment interest.

The Fund's investment in zero coupon and certain other securities will cause it to realize income prior to the receipt of cash payments with respect to these securities. Such income will be accrued daily by the Fund and, in order to avoid a tax payable by the Fund, the Fund may be required to liquidate securities that it might otherwise have continued to hold in order to generate cash so that the Fund may make required distributions to its shareholders.

Investments in lower rated or unrated securities may present special tax issues for the Fund to the extent that the issuers of these securities default on their obligations pertaining thereto. The Code is not entirely clear regarding the federal income tax consequences of the Fund's taking certain positions in connection with ownership of such distressed securities.

Any recognized gain or income attributable to market discount on long-term debt obligations (I.E., on obligations with a term of more than one year except to the extent of a portion of the discount attributable to original issue discount) purchased by the Fund is taxable as ordinary income. A long-term debt obligation is generally treated as acquired at a market discount if purchased after its original issue at a price less than (i) the stated principal amount payable at maturity, in the case of an obligation that does not have original issue discount or (ii) in the case of an obligation that does have original issue discount, the sum of the issue price and any original issue discount that accrued before the obligation was purchased, subject to a DE MINIMIS exclusion.

The Fund's investments in options, futures contracts, hedging transactions, forward contracts, other derivative instruments (to the extent permitted) and certain other transactions will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale, short sale and other rules), the effect of which may be to accelerate income to the Fund, defer Fund

losses, cause adjustments in the holding periods of securities held by the Fund, convert capital gain into ordinary income and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders. The Fund may be required to limit its activities in options and futures contracts in order to enable it to maintain its RIC status.

Any loss realized upon the sale or exchange of Fund shares with a holding period of six months or less will be treated as a long-term capital loss to the extent of any capital gain distributions received with respect to such shares. In addition, all or a portion of a loss realized on a redemption or other disposition of Fund shares may be disallowed under "wash sale" rules to the extent the shareholder acquires other shares of the same Fund (whether through the reinvestment of distributions or otherwise) within the period beginning 30 days before the redemption of the loss shares and ending 30 days after such date. Any disallowed loss will result in an adjustment to the shareholder's tax basis in some or all of the other shares acquired.

Sales charges paid upon a purchase of shares cannot be taken into account for purposes of determining gain or loss on a sale of the shares before the 91st day after their purchase to the extent a sales charge is reduced or eliminated in a subsequent acquisition of shares of the Fund (or of another fund) pursuant to the reinvestment or exchange privilege. Any disregarded amounts will result in an adjustment to the shareholder's tax basis in some or all of any other shares acquired.

Dividends and distributions on the Fund's shares are generally subject to federal income tax as described herein to the extent they do not exceed the Fund's realized income and gains, even though such dividends and distributions may economically represent a return of a particular shareholder's investment. Such distributions are likely to occur in respect of shares purchased at a time when the Fund's net asset value reflects gains that are either unrealized, or realized but not distributed. Such realized gains may be required to be distributed even when the Fund's net asset value also reflects unrealized losses. Certain distributions declared in October, November or December and paid in the following January will be taxed to shareholders as if received on December 31 of the year in which they were declared. In addition, certain other distributions made after the close of a taxable year of the Fund may be "spilled back" and treated as paid by the Fund (except for purposes of the 4% excise tax) during such taxable year. In such case, Shareholders will be treated as having received such dividends in the taxable year in which the distributions were actually made.

24

TAXES

Dividends and interest received, and gains realized, by the Fund on foreign securities may be subject to income, withholding or other taxes imposed by foreign countries and U.S. possessions (collectively "foreign taxes") that would reduce the return on its securities. Tax conventions between certain countries and the United States, however, may reduce or eliminate foreign taxes, and many foreign countries do not impose taxes on capital gains in respect of investments by foreign investors. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of securities of foreign issuers, the Fund will be eligible to, and may, file an election with the Internal Revenue Service (the "IRS") that will enable its shareholders, in effect, to receive the benefit of the foreign tax credit with respect to any foreign taxes paid by it. Pursuant to the election, the Fund

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

would treat those taxes as dividends paid to its shareholders and each shareholder (1) would be required to include in gross income, and treat as paid by such shareholder, a proportionate share of those taxes, (2) would be required to treat such share of those taxes and of any dividend paid by the Fund that represents income from foreign or U.S. possessions sources as such shareholder's own income from those sources, and (3) could either deduct the foreign taxes deemed paid in computing taxable income or, alternatively, use the foregoing information in calculating the foreign tax credit against federal income tax. The Fund will report to its shareholders shortly after each taxable year their respective shares of foreign taxes paid and the income from sources within, and taxes paid to, foreign countries and persons filing jointly) of creditable foreign taxes included on Forms 1099 and all of whose foreign source income is "qualified passive income" may elect each year to be exempt from the complicated foreign tax credit limitation, in which event such individual would be able to claim a foreign tax credit without needing to file the detailed Form 1116 that otherwise is required.

The Fund may invest in the stock of "passive foreign investment companies" ("PFICs"). A PFIC is any foreign corporation (with certain exceptions) that, in general, meets either of the following tests: (1) at least 75% of its gross income is passive or (2) an average of at least 50% of its assets produce, or are held for the production of, passive income. Under certain circumstances, the Fund will be subject to federal income tax on a portion of any "excess distribution" received on the stock of a PFIC or of any gain from disposition of that stock (collectively "PFIC income"), plus interest thereon, even if the Fund distributes the PFIC income as a taxable dividend to its shareholders. The balance of the PFIC income will be included in the Fund's investment company taxable income and, accordingly, will not be taxable to it to the extent it distributes that income to its shareholders. If the Fund invests in a PFIC and elects to treat the PFIC as a "qualified electing fund" ("QEF"), then in lieu of the foregoing tax and interest obligation, the Fund will be required to include in income each year its pro rata share of the QEF's annual ordinary earnings and net capital gain--which it may have to distribute to satisfy the distribution requirement and avoid imposition of the excise tax--even if the QEF does not distribute those earnings and gain to the Fund. In most instances it will be very difficult, if not impossible, to make this election because of certain of its requirements.

The Fund may elect to "mark to market" its stock in any PFIC. "Marking-to-market," in this context, means including in ordinary income each taxable year the excess, if any, of the fair market value of a PFIC's stock over the Fund's adjusted basis therein as of the end of that year. Pursuant to the election, the Fund also would be allowed to deduct (as an ordinary, not capital, loss) the excess, if any, of its adjusted basis in PFIC stock over the fair market value thereof as of the taxable year-end, but only to the extent of any net mark-to-market gains (reduced by any prior deductions) with respect to that stock included by the Fund for prior taxable years under the election. The Fund's adjusted basis in each PFIC's stock with respect to which it has made this election will be adjusted to reflect the amounts of income included and deductions taken thereunder.

Amounts paid by the Fund to individuals and certain other shareholders who have not provided the Fund with their correct taxpayer identification number ("TIN") and certain certifications required by the Internal Revenue Service (the "IRS") as well as shareholders with respect to whom the Fund has received certain information from the IRS or a broker may be subject to "backup" withholding of federal income tax arising from the Fund's taxable dividends and other distributions as well as the gross proceeds of sales of shares, at a rate of up to 28% for amounts paid during 2003. An individual's TIN is generally his or her social security number. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from payments made to a Shareholder may be refunded or credited against such Shareholder's U.S. federal income tax

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

liability, if any, provided that the required information is furnished to the IRS.

The foregoing discussion does not address the special tax rules applicable to certain classes of investors, such as tax-exempt entities, foreign investors, insurance companies and financial institutions. Shareholders should consult their own tax advisers with respect to special tax rules that may apply in their particular situations, as well as the state, local, and, where applicable, foreign tax consequences of investing in the Fund.

If the Fund issues preferred shares, the Fund will designate dividends made to holders of shares and to holders of those preferred shares in accordance with each class's proportionate share of each item of Fund income (such as net capital gains and other taxable income).

TAXES

The Fund will inform Shareholders of the source and tax status of all distributions promptly after the close of each calendar year. [The IRS has taken the position that if a RIC has more than one class of shares, it may designate distributions made to each class in any year as consisting of no more than that class's proportionate share of particular types of income for that year, including ordinary income and net capital gain. A class's proportionate share of a particular type of income for a year is determined according to the percentage of total dividends paid by the RIC during that year to the class. Accordingly, the Fund intends to designate a portion of its distributions in capital gain dividends in accordance with the IRS position.

Although the matter is not free from doubt, due to the absence of direct regulatory or judicial authority, in the opinion of Kirkpatrick & Lockhart LLP, counsel to the Fund, under current law the manner in which the Fund intends to allocate items of ordinary income and net capital gain among the Fund's Common Shares and any applicable preferred shares class will be respected for federal income tax purposes. It is possible that the IRS could disagree with counsel's opinion and attempt to reallocate the Fund's net capital gain or other taxable income.

STATE AND LOCAL TAXES

Shareholders should consult their own tax advisers as the state or local tax consequences of investing in the Fund.

OTHER INFORMATION

The Fund is an organization of the type commonly known as a "Massachusetts business trust." Under Massachusetts law, shareholders of such a trust may, in certain circumstances, be held personally liable as partners for the obligations of the trust. The Declaration of Trust contains an express disclaimer of shareholder liability in connection with the Fund property or the acts, obligations or affairs of the Fund. The Declaration of Trust also provides for indemnification out of the Fund property of any shareholder held personally liable for the claims and liabilities to which a shareholder may become subject by reason of being or having been a shareholder. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund itself is unable to meet its obligations. The Fund has been advised by its counsel that the risk of any shareholder incurring any liability for the obligations of the Fund is remote.

The Declaration of Trust provides that the Trustees will not be liable for errors of judgment or mistakes of fact or law; but nothing in the Declaration of

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

Trust protects a Trustee against any liability to the Fund or its shareholders to which he would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of his office. Voting rights are not cumulative, which means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees and, in such event, the holders of the remaining less than 50% of the shares voting on the matter will not be able to elect any Trustees.

The Declaration of Trust provides that no person shall serve as a Trustee if shareholders holding two-thirds of the outstanding shares have removed him from that office either by a written declaration filed with the Fund's custodian or by votes cast at a meeting called for that purpose. The Declaration of Trust further provides that the Trustees of the Fund shall promptly call a meeting of the shareholders for the purpose of voting upon a question of removal of any such Trustee or Trustees when requested in writing so to do by the record holders of not less than 10 per centum of the outstanding shares.

The Fund's Prospectus and this SAI do not contain all of the information set forth in the Registration Statement that the Fund has filed with the SEC. The complete Registration Statement may be obtained from the SEC upon payment of the fee prescribed by its Rules and Regulations.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

NOTES TO FINANCIAL STATEMENTS

NOTE 1: ORGANIZATION

The Fund was organized as a Massachusetts business trust on April 16, 2004, and has been inactive since that date except for matters relating to its organization and registration as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended, and the Securities Act of 1933, as amended, and the sale of [_____] common shares to Eaton Vance Management, the Fund's Investment Adviser.

[Eaton Vance Management, or an affiliate, has agreed to reimburse all organizational costs, estimated at approximately \$[_____.]]

[Eaton Vance Management, or an affiliate, has agreed to pay all offering costs (other than sales loads) that exceed \$[_____] per common share.]

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

The Fund's investment objective is to provide a high level of current income. The Fund may, as a secondary objective, also seek capital appreciation to the extent consistent with its primary goal of high current income.

NOTE 2: ACCOUNTING POLICIES

The Fund's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America which require the use of management estimates. Actual results may differ from those estimates.

The Fund's share of offering costs will be recorded within paid in capital as a reduction of the proceeds from the sale of common shares upon the commencement of Fund operations. The offering costs reflected above assume the sale of [_____] common shares.

NOTE 3: INVESTMENT MANAGEMENT AGREEMENT

Pursuant to an investment advisory agreement between the Adviser and the Fund, the Fund has agreed to pay an investment advisory fee, payable on a monthly basis, at an annual rate of [_____] % of the average weekly gross assets of the Fund. Gross assets of the Fund shall be calculated by deducting accrued liabilities of the Fund not including the amount of any preferred shares outstanding or the principal amount of any indebtedness for money borrowed.

In addition, Eaton Vance has contractually agreed to reimburse the Fund for fees and other expenses in the amount of [_____] % of the average weekly gross assets for the first 5 full years of the Fund's operations, [_____] % of average weekly gross assets in year 6, [_____] % in year 7 and [_____] % in year 8.

NOTE 4: FEDERAL INCOME TAXES

The Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income, including any net realized gain on investments.

APPENDIX A

DESCRIPTION OF SECURITIES RATINGS+ MOODY'S INVESTORS SERVICE, INC.

LONG-TERM DEBT SECURITIES RATINGS

Aaa: Bonds which are rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa: Bonds which are rated Aa are judged to be of high quality by all standards. Together with the AAA group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long term risk appear somewhat larger than the Aaa securities.

A: Bonds which are rated A possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

which suggest a susceptibility to impairment sometime in the future.

Baa: Bonds which are rated Baa are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba: Bonds which are rated Ba are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during other good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B: Bonds which are rated B generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa: Bonds which are rated Caa are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca: Bonds which are rated Ca represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C: Bonds which are rated C are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

ABSENCE OF RATING: Where no rating has been assigned or where a rating has been suspended or withdrawn, it may be for reasons unrelated to the quality of the issue.

Should no rating be assigned, the reason may be one of the following:

+ The ratings indicated herein are believed to be the most recent ratings available at the date of this SAI for the securities listed. Ratings are generally given to securities at the time of issuance. While the rating agencies may from time to time revise such ratings, they undertake no obligation to do so, and the ratings indicated do not necessarily represent ratings which would be given to these securities on the date of the Fund's fiscal year end.

DESCRIPTION OF SECURITIES RATINGS

1. An application for rating was not received or accepted.
2. The issue or issuer belongs to a group of securities or companies that are not rated as a matter of policy.
3. There is a lack of essential data pertaining to the issue or issuer.
4. The issue was privately placed, in which case the rating is not published in Moody's publications.

Suspension or withdrawal may occur if new and material circumstances arise, the effects of which preclude satisfactory analysis; if there is no longer

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

available reasonable up-to-date data to permit a judgment to be formed; if a bond is called for redemption; or for other reasons.

NOTE: Moody's applies numerical modifiers, 1, 2 and 3 in each generic rating classification from Aa through B in its bond rating system. The modifier 1 indicates that the security ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the issue ranks in the lower end of its generic rating category.

SHORT-TERM DEBT SECURITIES RATINGS

Moody's short-term debt ratings are opinions of the ability of issuers to repay punctually senior debt obligations. These obligations have an original maturity not exceeding one year, unless explicitly noted.

Moody's employs the following three designations, all judged to be investment grade, to indicate the relative repayment ability of rated issuers:

PRIME-1: Issuers rated Prime-1 (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics: leading market positions in well-established industries; high rates of return on funds employed; conservative capitalization structure with moderate reliance on debt and ample asset protection; broad margins in earnings coverage of fixed financial charges and high internal cash generation; and well-established access to a range of financial markets and assured sources of alternate liquidity.

PRIME-2: Issuers rated Prime-2 (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

PRIME-3: Issuers rated Prime-3 (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

NOT PRIME: Issuers rated Not Prime do not fall within any of the Prime rating categories.

STANDARD & POOR'S RATINGS GROUP

INVESTMENT GRADE

AAA: Debt rated AAA has the highest rating assigned by S&P. Capacity to pay interest and repay principal is extremely strong.

AA: Debt rated AA has a very strong capacity to pay interest and repay principal and differs from the highest rated issues only in small degree.

A: Debt rated A has a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.

BBB: Debt rated BBB is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories.

A-2

DESCRIPTION OF SECURITIES RATINGS

SPECULATIVE GRADE

Debt rated BB, B, CCC, CC and C is regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal. BB indicates the least degree of speculation and C the highest. While such debt will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major exposures to adverse conditions.

BB: Debt rated BB has less near-term vulnerability to default than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments. The BB rating category is also used for debt subordinated to senior debt that is assigned an actual or implied BBB-- rating.

B: Debt rated B has a greater vulnerability to default but currently has the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal. The B rating category is also used for debt subordinated to senior debt that is assigned an actual or implied BB or BB-- rating.

CCC: Debt rated CCC has a currently identifiable vulnerability to default, and is dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, it is not likely to have the capacity to pay interest and repay principal. The CCC rating category is also used for debt subordinated to senior debt that is assigned an actual or implied B or B-- rating.

CC: The rating CC is typically applied to debt subordinated to senior debt which is assigned an actual or implied CCC debt rating.

C: The rating C is typically applied to debt subordinated to senior debt which is assigned an actual or implied CCC-- debt rating. The C rating may be used to cover a situation where a bankruptcy petition has been filed, but debt service payments are continued.

C1: The Rating C1 is reserved for income bonds on which no interest is being paid.

D: Debt rated D is in payment default. The D rating category is used when interest payments or principal payments are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition if debt service payments are jeopardized.

PLUS (+) OR MINUS (--): The ratings from AA to CCC may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

P: The letter "p" indicates that the rating is provisional. A provisional rating assumes the successful completion of the project being financed by the

debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful and timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of, or the risk of default upon failure of such completion. The investor should exercise his own judgment with respect to such likelihood and risk.

L: The letter "L" indicates that the rating pertains to the principal amount of those bonds to the extent that the underlying deposit collateral is insured by the Federal Deposit Insurance Corp. and interest is adequately collateralized. In the case of certificates of deposit, the letter "L" indicates that the deposit, combined with other deposits being held in the same right and capacity, will be honored for principal and accrued pre-default interest up to the federal insurance limits within 30 days after closing of the insured institution or, in the event that the deposit is assumed by a successor insured institution, upon maturity.

NR: NR indicates no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular type of obligation as a matter of policy.

COMMERCIAL PAPER

COMMERCIAL PAPER RATING DEFINITIONS

A S&P's commercial paper rating is a current assessment of the likelihood of timely payment of debt having an original maturity of no more than 365 days. Ratings are graded into several categories, ranging from A for the highest quality obligations to D for the lowest. These categories are as follows:

A-3

A-1: A short-term obligation rated A-1 is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2: A short-term obligation rated A-2 is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3: A short-term obligation rated A-3 exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B: A short-term obligation rated B is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

C: A short-term obligation rated C is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D: A short-term obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The D rating also will be

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

A commercial paper rating is not a recommendation to purchase, sell or hold a security inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished to S&P by the issuer or obtained from other sources it considers reliable. S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended, or withdrawn as a result of changes in or unavailability of such information.

FITCH RATINGS

INVESTMENT GRADE BOND RATINGS

AAA: Bonds considered to be investment grade and of the highest credit quality. The obligor has an exceptionally strong ability to pay interest and repay principal, which is unlikely to be affected by reasonably foreseeable events.

AA: Bonds considered to be investment grade and of very high credit quality. The obligor's ability to pay interest and repay principal is very strong, although not quite as strong as bonds rated 'AAA'. Because bonds rated in the 'AAA' and 'AA' categories are not significantly vulnerable to foreseeable future developments, short-term debt of these issuers is generally rated 'F-1+'.

L: Bonds considered to be investment grade and of high credit quality. The obligor's ability to pay interest and repay principal is considered to be strong, but may be more vulnerable to adverse changes in economic conditions and circumstances than bonds with higher ratings.

BBB: Bonds considered to be investment grade and of satisfactory credit quality. The obligor's ability to pay interest and repay principal is considered to be adequate. Adverse changes in economic conditions and circumstances, however, are more likely to have adverse impact on these bonds, and therefore, impair timely payment. The likelihood that the ratings of these bonds will fall below investment grade is higher than for bonds with higher ratings.

HIGH YIELD BOND RATINGS

BB: Bonds are considered speculative. The obligor's ability to pay interest and repay principal may be affected over time by adverse economic changes. However, business and financial alternatives can be identified that could assist the obligor in satisfying its debt service requirements.

B: Bonds are considered highly speculative. While bonds in this class are currently meeting debt service requirements, the probability of continued timely payment of principal and interest reflects the obligor's limited margin of safety and the need for reasonable business and economic activity throughout the life of the issue.

A-4

DESCRIPTION OF SECURITIES RATINGS

CCC: Bonds have certain identifiable characteristics which, if not remedied, may lead to default. The ability to meet obligations requires an advantageous business and economic environment.

CC: Bonds are minimally protected. Default in payment of interest and/or

principal seems probable over time.

C: Bonds are in imminent default in payment of interest or principal.

DDD, DD AND D: Bonds are in default on interest and/or principal payments. Such bonds are extremely speculative and should be valued on the basis of their ultimate recovery value in liquidation or reorganization of the obligor. `DDD' represents the highest potential for recovery on these bonds, and `D' represents the lowest potential for recovery.

PLUS (+) OR MINUS (--): The ratings from AA to C may be modified by the addition of a plus or minus sign to indicate the relative position of a credit within the rating category.

NR: Indicates that Fitch does not rate the specific issue.

CONDITIONAL: A conditional rating is premised on the successful completion of a project or the occurrence of a specific event.

INVESTMENT GRADE SHORT-TERM RATINGS

Fitch's short-term ratings apply to debt obligations that are payable on demand or have original maturities of generally up to three years, including commercial paper, certificates of deposit, medium-term notes, and municipal and investment notes.

F-1+: Exceptionally Strong Credit Quality. Issues assigned this rating are regarded as having the strongest degree of assurance for timely payment.

F-1: Very Strong Credit Quality. Issues assigned this rating reflect an assurance of timely payment only slightly less in degree than issues rated `F-1+'.

F-2: Good Credit Quality. Issues carrying this rating have a satisfactory degree of assurance for timely payment, but the margin of safety is not as great as the `F-1+' and `F-1' categories.

F-3: Fair Credit Quality. Issues carrying this rating have characteristics suggesting that the degree of assurance for timely payment is adequate, however, near-term adverse change could cause these securities to be rated below investment grade.

* * * * *

NOTES: Bonds which are unrated expose the investor to risks with respect to capacity to pay interest or repay principal which are similar to the risks of lower-rated speculative bonds. The Fund is dependent on the Adviser's judgment, analysis and experience in the evaluation of such bonds.

Investors should note that the assignment of a rating to a bond by a rating service may not reflect the effect of recent developments on the issuer's ability to make interest and principal payments.

| Legal Fees and Expenses | ===== |
| Total | \$ _____ |

ITEM 27. PERSONS CONTROLLED BY OR UNDER COMMON CONTROL

None.

ITEM 28. NUMBER OF HOLDERS OF SECURITIES

Set forth below is the number of record holders as of December 7, 2004, of each class of securities of the Registrant:

| Title of Class ----- | Number of Record Holders ----- |
|---|-----------------------------------|
| Common Shares of Beneficial interest, par value \$0.01 per share | 0 |

ITEM 29. INDEMNIFICATION

The Registrant's By-Laws contain and the form of Underwriting Agreement to be filed by amendment is expected to contain provisions limiting the liability, and providing for indemnification, of the Trustees and officers under certain circumstances.

Registrant's Trustees and officers are insured under a standard investment company errors and omissions insurance policy covering loss incurred by reason of negligent errors and omissions committed in their official capacities as

such. Insofar as indemnification for liabilities arising under the Securities Act of 1933, as amended (the "Securities Act"), may be permitted to directors, officers and controlling persons of the Registrant pursuant to the provisions described in this Item 29, or otherwise, the Registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

ITEM 30. BUSINESS AND OTHER CONNECTIONS OF INVESTMENT ADVISER

Reference is made to: (i) the information set forth under the caption "Investment advisory and other services" in the Statement of Additional Information; (ii) the Eaton Vance Corp. 10-K filed under the Securities Exchange Act of 1934 (File No. 001-8100); and (iii) the Form ADV of Eaton Vance Management (File No. 801-15930) filed with the Commission, all of which are incorporated herein by reference.

ITEM 31. LOCATION OF ACCOUNTS AND RECORDS

All applicable accounts, books and documents required to be maintained by the Registrant by Section 31(a) of the Investment Company Act of 1940 and the Rules promulgated thereunder are in the possession and custody of the Registrant's custodian, Investors Bank & Trust Company, 200 Clarendon Street, 16th Floor, Boston, MA 02116, and its transfer agent, PFPC Inc., 4400 Computer Drive, Westborough, MA 01581-5120, with the exception of certain corporate documents and portfolio trading documents which are in the possession and custody of Eaton Vance Management, The Eaton Vance Building, 255 State Street, Boston, MA 02109. Registrant is informed that all applicable accounts, books and documents required to be maintained by registered investment advisers are in the custody and possession of Eaton Vance Management.

ITEM 32. MANAGEMENT SERVICES

Not applicable.

ITEM 33. UNDERTAKINGS

1. The Registrant undertakes to suspend offering of Common Shares until the prospectus is amended if (1) subsequent to the effective date of this

Edgar Filing: EATON VANCE LOW DURATION DIVERSIFIED INCOME FUND - Form N-2/A

Registration Statement, the net asset value declines more than 10 percent from its net asset value as of the effective date of this Registration Statement or (2) the net asset value increases to an amount greater than its net proceeds as stated in the prospectus.

2. Not applicable.

3. Not applicable.

4. Not applicable.

5. The Registrant undertakes that:

a. for the purpose of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this Registration Statement in reliance upon Rule 430A and contained in the form of prospectus filed by the Registrant pursuant to 497(h) under the Securities Act shall be deemed to be part of the Registration Statement as of the time it was declared effective; and

b. for the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

6. The Registrant undertakes to send by first class mail or other means designed to ensure equally prompt delivery, within two business days of receipt of an oral or written request, its Statement of Additional Information.

NOTICE

A copy of the Agreement and Declaration of Trust of Eaton Vance Short Duration Diversified Income Fund is on file with the Secretary of State of the Commonwealth of Massachusetts and notice is hereby given that this instrument is executed on behalf of the Registrant by an officer of the Registrant as an officer and not individually and that the obligations of or arising out of this instrument are not binding upon any of the Trustees, officers or shareholders individually, but are binding only upon the assets and property of the Registrant.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933 and the Investment Company Act of 1940, the Registrant has duly caused this Pre-Effective Amendment No. 1 to the Registration Statement to be signed on its behalf by the undersigned, thereunto duly authorized in the City of Boston and the Commonwealth of Massachusetts, on the 7th day of December 2004.
