BRAVO! FOODS INTERNATIONAL CORP. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

Note 1 -Interim Periods

The accompanying unaudited consolidated financial statements include the accounts of Bravo! Foods International Corp. and its wholly owned subsidiary Bravo! Brands (UK) Ltd. (collectively the "Company"). The Company is engaged in the sale of flavored milk products and flavor ingredients in the United States, Mexico and various countries in the Middle East and is establishing infrastructures to conduct business in Canada and the United Kingdom.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10QSB and Article 10 of Regulation S-X. Accordingly, the accompanying financial statements do not include all the information and footnotes required by generally accepted accounting principles for complete financial statements. All significant inter-company accounts and transactions have been eliminated in consolidation. The consolidated financial statements are presented in U.S. dollars. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the period ended June 30, 2005 are not necessarily indicative of the results that may be expected for the year ending December 31, 2005. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report for the year ended December 31, 2004.

As shown in the accompanying consolidated financial statements, the Company has suffered operating losses and negative cash flow from operations since inception and has an accumulated deficit of \$36,491,265, a capital deficit of \$2,933,786, negative working capital of \$2,701,460 and

is delinquent on certain of its debts at June 30, 2005. Further, the Company's auditors stated in their report on the Company's Consolidated Financial Statements for the year ended December 31, 2004, that these conditions raise substantial doubt about the Company's ability to continue as a going concern. Management plans to increase gross profit margins in its U.S. business, grow its international business, obtain additional financing and is in the process of repositioning its products with the continued launch of four product lines and the initiation of an additional two new lines. While there is no assurance that funding will be available or that the Company will be able to improve its profit margins, the Company is continuing to actively seek equity and/or debt financing and has committed financing of \$2,600,000, with 1,950,000 invested in the six months ending June 30, 2005 and the balance in August 2005. No assurances can be given that the Company will be successful in carrying out its plans. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

### Revenue Recognition

The Company recognizes revenue in the United States at the gross amount of its invoices for the sale of finished product to wholesale buyers. Commencing with the first quarter 2004, the Company no longer uses the sale of "kits" as a revenue event in the United States. Rather,

F-5

### BRAVO! FOODS INTERNATIONAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

the Company takes title to its branded flavored milks when they are shipped by the Company's third party processors and recognize as revenue the gross wholesale price charged to the Company's wholesale customers. Expenses for slotting fees and certain promotions are treated as a reduction of reported revenue. The Company determines gross margin by deducting from the reported wholesale price the cost charged by the Company's third party processors to produce the branded milk products. The sale of "kits" will remain as the revenue model for the Company's international business, with the exception of the United Kingdom and Canada, where the domestic business model will be implemented.

The Company recognizes revenue for its international business at the gross amount of its invoices for the sale of flavor ingredients and production rights (collectively referred to as "kits") at the time of shipment of flavor ingredients to processor dairies with whom the Company has production contracts for extended shelf life and aseptic long life milk. This recognition is based upon the Company's role as the principal in these transactions, its discretion in establishing kit prices (including the price of flavor ingredients and production rights fees), its development and refinement of flavors and flavor modifications, its discretion in supplier selection and its credit risk to pay for ingredients if processors do not pay ingredient suppliers. The revenue generated by the production contracts under this model is allocated for the processors' purchase of flavor ingredients and fees charged by the Company to the processors for production rights. The Company formulates the price of production rights to cover its royalties under intellectual property licenses, which varies by licensor as a percentage of the total cost of a kit sold to the processor dairy under the production agreement. The Company recognizes revenue on the gross amount of "kit" invoices to the dairy processors and simultaneously records as cost of goods sold the cost of flavor ingredients paid by the

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

processor dairies to ingredients suppliers. The recognition of revenue generated from the sale of production rights associated with the flavor ingredients is complete upon shipment of the ingredients to the processor, given the short utilization cycle of the ingredients shipped. The criteria to meet this guideline are: 1) persuasive evidence that an arrangement exists, 2) delivery has occurred or services have been rendered, 3) the price to the buyer is fixed or determinable and 4) collectibility is reasonably assured.

The Company follows the final consensus reached by the Emerging Issues Task Force (EITF) 99-19, "Reporting Revenue Gross as a Principal versus Net as an Agent". In certain circumstances in its U.S. business, the Company is required to pay slotting fees, give promotional discounts or make marketing allowances in order to secure wholesale customers. These payments, discounts and allowances reduce the Company's reported revenue in accordance with the guidelines set forth in EITF 01-9 and SEC Staff Accounting Bulletin No. 104. Pursuant to EITF 99-19, international sales of kits made directly to customers by the Company are reflected in the statements of operations on a gross basis, whereby the total amount billed to the customer is recognized as revenue.

### Stock-based Compensation

The Company has adopted the intrinsic value method of accounting for employee stock options as permitted by Statement of Financial Accounting Standards No. 123, "Accounting for

### BRAVO! FOODS INTERNATIONAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Stock-based Compensation" (SFAS No. 123) and discloses the pro forma effect on net loss and loss per share as if the fair value based method had been applied. For equity instruments, including stock options issued to non-employees, the fair value of the equity instruments or the fair value of the consideration received, whichever is more readily determinable, is used to determine the value of services or goods received and the corresponding charge to operations.

On April 6, 2005, the Company's Board of Directors voted to adopt a Stock Incentive Plan for the issuance of incentive options for up to 10,397,745 shares of the Company's common stock to management, employees and certain key third party service providers. On May 12, 2005, the Board received and reviewed a Report of the Compensation Committee recommending an allocation schedule for the allotted incentive option shares and voted to implement the Stock Incentive Plan for distribution of such options to the Corporation's present management, employees, directors and service providers as set forth in the Compensation Committee Report. The Company has not as yet issued the Incentive Stock Option Grant contracts.

The Company operates principally in the single serve flavored milk industry segment, under two distinct business models. In the United States, the Company is responsible for the sale of finished Slammers(R) flavored milk (referred to as "unit sales") to retail outlets. For these unit sales, the Company recognizes as revenue the invoiced wholesale prices that the Company charges to the retail outlets that purchase the Slammers(R) flavored milks. In countries other than the United States, the Company's revenue is generated by the sale of kits to dairy processors. Each kit consists of flavor ingredients for the Company's Slammers(R) flavored milks and production rights to manufacture and sell the milks. In line with the Company's revenue recognition policies, the Company recognizes the full invoiced kit price as revenue and credits the processor dairies. The Company currently sells kits to SADAFCO, a third party dairy processor located in Saudi Arabia, for distribution to nine Middle Eastern countries, and Neolac, a third party dairy processor located in Mexico.

#### Potential Change of Control and Distribution Agreements

-----

On July 13, 2005, Coca-Cola Enterprises, Inc. acquired options to purchase shares of common stock, convertible securities and warrants, entitling Coca-Cola Enterprises to purchase approximately 69,000,000 shares of common stock from 9 non-affiliated shareholders of the

Company (the "Options"). The common stock and other securities underlying the Options represent approximately 23% of the authorized shares of the Company's common stock. The exercise of the Options by Coca-Cola Enterprises is contingent on the completion of due diligence and the execution of a mutually satisfactory definitive master distribution agreement.

In addition, Coca-Cola Enterprises and the Company contemporaneously commenced negotiations regarding a stock purchase agreement for the direct sale of approximately 81 million shares of the Company's common stock to Coca-Cola Enterprises. With such a direct purchase of common stock, together with the shares of common stock purchasable upon the exercise of the Options, Coca-Cola Enterprises will hold slightly in excess of 50% of the Company's equity on a fully diluted basis. The transaction is contingent upon the execution of a distribution agreement, a stock purchase agreement and receipt of an appropriate fairness opinion by the Company as to the transaction.

On July 29, 2005, the Company and Coca-Cola Enterprises, Inc. ("CCE") entered into a Letter of Intent memorializing and confirming their intention, subject to due diligence, further negotiation and certain conditions, to enter into a stock purchase agreement pursuant to which CCE would purchase from the Company approximately 81,030,000 million shares of the Company's common stock at a purchase price of \$0.16245 per share. If the purchase of shares under the stock purchase agreement closes, those

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

shares, together with the shares of the Company's common stock subject to Options previously granted to CCE by certain unaffiliated stockholders of the Company, would, if exercised, give CCE ownership of approximately 50.01% of the Company's issued and outstanding common stock, on a fully diluted basis.

The closing under the stock purchase agreement will also be subject to the Company and CCE entering into a master distribution agreement pursuant to which CCE would distribute the Company's products throughout the United States, its possessions, Canada and other countries in which CCE is licensed to bottle products of The Coca-Cola Company. There can be no certainty that the stock purchase agreement contemplated by the Letter of Intent will be entered into, or if entered into, the transaction contemplated by the stock purchase agreement will be consummated.

### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - SIX MONTHS ENDED JUNE 30, 2005

#### FORWARD-LOOKING STATEMENTS

Statements that are not historical facts, including statements about the Company's prospects and strategies and the Company's expectations about growth contained in this report are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements represent the present expectations or beliefs concerning future events. The Company cautions that such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the Company's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among other things, the uncertainty as to the Company's future profitability; the uncertainty as to whether the Company's new business model can be implemented successfully; the accuracy of the Company's performance projections; and the Company's ability to obtain financing on acceptable terms to finance the Company's operations until

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

profitability.

### OVERVIEW

The Company's business model includes the development and marketing of a Company owned Slammers(R) trademarked brand, the obtaining of license rights from third party holders of intellectual property rights to other trademarked brands, logos and characters and the granting of production and marketing rights to processor dairies to produce branded flavored milk. The Company generates revenue in its international (non-US) business through the sale of "kits" to these dairies. The price of the "kits" consists of an invoiced price for a fixed amount of flavor ingredients per kit used to produce the flavored milk and a fee charged to the dairy processors for the production, promotion and sales rights for the branded flavored milk. In the United States, the Company generates revenue from the unit sales of finished branded flavored milks to retail consumer outlets.

The Company's new product introduction and growth expansion continues to be expensive, and the Company reported a net loss of \$2,579,275 for the six-month period ended June 30, 2005. As shown in the accompanying financial statements, the Company has suffered operating losses and negative cash flows from operations since inception and at June 30, 2005 has an accumulated deficit of \$36,491,265, a capital deficit of \$2,933,786, negative working capital of \$2,701,460. These conditions give rise to substantial doubt about the Company's ability to continue as a going concern. As discussed herein, the Company plans to work toward profitability in the Company's U.S. and international business and obtain additional financing. While there is no assurance that funding will be available or that the Company will be able to improve the Company's operating results, the Company is continuing to seek equity and/or debt financing. No assurances can be given, however, that management will be successful in carrying out the Company's plans.

### CORPORATE GOVERNANCE

#### The Board of Directors

The Company's board has positions for seven directors that are elected as Class A or Class B directors at alternate annual meetings of the Company's shareholders. Six of the seven current directors of the Company's board are independent. The Company's chairman and chief executive officer are separate. The board meets regularly, at least four times a year, and all directors have access to the information necessary to enable them to discharge their duties. The board, as a whole, and the audit committee in particular, reviews the Company's financial condition and performance on an estimated vs. actual basis and financial projections as a regular agenda item at scheduled periodic board meetings, based upon separate reports submitted by the Company's chief executive officer and chief financial officer. Directors are elected by the Company's shareholders after nomination by the board or are appointed by the board when a vacancy arises prior to an election. The Company has adopted a nomination procedure based upon a rotating nomination committee made up of those members of the director Class not up for election. The board presently is examining whether this procedure, as well as the make up of the audit and compensation committees, should be the subject of an amendment to the by-laws.

#### Audit Committee

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

The Company's audit committee is composed of three independent directors and functions to assist the board in overseeing the Company's accounting and reporting practices. The Company's financial information is booked in house by the Company's CFO's office, from which the Company prepares financial reports. These financial reports are audited or reviewed by Lazar Levine & Felix LLP, independent registered certified accountants and auditors. The Company's chief financial officer reviews the preliminary financial and non-financial information prepared in house with the Company's securities counsel and the auditors. The committee reviews the preparation of the Company's audited and unaudited periodic financial reporting and internal control reports prepared by the Company's chief financial officer. The committee reviews significant changes in accounting policies and addresses issues and recommendations presented by the Company's auditors. Currently, there is one vacancy on the audit committee.

### Compensation Committee

The Company's compensation committee is composed of three independent directors who review the compensation structure and policies concerning executive compensation. The committee develops proposals and recommendations for executive compensation and presents those recommendations to the full board for consideration. The committee periodically reviews the performance of the Company's other members of management and the recommendations of the chief executive officer with respect to the compensation of those individuals. Given the size of the Company, all such employment contracts are periodically reviewed by the board. The board must approve all compensation packages that involve the issuance of the Company's stock or stock options.

10

### Nominating Committee

The nominating committee was established in the second quarter 2002 and consists of those members of the director Class not up for election. The committee is charged with determining those individuals who will be presented to the shareholders for election at the next scheduled annual meeting. The full board fills any mid term vacancies by appointment.

### CRITICAL ACCOUNTING POLICIES

#### Estimates

This discussion and analysis of the Company's consolidated financial condition and results of operations are based on the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the Company to make estimates and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, the Company evaluates the Company's estimates, including those related to reserves for bad debts and valuation allowance for deferred tax assets. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the result of which forms the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ materially from these estimates under

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

different assumptions or conditions. The Company's use of estimates, however, is quite limited as the Company has adequate time to process and record actual results from operations.

### Revenue recognition

#### United States

-----

The Company recognizes revenue in the United States at the gross amount of its invoices for the sale of finished product to wholesale buyers ("unit sales"). The Company takes title to its branded flavored milks when they are shipped by the Company's third party processors and recognize as revenue the gross wholesale price charged to the Company's wholesale customers. The Company's gross margin is determined by the reported wholesale price less the cost charged by Jasper Products, the Company's third party processor, to produce the branded milk products.

In certain circumstances in its U.S. business, the Company is required to pay slotting fees, give promotional discounts or make marketing allowances in order to secure wholesale customers. These payments, discounts and allowances reduce the Company's reported revenue in accordance with the guidelines set forth in EITF 01-9 and SEC Staff Accounting Bulletin No. 104.

11

#### International Sales

-----

The Company generally recognizes revenue in its international business at the gross amount of its invoices for the sale of kits ("kit sales") at the time of shipment of flavor ingredients to processor dairies with which the Company has production contracts for extended shelf life and aseptic long life milk. A "kit" consists of flavor ingredients and the grant of production rights for the Company's branded products. The Company bases this recognition on its role as the principal in these transactions, its discretion in establishing kit sale prices (including the price of flavor ingredients and production right fees), its development and refinement of flavors and flavor modifications, its discretion in supplier selection and its credit risk to pay for ingredients if processors do not pay ingredient suppliers. The revenue generated by the production contracts under this model consists of the cost of the processors' purchase of flavor ingredients and fees charged by the Company to the processors for production rights. The Company formulates the price of production rights to cover the Company's intellectual property licenses, which varies by licensor as a percentage of the total cost of a kit sold to the processor dairy under the production agreement. The Company recognizes revenue on the gross amount of "kit" invoices to the dairy processors and simultaneously records as cost of goods sold the cost of flavor ingredients paid by the processor dairies to ingredients supplier. The recognition of revenue generated from the sale of production rights associated with the flavor ingredients is complete upon shipment of the ingredients to the processor, given the short utilization cycle of the ingredients shipped.

Pursuant to EITF 99-19, international sales of kits made directly to customers by the Company are reflected in the statements of operations on a gross basis, whereby the total amount billed to the customer is recognized as revenue.

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

In certain circumstances, such as in the United Kingdom and as anticipated in Canada, the Company recognizes revenue under the unit sales model.

### RESULTS OF OPERATIONS

Financial Condition at June 30, 2005  
-----

As of June 30, 2005, we had an accumulated deficit of \$36,491,265, cash on hand of \$377,705 and reported total capital deficit of \$2,933,786.

For this same period of time, we had revenue of \$3,346,388 and general and administrative expense of \$1,439,554.

After interest expenses of \$220,246, cost of goods sold of \$2,358,127, product development costs of \$110,265 and selling expenses of \$1,797,471 incurred in the operations of the Company, we had a net loss of \$2,579,275.

Six Months Ended June 30, 2005 Compared to Six Months Ended June 30, 2004  
-----

#### Consolidated Revenue

12

We had revenues for the six months ended June 30, 2005 of \$3,346,388, with cost of sales of \$2,358,127, resulting in a gross margin of \$988,261. This revenue and resultant gross margin is net of slotting fees, promotional discounts and marketing allowances for this period in the amount of \$187,295. Of the reported \$3,346,388, U.S. sales accounted for \$3,313,038 with an additional \$33,350 from international kit sales in the Middle East. We did not have revenue in this period in Canada or Mexico. Our reported revenue for the six months ended June 30, 2005 increased by \$1,466,826, a 78.04% increase compared to revenue of \$1,879,562 for the same period in 2004. This increase is the result of the Company's development of new branded product lines in the United States, including the 2005 launch of our Slammers(R) line of Mars' Starburst, MilkyWay and 3 Musketeers flavored milk drinks. Our launch of Mars Slammers(R) line in the first quarter 2005 achieved market penetration in 30,000 grocery and convenience stores for this line by June 30, 2005.

#### Consolidated Cost of Sales

We incurred cost of goods sold of \$2,358,127 for the six months ended June 30, 2005, \$2,355,514 of which was incurred in our U.S. business, and \$2,613 in connection with our international sales in the Middle East. Cost of goods sold in this period increased by \$1,093,040, an 86.40% increase compared to \$1,265,087 for the same period in 2004. The increase in cost of goods sold reflects an increase in sales and the concomitant increase in reported cost of goods sold associated with that increase.

In countries except the United States, our revenue is generated by the sale of kits to dairy processors. Each kit consists of flavor ingredients for flavored milks and production rights to manufacture and sell the milks. In line with our revenue recognition policies, we recognize the full invoiced kit price as revenue, less the cost of production charged by the processor, which we record as cost of goods sold.

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

In the United States, we are responsible for the sale of finished Slammers(R)flavored milk (referred to as "unit sales") to retail outlets. For these unit sales, we recognize as revenue the invoiced wholesale prices that we charge to the retail outlets that purchase the Slammers(R)flavored milks. We report as cost of goods sold the price charged to it by Jasper Products, a third party processor under contract with the Company, for producing the finished Slammers(R)products.

### Segmented Revenues and Costs of Sales

The following table presents revenue by source and type against costs of goods sold, as well as combined gross revenues and gross margins. In countries other than the United States, revenues for the period ended June 30 2005, were generated by kit sales to third party processors. The Company's revenue from the sale of finished product to retail outlets is recorded as "unit sales" on the following table.

United States  
-----

Revenues for the period ended June 30, 2005 from unit sales in the United States increased from \$1,489,185 for the same period in 2004 to

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

\$3,313,038 in 2005, a 122.47% increase. The increase is the result of the introduction of the Company's new product lines during this period.

In the period ended June 30, 2005, our gross margin for U.S. sales of \$957,524, increased by \$639,228, or by 200.83%, from \$318,296 for the same period in 2004. The increase in gross margin was the result of the increased sales and greater efficiencies in the production of our products.

### Foreign Sales

-----

Revenues for the period ended June 30, 2005 from kit sales in foreign countries decreased from \$345,998 for the same period in 2004 to \$33,350, a 90.36 % decrease. The decrease is the result of the lack of sales in Mexico and a reduction of sales in the Middle East during this period.

We recorded \$2,613 in costs of kit sales in foreign countries for the period ended June 30, 2005, a decrease of \$47,206 or 94.76% from \$49,819 for the same period in 2004. As a percentage of sales, the costs of goods sold decreased to 7.84% for the period ended June 30, 2005, from 14.4% for the same period in 2004.

14

For the period ended June 30, 2005, our gross profit of \$30,737 for kit sales in foreign countries decreased by \$265,442, or 89.62%, from \$296,179 for the same period in 2004. The decrease in gross profit was consistent with the decrease in sales volume for this period.

### Consolidated Operating Expenses

We incurred selling expenses of \$1,797,471 for the period ended June 30, 2005, \$1,625,913 of which was incurred in our United States operations. Our selling expense for this period increased by \$1,180,051, a 191.13% increase compared to our selling expense of \$617,420 for the same period in 2004. The increase in selling expenses in the current period was due to increased freight and promotional charges, including media advertising and Boston Marathon promotion, associated with increased sales and our development of four new product lines, utilizing newly licensed and directly owned branded trademarks.

We incurred general and administrative expenses for the period ended June 30, 2005 of \$1,439,554, most of which we incurred in our United States business operations and a small portion for the enlargement of our international business into the United Kingdom and Canada. Our general and administrative expenses for this period decreased by \$222,473, a 13.39% decrease compared to \$1,662,027 for the same period in 2004. The decrease in general and administrative expenses for the current period is the result of greater efficiencies in the running of our business activities.

As a percentage of total revenue, the Company's general and administrative expenses decreased from 88.4% in the period ended June 30, 2004, to 43% for the current period in 2005. ### LIQUIDITY AND CAPITAL RESOURCES

As of June 30, 2005, we reported that net cash used in operating activities was \$2,575,105, net cash provided by financing activities was \$2,900,870 and net cash used in investing activities was \$43,969. We had a negative working capital of \$2,701,460 as of June 30, 2005.

Compared to \$2,806,492 of net cash used in operating activities in the period ended June 30, 2004, our current period net cash used in operating activities decreased by \$231,387 to \$2,600,105. This decrease was the result of changes in deferred product development costs, prepaid expenses, accounts payable and accrued expenses. Included in the net loss in this current period were depreciation and amortization and stock compensation for a finder fee aggregating \$385,314, compared to \$264,618 for the same period in 2004.

Changes in accounts receivable in this current period in 2005 resulted in a cash increase of \$26,778, compared to a cash decrease in receivables of \$577,246 for the same period in 2004, having a net result of an increase of \$604,024. The changes in accounts payable and accrued liabilities in the period ended of June 30, 2004 contributed to a cash increase of \$15,713, whereas the changes in accounts payable and accrued liabilities for the current period in 2005 amounted to an increase of \$958,921. We have adopted and will keep implementing cost-cutting measures to lower our costs and expenses and to pay our accounts payable and accrued liabilities by using cash and equity instruments. Cash flow generated through our operating activities was inadequate to cover all of our cash disbursement needs in the period ended June 30, 2005, and we had to rely on equity and debt financing to cover expenses.

Cash used in the period ended June 30, 2005 in our investing activities for equipment was \$43,969 for software, computer equipment, mobile communication devices and leasehold improvements in the U.S., compared to \$7,852 for the same period in 2004.

Net cash provided by our financing activities for the period ended

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

June 30, 2005 was \$2,900,870. Net cash provided by financing activities for the same period in 2004 was \$3,438,217, for a net decrease of \$537,347. The decrease was due to less need for financing to fund the Company's operations during this period and the payment of approximately \$62,000 in registration costs for past financing.

The Company used the proceeds of the current period financing for working capital purposes to support the continued launch of new product lines under a license from Masterfoods USA.

17

Going forward, our primary requirements for cash consist of the following:

- \* the continued development of our business model in the United States and on an international basis;
- \* general overhead expenses for personnel to support the new business activities;
- \* development, launch and marketing costs for our line of new branded flavored milk products, and
- \* the payment of guaranteed license royalties.

We estimate that our need for financing to meet cash needs for operations will continue through the fourth quarter of 2005, when we expect that cash supplied by operating activities will approach the anticipated cash requirements for operation expenses. We anticipate the need for additional financing in 2005 to reduce our liabilities, assist in marketing and to improve shareholders' equity status. No assurances can be given that we will be able to obtain additional financing, or that operating cash flows will be sufficient to fund our operations.

We currently have monthly working capital needs of approximately \$220,000. We will continue to incur significant selling and other expenses in 2005 in order to derive more revenue in retail markets, through the introduction and ongoing support of our new products. Certain of these expenses, such as slotting fees and freight charges, will be reduced as a function of unit sales costs as we expand our sales markets and increase our sales within established markets. Freight charges will be reduced as we are able to ship more full truckloads of product given the reduced per unit cost associated with full truckloads versus less than full truckloads. Similarly, slotting fees, which are paid to warehouses or chain stores as initial set up or shelf space fees, are essentially one-time charges per new customer. We believe that along with the increase in our unit sales volume, the average unit selling expense and associated costs will decrease, resulting in gross margins sufficient to mitigate cash needs. In addition, we are actively seeking additional financing to support our operational needs and to develop an expanded promotional program for our products.

We are continuing to explore new points of sale for our branded flavored milk. Presently, we are aggressively pursuing the school and vending market through trade/industry shows and individual direct contacts. The implementation of such a school base program, if viable, could have an impact on the level of our revenue during 2005. Similarly, we expect that the greater control over sales resulting from our refined business model and the anticipated expansion into bodega stores as well as national chains, such as 7-Eleven, will have a positive impact on revenues.

Material Events

-----

In January 2005, we launched our Slammers(R)Starburst line of Fruit & Cream Smoothies utilizing a "shelf stable" re-sealable plastic bottle for milk products that does not require refrigeration. Until that launch, all single served flavored milk in plastic bottles required refrigeration for storage, distribution, and shelf placement. The tactical advantage of distributing milk products ambient enables us to side-step a major entry barrier in our immediate consumption strategy. Refrigerated milk is relegated to dairy direct-store-delivery systems that

18

are controlled by either regional dairy processors or larger national dairy holding companies. Shelf stable re-sealable plastic bottle allows us to use a more traditional distribution network that accommodates the non-refrigerated beverages. Also, milk products packaged in shelf stable re-sealable plastic bottles have significantly longer shelf life for storage, allowing us to ship in full truckloads resulting in decreased freight costs. We currently are converting all of our products to "shelf stable" re-sealable plastic bottle.

On July 29, 2005, the Company and Coca-Cola Enterprises, Inc. ("CCE") entered into a Letter of Intent memorializing and confirming their intention, subject to due diligence, further negotiation and certain conditions, to enter into a stock purchase agreement pursuant to which CCE would purchase from the Company approximately 81,030,000 million shares of the Company's common stock for approximately \$13 million dollars. If the purchase of shares under the stock purchase agreement closes, those shares, together with the shares of the Company's common stock subject to Options previously granted to CCE by certain unaffiliated stockholders of the Company, would, if exercised, give CCE ownership of approximately 50.01% of the Company's issued and outstanding common stock, on a fully diluted basis. The closing under the stock purchase agreement will also be subject to the Company and CCE entering into a master distribution agreement pursuant to which CCE would distribute the Company's products throughout the United States, its possessions, Canada and other countries in which CCE is licensed to bottle products of The Coca-Cola Company.

##### Individual Loans

-----

On November 6 and 7, 2001, respectively, we received the proceeds of two loans aggregating \$100,000 from two offshore lenders. The two promissory notes, one for \$34,000 and the other for \$66,000, were payable February 1, 2002 and bear interest at the annual rate of 8%. These loans are secured by a general security interest in all our assets. On February 1, 2002, the parties agreed to extend the maturity dates until the completion of the anticipated Series H financing. On September 18, 2002, the respective promissory note maturity dates were extended by agreement of the parties to December 31, 2002. On September 18, 2002, we agreed to extend the expiration dates of warrants issued in connection with our Series D and F preferred until September 17, 2005 and to reduce the exercise price of certain of those warrants to \$1.00, in partial consideration for the maturity date extension. The holders of these notes have agreed to extend the maturity dates, and the notes are now payable on a demand basis.

## Edgar Filing: BRAVO FOODS INTERNATIONAL CORP - Form 10QSB

The note's original maturity date of September 4, 2004 has been extended. We issued warrants to purchase 3,000,000 shares of our common stock to Mid-Am in connection with this promissory note. The warrants are exercisable for one year from issue at an exercise price of \$0.25 per share. We used the proceeds of this promissory note to pay the promissory note issued to Jasper Products in January 2004.
