XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Preparation and Consolidation

These unaudited consolidated financial statements include the accounts of the Company and all of its subsidiaries and have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, these unaudited financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the financial position and results of operations as at the end of and for the periods presented. The results of operations for any interim period are not necessarily indicative of the results for a full year. All significant inter-company accounts and transactions have been eliminated. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

To facilitate period-to-period comparisons, certain reclassifications have been made to prior period consolidated financial statement amounts to conform to current period presentation. There was no effect on net income from this change in presentation.

Unless the context otherwise indicates, references herein to the "Company" include XL Capital Ltd and its consolidated subsidiaries.

2. Significant Accounting Policies

(a) Derivatives

For all periods reported herein, the Company amended the presentation of certain credit derivative transactions (described below) in the consolidated statements of income to include certain components of the change in fair value in "gross premiums written", "net premiums earned" and "net losses and loss expenses incurred", and in the consolidated balance sheet, certain components of the fair value in "unearned premiums" and "unpaid losses and loss expenses." Previously, the change in fair value of all of the Company's derivative transactions was reflected in one line item under "net realized and unrealized gains (losses) on derivative instruments", and the fair value had been reflected in "other assets" and "other liabilities." There was no effect on net income as a result of this change in presentation and prior period results have been reclassified to reflect this presentation. This change in presentation is applicable only to credit default swaps issued by the Company that are investment grade and that the Company intends, and has the ability, to hold to maturity, and is consistent with practices in the financial guaranty insurance industry for reporting the results of such instruments.

(b) Stock-based compensation

Effective January 1, 2003, the Company adopted the fair value recognition provisions of Statement of Financial Accounting Standards ("FAS") No. 123, *Accounting for Stock-Based Compensation* ("FAS 123"), as amended by FAS No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure* ("FAS 148"), under the prospective method for options granted subsequent to January 1, 2003. Prior to 2003, the Company accounted for options under the disclosure-only provisions of FAS 123 and no stock-based employee compensation cost was included in net income as all options granted had an exercise price equal to the market value of the Company's ordinary shares on the date of the grant. Awards under the Company's plans vest over periods ranging from three to four years. If the fair-value-based method had been applied to all awards since the original effective date of FAS 123, the cost related to employee stock-based compensation included in the determination of net income would have been higher. The following table illustrates the net effect on net income and earnings per share as if the fair-value-based method had been applied to all outstanding and unvested awards in each period:

3. Recent Accounting Pronouncements

Statement of Position (□SOP□) 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (□SOP 03-3□), addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor□s initial investment in loans or debt securities acquired in a transfer if those differences are attributable, at least in part, to credit quality. SOP 03-3 limits the yield that may be accreted (accretable yield) to the excess of the investor□s estimate of undiscounted expected principal, interest and other cash flows (cash flows expected at acquisition to be collected) over the investor□s initial investment in the debt security. SOP 03-3 is effective for loans acquired in fiscal years beginning after December 15, 2004. The adoption of SOP 03-3 did not have a material effect on the Company□s financial condition or results of operations.

In December 2004, the Financial Accounting Standards Board (□FASB□) issued FAS No. 123 (Revised), *Share-Based Payments* (□FAS 123 (Revised)□), which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based at their fair values. This statement will be effective for the first fiscal year beginning after June 15, 2005. The Company adopted the fair-value-based method of accounting for share-based payments effective January 1, 2003, using the prospective method described in FAS 148. FAS 123 (Revised) must be applied not only to new awards but to previously granted awards that are not fully vested on the effective date. Had the Company adopted FAS 123 (Revised) in prior periods, the impact of that standard would have approximated the impact of FAS 123 as described in the disclosure of pro forma net income and earnings per share in Item 1, Note 2(b) to the Unaudited Consolidated Financial Statements.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

In March 2005, the FASB issued FASB Staff Position (FSP) FIN 46(R)-~~5~~*Implicit Variable Interests Under FASB Interpretation No. 46(R)* (FSP FIN 46(R)-5), which requires an enterprise to consider whether it holds an implicit variable interest in a Variable Interest Entity (VIE) and what effect this may have on the calculation of expected losses and residual returns of the VIE and the determination of which party, if any, is considered the primary beneficiary of the VIE. FSP FIN 46(R)-5 is effective for the first reporting period beginning after March 3, 2005 and did not have a material impact on the Company's financial condition or results of operations.

In May 2005, the FASB issued FAS No. 154, *Accounting Changes and Error Corrections* (FAS 154), which changes the requirements for the accounting for and reporting of changes in accounting principles. FAS 154 applies to all voluntary changes in accounting principles and changes the requirements for accounting for, and reporting of, changes in accounting principles. FAS 154 will be effective for fiscal years beginning after December 2005.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

3. Recent Accounting Pronouncements (continued)

In June 2005, the FASB ratified the Emerging Issues Task Force (EITF) Issue No. 04-~~04~~*Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights* (EITF 04-5). The EITF reached a consensus that a sole general partner is presumed to control a limited partnership (or similar entity) and should consolidate the limited partnership unless (1) the limited partners possess substantive kick-out rights or (2) the limited partners possess substantive participating rights similar to the rights described in EITF Issue No. 96-16, *Investor's Accounting for an Investee When the Investor Has a Majority of the Voting Interest but the Minority Shareholders Have Certain Approval or Veto Rights*. EITF 04-5 was effective for all new and modified agreements upon the FASB's ratification in June 2005. For pre-existing agreements that are not modified, the consensus is effective as of the beginning of the first fiscal reporting period beginning after December 15, 2005 and is not expected to have a material impact on the Company's financial condition or results of operations.

In July 2005, the FASB issued FSP APB 18-1, *Accounting by an Investor for Its Proportionate Share of Accumulated Other Comprehensive Income of an Investee Accounted for under the Equity Method In Accordance With APB Opinion No. 18 upon a Loss of Significant Influence* (FSP APB 18-1), to provide guidance on how an investor should account for its proportionate share of an investee's equity adjustments for other comprehensive income (OCI) upon a loss of significant influence. The FASB believes that an investor's proportionate share of an investee's equity adjustments for OCI should be offset against the carrying value of the investments at the time significant influence is lost. To the extent that the offset results in a carrying value of the investment that is less than zero, an investor should (a) reduce the carrying value of the investment to zero and (b) record the remaining balance in income. FSP APB 18-1 becomes effective during the fourth quarter of 2005 and is not expected to have a material impact on the Company's financial condition or results of operations.

In August 2005, the FASB issued FSP FAS 123(R)-1, *Classification and Measurement of Freestanding Financial Instruments Originally Issued in Exchange for Employee Services under FASB Statement No. 123(R)* (FSP FAS 123(R)-1), to defer the requirement of FAS 123(R) that a freestanding financial instrument originally subject to FAS 123(R) becomes subject to the recognition and measurement requirements of other applicable GAAP when the rights conveyed by the instrument are no longer dependent on the holder being an employee of the entity. This FSP notes that these instruments should continue to be subject to the recognition and measurement provisions of FAS 123(R) throughout the life of the instrument, unless their terms are modified when the holder is no longer an employee. Following modification, recognition and measurement should be determined through reference to other applicable GAAP. FSP FAS 123(R)-1 becomes effective during the fourth quarter of 2005 and is not expected to have a material impact on the Company's financial condition or results of operations.

The Company is aware of the SEC's recent review of the loss reserving practices of the financial guaranty industry. The Company recognizes that there is diversity in practice among financial guaranty insurers and reinsurers with respect to their accounting policies. Current accounting literature, specifically FASB FAS No. 60 *Accounting and Reporting by Insurance Enterprises* (FAS 60) does not specifically address the unique characteristics of financial guaranty insurance contracts. During June 2005, the FASB undertook a project to review this matter and provide guidance for the accounting for financial guaranty insurance contracts under which it will consider claims liability recognition, premium recognition, and the related amortization of deferred policy acquisition costs. The Company will continue its loss reserving methodology as noted in Item 8, Note 2(k) to Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2004, until further guidance is provided by the SEC or FASB.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

4. Segment Information

The Company is organized into three operating segments — Insurance, Reinsurance and Financial Products and Services — in addition to a Corporate segment that includes the general investment and financing operations of the Company. General, life and annuity and financial operations are disclosed separately by segment. General operations include property and casualty lines of business.

The Company evaluates the performance of each segment based on underwriting results for general operations, net income from life and annuity operations and contribution from financial operations. Other items of revenue and expenditure of the Company are not evaluated at the segment level. In addition, the Company does not allocate assets by segment for its general operations. Investment assets related to the Company's life and annuity and financial operations are held in separately identified portfolios. Net investment income from these assets is included in net income from life and annuity operations and contribution from financial operations, respectively.

Following changes in certain executive management responsibilities in January 2005, the Company changed the reporting segments under which certain business units are reported in order to reflect these changes in responsibilities.

- Results of business structured by XL Financial Solutions Ltd (["XLFS"]) are now included entirely within the Financial Products and Services segment whereas previously this unit was reported in all three segments, depending on the nature of individual contracts.
- Certain blocks of U.S.-based term life mortality reinsurance business previously included in the Financial Products and Services segment are now included in the Reinsurance segment as management of these contracts was transferred to the life reinsurance business units in order to centralize the Company's management of traditional mortality-based reinsurance business.
- Political risk insurance business units now report to executive management of the Financial Products and Services segment and, as such, earnings from this business are no longer reported in the Insurance segment but included with financial operations.
- All operations of business units within the Financial Products and Services segment, including municipal reinvestment contracts and funding agreements, are now reported under financial operations in order to consolidate businesses with similar operating characteristics and risks.
- Net investment income and net income from affiliates generated by assets and interest expense incurred on liabilities of the business units within the Financial Products and Services segment is reported under financial operations. This income and expense is included in financial operations as it relates to interest on portfolios of separately identified and managed assets and deposit liabilities.

Prior period comparative information has been re-presented to conform to the above noted changes. There was no change in net income as a result of this change in presentation.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Unpaid Losses and Loss Expenses

The third quarter of 2005 experienced an unprecedented quantum of natural catastrophe losses. On August 29, 2005, Hurricane Katrina, a Category 4 hurricane, hit the Gulf Coast of the United States and is estimated to have caused the largest ever insured loss from a natural disaster in the property and casualty insurance industry. On September 24, 2005, Hurricane Rita, a Category 3 hurricane, hit the Gulf Coast of the United States and caused considerable damage, although Hurricane Rita was less severe than Hurricane Katrina. In addition, there were several other natural loss events, including Hurricanes Dennis, Emily and Ophelia, the European and Mumbai Floods and Typhoon Mawar (Other Cats). Collectively, Hurricanes Katrina, Rita and the Other Cats are referred to herein as the Q3 05 Cats and have had a significant impact on the Company's results of operations and financial condition.

The Company has exposure to the Q3 05 Cats with claims expected to arise mainly from its property, marine, energy and business interruption insurance and reinsurance coverages. The Company has performed an analysis of contracts it believes are exposed to the Q3 05 Cats and, together with preliminary information received from insureds and cedents and industry models, has determined its best estimate at this time for the expected ultimate loss. Actual losses may vary materially from this estimate based on a number of factors, including receipt of additional information from insureds or brokers, the attribution of losses to coverages that had not previously been considered as exposed and inflation in repair costs due to additional demand for labor and materials. In addition, the loss estimate includes a high level of uncertainty related to, among other things, complex coverage issues associated with Hurricanes Katrina and Rita, limited claims data received to date and potential legal developments that may result in ultimate losses not being known for a considerable period of time. Therefore, losses may ultimately be materially greater or lesser than the current estimate and may impact future financial results.

The following is an analysis of the impact of the Q3 05 Cats on the Company's results of operations:

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Unpaid Losses and Loss Expenses (continued)

Net premiums earned relate to net reinstatement and adjustment premiums that typically are received on assumed business or paid on ceded business when a catastrophic event occurs. The premium is paid to reinstate coverage for the remaining life of the contract.

The Company has estimated its reinsurance recoveries in accordance with underlying reinsurance contract terms. Approximately 98% of the relevant reinsurers currently have Standard and Poor's financial strength ratings of [A-] or better, with approximately 45% rated [AA-] or better.

During the quarter ended June 30, 2005, the Company increased net losses and loss expenses by an additional \$190.6 million due to higher than expected losses in its North American reinsurance operations, primarily from claims arising from workers' compensation, umbrella liability, errors and omissions and directors' and officers' lines written, largely, in years prior to 2001. This increase resulted from the Company's scheduled semi-annual reserve review.

6. Future Policy Benefit Reserves

As a result of paid losses exceeding expectations on certain novated blocks of U.S.-based term life reinsurance business, the Company undertook an in-depth review of the reported losses and recorded a premium deficiency charge to earnings of \$63.3 million in the second quarter of 2005. This charge comprised a write-off of deferred acquisition costs of \$25.9 million and an increase in claims and policy benefits of \$37.4 million. These contracts were novated to the Company from Annuity and Life Reassurance, Ltd., an affiliated company.

7. Notes Payable and Debt and Financing Arrangements

The Company replaced its 364-day credit facility that expired on June 22, 2005 with a new 5-year \$2.35 billion credit facility that expires on June 22, 2010. The facility provides letter of credit capacity of up to \$2.25 billion and revolving credit of up to \$1.0 billion. The revolving credit sub-limit of \$1.0 billion is shared with the 3-year credit facility that the Company entered into in June 2004 in that the Company can have no more than \$1.0 billion in aggregate in revolving credit outstanding under the two facilities. In addition, the 5-year facility contains a \$100 million revolving-credit-only sub-limit, which means that no more than \$2.25 billion of the total 5-year facility of \$2.35 billion is available in the form of letters of credit.

The Company entered into a new bilateral revolving credit facility on August 3, 2005. The bilateral revolving credit facility provides up to \$100 million in revolving credit and was unutilized at September 30, 2005. The Company replaced a 364-day letter of credit facility on September 30, 2005 with a new 364-day \$150 million credit facility that expires on September 29, 2006. This facility was unutilized at September 30, 2005. Another 364-day revolving credit and letter of credit facility expired on September 30, 2005 and was not replaced. This facility had provided up to \$100 million of letters of credit and up to \$60 million in revolving credit with aggregate credit available of \$100 million.

8. Exposures under Guaranties

The Company provides financial guaranty insurance and reinsurance to support public and private borrowing arrangements. Financial guaranty insurance guarantees the timely payment of principal and interest on insured obligations to third party holders of such obligations in the event of default by an issuer. The Company's potential liability in the event of non-payment by the issuer of an insured or reinsured obligation represents the aggregate outstanding principal insured or reinsured under its policies and contracts and related interest payable at the date of default. In addition, the Company provides credit protection on specific referenced credits or on pools of specific referenced credits through the issuance of credit default swaps. Under the terms of credit default swaps, the seller of credit protection makes a specified payment to the buyer of credit protection upon the occurrence of one or more specified credit events with respect to a reference obligation or entity. The Company's potential liability under credit default swaps represents the notional amount of such swaps.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

8. Exposures under Guaranties (continued)

At September 30, 2005, the Company's net outstanding par exposure under its in-force financial guaranty insurance and reinsurance policies and contracts aggregated \$68.6 billion and net reserves for losses and loss adjustment expenses relating to such exposures was \$160.0 million at such date. In addition, at September 30, 2005, the Company's notional exposure under credit default swaps aggregated to \$11.5 billion and the net liability for these credit default swaps reflected in the Company's balance sheet at September 30, 2005 was \$28.0 million.

At September 30, 2005, the Company's exposure to public finance credits located in Gulf Coast counties impacted by Hurricanes Katrina and Rita and designated by the Federal Emergency Management Agency for individual and public assistance was \$283.1 million. The Company has no direct exposure in the City of New Orleans. The Company does not anticipate any material adverse effects on these credits and for this reason no reserves have been established by management related to these exposures.

9. Derivative Instruments

The Company enters into investment, structured financial and weather and energy derivative instruments for both risk management and trading purposes. The Company also enters into credit derivatives in connection with its Financial Products and Services business. The Company is exposed to potential loss from various market risks and manages its market risks based on guidelines established by senior management. All of these derivative instruments are carried at fair value. Resulting realized and unrealized gains and losses on credit derivatives are accounted for as discussed in Item 1, Note 2(a) to the Unaudited Consolidated Financial Statements. Resulting realized and unrealized gains and losses on all other derivatives are recognized in net realized and unrealized gains (losses) on derivatives during the period in which they occur.

The following table summarizes the net realized and unrealized gains (losses) on derivative instruments included in net income:

(U.S. dollars in thousands)	(Unaudited) Three Months Ended September 30,		(Unaudited) Nine Months Ended September 30,	
	2005	2004	2005	2004
Credit derivatives	\$ (2,223)	\$ 13,842	\$ 4,015	\$ 38,395
Weather and energy risk management derivatives	4,931	(186)	15,097	(4,802)
Other non-investment derivatives	(249)	105	16,912	(165)
Net results from derivatives financial operations	\$ 2,459	\$ 13,761	\$ 36,024	\$ 33,428
Investment derivatives	15,523	(17,588)	(20,805)	1,386
Net realized and unrealized gains (losses) on derivatives	\$ 17,982	\$ (3,827)	\$ 15,219	\$ 34,814

The Company records premiums received from sales of investment grade credit derivatives in gross written premiums and establishes loss reserves for this derivative business. These loss reserves represent the Company's best estimate of the probable losses expected under these contracts. Net realized and unrealized gains and losses on credit derivative instruments are computed as the difference between fair value and the net of unpaid losses and loss expenses and unpaid losses and loss expenses recoverable. Changes in unrealized gains and losses on credit derivative instruments are reflected in the consolidated statements of income. Cumulative unrealized gains

and losses are reflected as assets and liabilities, respectively, in the Company's consolidated balance sheet. Net realized and unrealized gains and losses resulting from changes in the fair value of derivatives occur because of changes in interest rates, credit spreads, recovery rates, the credit ratings of the referenced entities and other market factors.

10. XL Capital Finance (Europe) plc

XL Capital Finance (Europe) plc ("XLFE") is a wholly owned finance subsidiary of XL Capital Ltd. In January 2002, XLFE issued \$600.0 million par value 6.5% Guaranteed Senior Notes due January 2012. XLFE's notes are fully and unconditionally guaranteed by XL Capital Ltd. XL Capital Ltd's ability to obtain funds from its subsidiaries is subject to certain contractual restrictions, applicable laws and statutory requirements of the various countries in which the Company operates including Bermuda, the U.S. and the U.K., among others. Required statutory capital and surplus for the principal operating subsidiaries of the Company was \$3.6 billion as of December 31, 2004.

12. Commitments and Contingencies

Included in unpaid losses and loss expenses recoverable at September 30, 2005 is an unsecured reinsurance recoverable from Winterthur Swiss Insurance Company (the "Seller") of \$1.4 billion, related to certain contractual arrangements within the sale and purchase agreement, as amended ("SPA"), relating to the Company's acquisition of Winterthur International in July 2001. The Seller is currently rated "A-" by S&P. The Seller provides the Company with post-closing protection determined as of June 30, 2004 with respect to, among other things, adverse development of incurred losses and premium balances relating to the acquired Winterthur International business ("Winterthur Business"). This protection is based upon net loss experience and development over a three-year, post-closing seasoning period based on actual loss development experience, collectible reinsurance and certain other factors set forth in the SPA. The SPA includes an independent actuarial process for determining the net amount due to the Company from the Seller. In this process, each of the Company and the Seller submits its respective net reserves and seasoned premium amounts. The independent actuary develops its own value of the seasoned net reserves and seasoned premium amounts and the actual final seasoned amount would be, in each case, the submission that is closest to the number developed by the independent actuary.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

12. Commitments and Contingencies (continued)

As the Company and the Seller were unable to come to an agreement, the Company submitted to the Seller notice to trigger the independent actuarial process as contemplated by the SPA. On February 3, 2005, both the Company and the Seller made submissions for the independent actuarial process. The independent actuary has commenced the evaluation process. Based on submissions and meetings to date, the Company continues to expect that the independent actuary's final report will be issued in the fourth quarter of this year. The Company's submissions would result in a net payable to the Company of approximately \$1.4 billion in aggregate and the Seller's submissions would result in a net payable to the Company of \$541.0 million in aggregate. At the completion of the independent actuarial process, the Company will be entitled to a lump sum payment. During the three months ended September 30, 2005, minor adjustments have been made to the Company's net recoverable from the Seller, which had no impact on net income.

In addition, the Seller provides protection to the Company with respect to third party reinsurance receivables and recoverables related to the Winterthur Business, which were approximately \$1.6 billion, in the aggregate, as of September 30, 2005. There are two levels of protection from the Seller for these balances:

1. At the time of the Winterthur International acquisition, the Seller provided to the Company a liquidity facility. At the time of the payment of the net reserve seasoned amount as described above, the Company has the right to repay up to the balances outstanding on this facility by assignment to the Seller of an equal amount of reinsurance receivables selected by the Company. The payable balance related to this facility is included within other liabilities on the Company's balance sheet at September 30, 2005 and amounted to approximately \$268 million at that date.
2. Under two retrocession agreements the Company has reinsurance protection on the remaining portion of reinsurance recoverables with respect to incurred losses seasoned as of September 30, 2004 to the extent that the Company does not receive payment of such amounts from applicable reinsurers, with one agreement providing a limit of \$1.3 billion for insurance written in the period to June 30, 2001 and the other agreement providing a limit of \$1.3 billion for insurance written prior to December 31, 2000.

Certain reinsurers responsible for some portions of the reinsurance of the Winterthur Business have raised issues as to whether amounts claimed are due and the resolution of those discussions is also currently ongoing.

The Company may record a loss in future periods if any or some of the following occur:

- (i) The submission of the Seller is closer to the valuation developed by the independent actuary in which case the Company may record a loss of approximately \$900.0 million;
- (ii) There is deterioration of the net reserves and premium balances relating to the Winterthur Business from what was reported in the Company's December 31, 2004 financial statements;
- (iii) The Company is unable to make full recovery of the reinsurance recoverables related to the Winterthur Business, either from third parties or from the Seller under the additional protections; and/or
- (iv) Any amount due from the Seller proves to be uncollectible from the Seller for any reason.

13. Subsequent Events

On October 24, 2005, Hurricane Wilma struck south Florida after causing significant damage in Mexico and Cuba. To date, the Company has received limited advice from insureds and from cedents as to the level of losses. Accordingly, it is not yet possible to provide an estimate of the likely cost to the Company of this event.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**General**

The following is a discussion of the Company's financial condition and liquidity and results of operations. Certain aspects of the Company's business have loss experience characterized as low frequency and high severity. This may result in volatility in both the Company's and an individual segment's results of operations and financial condition.

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve inherent risks and uncertainties. Statements that are not historical facts, including statements about the Company's beliefs and expectations, are forward-looking statements. These statements are based upon current plans, estimates and projections. Actual results may differ materially from those included in such forward-looking statements and, therefore, undue reliance should not be placed on them. See Cautionary Note Regarding Forward-Looking Statements below for a list of factors that could cause actual results to differ materially from those contained in any forward-looking statement.

This discussion and analysis should be read in conjunction with the Management's Discussion and Analysis of Financial Condition and Results of Operations and the audited Consolidated Financial Statements and notes thereto, presented under Item 7 and Item 8, respectively, of the Company's Form 10-K for the year ended December 31, 2004.

Executive Overview

See Executive Overview in Item 7 of the Company's Form 10-K for the year ended December 31, 2004.

Weighted average number of ordinary shares and ordinary share equivalents □ diluted	138,823	138,511

The Company's net income and other financial measures for the three and nine months ended September 30, 2005 have been affected by, among other things, the following significant items:

- 1) The impact of Hurricanes Katrina and Rita and other natural catastrophes occurring during the third quarter of 2005;
- 2) Net adverse prior year loss development;
- 3) Growing asset base, higher investment yields and positive performance from investment affiliates;
- 4) Life reinsurance loss recognition.

1. The impact of Hurricanes Katrina and Rita and other natural catastrophes

During the third quarter 2005, there was an unprecedented quantum of natural catastrophes. On August 29, 2005, Hurricane Katrina, a Category 4 storm, hit the Gulf Coast of the United States and is estimated to have caused the largest ever insured loss from a natural disaster in the property and casualty insurance industry. On September 24, 2005, Hurricane Rita, a Category 3 storm, hit the Gulf Coast of the United States and caused considerable damage, although less severe than Katrina. In addition, there were several other natural loss events, including hurricanes Dennis, Emily and Ophelia, the European and Mumbai Floods and Typhoon Mawar (collectively, the "Other Cats"). Collectively, Hurricanes Katrina, Rita and these Other Cats are referred to herein as the "Q3 05 Cats" and have had a substantial impact on the Company's results of operations and financial condition.

The Q3 05 Cats have had a substantial impact on the results of the Company for the quarter and nine months ended September 30, 2005. The Company has estimated losses incurred, net of reinsurance recoveries, of \$1.16 billion, \$263.6 million and \$89.7 million related to Hurricanes Katrina, Rita and the combined impact of the Other Cats, respectively, based on preliminary reports and estimates of loss and damage. The Company has performed an analysis of contracts it believes are exposed to the Q3 05 Cats and together with preliminary information received from insureds and cedents and industry models, has determined its best estimate at this time for the expected ultimate loss. Actual losses may vary materially from this estimate based on a number of factors including, receipt of additional information from insureds or brokers, the attribution of losses to coverages that had not previously been considered as exposed and inflation in repair costs due to additional demand for labor and materials. In addition, the loss estimate includes a high level of uncertainty related to, among other things, complex coverage issues associated with hurricanes Katrina and Rita, limited claims data received to date and

Edgar Filing: XL CAPITAL LTD - Form 10-Q

potential legal developments that may result in ultimate losses not being known for a considerable period of time as well as industry modelling challenges related to the Company's property risk reinsurance portfolios. Therefore, losses may ultimately be materially greater or lesser than the current estimate and accordingly impact future financial results.

Losses were incurred almost equally from the Company's Insurance and Reinsurance segments.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The Company's Insurance segment had losses from the commercial catastrophe insurance line as well as losses from the large commercial property line. The large commercial property unit accounted for approximately 60% of the segment losses in the third quarter.

The Company's Reinsurance segment reflects losses in property catastrophe, property risk and marine excess of loss lines of business. The loss from the Company's marine excess of loss portfolio reflects the Company's larger market share.

The Q3 05 Cats are considered by the Company and the property and casualty insurance industry as market changing events. The Company expects that premium rates for the January 1, 2006 renewal season will increase, particularly in the United States, for its property and marine and energy lines of business. There can be no assurance that this will take place.

The third quarter and nine months ended September 30, 2004 were negatively impacted by four hurricanes, Frances, Charley, Ivan and Jeanne, for a total net loss of \$446.8 million, net of reinsurance recoveries.

The following is an analysis of the financial impact on the Company's results of operations from natural catastrophes:

(U.S. dollars in millions, except ratios)

2. Net adverse prior year loss development.

The results for the first nine months of 2005 have been adversely impacted by an increase in net reserves in the Company's North American reinsurance operations of \$190.6 million reported in the second quarter of 2005. The after tax charge was \$186.3 million or \$1.32 per ordinary share. This increase resulted from the Company's scheduled semi-annual reserve review and related principally to losses on business written prior to 2001 in the Company's U.S. casualty reinsurance business.

Net adverse prior period loss development occurs when there is an increase to loss reserves recorded at the beginning of the year, resulting from actual or reported loss development for prior years exceeding expected loss development and/or as a result of the Company's reserve reviews as discussed above. See the discussion of the Reinsurance segment's results below.

3. Growing asset base, higher investment yields and positive performance from investment affiliates.

Net investment income was \$366.7 million and \$1,042.3 million for the three months and nine months ended September 30, 2005, respectively, compared to \$268.0 million and \$747.5 million, respectively, for the same periods in 2004. This increase resulted from a larger investment base combined with higher investment yields primarily due to increases in U.S. short-term and intermediate-term interest rates. The increase in the size of the investment portfolio resulted from positive operating cash flows and growth in structured and spread balances during these periods.

Net income from investment affiliates was \$56.7 million and \$116.5 million for the three months and nine months ended September 30, 2005, respectively, compared to \$5.2 million and \$76.7 million, respectively, for the same periods in 2004. These results reflect strong returns from the Company's alternative fund investments during the third quarter of 2005.

4. Life reinsurance loss recognition.

Results for the first nine months of 2005 have been adversely impacted by a \$63.3 million after tax charge related to the Company's life and annuity reinsurance operations reported in the second quarter of 2005. The Company completed a detailed actuarial experience study of this business. In accordance with U.S. GAAP treatment for life business, a loss recognition test process was carried out to determine if expected future premiums would be sufficient to pay for expected future losses. This process led to management's decision to unlock the current policy benefit reserve ratio and record a loss recognition charge of \$63.3 million. With a recognition that the business was loss making based on existing assumptions, the total charge has first been applied to write-off the deferred acquisition costs and Value of Business Acquired assets of \$25.9 million, with the remaining \$37.4 million recorded as a net increase in policy benefit reserves.

Financial Measures

The following are some of the financial measures management considers important in evaluating the Company's operating performance:

(U.S. dollars in thousands, except ratios and per share amounts)

	(Unaudited) Three Months Ended September 30,	
	2005	2004
Underwriting loss □ general operations	\$ (1,363,890)	\$ (162,440)
Combined ratio □ general operations	182.2%	110.7%
Investment income □ general operations	\$ 184,055	\$ 157,233
	(Unaudited) Nine Months Ended September 30,	
	2005	2004
Underwriting (loss) profit □ general operations	\$ (1,143,082)	\$ 251,268
Combined ratio □ general operations	122.2%	95.9%
Investment income □ general operations	\$ 565,712	\$ 450,359
Annualized return on average ordinary shareholders' equity	NM	16.8%
	(Unaudited)	
	September 30,	December 31,
	2005	2004
Book value per ordinary share	\$ 46.41	\$ 51.98

* NM □ Not Meaningful

Underwriting (loss) profit □ general operations

One way the Company evaluates the performance of its property and casualty insurance and reinsurance general operations is the underwriting profit or loss. The Company does not measure performance based on the amount of gross premiums written. Underwriting profit or loss is calculated from premiums earned and fee income, less net losses incurred and expenses related to the underwriting activities. Underwriting losses in the three and nine months ended September 30, 2005 are primarily reflective of the combined ratio discussed below.

Combined ratio □ general operations

The combined ratio for general operations is used by the Company, and many other property and casualty insurance and reinsurance companies, as another measure of underwriting profitability. The combined ratio is calculated from the net losses incurred and underwriting expenses as a ratio of the net premiums earned for the

Edgar Filing: XL CAPITAL LTD - Form 10-Q

Company's general insurance and reinsurance operations. A combined ratio of less than 100% indicates an underwriting profit and greater than 100% reflects an underwriting loss. Increases in the Company's combined ratio for the three and nine months ended September 30, 2005, compared to the same periods in the previous year, were primarily a result of a higher loss and loss expense ratio partially offset by a decreasing underwriting expense ratio. The increase in the loss and loss expense ratio was primarily due to the catastrophe losses incurred in the third quarter of 2005 combined with the increase in net reserves in the Company's North American reinsurance operations in the second quarter of 2005.

Net investment income □ general operations

Net investment income from the Company's general operations is an important measure that affects the Company's overall profitability. The largest liability of the Company relates to its unpaid loss reserves, and the Company's investment portfolio provides liquidity for claims settlements of these reserves as they become due. A significant part of the portfolio is in fixed income securities. Net investment income is affected by overall market interest rates and also the size of the portfolio. The average size of the investment portfolio outstanding during the three and nine months ended September 30, 2005 increased as compared to the same periods in 2004 due to positive operating cash flow and structured and spread transactions. Total investments as at September 30, 2005 were \$34.8 billion as compared to \$27.9 billion as at September 30, 2004. Short-term and intermediate-term interest rates in the United States have risen in 2005, which has also contributed to the increase in investment income.

Book value per ordinary share

Management also views the Company's book value per ordinary share as an additional measure of the Company's performance. Book value per ordinary share is calculated by dividing ordinary shareholders' equity by the number of outstanding ordinary shares at any period end. Book value per ordinary share is affected primarily by the Company's net income (loss) and also by any changes in the net unrealized gains and losses on its investment portfolio. Book value per ordinary share has decreased by \$5.57 over the first nine months of 2005. The factors noted above created \$440.1 million in net loss for the first nine months of the year. The net unrealized gains associated with the Company's investment portfolio have decreased by \$217.9 million for the first nine months of 2005. These changes were driven by increasing U.S. interest rates.

Annualized return on average ordinary shareholders' equity

Annualized return on average ordinary shareholders' equity (□ROE□) is a widely used measure of a company's profitability. It is calculated by dividing the net income for any period by the average of the opening and closing ordinary shareholders' equity. The Company establishes target ROEs for its total operations, segments and lines of business. If the Company's ROE return targets are not met with respect to any line of business over time, the Company seeks to re-evaluate these lines. In addition, the Company's compensation of its senior officers is significantly dependent on the achievement of the Company's performance goals to enhance shareholder value, including ROE. The decline in this financial measure in the first nine months of 2005 as compared to the same period in 2004 was due to the key operating factors noted above, most notably the significant catastrophe losses.

Other Key Focuses of Management

See the discussion of the □Other Key Focuses of Management□ in Item 7 of the Company's Form 10-K for the year ended December 31, 2004. That discussion is updated with the disclosures set forth below.

Ratings and Capital Management

The Company's ability to underwrite business is dependent upon the quality of its claims paying and financial strength ratings as evaluated by independent rating agencies. As a result, in the event that the Company's financial strength rating was downgraded, its ability to write business may be adversely affected. Such a downgrade would also adversely affect the Company's financial guaranty lines of business. Standard & Poor's, A.M. Best, Fitch Ratings and Moody's Investors Service have placed the financial strength ratings of many companies, including XL Capital Ltd, under review for potential downgrade. On October 26, 2005 Fitch Ratings downgraded the Company's long term issuer rating to □A-□ and downgraded the financial strength ratings of the principal insurance and reinsurance subsidiaries and pools including, XL Insurance (Bermuda) Ltd and XL Re Ltd to □AA-□ with a stable outlook. The financial strength ratings of the Company's financial guaranty companies remain □triple A□ with stable outlook (by Standard & Poor's, Moody's and Fitch Ratings).

In the normal course of business, the Company evaluates its capital needs to support the volume of business written in order to maintain its claims paying and financial strength ratings. Due to the unprecedented insured hurricane losses during the 2005 Atlantic hurricane season, rising capital requirements for property catastrophe business from rating agencies and the currently anticipated growth in business written in 2006, the Company expects that it may have additional capital needs. The Company is actively attempting to address these needs with several key business initiatives.

1. Management has entered into a strategic initiative intended to augment the Company's overall underwriting capacity to take advantage of opportunities in certain catastrophe exposed lines of business. Management has agreed in principle to enter into a quota share reinsurance treaty with a newly-formed reinsurance company. Under this agreement, management expects to cede specified portions of the Company's property catastrophe reinsurance and retrocessional lines of business to this new company, which is expected to have from \$500 million to \$1 billion in dedicated capital. There can be no assurance that the Company will enter into such quota share reinsurance treaty or that this new company will have the expected amount of dedicated capital.

2. Management intends to reduce the Company's net catastrophe exposed risks. In the Insurance segment, management intends to reduce exposure from accounts that have the potential for significant volatility under worsening catastrophe event scenarios, reduce catastrophe sub-limits and eliminate accounts that no longer meet the Company's increased pricing needs. In addition to the strategic initiative noted above, the Reinsurance segment's management intends to reduce catastrophe exposure within the property risk portfolio and restructure the way in which marine excess of loss programs are written.
3. Management plans to raise capital following the resolution of the independent actuarial process with Winterthur Swiss Insurance Company, the result of which is expected in the fourth quarter of 2005. The Company expects that this financing will have a significant equity component. In the event that the Company does not prevail in the independent actuarial process with Winterthur Swiss Insurance Company the amount of capital raised will be greater.

Winterthur International Net Reserve Seasoning

Management continues to focus on the settlement and collection of certain post-closing balances under the sale and purchase agreement, as amended ("SPA"), related to the 2001 acquisition of the Winterthur International operations from Winterthur Swiss Insurance Company. The independent actuary has commenced the evaluation process related to the post-closing seasoning process relating to the Company's acquisition of Winterthur International. Based on submissions and meetings to date, the Company continues to expect that the independent actuary's final report will be issued in the fourth quarter of this year. For further information regarding the settlement and collection under the SPA, see "Unpaid Losses and Loss Expenses Recoverable and Reinsurance Balances Receivable" below.

Critical Accounting Policies and Estimates

During the nine months ended September 30, 2005, management increased the levels of reserves in XL Reinsurance America Inc. ("XLRA"), a subsidiary of the Company, to reflect unexpected loss development. Effective as of January 1, 2004, XLRA entered into an adverse development reinsurance treaty with another reinsurance subsidiary of the Company. The treaty related to the 1985 through (and including) 2000 underwriting years covering any adverse development on reserves calculated as of December 31, 2003 between January 1, 2004 and December 31, 2005. The treaty has a limit of \$500 million and limits loss development at XLRA relating to these underwriting years. During the second quarter of 2005, a significant portion of the adverse development recorded in XLRA was ceded to this treaty, reducing the net losses to XLRA. As part of management's continuing evaluation of its deferred tax asset, the treaty is important in evaluating the future income position of the U.S. group of companies. After giving consideration to the Q3 05 Cats, management continues to believe that there is sufficient positive evidence of future profitability in the U.S. such that a valuation allowance as a charge against the deferred tax asset is not required at this time.

See the discussion of the Company's "Critical Accounting Policies and Estimates" in Item 7 of the Company's Form 10-K for the year ended December 31, 2004.

Variable Interest Entities and Other Off-Balance Sheet Arrangements

See the discussion of the Company's variable interest entities and other off-balance sheet arrangements in Item 7 of the Company's Form 10-K for the year ended December 31, 2004.

Segment Results for the three months ended September 30, 2005 compared to the three months ended September 30, 2004

The Company operates through three business segments: Insurance, Reinsurance and Financial Products and Services. These business segments were determined in accordance with FAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*.

The Company's segment results have been significantly impacted by the Q3 05 Cats and the third quarter 2004 catastrophes, as noted above. These should be considered when making period to period comparisons of segment results.

Following changes in certain executive management responsibilities in January 2005, the Company changed the reporting segments under which certain business units are reported in order to reflect these changes in responsibilities.

The following areas have been changed for all periods presented:

- Results of business structured by XL Financial Solutions Ltd (["XLFS"]) are now included entirely within the Financial Products and Services segment whereas previously this unit was reported in all three segments, depending on the nature of individual contracts.
- Certain blocks of U.S.-based term life mortality reinsurance business previously included in the Financial Products and Services segment are now included in the Reinsurance segment as management of these contracts was transferred to the life reinsurance business units in order to centralize the Company's management of traditional mortality-based reinsurance business.
- Political risk insurance business units now report to executive management of the Financial Products and Services segment and, as such, future earnings from this business will no longer be reported in the Insurance segment but included with financial operations.
- All operations of business units within the Financial Products and Services segment, including municipal reinvestment contracts and funding agreements, are now reported under financial operations in order to consolidate businesses with similar operating characteristics and risks.
- All net investment income and net income from affiliates generated by assets and interest expense incurred on liabilities of the business units within the Financial Products and Services segment is reported under financial operations. This income and expense is included in financial operations as it relates to interest on portfolios of separately identified and managed assets and deposit liabilities. Management believes this change will better reflect the nature of spread focused business.

In addition, the Company has changed its presentation of certain credit derivatives and now records premiums received from sales of these derivatives in gross written premiums and establishes unearned premium reserves and loss reserves for its investment grade credit derivative business. Previously all components of the Company's consolidated statements of income impact related to credit default swaps had been reported on one line, ["net realized and unrealized gains (losses) on derivative instruments."] Prior periods have been re-presented for consistency in presentation.

Insurance

General insurance business written includes risk management and specialty lines. Risk management products are comprised of global property and casualty insurance programs for large multinational companies, including umbrella liability, integrated risk and primary master property and liability coverages. Specialty lines products include directors' and officers' liability, environmental liability, professional liability, aviation and satellite, employment practices liability, surety, marine, equine and certain other insurance coverages including program business. Management has announced its intention to discontinue writing surety business in 2005.

A large part of the Company's casualty insurance business written has loss experience that is low frequency and high severity. As a result, large losses, though infrequent, can have a significant impact on the Company's results of operations, financial condition and liquidity. The Company attempts to mitigate this risk by using strict underwriting guidelines and various reinsurance arrangements.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The following table summarizes the underwriting results for this segment:

(U.S. dollars in thousands)

	(Unaudited)		
	Three Months Ended September 30,		
	2005	2004	% Change
Gross premiums written	\$ 1,329,271	\$ 1,342,689	(1.0)%
Net premiums written	834,650	886,927	(5.9)%
Net premiums earned	933,026	1,062,847	(12.2)%
Fee income and other	310	9,044	(96.6)%
Net losses and loss expenses	1,314,386	886,738	48.2%
Acquisition costs	119,133	145,134	(17.9)%
Operating expenses	133,598	145,411	(8.1)%
Exchange (gains)	(8,130)	(19,472)	(58.2)%
Underwriting (loss)	\$ (625,651)	\$ (85,920)	NM

* NM □ Not Meaningful

Gross and net premiums written decreased by 1.0% and 5.9%, respectively, in the three months ended September 30, 2005 compared with the three months ended September 30, 2004. The decrease in gross premiums written was primarily due to continued competitive pressures combined with the discontinuation of the segment's surety business and partially offset by new business efforts in professional liability and excess casualty lines. Pricing pressures seen earlier in the year, particularly in property lines, appear to be moderating following the impact of hurricanes Katrina and Rita, particularly for U.S. exposures. Foreign exchange movements had very little impact on written premium in the quarter. The decrease in net premiums written both in total and as a percentage of gross premiums written compared to the same period in 2004 was primarily a result of higher reinstatement premiums related to the third quarter catastrophes partially offset by the strategic decision to increase retentions in professional lines.

Net premiums earned decreased by 12.2% in the three months ended September 30, 2005 compared with the three months ended September 30, 2004. This decrease was due to the factors affecting net premiums written, noted above, combined with the fact that ceded reinstatement premiums are earned at the time of the related loss.

Exchange gains in the three months ended September 30, 2005 were primarily due to the impact of the weakening of the U.K. sterling and the Euro against the U.S. dollar during the quarter.

The following table presents the ratios for this segment:

	(Unaudited)	
	Three Months Ended September 30,	
	2005	2004
Loss and loss expense ratio	140.9%	83.4%
Underwriting expense ratio	27.1%	27.4%

Combined ratio	168.0%	110.8%
----------------	--------	--------

The loss and loss expense ratio includes net losses incurred for both the current year and any adverse or favorable prior year development of loss and loss expense reserves held at the beginning of the year. The loss and loss expense ratio for the three months ended September 30, 2005 increased significantly compared with the three months ended September 30, 2004, primarily due to net catastrophe losses of \$669.6 million incurred mainly in the property catastrophe and property lines of business. Hurricanes Katrina and Rita, as well as other natural catastrophes in the quarter combined to increase the loss and loss expense ratio by 77.3% for the quarter. The three months ended September 30, 2004 included a net incurred losses of \$188.0 million related to hurricanes Charley, Frances, Ivan and Jeanne combined with approximately \$89.0 million in net prior period reserve strengthening.

The underwriting expense ratio for the three months ended September 30, 2005 decreased slightly compared with the same period in 2004. A decrease in the acquisition expense ratio of 0.9 percentage points (12.8% as compared to 13.7%) due primarily to a change in the commission structure with certain brokers, was partially offset by an increase the operating expense ratio resulting from reduced earned premiums.

Reinsurance

Reinsurance □ General Operations

General reinsurance business written includes casualty, property, marine, aviation and other specialty reinsurance on a global basis. The Company's property reinsurance business generally has loss experience characterized as low frequency and high severity. As a result, large losses, though infrequent, can have a significant impact on the Company's results of operations, financial condition and liquidity. The Company endeavors to manage its exposures to catastrophic events by limiting the amount of its exposure in each geographic zone worldwide and requiring that its property catastrophe contracts provide for aggregate limits and varying attachment points.

The following table summarizes the underwriting results for the general operations of this segment:

(U.S. dollars in thousands)

	(Unaudited)		
	Three Months Ended		
	September 30,		
	2005	2004	% Change
Gross premiums written	\$ 855,300	\$ 663,834	28.9%
Net premiums written	576,832	513,587	12.3%
Net premiums earned	722,303	799,901	(9.7)%
Fee income and other	140	(15)	NM
Net losses and loss expenses	1,245,282	666,152	86.9%
Acquisition costs	161,399	174,536	(7.5)%
Operating expenses	41,564	43,768	(5.0)%
Exchange losses (gains)	12,437	(8,050)	NM
Underwriting (loss)	\$ (738,239)	\$ (76,520)	NM

* NM □ Not Meaningful

Gross and net premiums written increased by 28.9% and 12.3%, respectively, in the third quarter of 2005 as compared to the third quarter of 2004. Gross reinstatement premiums written of \$115.7 million were offset by \$96.9 million of ceded reinstatement premiums related to the third quarter 2005 catastrophes. On a net basis, the increases largely reflected timing differences on both gross and ceded written premiums and the minor addition of net inward reinstatement premiums, partially offset by some reduction in the volume of business written in Latin America.

Net premiums earned in the third quarter of 2005 decreased 9.7% compared to the third quarter of 2004. This decrease is a reflection of the pricing pressures and related reduction of net premiums written over the last 24 months, partially offset by the factors affecting net premiums written.

The following table presents the ratios for this segment:

(Unaudited)
Three Months Ended
September 30,

	2005	2004
Loss and loss expense ratio	172.4%	83.3%
Underwriting expense ratio	28.1%	27.3%
Combined ratio	200.5%	110.6%

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The loss and loss expense ratio includes net losses incurred for both the current year and any adverse or favorable prior year development of loss reserves held at the beginning of the year. The increase in the loss and loss expense ratio in the three months ended September 30, 2005, compared to the same period in 2004, primarily reflected the effects of hurricanes Katrina and Rita combined with other smaller natural disasters from which the segment incurred a combined \$821.1 million of net losses. These catastrophes contributed 112.1% to the segment loss ratio for the quarter. The quarter ended September 30, 2004 included \$258.8 million of net losses related to hurricanes Charley, Frances, Ivan and Jeanne.

The small increase in the underwriting expense ratio in the three months ended September 30, 2005, as compared with the three months ended September 30, 2004, was due to increases in both the acquisition expense ratio and operating expense ratio to 22.3% and 5.8%, respectively, as compared to 21.8% and 5.5%, respectively, in the third quarter of 2004. The increase in the acquisition expense ratio was due to slight fluctuations in business mix. The operating expense ratio increase was primarily due to lower earned premium levels.

Exchange losses in the three months ended September 30, 2005 were mainly attributable to an overall strengthening, during the quarter, in the value of the U.S. dollar against U.K. Sterling and the Euro in those operations with the U.S. dollar as their functional currency and net U.K. sterling and Euro assets.

Reinsurance □ Life and Annuity Operations

Life business written by the reinsurance operations is primarily European life reinsurance. This includes term assurance, group life, critical illness cover, immediate annuities and disability income business. Due to the nature of these contracts, premium volume may vary significantly from period to period. In addition, certain closed block U.S. life and annuity reinsurance contracts previously included in the Financial Products and Services segment are now included in the Reinsurance segment as management of these contracts was transferred to the traditional life reinsurance business units in order to centralize management of mortality based life and annuity reinsurance business.

The following summarizes net income from life and annuity operations:

(U.S. dollars in thousands)

	(Unaudited)		
	Three Months Ended		
	September 30,		
	2005	2004	% Change
Gross premiums written	\$ 96,870	\$ 93,326	3.8%
Net premiums written	87,762	92,928	(5.6)%
Net premiums earned	87,964	93,111	(5.5)%
Fee income and other	74	62	19.4%
Claims and policy benefits	142,957	128,004	11.7%

* NM □ Not Meaningful

Edgar Filing: XL CAPITAL LTD - Form 10-Q

Gross premiums written increased in the third quarter of 2005 as compared to the third quarter of 2004. This increase was primarily a result of growing portfolio of regular renewal premium business. The increase in ceded premium relates to the addition of several proportional retrocessions of certain European mortality risks.

Claims and policy benefits also increased in the quarter in line with the growth in the underlying business. Changes in claims and policy benefits also include the movement in policy benefit reserves related to contracts where investment assets were acquired with the assumption of the policy benefit reserves at the inception of the contract.

Acquisition costs decreased in the third quarter of 2005, as compared to the third quarter of 2004, due to costs related to specific contracts in the prior year that were not incurred in 2005. Operating expenses increased in the third quarter of 2005 compared to the same period in 2004, reflecting the build up of the new life operations in the U.S.

Net investment income is included in the calculation of net income from life and annuity operations, as it relates to income earned on portfolios of separately identified, managed life investment assets and other allocated assets. Several new large annuity contracts have been written since September 30, 2004, which have significantly increased the invested assets relating to these operations.

Financial Products and Services

The Financial Products and Services segment provides (i) financial guaranty insurance and reinsurance, (ii) a wide range of structured financial and alternative risk transfer products, (iii) municipal investment and funding agreements, (iv) political risk insurance and (v) weather and energy risk management products. Many of the products offered by the Financial Products and Services segment are unique and tailored to the specific needs of the insured or user.

Financial guaranty insurance and reinsurance generally guarantees the timely payment of interest and principal on an issuer's obligations when due. Obligations guaranteed or enhanced by the Company range in duration and premiums are received either on an installment basis or upfront. Guaranties written in credit default swap form provide coverage for losses upon the occurrence of specified credit events set forth in the swap documentation.

Structured financial and alternative risk transfer products cover complex financial risks, including property, casualty, mortality insurance and reinsurance and business enterprise risk management products.

Municipal investment contracts and funding agreements provide users guaranteed rates of interest on amounts deposited with the Company. The Company has investment risk related to its ability to generate sufficient investment income to enable the total invested assets to cover the payment of its estimated ultimate liability on such agreements.

Political risk insurance generally covers risks arising from expropriation, currency inconvertibility, contract frustration, non-payment and war on land or political violence (including terrorism) in developing regions of the world. Political risk insurance is typically provided to financial institutions, equity investors, exporters, importers, export credit agencies and multilateral agencies in connection with investments and contracts in emerging market countries.

The Company's weather and energy risk management products are customized solutions designed to assist corporate customers, primarily energy companies and utilities, in managing their financial exposure to variations in weather conditions and related energy markets.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The following table summarizes the contribution for this segment:

(U.S. dollars in thousands)

	(Unaudited)		
	Three Months Ended		
	September 30,		
	2005	2004	% Change
Gross premiums written	\$ 99,437	\$ 77,393	28.5%

Contribution from financial operations	\$ 51,307	\$ 348	NM

* NM □ Not Meaningful

Gross and net premiums written relating to the financial guaranty line of business reflect premiums received and accrued for the period and do not include the present value of future cash receipts expected from installment premium policies and contracts written in the period. In addition to the financial guaranty premiums, segment premiums also include amounts received from political risk and other structured property and casualty business lines. Increases in gross and net premiums written of 28.5% and 34.8%, respectively, in the third quarter of 2005, as compared to the same period in 2004, were primarily due to several new structured property and casualty policies. Excluding such policies, net financial guaranty premiums written increased in the quarter due to new business and improved pricing in certain products. Narrowing of credit spreads, in general, during the quarter was less pronounced than in the same period in 2004.

Net premiums earned decreased 19.4% in the third quarter of 2005 as compared to the same period in 2004. This decrease related primarily to the \$23.3 million in premium earnings associated with an insured project financing structure on which a loss was recognized in the three months ended September 30, 2004 partially offset by continued growth in financial guaranty in force business.

The following table provides a line of business breakdown of the Financial Products and Services segment's net premiums earned:

(U.S. dollars in thousands)

(Unaudited)
 Three Months Ended
 September 30,

	2005	2004	% Change
Financial Guaranty	\$ 43,608	\$ 59,156	(26.3)%
Political Risk	5,054	6,029	(16.2)%
Other (1)	8,099	5,198	55.9%

(1) Other includes structured financial and alternative risk transfer products and weather and energy risk management products.

Net losses and loss expenses include current period net losses incurred and adverse or favorable development of prior periods' net loss and loss expense reserves. Net losses and loss expenses for the three months ended September 30, 2005 decreased by 59.4% as compared to the same period in 2004. This decrease primarily resulted from lower incurred losses in the Company's financial guaranty business of approximately \$71.6 million, partially offset by a loss of \$21.4 million on a structured property and casualty policy incurred as a result of Hurricane Katrina. Incurred losses in the Company's financial guaranty business were approximately \$1.2 million for the three months ended September 30, 2005, as compared to approximately \$72.8 million in the same period in 2004. Incurred losses for the three months ended September 30, 2004 primarily resulted from a provision for loss of \$41.7 million relating to the subordinate layer of an insured project financing structure and certain other case basis reserves relating to the Company's credit derivative business.

Net investment income related to the financial guaranty business increased by 67.6% in the three months ended September 30, 2005 compared to the same period in 2004, due primarily to higher average invested assets resulting from net cash inflows from operations and a \$125.0 million capital infusion during the fourth quarter of 2004. In addition, \$2.2 million in investment income relates to the Company's investment in Financial Security Assurance International Ltd (FSAI). Prior to October 1, 2004, the Company accounted for its investment in FSAI under the equity method and reported the associated results thereof in Net income from financial and investment affiliates. Effective October 1, 2004, the Company changed its accounting for its investment in FSAI from the equity method to FSAB 115, *Accounting for Certain Investments in Debt and Equity Securities* to conform to the requirements of EITF Issue No. 02-14 *Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock* (EITF 02-14). Accordingly, beginning October 1, 2004 the only earnings recognized by the Company on its investment in FSAI are dividends that are reported in investment income.

Net investment income related to structured products increased by 93.7% in the three months ended September 30, 2005, as compared to the same period in 2004, primarily as a result of significant increases in the combined average funding agreement and guaranteed investment contract balances from \$2.6 billion to \$5.3 billion for the three months ended September 30, 2004 and 2005, respectively.

Interest expense on structured products relates to deposit liabilities associated with funding agreements, guaranteed investment contracts and certain structured property and casualty contracts. The increase in interest expense during the three months ended September 30, 2005 as compared to the same period in 2004 related primarily to the increase in the combined average funding agreement and guaranteed investment contract balances for the three months ended September 30, 2005, as compared to the same prior year period, off-set by reduced interest expense during the three months ended September 30, 2005 on certain structured property and casualty contracts resulting from a change in the timing of estimated cash outflows from such contracts.

Net income (losses) from financial and investment affiliates includes earnings on the Company's investment in Primus Guaranty, Ltd (Primus) and certain of the Company's investment affiliates which are accounted for under the equity method. The decrease in such earnings for the three months ended September 30, 2005 as compared to the same period in 2004 was due primarily to a decrease in earnings from Primus as well as the change in accounting related to the Company's investment in FSAI to conform with the requirements of EITF 02-14 as discussed above. Primus had a negative mark-to-market adjustment in the quarter ended September 30, 2005.

Net results from derivatives represent changes in the market value of the Company's insured credit derivative portfolio, weather and energy derivative instruments and certain structured derivatives. The net results from derivatives for the three months ended September 30, 2005 represent the relatively level spreads across both the investment grade and non-investment grade markets, compared to the significant tightening in the same period in 2004.

Investment Activities

The following table illustrates the change in net investment income from general operations, net income from investment affiliates, net realized gains on investments and net realized and unrealized gains (losses) on investment derivative instruments:

(U.S. dollars in thousands)

	(Unaudited)		
	Three Months Ended September 30,		
	2005	2004	% Change
Net investment income □ general operations	\$ 184,055	\$ 157,233	17.1%
Net income from investment affiliates □ general operations	52,772	4,738	NM
Net realized gains on investments	53,223	57,015	(6.7)%
Net realized and unrealized gains (losses) on investment derivative instruments □ general operations	15,523	(17,588)	NM

* NM □ Not Meaningful

Net investment income related to general operations increased in the third quarter of 2005 as compared to the third quarter of 2004 due primarily to a higher investment base as well as increases in the yield of the portfolio. The growth in the investment base reflected the Company's cash flow from operations. The market yield to maturity on the fixed income portfolio was 4.5% at September 30, 2005, as compared to 3.9% at September 30, 2004.

Net income from investment affiliates increased in the third quarter of 2005 compared to the third quarter of 2004 due primarily to stronger performance in alternative fund affiliates.

The Company manages its investment grade fixed income securities using an asset/liability management framework. Due to the unique nature of the underlying liabilities, customized benchmarks are used to measure investment performance and comparison to standard market indices is not meaningful. Investment performance is not monitored for certain assets primarily consisting of operating cash and special regulatory deposits. The following is a summary of the investment portfolio returns for the general account asset/liability portfolios, structured and spread product portfolios and risk asset portfolios:

	(Unaudited)	(Unaudited)
	Three Months Ended September 30, 2005 (1)	Three Months Ended September 30, 2004 (1)
General Account Asset/Liability portfolios		
USD fixed income portfolio	(0.3)%	2.5%
Non USD fixed income portfolio	0.6%	2.9%
Structured and Spread Products portfolios		
USD fixed income portfolio	0.1%	3.0%
Non USD fixed income portfolio	1.0%	4.3%
Risk Asset portfolios		

Edgar Filing: XL CAPITAL LTD - Form 10-Q

Alternative portfolio (2)	3.4%	0.2%
Equity portfolio	8.1%	(0.5)%
High-Yield fixed income portfolio	1.0%	2.5%

- (1) Portfolio returns are calculated by dividing the sum of net investment income or net income from investment affiliates, realized gains (losses) and unrealized gains (losses) by the daily weighted average market value of each portfolio. Non U.S. dollar fixed income performance is measured in either the underlying currency or in U.S. dollars
- (2) Performance on the alternative portfolio reflects the three months ended August 31, 2005 and August 31, 2004, respectively.

Net Realized Gains and Losses and Other than Temporary Declines in the Value of Investments

Net realized gains on investments in the third quarter of 2005 included net realized gains of \$59.1 million from sales of investments and net realized losses of approximately \$5.9 million related to the write-down of certain of the Company's fixed income and equity investments where the Company determined that there was an other than temporary decline in the value of these investments.

Net realized gains on investments in the third quarter of 2004 included net realized gains of \$59.1 million from sales of investments and net realized losses of approximately \$2.1 million related to the write-down of certain of the Company's fixed income and equity investments where the Company determined that there was an other than temporary decline in the value of those investments.

The Company's process for identifying declines that are other than temporary in the fair value of investments involves consideration of several factors. These factors include: (i) the time period during which there has been a significant decline in value; (ii) an analysis of the liquidity, business prospects and overall financial condition of the issuer; (iii) the significance of the decline; (iv) an analysis of the collateral structure and other credit support, as applicable, of the securities in question; and (v) the Company's intent and ability to hold the investment for a sufficient period of time for the value to recover. Where the Company's analysis of the above factors results in the Company's conclusion that declines in fair values are other than temporary, the cost of the security is written down to fair value and the previously unrealized loss is therefore recorded as realized.

Net realized and unrealized gains on investment derivatives for the three months ended September 30, 2005 resulted from the Company's investment strategy to economically hedge certain interest, credit and foreign exchange risks within the investment portfolio.

Net Unrealized Gains and Losses on Investments

At September 30, 2005, the Company had net unrealized gains on fixed income and short term securities of \$430.6 million and net unrealized gains on equities of \$166.8 million. Of these amounts, gross unrealized losses on fixed income and short term securities and equities were \$228.5 million and \$10.5 million, respectively. The information presented below for the gross unrealized losses on the Company's investments at September 30, 2005 shows the potential effect upon future earnings and financial position should management later conclude that some of the current declines in the fair value of these investments are other than temporary. U.S short-term and intermediate-term interest rates increased during the quarter which was the primary reason for the decline in net unrealized gains on fixed income securities.

At September 30, 2005, approximately 8,600 fixed income securities out of a total of approximately 16,900 securities were in an unrealized loss position. The largest single unrealized loss in the fixed income portfolio was \$2.0 million. Approximately 300 equity securities out of a total of approximately 1,700 securities were in an unrealized loss position at September 30, 2005 with the largest individual loss being \$0.5 million.

The following is an analysis of how long each of those securities with an unrealized loss at September 30, 2005 had been in a continual unrealized loss position:

**(U.S. dollars
in
thousands)**

Type of Securities	Length of time in a continual unrealized loss position	(Unaudited) Amount of unrealized loss at September 30, 2005	(Unaudited) Fair Value of Securities in unrealized loss position at September 30, 2005
Fixed Income and			
Short-Term	Less than six months	\$ 119,043	\$ 11,292,347
	At least 6 months but less than 12 months	58,664	3,238,896

Edgar Filing: XL CAPITAL LTD - Form 10-Q

	At least 12 months but less than 2 years	43,531	1,608,188
	2 years and over	7,311	172,292
	Total	<u>\$ 228,549</u>	<u>\$ 16,311,723</u>
Equities	Less than six months	\$ 6,525	\$ 83,703
	At least 6 months but less than 12 months	3,996	56,743
	Total	<u>\$ 10,521</u>	<u>\$ 140,446</u>

Edgar Filing: XL CAPITAL LTD - Form 10-Q

At September 30, 2005, the following was the maturity profile of the fixed income securities that were in a gross unrealized loss position:

(U.S. dollars in thousands)

Maturity profile in years of fixed income securities in a continual unrealized loss position	(Unaudited) Amount of unrealized loss at September 30, 2005	(Unaudited) Fair value of securities in unrealized loss positions at September 30, 2005
Less than 1 year remaining	\$ 2,618	\$ 1,338,606
At least 1 years but less than 5 years remaining	60,872	4,326,749
At least 5 years but less than 10 years remaining	48,525	2,698,259
At least 10 years but less than 20 years remaining	5,270	310,153
At least 20 years or more remaining	10,408	652,968
Mortgage and asset backed securities	100,856	6,984,988
Total	\$ 228,549	\$ 16,311,723

The Company operates a risk asset portfolio that includes high yield (below investment grade) fixed income securities. These represented approximately 2.9% of the total fixed income portfolio market value at September 30, 2005. Fair values of these securities have a higher volatility than investment grade securities. Of the total gross unrealized losses in the Company's fixed income portfolio as at September 30, 2005, \$14.3 million related to securities that were below investment grade or not rated. The following is an analysis of how long each of these below investment grade and unrated securities had been in a continual unrealized loss position at the date indicated:

(U.S. dollars in thousands)

Length of time in a continual unrealized loss position	(Unaudited) Amount of unrealized loss at September 30, 2005	(Unaudited) Fair value of securities in unrealized loss position at September 30, 2005

At least 6 months but less than 12 months	1,598	58,188
At least 12 months but less than 2 years	512	10,120
2 years and over	203	3,228
Total	\$ 14,277	\$ 595,406

Other Revenues and Expenses

The following table sets forth other revenues and expenses:

(U.S. dollars in thousands)

	(Unaudited)		
	Three Months Ended		
	September 30,		
	2005	2004	% Change
Net income from operating affiliates □ general operations	\$ 12,415	\$ 103,016	(87.9)%
Amortization of intangible assets	2,668	3,256	(18.1)%
Corporate operating expenses	56,415	49,538	13.9%
Interest expense	43,949	47,390	(7.3)%
Income tax (benefit) expense	(47,338)	13,975	NM

* NM □ Not Meaningful

Edgar Filing: XL CAPITAL LTD - Form 10-Q

Net income from operating affiliates decreased for the three months ended September 30, 2005 as compared to the same period in 2004 primarily as a result of the inclusion of a \$102.1 million gain on the sale of the Company's investments in the Admiral Group Ltd. and Pareto Partners in the third quarter of 2004.

Corporate operating expenses in the three months ended September 30, 2005 increased compared to the three months ended September 30, 2004 due primarily to higher legal expenses and a write-off of a loan to an affiliate.

The decrease in interest expense primarily reflected a lower expense related to a guaranteed investment contract where part of the principal amount outstanding was repaid in June 2005 the increase in outstanding debt since September 30, 2004. For more information on the Company's financial structure, see "Liquidity and Capital Resources".

The income tax benefit reported for the three months ended September 30, 2005 arose principally from the losses incurred in the Company's U.S. operations as a result of hurricanes Katrina and Rita. A significant proportion of the incurred losses in the quarter were captured in non-U.S. subsidiaries where no tax relief is available.

Segment Results for the nine months ended September 30, 2005 compared to the nine months ended September 30, 2004

Insurance

The following table summarizes the underwriting results for this segment:

(U.S. dollars in thousands)

	(Unaudited)		% Change
	Nine Months Ended September 30,		
	2005	2004	
Gross premiums written	\$ 4,421,435	\$ 4,566,347	(3.2)%
Net premiums written	3,227,012	3,370,362	(4.3)%
Net premiums earned	3,069,904	3,044,953	0.8%
Fee income and other	1,321	16,660	(92.1)%
Net losses and loss expenses	2,716,275	2,136,396	27.1%
Acquisition costs	376,908	418,340	(9.9)%
Operating expenses	399,727	403,647	(1.0)%
Exchange (gains)	(27,919)	(7,415)	NM
Underwriting (loss) profit	\$ (393,766)	\$ 110,645	NM

* NM □ Not Meaningful

Gross and net premiums written decreased by 3.2% and 4.3%, respectively, in the nine months ended September 30, 2005 compared with the nine months ended September 30, 2004. These decreases were primarily due to continued competitive pricing across most lines, most notably property and professional lines. Decreases were partially offset by continued growth in the newer select and design professional and U.S. primary casualty units, and the weakening of the U.S. dollar against the U.K. sterling and the Euro as compared to the first nine months of 2004. Net premiums written have declined in line with gross premiums written combined with increased ceded reinstatement premiums payable.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

Net premiums earned increased by 0.8% in the nine months ended September 30, 2005 compared with the nine months ended September 30, 2004. Growth in net premiums earned is primarily as a result of the earn out of net premiums written in 2004, including the newer business initiatives mentioned above and increased net retentions. This growth was partially offset by decreased volume in the first nine months of 2005, noted above, and net \$81.4 million ceded reinstatement premiums as a result of the natural catastrophes in the third quarter of 2005.

Exchange gains in the nine months ended September 30, 2005 were primarily due to the weakening of the U.K. sterling and the Euro against the U.S. dollar during the second quarter of 2005 on several large contracts.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The following table presents the ratios for this segment:

	(Unaudited) Nine Months Ended September 30,	
	2005	2004
Loss and loss expense ratio	88.5%	70.2%
Underwriting expense ratio	25.3%	27.0%
Combined ratio	113.8%	97.2%

The loss and loss expense ratio includes net losses incurred for both the current year and any adverse or favorable prior year development of loss and loss expense reserves held at the beginning of the year. The loss and loss expense ratio for the nine months ended September 30, 2005 increased compared with the nine months ended September 30, 2004, primarily reflecting the losses of \$669.6 million incurred in the property catastrophe and property lines of business as a result of hurricanes Katrina and Rita and other natural catastrophes combined with the impact of overall softening market conditions since the third quarter 2004.

The underwriting expense ratio for the nine months ended September 30, 2005 decreased compared to the same period in 2004 as a result of a decrease in the operating expense ratio of 0.3 points (13.0% as compared to 13.3%) combined with a decrease in the acquisition expense ratio of 1.4 points (12.3% as compared to 13.7%). The decrease in the operating expense ratio was due primarily to higher earned premiums combined with relatively flat operating costs. The reduction in the acquisition expense ratio was due primarily to a change in the commission structure with certain brokers.

Reinsurance

Reinsurance □ General Operations

The following table summarizes the underwriting results for the general operations of this segment:

(U.S. dollars in thousands)

	(Unaudited) Nine Months Ended September 30,		
	2005	2004	% Change
Gross premiums written	\$ 3,055,752	\$ 3,003,780	1.7%
Net premiums written	2,492,194	2,566,671	(2.9)%
Net premiums earned	2,079,255	2,237,256	(7.1)%
Fee income and other	(306)	124	NM
Net losses and loss expenses	2,223,786	1,479,561	50.3%
Acquisition costs	452,638	494,832	(8.5)%
Operating expenses	121,123	134,590	(10.0)%
Exchange losses (gains)	30,718	(12,226)	NM
Underwriting (loss) profit	\$ (749,316)	\$ 140,623	NM

* NM □ Not Meaningful

Gross premiums written increased and net premiums written decreased by 1.7% and 2.9%, respectively, in the first nine months of 2005 as compared to the first nine months of 2004. Significant levels of written and ceded reinstatement premiums related to the third quarter 2005 catastrophes were offset by a decline in U.S. casualty business as a result of increased retentions by ceding companies. Favorable foreign exchange movements partially offset the decrease in gross premiums written. Net premiums written reflect the above gross changes.

Net premiums earned in the first nine months of 2005 decreased 7.1% as compared to the first nine months of 2004, due primarily to the earn out of the impact of rate pressures seen in gross premiums written over the last 12 months.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The following table presents the ratios for this segment:

	(Unaudited) Nine Months Ended September 30,	
	2005	2004
Loss and loss expense ratio	107.0%	66.1%
Underwriting expense ratio	27.6%	28.1%
Combined ratio	134.6%	94.2%

The loss and loss expense ratio includes net losses incurred for both the current year and any adverse or favorable prior year development of loss reserves held at the beginning of the year. The increase in the loss and loss expense ratio in the nine months ended September 30, 2005 compared to the same period in 2004 primarily reflects the effects of Hurricanes Katrina and Rita combined other smaller natural catastrophes in the quarter ended September 30, 2005, from which the segment incurred a combined \$821.1 million of net losses combined with higher than expected adverse prior year development relating to U.S. casualty business, reported in the second quarter of 2005 of \$190.6 million.

The prior year net reserve increase is attributable to the following sources:

(U.S. dollars in thousands)	(Unaudited) Adverse Prior Year	
	Development	% of Total
Workers' compensation	\$ 64,719	34%
Pre-1997 underwriting years excluding workers' compensation	15,603	8%
1997 - 2001 underwriting years excluding workers' compensation	76,011	40%
Post - 2001 underwriting years excluding workers' compensation	34,306	18%
Net reserve increase	\$ 190,639	100%

Approximately 90% of the Workers' Compensation reserve increase was related to an XLRA working layer program written across multiple underwriting years with a single cedent. This program was not renewed at the end of 2001. Other than this program, XLRA has not written significant working layer Workers' Compensation business.

The reserve increase relating to the pre-1997 underwriting years, excluding Workers' Compensation, was primarily driven by a small number of increases in reported claims in the Other Liability and Errors and Omissions lines of business in those underwriting years.

The reserve increase relating to the 1997-2001 underwriting years, excluding Workers' Compensation, was principally driven by recently reported claims in Umbrella Liability, Errors and Omissions and Directors and Officers lines of business in those underwriting years. The professional lines claims activity arises largely from a limited number of cedents. This reserve increase was partially offset by favorable development in the 1997- 2001 underwriting years in the Medical Malpractice business line.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The reserve increase related to the post-2001 underwriting years excluding Workers' Compensation, was primarily due to certain large individual claims affecting a number of lines including; Surety, Umbrella Liability and Errors and Omissions.

The decrease in the underwriting expense ratio in the first nine months of 2005 as compared with the first nine months of 2004 was due to a decrease in both the acquisition expense ratio and operating expense ratio to 21.8% and 5.8%, respectively, as compared to 22.1% and 6.0%, respectively, in the first nine months of 2004. The decrease was mainly due to decreased profit commissions, which resulted from the 2004 hurricane activity. The operating expense ratio decrease primarily reflects severance costs incurred for reduction of staff in 2004.

Exchange losses in the nine months ended September 30, 2005 were mainly attributable to an overall strengthening in the value of the U.S. dollar against the UK Sterling and the Euro in those operations with U.S. dollars as their functional currency and net U.K. sterling and Euro assets.

Reinsurance ☐ Life and Annuity Operations

The following summarizes net (loss) income from life and annuity operations:

(U.S. dollars in thousands)

	(Unaudited)		
	Nine Months Ended		
	September 30,		
	2005	2004	% Change
Gross premiums written	\$ 2,130,627	\$ 1,171,509	81.9%
Net premiums written	2,102,026	1,169,985	79.7%
Net premiums earned	2,102,650	1,171,849	79.4%
Fee income and other	253	293	NM
Claims and policy benefits	2,289,248	1,253,411	82.6%
Acquisition costs	50,472	31,039	62.6%
Operating expenses	13,330	8,488	57.0%
Exchange losses (gains)	925	(24)	NM
Net investment income	211,347	146,633	44.1%
Interest expense	☐	23	NM
Net (loss) income from life and annuity operations	\$ (39,725)	\$ 25,838	NM

* NM ☐ Not Meaningful

Gross and net premiums written as well as net premiums earned and claims and policy benefits increased significantly in the first nine months of 2005 as compared to the first nine months of 2004 primarily as a result of the large immediate annuity portfolio contracts bound in the second quarter of 2005. In addition, the Company wrote several new regular premium term assurance contracts since September 30, 2004, which generate written premiums in the current year.

Claims and policy benefits also increased significantly as a result of the annuity payout liabilities accepted under the contracts noted above. Changes in claims and policy benefits also included the movement in policy benefit reserves related to other contracts where investment assets were acquired with the assumption of the policy benefit reserves at the inception of the contract. In addition, \$37.4 million in losses were recorded during the second quarter of 2005 related to certain novated blocks of U.S.-based term life mortality reinsurance business as a result of the actuarially modeled impact of actual paid losses being greater than expected.

Acquisition costs increased in the first nine months of 2005 as compared to the first nine months of 2004 reflecting the write-off of certain deferred costs related to the U.S. mortality business noted above, as current profit projections did not support the recovery of the deferred costs product commissions booked in the prior year. Operating expenses increased in the first nine months of 2005 compared to the same period in 2004 due to build out of existing operations and start-up costs of new life operations in the U.S.

Net investment income increased in the first nine months of 2005 compared to the first nine months of 2004 reflecting the increase in life business invested assets primarily arising from new large annuity contracts written since September 30, 2004.

Financial Products and Services □ **Financial Operations**

The following table summarizes the contribution for this segment:

(U.S. dollars in thousands)

	(Unaudited)		
	Nine Months Ended September 30,		
	2005	2004	% Change
Gross premiums written	\$ 262,834	\$ 247,904	6.0%
Net premiums written	248,572	234,188	6.1%
Net premiums earned	160,448	175,101	(8.4)%
Fee income and other	14,465	8,793	64.5%
Net losses and loss expenses	55,676	98,079	(43.2)%
Acquisition costs	21,382	21,477	(0.4)%
Operating expenses	52,773	49,030	7.6%
Exchange losses (gains)	1,664	(2,983)	NM
Underwriting profit	\$ 43,418	\$ 18,291	137.4%
Net investment income □ financial guarantee	\$ 45,880	\$ 26,778	71.3%

Net results from derivatives	36,024	33,428	7.8%
Contribution from financial operations	\$ 163,593	\$ 94,724	72.7%

* NM □ Not Meaningful

Gross and net premiums written related to the financial guaranty line of business reflect premiums received and accrued for in the period and do not include the present value of future cash receipts expected from financial guaranty installment premium policies and contracts written in the period. In addition to the financial guaranty premiums, segment premiums also include premiums received from political risk and other structured property and casualty business lines. Increases in gross and net premiums written of 6.0% and 6.1%, respectively, for the nine month period ended September 30, 2005, as compared to the same period in 2004 were primarily due to several new structured property and casualty policies, combined with an increase in financial guaranty premiums primarily as a result of expansion of the Company's public finance business.

Net premiums earned decreased during the nine months ended September 30, 2005 as compared to the same period in 2004, primarily due to a decline in premium volume in the Company's financial guaranty business from the comparable prior year period. Results for the nine month period ended September 30, 2004 were positively affected by \$23.3 million in premium earnings associated with an insured project financing structure on which a full limit loss was recognized during the period.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The following table provides a line of business breakdown of the Financial Products and Services segment's net premiums earned:

(U.S. dollars in thousands)

	(Unaudited)		
	Nine Months Ended September 30,		
	2005	2004	% Change
Financial Guaranty	\$ 124,065	\$ 141,592	(12.4)%
Political Risk	18,457	21,368	(13.6)%
Other (1)	17,926	12,141	47.7%

(1) Includes structured property and casualty and alternative risk transfer products and weather and energy risk management products.

Net losses and loss expenses include current period net losses incurred and adverse or favorable development of prior periods' net loss and loss expense reserves. Net losses and loss expenses in the nine months ended September 30, 2005 decreased by 43.2% compared to the same period in 2004. This decrease primarily resulted from lower incurred losses in the Company's financial guaranty business of approximately \$70.8 million, partially offset by a net loss of \$21.4 million on a structured property and casualty policy incurred as a result of Hurricane Katrina, as discussed above, as well as losses incurred by the Company's weather and energy risk management business.

Net investment income related to the financial guaranty business increased by 71.3% in the nine months ended September 30, 2005 compared to the same period in 2004, due primarily to higher average invested assets resulting from net cash inflows from operations and a \$125.0 million capital infusion during the fourth quarter of 2004. In addition, \$6.4 million in investment income relates to the Company's investment in Financial Security Assurance International Ltd (FSAI). Prior to October 1, 2004, the Company accounted for its investment in FSAI under the equity method and reported the associated results thereof in Net income from financial and investment affiliates. Effective October 1, 2004, the Company changed its accounting for its investment in FSAI from the equity method to FSAB 115. *Accounting for Certain Investments in Debt and Equity Securities* to conform to the requirements of EITF 02-14 *Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock*. Accordingly, beginning October 1, 2004 the only earnings recognized by the Company on its investment in FSAI are dividends that are reported in investment income.

Net investment income related to structured products increased by 77.2% in the nine months ended September 30, 2005, as compared to the same period in the prior year as a result of significant increases in the combined average funding agreement and guaranteed investment contract balances from \$2.6 billion to \$4.7 billion for the nine months ended September 30, 2004 and 2005, respectively.

Interest expense on structured products relates to deposit liabilities associated with funding agreements, guaranteed investment contracts and certain structured property and casualty contracts. The increase in interest expense during the nine months ended September 30, 2005, as compared to the same period in 2004 related primarily to the increase in the combined average funding agreement and guaranteed investment contract balances for the nine months ended September 30, 2005 partially off-set by reduced interest expense on certain structured property and casualty contracts resulting from a change in the timing of estimated future cash outflows from such contracts during the nine months ended September 30, 2005 as compared to the same period in 2004.

Net income from financial and investment affiliates includes earnings on the Company's investment in Primus Guaranty, Ltd (Primus) and certain of the Company's investment affiliates, which are accounted for under the equity method. The decrease in such earnings for the nine months ended September 30, 2005 as compared to the

Edgar Filing: XL CAPITAL LTD - Form 10-Q

same period in 2004 was due primarily to a decrease in earnings from Primus, as well as the change in accounting related to the Company's investment in FSAI to conform with the requirements of EITF 02-14 as discussed above. Primus specializes in providing credit risk protection through credit derivatives.

Net results from derivatives represent changes in the market value of the Company's insured credit derivative portfolio, as well as results from the Company's weather and energy derivative business and certain structured financial risk management products. Net results from derivatives increased 7.8% in the nine months ended September 30, 2005 as compared to the same period in the prior year. Net results for the nine month period ended September 30, 2005 were primarily comprised of an \$18.6 million

gain on the settlement of a structured financial risk management derivative product tied to a housing price index and net results of \$15.2 million for the Company's weather and energy business. Net results for the nine month period ended September 30, 2004 were primarily comprised of mark to market credit derivatives of \$35.3 million.

Investment Activities

The following table illustrates the change in net investment income from general operations, net income from investment affiliates, net realized gains on investments and net realized and unrealized (losses) gains on investment derivative instruments.

(U.S. dollars in thousands)

	(Unaudited)		
	Nine Months Ended September 30,		
	2005	2004	% Change
Net investment income □ general operations	\$ 565,712	\$ 450,359	25.6%
Net income from investment affiliates □ general operations	112,750	71,862	56.9%
Net realized gains on investments	203,949	181,115	12.6%
Net realized and unrealized (losses) gains on investment derivative instruments □ general operations	(20,805)	1,386	NM

* NM □ Not Meaningful

Net investment income related to general operations increased in the first nine months of 2005 as compared to the first nine months of 2004 due primarily to a higher investment base as well as increases in the yield of the portfolio. The growth in the investment base reflected the Company's cash flow from operations. The market yield to maturity on the general account portion of the fixed income portfolio was 4.5% at September 30, 2005 as compared to 3.9% at September 30, 2004.

Net income from investment affiliates increased in the first nine months of 2005 compared to the first nine months of 2004 due primarily to stronger results in alternative fund affiliates and a strong performance in private equity fund affiliates.

The Company manages its investment grade fixed income securities using an asset/liability management framework. Due to the unique nature of the underlying liabilities, customized benchmarks are used to measure investment performance and comparison to standard market indices is not meaningful. Investment performance is not monitored for certain assets primarily consisting of operating cash and special regulatory deposits. The following is a summary of the investment portfolio returns for the general account asset/liability portfolios, structured and spread product portfolios and risk asset portfolios:

	(Unaudited)	(Unaudited)
	Nine Months Ended September 30, 2005 (1)	Nine Months Ended September 30, 2004 (1)
General Account Asset/Liability portfolios		
USD fixed income portfolio	1.6%	2.6%
Non USD fixed income portfolio	0.2%	3.8%
Structured and Spread Products portfolios		
USD fixed income portfolio	3.0%	3.5%
Non USD fixed income portfolio	7.4%	4.7%

Risk Asset portfolios

Alternative portfolio (2)	5.7%	4.7%
Equity portfolio	8.9%	4.2%
High-Yield fixed income portfolio	2.5%	3.1%

-
- (1) Portfolio returns are calculated by dividing the sum of net investment income or net income from investment affiliates, realized gains (losses) and unrealized gains (losses) by the daily weighted average market value of each portfolio. Non U.S. dollar fixed income performance is measured in either the underlying currency or in U.S. dollars.
- (2) Performance on the alternative portfolio reflects the nine months to August 31, 2005 and August 31, 2004, respectively.

Net Realized Gains and Losses and Other Than Temporary Declines in the Value of Investments

Net realized gains on investments in the first nine months of 2005 included net realized gains of \$243.7 million from sales of investments and net realized losses of approximately \$39.7 million related to the write-down of certain of the Company's fixed income and equity investments where the Company determined that there was an other than temporary decline in the value of these investments.

Net realized gains on investments in the first nine months of 2004 included net realized gains of \$187.3 million from sales of investments and net realized losses of approximately \$6.2 million related to the write-down of certain of the Company's fixed income and equity investments where the Company determined that there was an other than temporary decline in the value of those investments.

Other Revenues and Expenses

The following table sets forth other revenues and expenses:

(U.S. dollars in thousands)

	(Unaudited)		
	Nine Months Ended		
	September 30,		
	2005	2004	% Change
Net income from operating affiliates	\$ 46,030	\$ 131,848	(65.1)%
Amortization of intangible assets	8,504	9,770	(13.0)%
Corporate operating expenses	139,491	129,934	7.4%
Interest expense	133,457	118,379	43.6%
Income tax expense	47,312	82,126	(42.4)%

Net income from operating affiliates for the nine months ended September 30, 2005 decreased by 65.1% compared to the same period in 2004. This decrease related primarily to gains of \$102.1 million on the sale of the Company's investments in the Admiral Group and Pareto Partners recorded in 2004. This decrease was partially offset by increased earnings from fund manager affiliates in the first nine months of 2005.

Corporate operating expenses in the nine months ended September 30, 2005 increased compared to the nine months ended September 30, 2004 due to legal expenses and certain compensation costs which were partially offset by the ongoing conscious efforts towards cost reduction across the Company and the higher costs related to the first year of compliance with the Sarbanes-Oxley Act in 2004.

The increase in interest expense primarily reflected the increase in average outstanding debt for the nine months ended September 30, 2005, compared to the same period in 2004. For more information on the Company's financial structure, see "Liquidity and Capital Resources".

Income tax expense for the nine months ended September 30, 2005 decreased from the nine months ended September 30, 2004, due primarily to losses incurred in the Company's U.S. operations as a result of hurricanes Katrina and Rita. A significant proportion of the loss reserve increases are captured in non-U.S. subsidiaries where no tax relief is available.

Investments

The primary objectives of the investment strategy are to support the liabilities arising from the operations of the Company, generate stable investment income and to build book value for the Company over the longer term. The strategy strives to maximize investment returns while taking into account market and credit risk. The

Company's overall investment portfolio is structured to take into account a number of variables including local regulatory requirements, business needs, collateral management and risk tolerance.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

At September 30, 2005 and December 31, 2004, total investments and cash and cash equivalents were \$37.2 billion and \$32.4 billion, respectively. The following table summarizes the composition of the Company's invested assets:

(U.S. dollars in thousands)	(Unaudited)			
	Market Value at	Percent of	Market Value at	Percent of
	September 30,	Total	December 31,	Total
	2005		2004	
Cash and cash equivalents	\$ 2,150,609	5.8%	\$ 2,304,303	7.1%
Net payable for investments purchased	(182,929)	(0.5)%	(273,535)	(0.8)%
Fixed maturities	29,586,429	79.6%	25,100,194	77.4%
Short-term investments	1,997,587	5.4%	1,760,714	5.4%
Equity securities	845,501	2.3%	962,920	3.0%
Investments in affiliates	2,078,582	5.6%	1,936,852	6.0%
Other investments	310,879	0.8%	305,160	0.9%
Accrued investment income	370,379	1.0%	326,510	1.0%
Total investments and cash and cash equivalents	\$ 37,157,037	100%	\$ 32,423,118	100%

The Company reviews, on a regular basis, its corporate debt concentration, credit quality and compliance with established guidelines. At September 30, 2005 and December 31, 2004, the average credit quality of the Company's total fixed income portfolio was \square AA \square . Approximately 55.6% of the fixed income portfolio was rated \square AAA \square by one or more of the principal ratings agencies. Approximately 2.9% was below investment grade or not rated.

Unpaid Losses and Loss Expenses

The Company establishes reserves to provide for estimated claims, the general expenses of administering the claims adjustment process and for losses incurred but not reported. These reserves are calculated using actuarial and other reserving techniques to project the estimated ultimate net liability for losses and loss expenses. The Company's reserving practices and the establishment of any particular reserve reflects management's judgment concerning sound financial practice and do not represent any admission of liability with respect to any claims made against the Company.

Unpaid losses and loss expenses relate primarily to the casualty insurance and reinsurance business written by the Company. The balance was \$22.7 billion at September 30, 2005, and \$19.8 billion at December 31, 2004. The increase related primarily to the unpaid reserves for the third quarter 2005 catastrophes.

The table below represents a reconciliation of the Company's unpaid losses and loss expenses:

(U.S. dollars in thousands)	(Unaudited)	
	Nine Months Ended	
	September 30, 2005	
	Unpaid	Net unpaid
Gross unpaid	losses and	losses
Losses and loss	loss expenses	and loss

Edgar Filing: XL CAPITAL LTD - Form 10-Q

	<u>expenses</u>	<u>recoverable</u>	<u>expenses</u>
Balance as at December 31, 2004	\$ 19,837,669	\$ 6,971,356	\$ 12,866,313
Losses and loss expenses incurred	7,141,801	2,122,464	5,019,337
Losses and loss expenses paid /recovered	3,721,802	1,206,018	2,515,784
Foreign exchange and other	(592,823)	(283,615)	(309,208)
	<hr/>	<hr/>	<hr/>
Balance as at September 30, 2005	\$ 22,664,845	\$ 7,604,187	\$ 15,060,658
	<hr/>	<hr/>	<hr/>

While the Company reviews the adequacy of established reserves for unpaid losses and loss expenses regularly, no assurance can be given that actual claims made and payments related thereto will not be in excess of the amounts reserved. In the future, if such reserves develop adversely, such deficiency would have a negative impact on future results of operations. See "Unpaid Losses and Loss Expenses" in Item 1, "Critical Accounting Policies and Estimates" in Item 7 and Item 8, Note 9 to the Consolidated Financial Statements, each in the Company's Form 10-K for the year ended December 31, 2004, for further discussion.

Unpaid Losses and Loss Expenses Recoverable and Reinsurance Balances Receivable

In the normal course of business, the Company seeks to reduce the potential amount of loss arising from claims events by reinsuring certain levels of risk assumed in various areas of exposure with other insurers or reinsurers. While reinsurance agreements are designed to limit the Company's losses from large exposures and permit recovery of a portion of direct unpaid losses, reinsurance does not relieve the Company of its ultimate liability to its insureds. Accordingly, the loss and loss expense reserves on the balance sheet represent the Company's total unpaid gross losses. Unpaid losses and loss expenses recoverable relates to estimated reinsurance recoveries on the unpaid loss and loss expense reserves.

Unpaid losses and loss expenses recoverables were \$7.6 billion at September 30, 2005 and \$7.0 billion at December 31, 2004. The table below presents the Company's net reinsurance recoverable:

(U.S. dollars in thousands)	(Unaudited)	
	As at	As at
	September 30,	December 31,
	2005	2004
Reinsurance balances receivable	\$ 1,047,736	\$ 1,097,709
Reinsurance recoverable on future policy benefits	24,292	23,585
Unpaid losses and loss expenses recoverable	7,844,938	7,226,480
Bad debt reserve on unpaid losses and loss expenses and reinsurance balances receivable	(280,904)	(280,679)
Net paid and unpaid losses and loss expenses recoverable and reinsurance balances receivable	<u>\$ 8,636,062</u>	<u>\$ 8,067,095</u>

Included in unpaid losses and loss expenses recoverable at September 30, 2005 is an unsecured reinsurance recoverable from Winterthur Swiss Insurance Company (the "Seller") of \$1.4 billion, related to certain contractual arrangements with the sale and purchase agreement, as amended ("SPA"), relating to the Company's acquisition of Winterthur International in July 2001. The Seller is currently rated "A-" by S&P. The Seller provides the Company with post-closing protection determined as of June 30, 2004 with respect to, among other things, adverse development of incurred losses and premium balances relating to the acquired Winterthur International business ("Winterthur Business"). This protection is based upon net loss experience and development over a three-year, post-closing seasoning period based on actual loss development experience, collectible reinsurance and certain other factors set forth in the SPA. The SPA includes an independent actuarial process for determining the net amount due to the Company from the Seller. In this process, each of the Company and the Seller submits its respective net reserves and seasoned premium amounts. The independent actuary develops its own value of the seasoned net reserves and seasoned premium amounts and the actual final seasoned amount would be, in each case, the submission that is closest to the number developed by the independent actuary.

As the Company and the Seller were unable to come to an agreement, the Company submitted to the Seller notice to trigger the independent actuarial process as contemplated by the SPA. On February 3, 2005, both the Company and the Seller made submissions for the independent actuarial process. The independent actuary has commenced the evaluation process. Based on submissions and meetings to date, the Company continues to expect that the independent actuary's final report will be issued in the fourth quarter of this year. The Company's submissions would result in a net payable to the Company of approximately \$1.4 billion in aggregate and the Seller's submissions would result in a net payable to the Company of \$541.0 million in aggregate. At the completion of the independent actuarial process, the Company will be entitled to a lump sum payment. During the three months ended September 30, 2005, minor adjustments have been made to the Company's net recoverable from the Seller, which had no impact on net income.

In addition, the Seller provides protection to the Company with respect to third party reinsurance receivables and recoverables related to the Winterthur Business, which were approximately \$1.6 billion, in the aggregate, as

Edgar Filing: XL CAPITAL LTD - Form 10-Q

of September 30, 2005. There are two levels of protection from the Seller for these balances:

1. At the time of the Winterthur International acquisition, the Seller provided to the Company a liquidity facility. At the time of the payment of the net reserve seasoned amount as described above, the Company has the right to repay up to the balances outstanding on this facility by assignment to the Seller of an equal amount of reinsurance receivables selected by the Company. The payable balance related to this facility is included within other liabilities on the Company's balance sheet at September 30, 2005 and amounted to approximately \$268 million at that date.

2. Under two retrocession agreements the Company has reinsurance protection on the remaining portion of reinsurance recoverables with respect to incurred losses seasoned as of September 30, 2004 to the extent that the Company does not receive payment of such amounts from applicable reinsurers, with one agreement providing a limit of \$1.3 billion for insurance written in the period to June 30, 2001 and the other agreement providing a limit of \$1.3 billion for insurance written prior to December 31, 2000.

Certain reinsurers responsible for some portions of the reinsurance of the Winterthur Business have raised issues as to whether amounts claimed are due and the resolution of those discussions is also currently ongoing.

The Company may record a loss in future periods if any or some of the following occur:

- (i) The submission of the Seller is closer to the valuation developed by the independent actuary in which case the Company may record a loss of approximately \$900.0 million;
- (ii) There is deterioration of the net reserves and premium balances relating to the Winterthur Business from what was reported in the Company's December 31, 2004 financial statements;
- (iii) The Company is unable to make full recovery of the reinsurance recoverables related to the Winterthur Business, either from third parties or from the Seller under the additional protections; and/or
- (iv) Any amount due from the Seller proves to be uncollectible from the Seller for any reason.

Liquidity and Capital Resources

As a holding company, the Company's assets consist primarily of its investments in subsidiaries, and the Company's future cash flows depend on the availability of dividends or other statutorily permissible payments from its subsidiaries. The ability to pay such dividends is limited by the applicable laws and regulations of the various countries the Company operates in including, among others, Bermuda, the United States, Ireland, Switzerland and the United Kingdom, and those of the Society of Lloyd's and certain contractual provisions. No assurance can be given that the Company or its subsidiaries will be permitted to pay dividends in the future.

The Company and its subsidiaries provide no guarantees or other commitments (express or implied) of financial support to the Company's subsidiaries or affiliates, except for express written financial support provided by XL Insurance (Bermuda) Ltd in connection with the Company's financial guaranty subsidiaries and where other express written guaranty or other financial support arrangements are in place.

Liquidity

Liquidity is a measure of the Company's ability to generate sufficient cash flows to meet the short and long term cash requirements of the Company's business operations.

The Company's operating subsidiaries provide liquidity in that premiums are generally received months or even years before losses are paid under the policies related to such premiums. Historically, cash receipts from operations, consisting of insurance premiums and investment income, have provided more than sufficient funds to pay losses, operating expenses and dividends to the Company.

New cash from operations was approximately \$3.2 billion in the first nine months of 2005 compared with \$3.1 billion in the same period in 2004. This increase was due primarily to the growth of the immediate annuity business.

Certain business written by the Company has loss experience generally characterized as having low frequency and high severity. This may result in volatility in both the Company's results and operational cash flow. Cash flow has not yet been negatively affected by the Q3 05 Cats as all losses are currently in unpaid loss reserves given the timing and size of the loss events. The Company has reviewed the anticipated cash flows from these events and believes it has sufficient liquidity to meet its obligations.

Capital Resources

At September 30, 2005, the Company had total shareholders' equity of \$7.04 billion. In addition to ordinary and preferred share capital, the Company depends on external sources of financing such as debt, credit facilities and contingent capital to support its underwriting activities.

The Company does not intend, subject to the terms and conditions of the Series A or Series B preference ordinary shares as set forth in the relevant prospectus supplements, to redeem either the Series A or Series B preference ordinary shares unless replaced with capital having at least the equivalent credit.

As at September 30, 2005, the Company had revolving loan facilities from a variety of sources, including commercial banks, totaling \$3.8 billion of which \$2.7 billion in debt was outstanding. In addition, the Company had letters of credit facilities amounting to \$5.4 billion of which \$2.7 billion was utilized to provide of letters of credit in issue at September 30, 2005, 7.0% of which were collateralized by the Company's investment portfolio. Such letters of credit principally support the Company's U.S. non-admitted business and the Company's capital requirements at Lloyd's.

The Company plans to raise capital in the fourth quarter of 2005. In the event that the Company does not prevail in the independent actuarial process with Winterthur Swiss Insurance Company, the result of which is expected in the fourth quarter of 2005, the amount of capital raised will be greater. The Company expects that this financing will have a significant equity component. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" Other Key Focuses of Management.

Debt

The following table presents the Company's indebtedness under outstanding debt securities and lenders' commitments as at September 30, 2005:

Notes Payable And Debt (U.S. dollars in thousands)	Commitment	In Use	Year Of Expiry	Payments Due By Period			
				Less Than 1 Year	1 To 3 Years	3 To 5 Years	After 5 Years
5 year and 3 year revolvers (1)	1,000,000		2007 2010				
3-year revolver	100,000		2008				
7.15% Senior Notes due 2005	100,000	100,000	2005	100,000			
2.53% Senior Notes due 2009 (2)	825,000	825,000	2009			825,000	
6.58% Guaranteed Senior Notes due 2011	255,000	255,000	2011				255,000
6.50% Guaranteed Senior Notes due 2012 (3)	597,998	597,998	2012				600,000
5.25% Senior Notes due 2014 (2)	594,164	594,164	2014				600,000
6.375% Senior Notes due 2024 (2)	350,000	350,000	2024				350,000
Total debt	\$ 3,822,162	\$ 2,722,162		\$ 100,000	\$ -	\$ 825,000	\$ 1,805,000

- (1) The syndicated revolving credit and letter of credit facilities created in June 2004 and 2005 consist of a \$2.35 billion 5-year facility that expires in June 2010 and a \$2.0 billion 3-year facility that expires in June 2007. The combined revolving credit sub-limit of these facilities is \$1.0 billion. The 5 year facility includes a revolving-credit-only sub-limit of \$100 million.
- (2) The 2.53% Senior Notes due 2009 are a component of the Equity Security Units issued in March 2004. In addition to the Senior Notes coupon of 2.53%, contract adjustment payments of 3.97% per annum are paid on forward purchase contracts for ordinary shares for a total distribution per annum on the Units of 6.50%. The forward purchase contracts will be settled on May 15, 2007 and the Senior Notes will mature on May 15, 2009.
- (3) [Commitment] and [In Use] data represent September 30, 2005, accreted values. [After 5 years] data represent ultimate redemption values.

The total pre-tax interest expense on the borrowing described above was \$112.3 million and \$83.5 million for the nine months ended September 30, 2005 and September 30, 2004, respectively.

Credit facilities, contingent capital and other sources of collateral.

The Company replaced its 364-day credit facility that expired on June 22, 2005, with a new 5-year, \$2.35 billion credit facility that expires on June 22, 2010. The facility provides letter of credit capacity of up to \$2.25 billion and revolving credit of up to \$1.0 billion. The revolving credit sub-limit of \$1.0 billion is shared with the June 2004 3-year credit facility in that the Company can have no more than \$1.0 billion in aggregate in revolving credit outstanding under the two facilities. In addition, the 2005 5-year facility contains a \$100 million revolving-credit-only sub-limit which means that no more than \$2.25 billion of the total facility of \$2.35 billion is available in the form of letters of credit.

The Company entered into a new bilateral revolving credit facility on August 3, 2005. The facility provides up to \$100 million in revolving credit and was unutilized at September 30, 2005. The Company replaced a 364-day letter of credit facility on September 30, 2005, with a new 364-day \$150 million credit facility that expires on September 29, 2006. This facility was unutilized at September 30, 2005. Another 364-day revolving credit and letter of credit facility expired on September 30, 2005 and was not replaced. This facility had provided up to \$100 million of letters of credit and up to \$60 million in revolving credit with aggregate credit available of \$100 million.

The following table presents the Company's letter of credit facilities available, in use, and expiration dates as at September 30, 2005:

Other Commercial Commitments (U.S. dollars in thousands)	Commitment	In Use	Year Of Expiry	Amount of Commitment Expiration Per Period			
				Less Than 1 Year	1 To 3 Years	3 To 5 Years	After 5 Years
5 Letter of Credit facilities	\$ 1,149,963	\$ 870,735	2006	\$ 1,149,963	\$ □	\$ □	\$ □
1 Letter of Credit facility	2,000,000	□	2007	□	2,000,000	□	□
1 Letter of Credit facility	2,250,000	1,806,556	2010	□	□	2,250,000	□
7 Letter of Credit facilities	\$ 5,399,963	\$ 2,677,291		\$ 1,149,963	\$ 2,000,000	\$ 2,250,000	\$ □

Of the total letter of credit commitment above, \$900 million is also included in the revolvers under notes payable and debt.

The Company has several letter of credit facilities provided on a syndicated and bilateral basis from commercial banks. These facilities are principally utilized to support non-admitted insurance and reinsurance operations in the United States and capital requirements at Lloyd's. In addition to letters of credit, the Company has established insurance trusts in the U.S. that provide cedants with statutory relief under state insurance regulations in the U.S. It is anticipated that the commercial facilities will be renewed on expiry but such renewals are subject to the availability of credit from banks utilized by the Company. In the event that such credit support is insufficient, the Company could be required to provide alternative security to cedants. This could take the form

Edgar Filing: XL CAPITAL LTD - Form 10-Q

of additional insurance trusts supported by the Company's investment portfolio or funds withheld using the Company's cash resources. The value of letters of credit required is driven by, among other things, loss development of existing reserves, the payment pattern of such reserves, the expansion of business written by the Company and loss experience of such business.

In addition to funded debt transactions, the Company and a majority-owned subsidiary XL Financial Assurance Ltd. (XLFA) have entered into contingent capital transactions as further described below. No up-front proceeds were received by the Company or XLFA under these transactions, however, in the event that the associated irrevocable put option agreements are exercised, proceeds previously raised from investors from the issuance of pass-through trust securities would be received in return for the issuance of preferred shares by the Company or XLFA, as applicable.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

On December 10, 2004, XLFA entered into a put option agreement and an asset trust expense reimbursement agreement with Twin Reefs Asset Trust (the "Asset Trust"). The put option agreement provides XLFA with the irrevocable right to require the Asset Trust at any time and from time to time to purchase XLFA's non-cumulative perpetual Series B Preferred Shares with an aggregate liquidation preference of up to \$200 million. There is no limit to the number of times that XLFA may exercise the put option, redeem the Series B Preferred Shares from the Asset Trust and exercise the put option again. XLFA is obligated to reimburse the Asset Trust for certain fees and ordinary expenses. To the extent that any Series B Preferred Shares are put to the Asset Trust and remain outstanding, a corresponding portion of such fees and ordinary expenses will be payable by XLFA pursuant to the asset trust expense reimbursement agreement. The put option agreement is perpetual but would terminate on delivery of notice by XLFA on or after December 9, 2009, or under certain defined circumstances, such as the failure of XLFA to pay the put option premium when due or bankruptcy. The premium payable by XLFA is the sum of certain trustee and investment manager expenses, the distribution of income paid to holders of the pass-through trust securities, less the investment yield on the eligible assets purchased using the proceeds originally raised from the issuance of the pass-through trust securities.

In July 2003, the Company entered into a contingent capital transaction with an aggregate value of \$500.0 million. This transaction provides the Company with an insurance trust that provides the Company with statutory relief under state insurance regulations in the U.S. Under the terms of this facility, the Company has acquired an irrevocable put option to issue preference ordinary shares into a trust in return for proceeds raised from investors. This put option may be exercised by the Company at any time. In addition, the Company may be required to issue preference ordinary shares to the trust under certain circumstances, including, but not limited to, the non-payment of the put option premium and a ratings downgrade of the Company. In connection with this transaction, the fair value of the put premiums and other related costs, in total of \$111.9 million was transferred from "Additional paid in capital" to a deferred liability.

Ratings

The Company's ability to underwrite business is dependent upon the quality of its claims paying and financial strength ratings as evaluated by independent rating agencies. As a result, in the event that the Company is downgraded, its ability to write business may be adversely affected. In the normal course of business, the Company evaluates its capital needs to support the volume of business written in order to maintain its claims paying and financial strength ratings. The Company regularly provides financial information to rating agencies to both maintain and enhance existing ratings.

The following are the current financial strength and claims paying ratings from internationally recognized rating agencies in relation to the Company's principal insurance and reinsurance subsidiaries and pools:

<u>Rating agency</u>	<u>Rating</u>
Standard & Poor's	AA- (Watch Negative)
Fitch	AA- (Stable)
A.M. Best	A+ (Under Review Negative)
Moody's Investor Services	Aa2 (Watchlist Negative) (Members of the XL America Pool, XL Re Ltd and XL Life Insurance and Annuity Company are rated Aa3.)

On October 26, 2005, Fitch Ratings downgraded ratings of XL Capital Ltd and its property/casualty reinsurance subsidiaries by one notch to "AA-" (Stable) from "AA" (Ratings Watch Negative). The following are the financial strength and claims paying ratings from internationally recognized rating agencies in relation to the Company's principal insurance and reinsurance subsidiaries and pools at September 30, 2005:

<u>Rating agency</u>	<u>Rating</u>
----------------------	---------------

Edgar Filing: XL CAPITAL LTD - Form 10-Q

Standard & Poor's	AA-	(Watch Negative)
Fitch	AA	(Ratings Watch Negative)
A.M. Best	A+	(Under Review Negative)
Moody's Investor Services	Aa2	(Watchlist Negative) (Members of the XL America Pool, XL Re Ltd and XL Life Insurance and Annuity Company are rated Aa3.)

The following are the current financial strength ratings from internationally recognized rating agencies in relation to the Company's principal financial guaranty insurance and reinsurance subsidiaries:

<u>Rating agency</u>	<u>Rating</u>
Standard & Poor's	AAA
Fitch	AAA
Moody's Investor Services	Aaa

In addition, XL Capital Ltd, at the end of the quarter, had the following long term debt ratings: 'aa' (Under Review Negative) from A.M. Best, 'A' (Watch Negative) from Standard and Poor's, 'A2' (Watchlist Negative) from Moody's and 'A' (Rating Watch Negative) from Fitch. On October 26, 2005, Fitch Ratings downgraded XL's long-term issuer rating to 'A-' (Stable) from 'A' (Ratings Watch Negative).

Other

For information regarding cross-default and certain other provisions in the Company's debt and convertible securities documents, see Item 7 of the Company's Form 10-K for the year ended December 31, 2004.

The Company has had several share repurchase programs in the past as part of its capital management strategy. On January 9, 2000, the Board of Directors authorized a program for the repurchase of shares up to \$500.0 million. Under this plan, the Company has purchased 6.6 million shares at an aggregate cost of \$364.6 million or an average cost of \$55.24 per share. The Company has \$135.4 million remaining in its share repurchase authorization. During the nine months ended September 30, 2005, no shares were repurchased in the open market. The Company has repurchased shares from employees and directors in relation to withholding tax on restricted stock. See Part II, Item 2 "Unregistered Sales of Equity Securities and Use of Proceeds", below.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 ("PSLRA") provides a "safe harbor" for forward-looking statements. Any prospectus, prospectus supplement, the Company's Annual Report to ordinary shareholders, any proxy statement, any Form 10-K, other Form 10-Q or Form 8-K of the Company or any other written or oral statements made by or on behalf of the Company may include forward-looking statements that reflect the Company's current views with respect to future events and financial performance. Such statements include forward-looking statements both with respect to the Company in general, and to the insurance, reinsurance and financial products and services sectors in particular (both as to underwriting and investment matters). Statements that include the words "expect", "intend", "plan", "believe", "project", "anticipate", "will", and similar state a future or forward-looking nature identify forward-looking statements for purposes of the PSLRA or otherwise.

All forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements. The Company believes that these factors include, but are not limited to, the following: (i) the adequacy of rates and terms and conditions may not be as sustainable as the Company is currently projecting; (ii) changes to the size of the Company's claims relating to the Q3 05 Cats; (iii) the Company's ability to (a) enter into the contemplated quota share reinsurance treaty with respect to specified portions of the Company's property catastrophe and retrocessional lines of business or (b) if entered into, realize the expected benefits of such treaty; (iv) the timely and full recoverability of reinsurance placed by the Company with third parties, or other amounts due to the Company, including, without limitation, amounts due to the Company from the Winterthur Swiss Insurance Company (a) in connection with the independent actuarial process or (b) under other contractual arrangements; (v) the projected amount of ceded reinsurance recoverables and the ratings and creditworthiness of reinsurers may change; (vi) the timing of claims payments being faster or the receipt of reinsurance recoverables being slower than anticipated by the Company; (vii) ineffectiveness or obsolescence of the Company's business strategy due to changes in current or future market conditions; (viii) increased competition on the basis of pricing, capacity, coverage terms or other factors; (ix) greater frequency or severity of claims and loss activity, including as a result of natural or man-made catastrophic events, than the Company's underwriting models, reserving or investment practices anticipate based on historical experience or industry data; (x) developments in the world's financial and capital markets that adversely affect the performance of the Company's investments and the Company's access to such markets; (xi) the potential impact on the Company from government-mandated insurance coverage for acts of terrorism; (xii) the potential impact of variable interest entities or other off-balance sheet arrangements on the Company; (xiii) developments in bankruptcy proceedings or other developments related to bankruptcies of companies insofar as they affect property and casualty insurance and reinsurance coverages or claims that the Company may have as a counterparty; (xiv) availability of borrowings and letters of credit under the Company's credit facilities; (xv) changes in regulation or tax laws applicable to the Company or its subsidiaries, brokers or customers; (xvi) acceptance of the Company's products and services, including new products and services; (xvii) changes in the availability, cost or quality of reinsurance; (xviii) changes in the distribution or placement of risks due to increased consolidation of insurance and reinsurance brokers; (xix) loss of key personnel; (xx) the effects of mergers, acquisitions and divestitures; (xxi) changes in rating agency policies or practices; (xxii) changes in accounting policies or practices or the application thereof; (xxiii) legislative or regulatory developments; (xxiv) changes in general economic conditions, including inflation, foreign currency exchange rates and other factors; (xxv) the effects of business disruption or economic contraction due to war, terrorism or other hostilities; and (xxvi) the other factors set forth in the Company's other documents on file with the SEC. The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included herein or elsewhere. The Company undertakes no obligation to update publicly or revise any forward-looking

statement, whether as a result of new information, future developments or otherwise.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Except as described below, there have been no material changes in the Company's market risk exposures, or how those exposures are managed, since December 31, 2004. The following discussion should be read in conjunction with "Quantitative and Qualitative Disclosures About Market Risk" presented under Item 7A of the Company's Form 10-K for the year ended December 31, 2004.

The Company enters into derivatives and other financial instruments primarily for risk management purposes. The Company's derivative transactions can expose the Company to credit default swap risk, weather and energy risk, investment market risk and foreign currency exchange rate risk. The Company attempts to manage these risks based on guidelines established by senior management. Derivative instruments are carried at fair value with resulting changes in fair value recognized in income in the period in which they occur.

Value-at-risk ("VaR") is one of the tools used by management to estimate potential losses in fair values using historical rates, market movements and credit spreads to estimate the volatility and correlation of these factors to calculate the potential loss that could occur over a defined period of time given a certain probability.

This risk management discussion and the estimated amounts generated from the sensitivity and VaR analyses presented in this document are forward-looking statements of market risk assuming certain adverse market conditions occur. Actual results in the future may differ materially from these estimated results due to, among other things, actual developments in the global financial markets. The results of analysis used by the Company to assess and mitigate risk should not be considered projections of future events of losses. See generally "Cautionary Note Regarding Forward-Looking Statements" in Item 2.

Credit Default Swaps

The Company has written certain financial guaranty transactions in derivative or swap form. The Company does not actively trade these transactions and generally issues and holds these contracts to maturity. Changes in fair value can result from changes in market credit spreads, supply and demand for similar type instruments, changes in future loss and/or recovery estimates, interest rates and credit rating upgrades or downgrades. The Company therefore is at risk for changes in fair value due to changes in any of the above factors. In addition, the Company enters into credit default swap transactions as part of its overall investment strategy.

Weather and Energy Market Risk

The Company offers weather and energy risk management products in insurance or derivative form to end-users, while managing the risks in the over-the-counter and exchange traded derivatives markets in a weather and energy derivatives trading portfolio.

Fair values for the Company's natural gas derivative contracts are determined through the use of quoted market prices. As quoted market prices are not widely available in the weather derivative market, management uses available market data and internal pricing models based upon consistent statistical methodologies to estimate fair values. Estimating fair value of instruments that do not have quoted market prices requires management judgment in determining amounts that could reasonably be expected to be received from, or paid to, a third party in settlement of the contracts. The amounts could be materially different from the amounts that might be realized in an actual sale transaction. Fair values are subject to change in the near-term and reflect management's best estimate based on various factors including, but not limited to, realized and forecasted weather conditions, changes in commodity prices, changes in interest rates and other market factors.

The following table summarizes the movement in the fair value of weather and energy contracts outstanding during the nine months ended September 30, 2005.

(U.S. dollars in thousands)

**(Unaudited)
Nine Months
Ended September 30,
2005**

Edgar Filing: XL CAPITAL LTD - Form 10-Q

Fair value of contracts outstanding, beginning of the period	\$ 7,219
Net option premiums realized (1)	10,930
Reclassification of settled contracts to realized (2)	(3,947)
Other changes in fair value (3)	(6,973)
	<hr/>
Fair value of contracts outstanding, end of period	\$ 7,229
	<hr/>

- (1) The Company received \$11 million of premiums and realized \$21.9 million of premiums on expired transactions for a net increase in the balance sheet derivative asset of \$10.9 million.
- (2) The Company paid \$3.9 million to settle derivative positions during the period resulting in a reclassification of this amount from unrealized to realized and an increase in the derivative asset on the balance sheet.
- (3) This represents the effects of changes in commodity prices, the time value of options, and other valuation adjustments.

The change in the fair value of contracts outstanding at September 30, 2005 as compared to the beginning of the period, is primarily due to favorable weather development in the European weather portfolio and the impact on seasonal contracts that are at the end of their risk periods.

The following table summarizes the maturity of contracts outstanding as of September 30, 2005:

(U.S. dollars in thousands)
(Unaudited)

Source Of Fair Value	Less Than 1 Year	1-3 Years	3-5 Years	Greater Than 5 Years	Total Fair Value
Prices actively quoted	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
Prices based on models and other valuation methods	7,043	509	(324)	0	7,228
Total fair value of contracts outstanding	\$ 7,043	\$ 509	\$ (324)	\$ 0	\$ 7,228

The Company manages its weather and energy portfolio through the employment of a variety of strategies. These include geographical and directional diversification of risk exposures and direct hedging within the capital and reinsurance markets. Risk management is undertaken on a product portfolio-wide basis, to maintain a portfolio that the Company believes is well diversified and which remains within the aggregate risk tolerance established by the Company's senior management.

The Company's aggregate average, low and high seasonal VaR amounts for its weather risk management portfolio, calculated at a 99% confidence level, during the period ended September 30, 2005 were \$91.7 million, \$65.3 million and \$115.1 million, respectively. The corresponding levels for the weather risk management portfolio during the period ended September 30, 2004 were \$177.8 million, \$126.5 million and \$232.4 million, respectively. The Company calculates its aggregate VaR by summing the VaR amounts for each of its seasonal portfolios. The Company's aggregation methodology yields a conservative aggregate portfolio VaR, given that current weather events and patterns have an immaterial effect on expectations for future seasons and the Company could therefore greatly reduce or eliminate its VaR on future seasons by selling its positions prior to the beginning of a season. At present, the Company's VaR calculation does not exceed \$40.0 million in any one season.

For electricity generation outage insurance products, VaR is calculated using an annual holding period. Management has established an annual VaR limit of \$25.0 million for this book of business. The Company's average, low and high annual VaR amounts, calculated at a 99% confidence level, during the period ended September 30, 2005 were \$24.5 million, \$15.3 million, and \$38.4 million, respectively. The corresponding amounts during the period ended September 30, 2004 were \$4.2 million, \$2.6 million, and \$7.6 million, respectively.

Investment Market Risk

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The Company's investment portfolio consists of exposures to fixed income securities, equities, alternative investments, derivatives, business and other investments and cash. These securities and investments are denominated in both U.S. dollars and foreign currencies.

Through the structure of the Company's investment portfolio, the Company's earnings and book value are directly affected by changes in the valuations of the securities and investments held in the investment portfolio. These valuation changes reflect changes in interest rates (e.g., changes in the level, slope and curvature of the yield curves, volatility of interest rates, mortgage prepayment speeds and credit spreads), credit quality, equity prices (e.g., changes in prices and volatilities of individual securities, equity baskets and equity indices) and foreign currency exchange rates (e.g., changes in spot prices, forward prices and volatilities of currency rates). Market risk therefore arises due to the uncertainty surrounding the future valuations of these different assets, the factors that impact their values and the impact that this could have on the Company's earnings and book value.

The Company seeks to manage the risks of the investment portfolio through a combination of asset class, country, industry and security level diversification and investment manager allocations. These allocation decisions are made relative to the liability profile of the Company and the Company's surplus. Further, individual security and issuer exposures are generally controlled and monitored at the investment portfolio level, via specific investment constraints outlined in investment guidelines and agreed with the Company's external investment professionals. Additional constraints are generally agreed with the external investment professionals which may address exposures to eligible securities, prohibited investments/transactions, credit quality and general concentration limits.

The Company's direct use of investment derivatives includes futures, forwards, swaps and option contracts that derive their value from underlying assets, indices, reference rates or a combination of these factors. When investment guidelines allow for the use of derivatives, these can generally only be used for the purposes of managing interest rate risk, foreign exchange risk, credit risk and replicating permitted investments, provided the use of such instruments is incorporated in the overall portfolio duration, spread, convexity and other relevant portfolio metrics. The direct use of derivatives to economically leverage the portfolio outside of the stated guidelines is generally not permitted. Derivatives may also be used to add value to the investment portfolio where market inefficiencies are perceived to exist, to utilize cash holdings to purchase equity indexed derivatives and to adjust the duration of a portfolio of fixed income securities to match the duration of related deposit liabilities.

Investment Value-At-Risk

The VaR of the Company's total investment portfolio at September 30, 2005, based on a 95% confidence level with a one month holding period, was approximately \$557.1 million as compared to \$487.3 million as at December 31, 2004. The VaR of all investment related derivatives as at September 30, 2005 was approximately \$21.0 million as compared to \$15.1 million as at December 31, 2004. The Company's investment portfolio VaR as at September 30, 2005 is not necessarily indicative of future VaR levels.

To complement the VaR analysis which is based on normal market environments, the Company considers the potential impact on the investment portfolio of several different historical stress periods to analyze the effect of unusual market conditions. The Company establishes certain historical stress test scenarios which are applied to the actual investment portfolio. As these stress tests and estimated gains and losses are based on historical events, they will not necessarily reflect future stress events or gains and losses from such events. The results of the stress test scenarios are reviewed on a regular basis to ensure they reflect current shareholders' equity, market conditions and the Company's total risk tolerance. Given the investment portfolio allocations as at September 30, 2005, the Company would expect to lose approximately 5.8% of the portfolio if the most damaging event stress tested was repeated, all other things held equal, as compared to 5.7% at December 31, 2004. Given the investment portfolio allocations as at September 30, 2005, the Company would expect to gain approximately 19.3% on the portfolio if the most favorable event stress tested was repeated, all other things held equal, as compared to 18.4% at December 31, 2004. The Company assumes that no action is taken during the stress period to either liquidate or rebalance the portfolio and believes that this fairly reflects the potential decreased liquidity that is often associated with stressed market environments.

Fixed Income Portfolio

The Company's fixed income portfolio is exposed to credit and interest rate risk. The fixed income portfolio includes fixed maturities, short-term investments, cash and cash equivalents and net payable for investments purchased.

As at September 30, 2005, the value of the Company's fixed income portfolio, including cash and cash equivalents and net payable for investments purchased, was approximately \$33.6 billion as compared to approximately \$28.9 billion as at December 31, 2004. As at September 30, 2005, the fixed income portfolio consisted of approximately 90.3% of the total investment portfolio (including cash and cash equivalents, accrued investment income and net payable for investments purchased) as compared to approximately 89.1% as at December 31, 2004.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The table below shows the Company's fixed income portfolio by credit rating in percentage terms of the Company's total fixed income portfolio (including fixed maturities, short-term investments, cash and cash equivalents and net payable for investments purchased) as at September 30, 2005.

	Total
AAA	55.6%
AA	11.8%
A	18.0%
BBB	11.7%
BB & BELOW	2.6%
NR	0.3%
	100.0%

At September 30, 2005, the average credit quality of the Company's total fixed income portfolio was \square AA \square .

As at September 30, 2005, the top 10 corporate holdings, which exclude government guaranteed and government sponsored enterprises, represented approximately 11.1% of all corporate holdings. The top 10 corporate holdings listed below represent the direct exposure to the corporations listed below, including their subsidiaries, and excludes any securitized, credit enhanced and collateralized asset or mortgage backed securities, cash and cash equivalents, and excludes any reduction to this exposure through credit default swaps, if applicable.

Top 10 Corporate Holdings	Percentage of Total Fixed Income Portfolio (1)
HSBC Holdings plc	0.5%
General Electric Company	0.5%
HBOS plc	0.4%
Citigroup Inc	0.4%
Lloyds TSB Group plc	0.4%
Royal Bank of Scotland Group plc	0.4%
Banco Santander Central Hispano SA	0.4%
Wal-Mart Stores Inc.	0.3%
Bank of America Corporation	0.3%
Morgan Stanley	0.3%

(1) Including fixed maturities, short-term investments, cash and cash equivalents and net payable for investments purchased.

The Company's fixed income portfolio is exposed to interest rate risk. Interest rate risk is the price sensitivity of a fixed income security to changes in interest rates. The hypothetical case of an immediate 100 basis point adverse parallel shift in global bond curves as at September 30, 2005 would decrease the fair value of the Company's fixed income portfolio by approximately 4.6% or \$1.5 billion as compared to approximately 4.4% or \$1.3 billion as at December 31, 2004. Based on historical observations, it is unlikely that all global yield curves would shift in the same direction, by the same amount and at the same time.

Equity Portfolio

As at September 30, 2005, the Company's equity portfolio, which for financial reporting purposes includes certain fixed income mutual fund investments that do not have the risk characteristics of equity investments, was \$845.5 million as compared to \$962.9 million as at December 31, 2004. As at September 30, 2005, the Company's allocation to equity securities was approximately 2.3% of the total investment portfolio (including cash and cash equivalents, accrued investment income and net payable for investments purchased) as compared to approximately 3.0% as at December 31, 2004.

As at September 30, 2005, approximately 54% of the equity portfolio was invested in U.S. companies as compared to approximately 60% as at December 31, 2004. As at September 30, 2005, the top ten equity holdings represented approximately 7.4% of the Company's total equity portfolio as compared to approximately 8.0% as at December 31, 2004.

The Company's equity portfolio is exposed to price risk. Equity price risk is the potential loss arising from decreases in the market value of equities. An immediate hypothetical 10% change in the value of each equity position would affect the fair value of the portfolio by approximately \$84.6 million as at September 30, 2005 as compared to \$96.3 million as at December 31, 2004.

Alternative Investment Portfolio

The Company's alternative investment portfolio (included in investments in affiliates or other investments) had approximately 85 separate fund investments at September 30, 2005 with a total portfolio of \$1.8 billion representing approximately 4.8% of the total investment portfolio (including cash and cash equivalents, accrued investment income and net payable for investments purchased) as compared to December 31, 2004 where the Company had approximately 100 separate fund investments with a total portfolio of \$1.7 billion representing approximately 5.2% of the total investment portfolio.

As at September 30, 2005, the alternative investment style allocation was 43% in directional/tactical strategies, 31% in event-driven strategies, 22% in arbitrage strategies, and 4% in multi-strategy strategies. As at December 31, 2004, the alternative investment style allocation was 42% in directional/tactical strategies, 25% in event-driven strategies, 25% in arbitrage strategies, and 8% in multi-strategy strategies.

Private Investment Portfolio

As at September 30, 2005, the Company's exposure to private investments was approximately \$196.9 million compared to \$206.0 million as at December 31, 2004. As at September 30, 2005, the Company's exposure to private investments comprised approximately 0.5% of the total investment portfolio (including cash and cash equivalents, accrued investment income and net payable for investments purchased), as compared to 0.6% as at December 31, 2004.

Bond and Stock Index Futures Exposure

As at September 30, 2005, bond and stock index futures outstanding had a net short position of \$65.9 million as compared to a net long position of \$1.3 billion as at December 31, 2004. A 10% appreciation or depreciation of the underlying exposure to these derivative instruments would have resulted in realized losses or realized gains of \$6.6 million as at September 30, 2005 and realized gains or realized losses of \$129.5 million as at December 31, 2004, respectively. The Company may reduce its exposure to these futures through offsetting transactions, including options and forwards.

Foreign Currency Exchange Risk

The Company has exposure to foreign currency exchange rate fluctuations through its operations, unpaid losses and loss expenses and in its investment portfolio. The Company's net foreign currency denominated payable on foreign exchange contracts as at September 30, 2005 was \$58.9 million as compared to \$3.8 million as at December 31, 2004, with a net unrealized gain of \$23.5 million as compared to a net unrealized loss of \$11.8 million as at December 31, 2004.

Foreign exchange contracts within the investment portfolio are utilized to manage individual portfolio foreign exchange exposures, subject to investment manager guidelines established by management. These contracts are not designated as specific hedges for financial reporting purposes and, therefore, realized and unrealized gains and losses on these contracts are recorded in income in the period in which they occur. These contracts generally have maturities of three months or less.

The Company also attempts to manage the foreign exchange volatility arising on certain transactions denominated in foreign currencies. These include, but are not limited to, premium receivable, reinsurance contracts, claims payable and investments in subsidiaries.

Credit Risk

The Company is exposed to credit risk in the event of non-performance by the other parties to the forward contracts, however the Company does not anticipate non-performance. The difference between the notional principal amounts and the associated market value is the Company's maximum credit exposure.

ITEM 4. CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 promulgated under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective to provide reasonable assurance that all material information relating to the Company required to be filed in this report has been made known to them in a timely fashion.

Changes in Internal Control Over Financial Reporting

There have been no changes in internal control over financial reporting identified in connection with the Company's evaluation required pursuant to Rules 13a-15 and 15d-15 promulgated under the Securities Exchange Act of 1934, as amended, that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II □ OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On June 21, 2004, a consolidated and amended class action complaint (the "Amended Complaint") was served on the Company and certain of its present and former directors and officers as defendants in a putative class action (Malin et al. v. XL Capital Ltd et al.) filed in United States District Court, District of Connecticut (the "Malin Action"). The Malin Action purports to be on behalf of purchasers of the Company's common stock between November 1, 2001 and October 16, 2003, and alleges claims under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder ("Securities Laws"). The Amended Complaint alleges that the defendants violated the Securities Laws by, among other things, failing to disclose in various public and shareholder and investor reports and other communications the alleged inadequacy of the Company's loss reserves for its NAC Re subsidiary (now known as XL Reinsurance America, Inc.) and that, as a consequence, the Company's earnings and assets were materially overstated. On August 26, 2005, the Court dismissed the Amended Complaint, but provided leave for Plaintiffs to file a further amended complaint. Plaintiffs thereafter filed a proposed Second Amended Complaint which is substantially similar to the Amended Complaint. Defendants intend to seek dismissal of the Second Amended Complaint. There has been no discovery in the Malin Action. The Company and the defendant present and former officers and directors intend to vigorously defend the claims asserted against them.

On June 17, 2004, William Kronenberg, III, Frank A. Piliero and David M. Rosenberg (together, the "Claimants") commenced an arbitration against the Company before the American Arbitration Association ("AAA") in New York, New York. The Claimants and the Company were parties to a stock purchase agreement dated June 1, 1999, pursuant to which the Company acquired the outstanding capital stock of ECS, Inc (the "Stock Purchase Agreement"). In their AAA arbitration demand, the Claimants assert claims of fraud and deceitful conduct, negligent misrepresentation, and breach of contract and a covenant of good faith and fair dealing, all relating to the allegation that the Company failed to make certain contingent payments allegedly due to the Claimants under the Stock Purchase Agreement. Claimants seek \$85 million (the maximum amount payable under the contingent payment provision at issue), plus punitive damages, interest, costs and attorneys' fees. Arbitration hearings concluded on August 10, 2005, and post-hearing briefing is due to be completed on November 14, 2005. The AAA panel will have until March 14, 2006 to issue an award. Pursuant to rulings of the United States District Court for the Southern District of New York and the United States Court of Appeals for the Second Circuit in related litigation concerning the scope of the AAA arbitration, it is possible that the AAA panel may not resolve all issues between the Claimants and the Company, and that additional arbitration proceedings before an independent accounting firm may follow the issuance of the AAA award. The Company is vigorously defending the Claimants' claims.

The Company is also subject to litigation and arbitration in the normal course of its business. These lawsuits and arbitrations principally involve claims on policies of insurance and contracts of reinsurance and are typical for the Company and for the property and casualty insurance and reinsurance industry in general. Such legal proceedings are considered in connection with the Company's loss and loss expense reserves. Reserves in varying amounts may or may not be established in respect of particular claims proceedings based on many factors, including the legal merits thereof. In addition to claims litigation, the Company and its subsidiaries are subject to lawsuits in the normal course of business that do not arise from or directly relate to claims on policies of insurance or contracts of reinsurance.

As previously disclosed, in May and June of 2005, the Company received a subpoena from the SEC and a grand jury subpoena from the U.S. Attorney's Office for the Southern District of New York, respectively, in each case for documents and information relating to certain finite risk and loss mitigation insurance products. The Company is fully cooperating and responding to these requests.

From time to time, the Company has also received and responded to additional requests from Attorneys General and state insurance regulators for information relating to the Company's contingent commission arrangements including brokers and agents and the Company's insurance and reinsurance practices in connection with certain finite risk and loss mitigation insurance products. Similarly, the Company's affiliates outside the United States have, from time to time, received and responded to requests from regulators relating to the Company's insurance and reinsurance practices. The Company is fully cooperating with these regulators in these matters.

On August 1, 2005, plaintiffs in a proposed class action multi-district lawsuit, captioned *In re Insurance Brokerage Antitrust Litigation*, MDL No. 1663, Civil Action No. 04-5184 (FSH) (the "MDL"), filed a Consolidated Amended Complaint, which named as new defendants in the pending action approximately 30 entities, including Greenwich Insurance Company, Indian Harbor Insurance Company and XL Capital Ltd. In the MDL, 19 named plaintiffs have asserted various claims, purportedly on behalf of a class of commercial insureds, against approximately 113 insurance companies and insurance brokers through which the named plaintiffs allegedly purchased insurance. The Amended Complaint alleges that the defendant insurance companies and insurance brokers conspired to manipulate bidding practices for insurance policies in certain insurance lines and failed to disclose certain commission arrangements. The named plaintiffs have asserted statutory claims under the Sherman Act, various state antitrust laws and the

Racketeer Influenced and Corrupt Organizations Act, as well as common law claims alleging breach of fiduciary duty, aiding and abetting a breach of fiduciary duty and unjust enrichment. Discovery has commenced. Answers or motions to dismiss the Amended Complaint must be filed by November 29, 2005.

The Company believes that the ultimate outcome of all outstanding litigation and arbitration will not have a material adverse effect on its consolidated financial condition, future operating results and/or liquidity, although an adverse resolution of a number of these items could have a material adverse effect on the Company's results of operations in a particular fiscal quarter or year.

Although not a litigation or arbitration, the Company has entered into a binding independent actuarial valuation process related to certain contractual agreements in the sale and purchase agreement, as amended (the "SPA"), relating to the Company's acquisition of Winterthur International in July 2001. This process is further described in Item 1, Note 12 to the Unaudited Consolidated Financial Statements and Item 2 and the Management's Discussion and Analysis of Financial Condition and Results of Operations. Based on submissions and meetings to date, the Company continues to expect that the independent actuary's final report will be issued in the fourth quarter of this year.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table provides information about purchases by the Company during the three months ended September 30, 2005 of equity securities that are registered by the Company pursuant to Section 12 of the Exchange Act:

ISSUER PURCHASES OF EQUITY SECURITIES

<u>Period</u>	<u>Total Number of Shares Purchased (1)</u>	<u>Average Price Paid per Share (2)</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (3)</u>
July 1-31, 2005	1,739	\$ 74.41	□	\$135.4 million
August 1-31, 2005	2,081	\$ 74.43	□	\$135.4 million
September 1-30, 2005	1,949	\$ 74.43	□	\$135.4 million
Total	5,769	\$ 74.42	□	\$135.4 million

- (1) All of the shares included in each period were purchased in connection with the vesting of restricted shares granted under the Company's restricted stock plan. All of these purchases were made in connection with satisfying tax withholding obligations of those employees. These shares were not purchased as part of the Company's publicly announced share repurchase program.
- (2) The price paid per share is the closing price of the shares on the vesting date.
- (3) On January 9, 2000, the Board of Directors previously authorized a \$500.0 million share repurchase program. The Company did not repurchase any equity securities under the share repurchase program during the three or nine months ended September 30, 2005. As of September 30, 2005, the Company may repurchase up to approximately \$135.4 million of its equity securities under the share repurchase program.

ITEM 6. EXHIBITS

10.1 First Amendment to the Employment Agreement, dated as of January 1, 2005, between XL Capital Ltd and Paul S. Giordano, incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K filed on September 14, 2005.

10.2

Edgar Filing: XL CAPITAL LTD - Form 10-Q

Master Standby Letter of Credit and Reimbursement Agreement, dated as of September 30, 2005, by and among XL Capital Ltd, X.L. America, Inc., XL Insurance (Bermuda) Ltd and XL Re Ltd, as Account Parties, and National Australia Bank Limited, New York Branch, incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K filed on October 5, 2005.

- 31 Rule 13a-14(a)/15d-14(a) Certifications.
- 32 Section 1350 Certification.
- 99.1 XL Capital Assurance Inc. and Subsidiary condensed consolidated financial statements (unaudited) for the three and nine month periods ended September 30, 2005 and 2004.
- 99.2 XL Financial Assurance Ltd. condensed financial statements (unaudited) for the three and nine month periods ended September 30, 2005 and 2004.
