### BUCKEYE ANNOUNCES CLOSURE OF CORK, IRELAND MANUFACTURING FACILITY

MEMPHIS, TN April 1, 2004 - Buckeye Technologies Inc. (NYSE:BKI) today announced that it will discontinue producing airlaid nonwoven materials at its Cork, Ireland facility by August. The Company will continue to meet customer needs for airlaid nonwoven materials by producing these products at its facilities in Delta, British Columbia, Canada; Steinfurt, Germany; and Gaston, North Carolina.

Buckeye Chairman, David B. Ferraro, stated, "Airlaid nonwoven materials are a very important part of Buckeye's product portfolio. Although we will cease production at the small single-line Cork plant, we will meet current and anticipated needs for these materials by increasing output at our three larger facilities. This consolidation will enable us to improve our overall airlaid nonwoven materials operating results by about \$7 million annually and reduce working capital needs by about \$4 million. We will begin to realize these benefits in the October-December quarter and anticipate achieving all the savings by the end of fiscal 2005."

Mr. Ferraro further commented, "It is extremely unfortunate that market conditions necessitate closure of the Cork facility and termination of approximately 83 dedicated employees. The Company will incur restructuring costs, including employee termination expenses, of approximately \$3 million during the next six months. Additionally, we will include a non-cash asset impairment charge relating to the Cork facility of about \$27 million after tax in our March financial results."

Buckeye has scheduled a conference call for April 2, 2004 9:30 a.m. CST to further discuss the Cork plant closure. All interested parties are invited to dial in at (800) 946-0785 (U.S.) or (719) 457-2661 (International).

Buckeye, a leading manufacturer and marketer of specialty cellulose and absorbent products, is headquartered in Memphis, Tennessee, USA. The Company currently operates facilities in the United States, Germany, Canada, Ireland and Brazil. Its products are sold worldwide to makers of consumer and industrial goods.

Certain matters discussed in this press release may constitute forward-looking statements within the meaning of the federal securities laws that involve risks and uncertainties, including but not limited to economic, competitive, governmental, and technological factors affecting the Company's operations, financing, markets, products, services and prices, and other factors. For further information on factors which could impact the Company and the statements contained herein, please refer to public filings with the Securities and Exchange Commission.
