COMMERCIAL FEDERAL CORPORATION

FORM 8-K

CURRENT REPORT

Item 9. Regulation FD Disclosure:

On February 6, 2003, Commercial Federal Corporation (the "Corporation") issued a press release announcing the results of its operations for the fourth quarter and the year ended December 31, 2002. That press release included selected financial and operational information including activity in the loans serviced for other institutions for the three months ended December 31, 2002. That activity as originally made public was in error. The following presents such information for the three months ended December 31, 2002, as originally filed with the press release and the revised amounts.

### Commercial Federal Reports 23% Increase in 2002 EPS

OMAHA, Nebraska, February 6, 2003 -- Commercial Federal Corporation (NYSE: CFB), the parent company of Commercial Federal Bank, one of the largest financial institutions in the Midwest, today announced net income of \$108.5 million, or \$2.37 per diluted share, for the year ended December 31, 2002. This compares to net income of \$97.7 million, or \$1.93 per diluted share, for the year ended December 31, 2001.

Net income for the quarter ended December 31, 2002 was \$26.3 million, or \$.58 per diluted share, compared to net income of \$25.1 million, or \$.53 per diluted share, for the quarter ended December 31, 2001.

Results of operations for 2002 compared with the prior year are affected by the required changes in 2002 in the accounting for goodwill acquired in business combinations. For 2001, adjusted earnings per diluted share would have been \$2.10 including the benefit of eliminating goodwill amortization totaling \$8.1 million.

William A. Fitzgerald, chairman of the board and chief executive officer stated, "The Company had an outstanding quarter and record year, in spite of the continued weakness in the national economy. Record low interest rates led continued strong performance of the Company's mortgage banking operations. The Company's core banking operations produced solid financial results and enhanced the strength of our balance sheet.

Return on average assets (ROA) and return on average equity (ROE) for 2002 were .82% and 14.30%, respectively. This compares to an ROA of .76% and ROE of 12.23% for 2001. Book value per share increased to \$16.74 at the end of 2002, from \$15.98 at the end of 2001.

Mr. Fitzgerald concluded, "As we begin 2003, Commercial Federal remains focused on our strategy to expand share in our high growth core markets and provide long-term value for our investors."

Chief Financial Officer David S. Fisher stated, "We are pleased with the

## Edgar Filing: COMMERCIAL FEDERAL CORP - Form 8-K

Company's financial results for 2002, which were strengthened by record mortgage loan volume due to the low interest rate environment. Mortgage loan volumes increased more than 40% from 2001. Given economic uncertainties, we cannot predict that this level of mortgage volume will continue through 2003.

Mr. Fisher concluded, "Core consumer and commercial banking units are performing well and Commercial Federal's credit risk profile remains solid. As we continue to successfully grow loans and deposits, earnings will grow over the long-term."

### Highlights of the Quarter

#### Net Interest Income

Net interest income totaled \$80.4 million for the fourth quarter of 2002, compared to \$82.1 million for the 2002 third quarter and \$82.1 million for the fourth quarter of 2001. For the year, net interest income totaled \$327.7 million, compared with \$307.4 million for 2001. The net interest margin for the quarter decreased to 2.67%, compared with 2.82% for the same period last year and 2.77% for the quarter ended September 30, 2002.

The Company's net interest margin continues to compress as the rates on the Company's earning assets continue to decline with the drop in market interest rates, while the rate reductions have not resulted in similar reductions in the rates paid on deposits and borrowings. Further interest rate reductions in market rates during 2003 would place additional pressure on the Company's net interest margin.

#### Noninterest Income

The Company's retail and mortgage banking operations continued to generate strong results in the fourth quarter. Retail banking fees are a major portion of recurring noninterest income. The primary components of this income include deposit-related fees and charges, debit card and transaction-related revenues, and other retail fees. For the 2002 fourth quarter, retail fees totaled \$14.3 million compared to \$14.6 million for the September 30, 2002 quarter and \$14.4 million for the fourth quarter of 2001. Retail fee income was \$55.3 million for 2002 compared to \$53.5 million for 2001. Retail fee income for 2002 increased 7.0% over 2001 after adjusting for the \$1.6 million in fee income lost from the 34 branches sold in 2001.

The mortgage banking business includes activities associated with the Company's mortgage servicing and mortgage banking operations, offset by the amortization and valuation adjustments related to its mortgage servicing rights asset. During the 2002 fourth quarter, the Company recorded an impairment adjustment of \$9.6 million. In addition, amortization of existing mortgage servicing rights increased by \$3.8 million over the September 30, 2002 quarter. The Company offset this impairment and amortization by realizing \$12.3 million in pre-tax gains on the sales of securities and changes in fair values of hedging instruments. For 2002, the Company recorded impairment losses totaling \$60.4 million on its mortgage servicing rights compared to \$19.1 million for 2001. These losses were offset by pre-tax gains on the sales of securities and loans totaling \$76.8 million and \$24.2 million, respectively, for calendar years 2002 and 2001.

#### Operating Expenses

General and administrative expenses for the quarter totaled \$74.1 million compared with \$61.7 million for the September 30, 2002 quarter and \$64.8 million

## Edgar Filing: COMMERCIAL FEDERAL CORP - Form 8-K

for the 2001 fourth quarter. Expenses for the 2002 fourth quarter included charges and losses totaling \$8.5 million, resulting from asset impairment losses, prepayment of debt, adjustments to deferred loan costs and an additional charitable trust contribution.

### Credit Quality Overview

Overall credit quality remains strong as the Company continues to aggressively manage its nonperforming assets portfolio. In the quarter ended December 31, 2002, nonperforming assets decreased by \$10.4 million to \$114.0 million, compared to \$124.4 million at September 30, 2002. For the year nonperforming assets fell by \$17.5 million. Total NPAs represented .87% of total assets at the end of 2002, compared to .92% at September 30, 2002 and 1.02% at December 31, 2001.

Net charge-offs in the fourth quarter of 2002 totaled \$13.1 million, compared with \$3.4 million for the September 30, 2002 quarter. Charge-offs for the 2002 quarter included \$8.8 million in specific reserves previously allocated on \$11.0 million of nonresidential nonperforming loans. For the year, net loan charge-offs totaled \$27.0 million, compared to \$19.8 million for the year ending December 31, 2001.

During the 2002 fourth quarter, the Company added \$9.7 million to the loan loss allowance. Allowance for losses on loans totaled \$106.3 million at December 31, 2002, compared with \$102.5 million at December 31, 2001. The allowance for losses to nonresidential nonperforming assets at December 31, 2002 was 353%, compared to 258% at September 30, 2002 and 243% at December 31, 2001.

### Balance Sheet and Capital Ratios

Total assets at December 31, 2002 were \$13.1 billion, compared to \$13.5 billion at September 30, 2002 and \$12.9 billion at December 31, 2001. Total deposits increased \$276 million in the quarter ended December 31, 2002, with core deposit products, including checking, money market and savings accounts accounting for \$253 million of this increase. For the year, deposits increased \$43 million totaling \$6.4 billion at December 31, 2002.

Stockholders' equity was \$756.5 million at December 31, 2002, compared with \$745.9 million at September 30, 2002 and \$734.7 million at December 31, 2001. The capital ratios of the Company's banking subsidiary continued to exceed regulatory requirements for classification as "well-capitalized," the highest regulatory standard.

### Capital Management

During the quarter, the Company redeemed all of the fixed-rate 9.375 % cumulative trust preferred securities of the CFC Preferred Trust. This redemption totaled \$45 million plus accrued interest. The redemption was funded primarily from the proceeds of a new term and revolving credit agreement dated December 30, 2002. The Company repurchased 259,200 shares of its common stock during the last half of 2002 at a cost of \$6.2 million. These repurchased shares were part of the 500,000-share buyback authorization passed by the Company's Board of Directors in February 2002. In November

2002, the Board authorized the repurchase of an additional five million shares of the Company's stock. This repurchase is expected to be completed by June 30, 2004.

Commercial Federal Corporation is the parent company of Commercial Federal Bank, a \$13.1 billion federal savings bank that operates branches located in Nebraska,

## Edgar Filing: COMMERCIAL FEDERAL CORP - Form 8-K

Iowa, Colorado, Kansas, Oklahoma, Missouri and Arizona. Commercial Federal provides consumer and commercial banking services including mortgage origination and servicing, commercial and industrial lending, small business banking, construction lending, cash management, brokerage and insurance services, and Internet banking.

Commercial Federal's Web site, <http://www.comfedbank.com>, will host a live webcast of the investor conference call to discuss 2002 fourth quarter results on Thursday, February 6, 2003 at 10:30 a.m. Central Time. The site also includes access to company news releases, annual reports, quarterly financial statements, and SEC filings.

Certain statements contained in this release are forward-looking in nature. These statements are subject to risks and uncertainties that could cause Commercial Federal's actual results or financial condition to differ materially from those expressed in or implied by such statements. Factors of particular importance to Commercial Federal include, but are not limited to, changes in general economic conditions, changes in interest rates, changes in regulations or accounting methods, and price levels and conditions in the public securities markets generally.
