RADVISION Provides Update on Share Repurchase Program

Monday May 21, 9:00 am ET

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION (Nasdaq: RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, reported today that it has repurchased 393,578 shares of its common stock in the open market since May 8. The total amount invested by the Company for those shares was approximately \$8.0 million.

The repurchase was made under a plan approved by the RADVISION Board of Directors and the District Court in Tel Aviv Jaffa that became effective August 3, 2006 authorizing the Company to repurchase up to \$30 million but not more than 2 million shares of its common stock. To date, the Company has purchased 849,551 shares of its common stock for \$15.0 million under the plan.

Boaz Raviv, Chief Executive Officer, commented: "RADVISION continues to deliver record-breaking results, significant market share gains and industry-leading technology innovation. With the unified communications market now a commercial reality, we believe the opportunity for our Company is more promising and exciting than it has ever been."

Gemtek Selects RADVISION Multimedia Terminal Framework
for IAD and WiFi Phone Development

Tuesday May 29, 9:15 am ET

RADVISION Multimedia Terminal Framework shortens development time for CPEs
that support multimedia

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION (Nasdaq: RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation networks, today announced that Taiwan-based Gemtek, one of the world's leading providers of wireless broadband solutions, is using the RADVISION Multimedia Terminal Framework to develop a new Integrated Access Device (IAD) and a WiFi phone.

The RADVISION Multimedia Terminal Framework delivers the support required for call control services and multiple terminations. With advanced call control services, support for a wide range of SIP specifications, multiple terminations support, and "out-of-the-box" ease of use, the Multimedia Terminal Framework is an ideal solution for IAD developers.

Gemtek's IADs and WiFi phones deliver high voice quality with rich features. "RADVISION is the leading provider of the relevant technologies in this space, with unmatched capabilities," said Ebony Huang, Vice President at Gemtek. "The Multimedia Terminal Framework enables us to extend SIP-based VoIP technologies and together with our advanced call control features, meet the needs of operators across the globe."

RADVISION's Multimedia Terminal Framework allows application developers to focus on application development, hardware integration and user interaction rather than complex VoIP standards when developing CPE (Customer Premise Equipment) devices, such as IADs and WiFi Phones. This enables faster time-to-market. The framework is a complete solution; encompassing signaling, call control and media management.

"IADs are becoming more popular and important as businesses move to IP networks for telecommunications," said Tsahi Levent-Levi, Product Manager at RADVISION. "Our Multimedia Terminal Framework is playing an important role in affecting this process."

About RADVISION
