## Section 1 – Conflict Minerals Disclosure

### Item 1.01 Conflict Minerals Disclosure and Report

In this document, Sony Corporation and its consolidated subsidiaries are together referred to as “Sony,” “we,” or “our.”

Sony is engaged in the development, design, production, manufacture, offer and sale of various kinds of electronic equipment, instruments and devices for consumer, professional and industrial markets such as network services, game hardware and software, televisions, audio and video recorders and players, still and video cameras, mobile phones, and semiconductors. Sony’s primary manufacturing facilities are located in Asia including Japan. Sony also utilizes third-party contract manufacturers for certain products. Sony’s products and services are marketed throughout the world by sales subsidiaries and unaffiliated distributors as well as direct sales and offers via the internet. Sony is engaged in the development, production, manufacture, and distribution of recorded music and the

management and licensing of the words and music of songs as well as production and distribution of animation titles, including game applications based on the animation titles. Sony is also engaged in the production, acquisition and distribution of motion pictures and television programming and the operation of television and digital networks. Further, Sony is also engaged in various financial services businesses, including life and non-life insurance operations through its Japanese insurance subsidiaries and banking operations through a Japanese internet-based banking subsidiary.

Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD (collectively, the “Conflict Minerals Rule”) provide that a company must file this Specialized Disclosure Report if it manufactures or contracts to manufacture products for which one or more of the following minerals are necessary to the functionality or production of the products: cassiterite, columbite-tantalite (coltan) and wolframite; their derivatives tantalum, tin and tungsten; and gold (collectively, “3TG”). The Conflict Minerals Rule refers to these minerals as “conflict minerals” regardless of their geographic origin and whether or not they fund armed conflict.

Sony has determined that 3TG are necessary to the functionality or production of (i) certain electronic equipment, instruments, and devices for consumer, professional and industrial markets, and (ii) game hardware products manufactured by Sony or contracted to be manufactured by Sony for the period covered by this Specialized Disclosure Report. Thus, Sony conducted a reasonable country of origin inquiry (“RCOI”) for our products. As a result of the RCOI, Sony determined it had insufficient information to conclude either (i) that there was no reason to believe that any of its necessary 3TG originated in the Covered Countries (as defined in the Conflict Minerals Report), or (ii) that all of its necessary 3TG came from recycled or scrap sources. Therefore, Sony was required to conduct due diligence pursuant to the Conflict Minerals Rule. Our RCOI and due diligence are described in the attached Conflict Minerals Report.

Edgar Filing: SONY CORP - Form SD

Sony maintains a conflict minerals policy that supports conflict-free sourcing. The link to this Policy is maintained on Sony's website at:
