The FNBO Loan Agreement provides for a short-term credit facility of up to \$5,500,000 (the “FNBO Revolving Loan”). The FNBO Loan Agreement also provides for a term loan in the original principal amount of \$2,000,000 (the “FNBO Term Loan”). The provisions of the FNBO Term Loan were subsequently amended, most recently on January 24, 2008. Under such amendment, the original principal amount of the FNBO Term Loan is approximately \$1,410,000, and the principal balance bears interest at 30-day LIBOR plus 2.1%, with principal and interest payments due monthly and the final payment of principal and interest due January 24, 2013.

Index

The FNBO Loan Agreement contains a variety of affirmative and negative covenants, including, but not limited to, financial covenants that MtronPTI maintain: (i) tangible net worth of not less than \$7,000,000, (ii) a ratio of current assets to current liabilities of not less than 1.5 to 1.0; (iii) a ratio of total liabilities to tangible net worth of not greater than 2.75 to 1.0; and (iv) a fixed charge ratio of 1.2 to 1.0. At June 30, 2008, the Company was in compliance with these covenants.

All outstanding obligations under the FNBO Loan Agreement are guaranteed by the Company.

In connection with the FNBO Term Loan, MtronPTI entered into a separate interest rate swap agreement with FNBO from which it receives periodic payments at the LIBOR Base Rate and makes periodic payments at a fixed rate of 5.60% through the life of the FNBO Term Loan. The Company has designated this swap as a cash flow hedge in accordance with Financial Accounting Standards Board ("FASB") 133 "Accounting for Derivative Instruments and Hedging Activities" ("FASB 133"). The fair value of the interest rate swap at June 30, 2008 is \$6,000 net of any tax effect, and is included in "swap liability on hedge contracts" on the condensed consolidated balance sheets. The change in fair value is reflected in other comprehensive loss, net of any tax effect.

On September 30, 2005, MtronPTI entered into a loan agreement (the "RBC Loan Agreement") with RBC, which provides for a loan in the original principal amount of \$3,040,000 (the "RBC Term Loan"). The RBC Term Loan bears interest at LIBOR Base Rate plus 2.75% and is being repaid in monthly installments based on a 20 year amortization, with the then remaining principal balance and interest due on the fifth anniversary of the RBC Loan Agreement. The RBC Loan Agreement contains a variety of affirmative and negative covenants, including, but not limited to, financial covenants that MtronPTI maintain: (i) a ratio of total liabilities to tangible net worth of at least 4.0 to 1.0; (ii) tangible net worth of at least \$4.2 million; and (iii) a fixed charge coverage ratio of not less than 1.2 to 1.0. At June 30, 2008, the Company was in compliance with these covenants.

All outstanding obligations under the RBC Loan Agreement are collateralized by security interests in the assets of MtronPTI and guaranteed by the Company.

In connection with the RBC Term Loan, MtronPTI entered into a five-year interest rate swap from which it receives periodic payments at the LIBOR Base Rate and makes periodic payments at a fixed rate of 7.51% with monthly settlement and rate reset dates. The Company has designated this swap as a cash flow hedge in accordance with FASB 133. The fair value of the interest rate swap at June 30, 2008 is (\$84,000) net of any tax effect, and is included in "swap liability on hedge contracts" on the condensed consolidated balance sheets. The change in fair value is reflected in other comprehensive loss, net of any tax effect.

F. Stock Based Compensation

The Company utilizes the provisions of Statement of Financial Accounting Standards ("SFAS") 123R, "Share-Based Payment" ("SFAS 123-R") to measure the cost of employee services in exchange for an award of equity instruments based on the grant-date fair value of the award and to recognize cost over the requisite service period. Compensation expense is recognized for all share-based payments granted under SFAS 123-R, and all awards granted under SFAS 123 to employees prior to the effective date that remain unvested on the effective date. The Company recognizes compensation expense on fixed awards with pro rata vesting on a straight-line basis over the service period.

On March 20, 2007, the Company granted 10,000 restricted shares to an executive officer. This officer subsequently resigned prior to December 31, 2007 without vesting in any shares. On December 31, 2007, the Board of Directors granted restricted shares to eight of its members at 1,471 shares each. On January 22, 2008, the Board of Directors granted 1,250 restricted shares to one of its members. All of these shares are to vest ratably over 2008 at the end of each respective quarter. Total stock compensation related expense for all outstanding grants for the three-month

period ended June 30, 2008 was \$33,000 and for the six-month period ended June 30, 2008 was \$66,000. The Company estimates the fair value of stock based compensation on the date of grant using the Black-Scholes-Merton option-pricing model for stock option grants. The Black-Scholes-Merton option-pricing model requires subjective assumptions, including future stock price volatility and expected time to exercise, which greatly affect the calculated values. There is no expected dividend rate. Historical Company information was the primary basis for the expected volatility assumption. Prior years grants were calculated using historical volatility as the Company believes that the historical volatility over the life of the option is more indicative of the options expected volatility in the future. The risk-free interest rate is based on the U.S. Treasury zero-coupon rates with a remaining term equal to the expected term of the option. SFAS 123-R also requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Based on past history of actual performance, a zero forfeiture rate has been assumed.

Index

G. Loss Per Share

The Company computes loss per share in accordance with SFAS No. 128, "Earnings Per Share." Basic loss per share is computed by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted earnings per share adjusts basic earnings per share for the effects of stock options, restricted common stock, and other potentially dilutive financial instruments, only in the periods in which the effects are dilutive.

The following securities have been excluded from the diluted loss per share computation because the impact of the assumed exercise of stock options and unvested restricted stock would have been anti-dilutive:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Options to purchase common stock	200,000	200,000	200,000	200,000
Unvested restricted stock	7,754	30,000	7,754	30,000
Total	207,754	230,000	207,754	230,000

H. Other Comprehensive Loss

Other comprehensive loss includes the changes in fair value of investments classified as available for sale and the changes in fair values of derivatives designated as cash flow hedges.

For the six months ended June 30, 2008, total comprehensive loss was (\$1,176,000), comprised of net loss of (\$1,163,000) and change in Accumulated Other Comprehensive Loss of (\$13,000), compared to total comprehensive loss of (\$4,050,000) in the six months ended June 30, 2007, which was comprised of net loss of (\$2,275,000) and change in Other Comprehensive Loss of (\$1,775,000).

The change in accumulated other comprehensive loss, net of related tax, for the six month periods ended June 30, 2008 and 2007, are as follows:

In addition, the remaining assets and liabilities of the business divested in 2007 have been reclassified to "Assets of Discontinued Operations" and "Liabilities of Discontinued Operations" and the assets of the divested business held for separate sale continue to be classified as held and used in accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," and are included within "Land and Buildings and Improvements."

Consolidated Revenues and Gross Margin

Consolidated revenues from continuing operations increased by \$136,000, or 1.4%, to \$10,150,000 for the second quarter 2008 from \$10,014,000 for the comparable period in 2007. The increase is due primarily to an increase in foreign sales of \$365,000 over the comparable period in 2007 offset by a decrease in domestic sales of \$229,000. This growth in foreign sales is driven by the Company's customers' continuing migration of manufacturing into low labor cost regions.

Consolidated gross margin from continuing operations as a percentage of revenues for the second quarter 2008 increased to 25.7% from 25.3% for the comparable period in 2007.

Operating Loss

Operating loss from continuing operations of \$394,000 for the second quarter 2008 is an improvement of \$647,000 from the \$1,041,000 operating loss for the comparable period in 2007. The \$647,000 improvement was primarily driven by an impairment loss on Lynch Systems' assets recognized in the second quarter of 2007 of \$905,000 compared to \$0 in 2008, offset by an increase in engineering, selling and administrative expenses of \$326,000 in the second quarter of 2008 compared to the same period in 2007, which was primarily driven by an increase in professional fees due to the Company's restatement of its financial statements for the first two quarters of 2007, fiscal 2006 and prior years and its continuing compliance requirements under Sarbanes-Oxley.

Other Income (Expenses)

Net interest expense for the second quarter 2008 was \$66,000, compared with \$91,000 for the comparable period in 2007 due to the overall reduction in Company debt in the second quarter of 2008 in relation to the comparable period in 2007, as well as a reduction in the variable interest rate on MtronPTI's revolving loan. In the second quarter of 2007, MtronPTI recognized \$173,000 in other expense relating to the remeasurement process of consolidating one of its foreign subsidiaries, offset by the gain on the sale of vacant land of \$88,000.

Income Taxes

The Company files consolidated federal income tax returns, which includes all subsidiaries. The income tax provision for the six-month period ended June 30, 2008 included foreign taxes. The provision gives effect to our estimated tax liability at the end of the year.

Due to the uncertainty surrounding the realization of the favorable U.S. tax attributes in future tax returns, we continue to record a full valuation allowance against our otherwise recognizable U.S. net deferred tax assets as of June 30, 2008 and December 31, 2007, except for the Company's \$111,000 in AMT deferred tax assets which do not expire.

The decrease in cash provided by financing activities is due primarily to a decrease in net borrowings on the Company's note payable offset by a decrease in scheduled repayments of its long-term debt.

At June 30, 2008, total liabilities of \$10,545,000 was \$38,000 more than the total liabilities at December 31, 2007 of \$10,507,000. Changes in Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, management assessed the effectiveness of internal control over financial reporting as of December 31, 2007 based on the guidance for smaller companies in using the Committee of Sponsoring Organizations of the Treadway Commission (COSO) Internal Controls – Integrated Framework as it relates to the effectiveness of internal control over financial reporting. Based on that assessment, management had concluded that the Company's internal controls over financial reporting were not effective as of December 31, 2007 to provide reasonable assurance regarding the reliability of its financial reporting and the preparation of its financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. As a result of its assessment of our internal control over financial reporting, management identified material weaknesses in the following areas: entity-level controls, enterprise-wide risk oversight, financial statement close and reporting process,

inventory controls and information technology company-level controls.

There were no significant changes in our internal control over financial reporting, other than those stated below, that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Remediation Efforts to Address Material Weaknesses in Internal Control over Financial Reporting

Throughout the process to report on the operations for the three months ended June 30, 2008, management made progress in the implementation of a remediation plan to address the material weaknesses identified as of December 31, 2007. We have implemented controls and procedures that have addressed and corrected the previously reported control deficiency related to material weakness in internal control over financial reporting with respect to inventory controls. The primary changes made by the Company to remedy the identified material weakness were improvements in the documentation of implemented controls and procedures and their respective reviews and approvals. In addition, management continuously identifies and communicates in a timely manner to the responsible personnel across the Company changes to its compliance program and actively follows up on its appropriate implementation.

Management has continued to identify a material weakness in the area of information technology company-level controls.

We will continue to implement process changes to address the material weaknesses previously noted regarding the internal controls over financial reporting for fiscal 2007. We are currently undergoing a comprehensive effort to remedy the control deficiencies identified. This effort, under the direction of the Company's senior management and the newly hired IT Director who started in July 2008, includes the documentation, testing and review of our internal controls. During the course of these activities, we may identify other potential improvements to our internal controls over financial reporting that we will evaluate for possible future implementation. We expect to continue such documentation, testing and review and may identify other control deficiencies, possibly including additional material weaknesses, and other potential improvements to our internal controls in the future.

In the normal course of business, the Company and its subsidiaries may become defendants in certain product liability, worker claims and other litigation. There is no litigation pending currently.

Item 1A. Risk Factors.

We found material weaknesses in our internal control over financial reporting and concluded that our disclosure controls and procedures and our internal control over financial reporting were not effective as of December 31, 2007 and June 30, 2008.

As disclosed in Part II, Item 9A(T), "Controls and Procedures," of our Annual Report on Form 10-K, and updated herein in Part I, Item 4T, "Controls and Procedures," of our Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures and our internal control over financial reporting were not effective as of December 31, 2007 and not effective as of June 30, 2008. Our failure to successfully implement our plans to remediate the material weaknesses discovered could cause us to fail to meet our reporting obligations, to produce timely and reliable financial information, and to effectively prevent fraud.
