(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2009

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 0-13649

BERKSHIRE BANCORP INC.

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of
Incorporation or Organization)

160 Broadway, New York, New York

(Address of Principal Executive Offices)

94-2563513

(I.R.S. Employer
Identification No.)

10038

(Zip Code)

Registrant's Telephone Number, Including Area Code: (212) 791-5362

N/A

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. (See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.) (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 5, 2009, there were 7,054,183 outstanding shares of the issuer's Common Stock, \$.10 par value.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES

FORWARD-LOOKING STATEMENTS

Forward-Looking Statements. *Statements in this Quarterly Report on Form 10-Q that are not based on historical fact may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as believe, may, will, expect, estimate, anticipate, continue or similar terms identify forward-looking statements. A wide variety of factors could cause the actual results and experiences of Berkshire Bancorp Inc. (the Company) to differ materially from the results expressed or implied by the Company's forward-looking statements. Some of the risks and uncertainties that may affect operations, performance, results of the Company's business, the interest rate sensitivity of its assets and liabilities, and the adequacy of its loan loss allowance, include, but are not limited to: (i) deterioration in local, regional, national or global economic conditions which could result, among other things, in an increase in loan delinquencies, a decrease in property values, or a change in the housing turnover rate; (ii) changes in market interest rates or changes in the speed at which market interest rates change; (iii) changes in laws and regulations affecting the financial services industry; (iv) changes in competition; (v) changes in consumer preferences, (vi) changes in banking technology; (vii) ability to maintain key members of management, (viii) possible disruptions in the Company's operations at its banking facilities, (ix) cost of compliance with new corporate governance requirements, and other factors referred to in this Quarterly Report and in Item 1A, Risk Factors, of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.*

Certain information customarily disclosed by financial institutions, such as estimates of interest rate sensitivity and the adequacy of the loan loss allowance, are inherently forward-looking statements because, by their nature, they represent attempts to estimate what will occur in the future.

The Company cautions readers not to place undue reliance upon any forward-looking statement contained in this Quarterly Report. Forward-looking statements speak only as of the date they were made and the Company assumes no obligation to update or revise any such statements upon any change in applicable circumstances.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements
March 31, 2009 and 2008

NOTE 1. General

Berkshire Bancorp Inc., a Delaware corporation, is a bank holding company registered under the Bank Holding Company Act of 1956. References herein to Berkshire, the Company or we and similar pronouns, shall be deemed to refer to Berkshire Bancorp Inc. and its consolidated subsidiaries unless the context otherwise requires. Berkshire's principal activity is the ownership and management of its indirect wholly-owned subsidiary, The Berkshire Bank (the Bank), a New York State chartered commercial bank. The Bank is owned through Berkshire's wholly-owned subsidiary, Greater American Finance Group, Inc. (GAFG).

The accompanying financial statements of Berkshire Bancorp Inc. and subsidiaries includes the accounts of the parent company, Berkshire Bancorp Inc., and its wholly-owned subsidiaries: The Berkshire Bank, GAFG and East 39, LLC.

We have prepared the accompanying financial statements pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC) for interim financial reporting. These consolidated financial statements are unaudited and, in our opinion, include all adjustments, consisting of normal recurring adjustments and accruals necessary for a fair presentation of our consolidated balance sheets, operating results, and cash flows for the periods presented. Operating results for the periods presented are not necessarily indicative of the results that may be expected for the remaining quarters of fiscal 2009 due to a variety of factors. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States (GAAP) have been omitted in accordance with the rules and regulations of the SEC. These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes included in our 2008 Annual Report on Form 10-K.

NOTE 2. Trust Preferred Securities.

As of May 18 2004, the Company established Berkshire Capital Trust I, a Delaware statutory trust, (BCTI). The Company owns all the common capital securities of BCTI. BCTI issued \$15.0 million of preferred capital securities to investors in a private transaction and invested the proceeds, combined with the proceeds from the sale of BCTI's common capital securities, in the Company through the purchase of \$15.464 million aggregate principal amount of Floating Rate Junior Subordinated Debentures (the 2004 Debentures) issued by the Company. The 2004 Debentures, the sole assets of BCTI, mature on July 23, 2034 and bear interest at a floating rate, three month LIBOR plus 2.70%, currently 3.825%.

On April 1, 2005, the Company established Berkshire Capital Trust II, a Delaware statutory trust, (BCTII). The Company owns all the common capital securities of BCTII. BCTII issued \$7.0 million of preferred capital securities to investors in a private transaction and invested the proceeds, combined with the proceeds from the sale of BCTII's common capital securities, in the Company through the purchase of \$7.217 million aggregate principal amount of Floating Rate Junior Subordinated Debentures (the 2005 Debentures) issued by the Company. The 2005 Debentures, the sole assets of BCTII, mature on May 23, 2035 and bear interest at a floating rate, three month LIBOR plus 1.95%, currently 3.20%.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 2. - (continued)

Based on current interpretations of the banking regulators, the 2004 Debentures and 2005 Debentures (collectively, the Debentures) qualify under the risk-based capital guidelines of the Federal Reserve as Tier 1 capital, subject to certain limitations. The Debentures are callable by the Company, subject to any required regulatory approvals, at par, in whole or in part, at any time after five years from the date of issuance. The Company's obligations under the Debentures and related documents, taken together, constitute a full, irrevocable and unconditional guarantee on a subordinated basis by the Company of the obligations of BCTI and BCTII under the preferred capital securities sold by BCTI and BCTII to investors. FIN46(R) precludes consideration of the call option embedded in the preferred capital securities when determining if the Company has the right to a majority of BCTI and BCTII expected residual returns. Accordingly, BCTI and BCTII are not included in the consolidated balance sheet of the Company.

The Federal Reserve has issued guidance on the regulatory capital treatment for the trust-preferred securities issued by BCTI and BCTII. This rule would retain the current maximum percentage of total capital permitted for Trust Preferred Securities at 25%, but would enact other changes to the rules governing Trust Preferred Securities that affect their use as part of the collection of entities known as restricted core capital elements. The rule was to become effective on March 31, 2009, however, on March 23, 2009 the Federal Reserve adopted a rule extending the compliance date for tighter limits to March 31, 2011 in light of the current stressful financial conditions. Management has evaluated the effects of this rule and does not anticipate a material impact on its capital ratios when the proposed rule is finalized.

Series A Preferred Stock. On October 31, 2008, the Company sold an aggregate of 60,000 shares of its 8% Non-Cumulative Mandatorily Convertible Perpetual Series A Preferred Stock (the Series A Preferred Shares) at \$1,000 per share, or \$60 million in the aggregate, to the Company's Chairman of the Board and majority stockholder, and two non-affiliated investors. Each Series A Preferred Share bears non-cumulative cash dividends at the rate of 8% per annum, payable quarterly, is mandatorily convertible into 123.153 shares of our Common Stock on October 31, 2011, unless previously redeemed, and is redeemable at the option of the Company between April 30, 2009 and November 1, 2010 at a redemption price of \$1,100. So long as any share of Series A Preferred Shares remains outstanding, unless the full dividends for the most recent dividend payment date have been paid or declared, no dividends may be paid or declared on the Company's Common Stock. For the quarter ended March 31, 2009, we declared and paid cash dividends on the Series A Preferred Shares totalling \$1.2 million.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 3. Earnings Per Common Share

Basic earnings per common share is calculated by dividing income available to common stockholders by the weighted average common stock outstanding, excluding stock options from the calculation. In calculating diluted earnings per share, the dilutive effect of stock options is calculated using the average market price for the Company's common stock during the period. The following table presents the Company's calculation of earnings per common share for the periods indicated:

	For The Three Months Ended					
	March 31, 2009			March 31, 2008		
	Income (numerator)	Shares (denominator)	Per share amount	Income (numerator)	Shares (denominator)	Per share amount
	(In thousands, except per share data)					
Basic earnings per share						
Net income	\$ 1,069			\$ 2,649		
Dividends paid to preferred shareholders	(1,200)					
Net income (loss) available to common stockholders	(131)	7,054	\$ (.02)	2,649	7,054	\$.38
Effect of dilutive securities options			.		1	.
Diluted earnings per share						
Net income (loss) available to common stockholders plus assumed conversions	\$		\$	\$ 2,649	7,055	\$.38

Options to purchase 2,076 common shares at a weighted average exercise price of \$8.29 were not included in the diluted earnings per common shares as of March 31, 2009 as these options are anti-dilutive.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 4. Loan Portfolio

The following table sets forth information concerning the Company's loan portfolio by type of loan at the dates indicated:

	March 31, 2009		December 31, 2008	
	Amount	% of Total	Amount	% of Total
(Dollars in thousands)				
Commercial and professional loans	\$ 62,638	13.8%	\$ 68,418	14.6%
Secured by real estate				
1-4 family	137,636	30.3	140,150	30.0

Non-residential (commercial)	250,412	55.0	254,831	54.4
Consumer	418	0.1	460	0.1
Total loans	454,986	100.0%	467,890	100.0%
Deferred loan fees	(1,047)		(1,137)	
Allowance for loan losses	(9,357)		(9,204)	
Loans, net	\$ 444,582		\$ 457,549	

As of March 31, 2009, nonaccrual loans totalled \$312,000 compared to \$130,000 as of December 31, 2008. At March 31, 2009 and December 31, 2008, total loans contractually past due 90 days or more but still accruing interest were zero and \$99,000, respectively.

NOTE 5. Deposits

The following table summarizes the composition of the average balances of major deposit categories:

	Three Months Ended March 31, 2009		Twelve Months Ended December 31, 2008	
	Average Amount	Average Yield	Average Amount	Average Yield
(Dollars in thousands)				
Demand deposits	\$ 53,844		\$ 54,452	
NOW and money market	22,908	0.39%	39,849	1.58%
Savings deposits	181,607	1.52	247,923	2.84
Time deposits	435,326	3.03	456,803	3.79
Total deposits	\$ 693,685	2.31%	\$ 799,027	3.13%

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 6. Comprehensive Income (Loss)

The Company follows the provisions of Statement of Financial Accounting Standards (SFAS) No. 130, *Reporting Comprehensive Income* (SFAS No. 130) which includes net income as well as certain other items which result in a change to equity during the period. The following table presents the components of comprehensive income, based on the provisions of SFAS No. 130:

	For The Three Months Ended					
	March 31, 2009			March 31, 2008		
	Before tax amount	Tax (expense) benefit	Net of tax Amount	Before tax amount	Tax (expense) benefit	Net of tax amount
	(In thousands)					
Unrealized (losses) gains on investment securities:						
Unrealized holding (losses) arising during period	\$ (10,708)	\$ 4,283	\$ (6,425)	\$ (15,893)	\$ 6,357	\$ (9,536)
Less reclassification adjustment for gains (losses) realized in net income	(950)	380	(570)	58	(23)	35
Unrealized loss on investment securities	(11,658)	4,663	(6,995)	(15,835)	6,334	(9,501)
Change in minimum pension liability	15		15	15		15
Other comprehensive loss, net	\$ (11,643)	\$ 4,663	\$ (6,980)	\$ (15,820)	\$ 6,334	\$ (9,486)

NOTE 7. Accounting For Stock Based Compensation

At March 31, 2008, the Company had one stock-based employee compensation plan. The Company accounts for the plan in accordance with SFAS No. 123(R), *Share Based Payment* . Under the fair value recognition provisions of SFAS 123R, share-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the vesting period. Determining the fair value of share-based awards at the grant date requires judgement, including estimating the Company's stock price volatility, employee stock option exercise behaviors and employee option forfeiture rates.

The Company did not grant stock options, nor did any stock options vest during the three-month periods ended March 31, 2009 and 2008, as a result of which, no stock based compensation expense was recorded in either of those periods.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 8. Employee Benefit Plans

The Company has a Retirement Income Plan (the Plan), a noncontributory defined benefit plan covering substantially all full-time, non-union United States employees of the Company. The following interim-period information is being provided in accordance with the Financial Accounting Standards Board (FASB) Statement 132(R) (FASB 132(R)) based upon the most recent actuarial valuation dated December 31, 2008.

	For The Three Months Ended March 31,	
	2009	2008
Service cost	\$ 103,250	\$ 105,250
Interest cost	64,250	54,750
Expected return on plan assets	(70,500)	(62,250)
Amortization and Deferral:		
Prior service cost	4,500	4,500
Loss	36,500	10,750
	\$ 138,000	\$ 113,000
Net periodic pension cost		

The Pension Protection Act of 2006 (the PPA) changes the funding rules for defined benefit pension plans, beginning in 2008. A key element of the PPA is the introduction of benefit restrictions on plans that are funded below 80% of the plan's target liabilities. In order to avoid these restrictions, during the fiscal year ending December 31, 2009, we expect that the minimum contribution to the Plan will be approximately \$1.43 million. During the three months ended March 31, 2009 and March 31, 2008, we contributed approximately \$1.10 million and \$578,000, respectively, to the Plan.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 9. Fair Value Measurements

The Company accounts for fair value utilizing the provisions of SFAS No. 157, *Fair Value Measurements*. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosure about fair value. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date. SFAS 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value. A financial instrument's level within the fair value hierarchy is based on the lowest level of input significant to the fair value measurement. There have been no material changes in valuation techniques as a result of the adoption of SFAS No. 157.

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 - Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities in active markets; quoted prices in markets that are not active for identical or similar assets or liabilities; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and significant to the fair value of the assets or liabilities that are developed using the reporting entities' estimates and assumptions, which reflect those that market participants would use.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

A description of the valuation methodologies used for financial instruments measured at fair value on a recurring basis, as well as the classification of the instruments pursuant to the valuation hierarchy, are as follows:

Securities Available for Sale

Securities classified as available for sale are reported using Level 1, Level 2 or Level 3 inputs. Level 1 securities generally include equity securities valued based on quoted market prices in active markets. Level 2 instruments include U.S. government agency obligations, state and municipal bonds, mortgage-backed securities, collateralized mortgage obligations and corporate bonds. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. Level 3 available for sale securities consist of instruments that are not readily marketable and may only be redeemed with the issuer at par such as Federal Home Loan Bank and Federal Reserve Bank stock. For these securities, fair value is deemed to approximate the carrying value.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 9. - (continued)

Assets measured at fair value on a recurring basis are summarized below.

	Fair Value Measurement Using			Balance March 31, 2009
	Quoted Prices in Active Markets for Identical Assets/Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
(Dollars in thousands)				
Assets				
Investment securities available for sale	\$ 24,450	\$ 235,620	\$ 45,804	\$ 305,874
Total assets	\$ 24,450	\$ 235,620	\$ 45,804	\$ 305,874

The above table includes \$44.46 million in net unrealized losses on the Company's available for sale securities. Approximately \$23.52 million of these net unrealized losses are on corporate notes. The Company has reviewed its investment portfolio at March 31, 2009, and has determined that the unrealized losses are temporary. Such determination was based upon an evaluation of the creditworthiness of the issuers and/or guarantors, the underlying collateral, if applicable, as well as the continuing performance of the securities. Management also evaluates other facts and circumstances that may be indicative of an other-than-temporary impairment condition. This includes, but is not limited to, an evaluation of the type of security and length of time and extent to which the fair value has been less than cost, as well as certain collateral related characteristics. In addition, management considers the Company's ability to hold such securities to maturity, if necessary, thereby recovering its investment.

During the quarter ended March 31, 2009, the Company recorded an other-than-temporary impairment charge of \$1.025 million as a result of a downgrade on a certain corporate bond.

The fair value of the derivative is approximately \$24,000 and valued as a Level 3 input. Further disclosures are waived due to materiality.

	<u> </u>
Balance, March 31, 2009	<u>\$ 45,804</u>

The amount of total gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets still held at March 31, 2009

\$

NOTE 10. New Accounting Pronouncements**Accounting For Business Combinations**

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 141R (revised 2007), *Business Combinations* . This statement replaces SFAS No. 141, Business Combinations, but retains the fundamental requirements in SFAS No. 141 that the acquisition method of accounting be used for all business combinations and for an acquirer to be identified for each business combination. This statement defines the acquirer as the entity that obtains control of one or more businesses in the business combination and establishes the acquisition date as the date that the acquirer achieves control. This statement requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values as of that date, with limited exceptions. This statement also requires that costs incurred to complete the acquisition, including restructuring costs, are to be recognized separately from the acquisition. This statement also requires an acquirer to recognize assets or liabilities arising from all other contingencies as of the acquisition date, measured at their acquisition-date fair values, only if they meet the definition of asset or liability in FASB Concepts Statement No. 6, Elements of Financial Statements. This statement also provides specific guidance on the subsequent accounting for assets and liabilities arising from contingencies acquired or assumed in a business combination. SFAS No. 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Early adoption was not permitted. The adoption of SFAS No. 141R did not have a material effect on the Company's results of operations or financial condition.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 10. - (continued)

Accounting For Noncontrolling Interests In Consolidated Financial Statements

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, an amendment of ARB No. 51. This statement requires that ownership interests in subsidiaries held by parties other than the parent company be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent's equity. This statement also requires the amount of consolidated net income attributable to the parent company and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Early adoption was not permitted. The adoption of SFAS No. 160 did not have a material effect on the Company's results of operations or financial condition.

Accounting For Derivative Instruments and Hedging Activities

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, an amendment of FASB Statement No. 133. The statement requires enhanced disclosures about an entity's derivative and hedging activities, including information about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. The Statement is effective for all financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with earlier adoption permitted. Adoption of SFAS No. 161 did not have a material impact on the Company's results of operations or financial condition.

Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities

In June 2008, the FASB issued FASB Staff Position (FSP) Emerging Issues Task Force (EITF) 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. This FSP addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share (EPS) under the two-class method described in SFAS No. 128, Earnings per Share. The FSP concluded that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and shall be included in the computations of EPS pursuant to the two-class method. Our restricted stock awards are considered participating securities under this FSP. This FSP is effective for fiscal years beginning after December 15, 2008, and interim periods within those years. All prior-period EPS data presented shall be adjusted retrospectively to conform with the provisions of this FSP. Early application is not permitted. Adoption of this FSP did not have a material impact on our computation of EPS.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 10. - (continued)

Determining The Fair Value Of A Financial Asset When The Market For That Asset Is Not Active

In October 2008, the FASB issued FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*. This FSP applies to financial assets within the scope of accounting pronouncements that require or permit fair value measurements in accordance with SFAS No. 157. The FSP clarifies the application of SFAS No. 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. The FSP permits, in determining fair value for a financial asset in a dislocated market, the use of a reporting entity's own assumptions about future cash flows and appropriately risk-adjusted discount rates is acceptable when relevant observable inputs are not available. This FSP was effective upon issuance. Adoption of this FSP did not have a material impact on the Company's results of operations or financial condition.

Employer's Disclosures about Postretirement Benefit Plan Assets

In December 2008, the FASB issued FSP FAS 132(R)-1, *Employer's Disclosures about Postretirement Benefit Plan Assets*. This FSP amends SFAS No. 132 (revised 2003), *Employer's Disclosures about Pensions and Other Postretirement Benefits*. The FSP provides guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The FSP clarifies that the objectives of the disclosures about plan assets in an employer's defined benefit pension or other postretirement plan are to provide users of financial statements with an understanding of: (1) how investment allocation decisions are made, including the factors that are pertinent to an understanding of investment policies and strategies; (2) the categories of plan assets; (3) the inputs and valuation techniques used to measure the fair value of plan assets; (4) the effect of fair value measurements using significant unobservable inputs (Level 3) on changes in plan assets for the period; and (5) significant concentrations of risk within plan assets. The FSP also expands the disclosures related to these objectives. The disclosures about plan assets required by this FSP are effective for fiscal years ending after December 15, 2009. Upon initial application, the provisions of this FSP are not required for earlier periods that are presented for comparative purposes, although application of the provisions of the FSP to prior periods is permitted. Early adoption is not permitted.

Amendments to the Impairment Guidance of EITF Issue No. 99-20

In January 2009, the FASB issued FSP EITF 99-20-1, *Amendments to the Impairment Guidance of EITF Issue No. 99-20*. This FSP amended EITF Issue No. 99-20 to align the impairment guidance in Issue 99-20 with that in paragraph 16 of SFAS No. 115 and related implementation guidance. The FSP was effective for reporting periods ending after December 15, 2008, and is applied prospectively. Adoption of FSP EITF 99-20-1 did not have a material impact on the Company's results of operations or financial condition.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 10. - (continued)

Recognition and Presentation of Other-Than-Temporary Impairments

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. The FSP amends the other-than-temporary impairment guidance in GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in financial statements. The FSP replaces the existing requirement that an entity's management assert it has both the intent and ability to hold an impaired security until recovery with a requirement that management assert that it does not have the intent to sell the security and it is more likely than not it will not have to sell the security before recovery of its cost basis. The FSP requires an entity to recognize impairment losses on a debt security attributed to credit in income, and to recognize noncredit impairment losses in accumulated other comprehensive income. This requirement applies to debt securities held to maturity as well as debt securities held as available for sale. Upon adoption of this FSP, an entity will be required to record a cumulative-effect adjustment as of the beginning of the period of adoption to reclassify the noncredit component of a previously recognized other-than-temporary impairment from retained earnings to accumulated other comprehensive income if the entity does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery. The FSP is effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. We are in the process of completing our evaluation of the impact of this FSP on our results of operations and financial condition, and are therefore, at this time, unable to determine its effect.

Determining Fair Value When The Volume And Level of Activity For The Asset Or Liability Have Significantly Decreased And Identifying Transactions That Are Not Orderly

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. The FSP provides additional guidance for estimating fair value in accordance with SFAS No. 157, Fair Value Measurements, when the volume and level of activity for the asset or liability have significantly decreased when compared with normal market activity for the asset or liability (or similar assets and liabilities). The FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. The FSP also requires disclosure in interim and annual periods of the inputs and valuation technique(s) used to measure fair value and a discussion of changes in valuation techniques and related inputs, if any, during the period. The FSP is effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. We are in the process of completing our evaluation of the impact of this FSP on our results of operations and financial condition, and are therefore, at this time, unable to determine its effect.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)

NOTE 10. - (continued)

Interim Disclosures About Fair Value Of Financial Instruments

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*. The FSP amends SFAS No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. The FSP is effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. An entity may early adopt this FSP only if it also elects to early adopt FSP FAS 115-2 and FAS 124-2, and FSP FAS 157-4.

NOTE 11. Subsequent Event

On May 7, 2009, in connection with the Bank's most recent examination by the Federal Deposit Insurance Corporation (the FDIC) the Bank received a Joint Memorandum of Understanding (the MOU) from the FDIC and the New York State Banking Department (the NYSBD), which the Bank's board authorized the bank to execute. The MOU, when effective, will set forth an informal understanding among the Bank, the FDIC and the NYSBD addressing asset quality, loan review, underwriting and administration and certain other concerns identified in the examination. The Bank's board has appointed a committee comprised of three directors to monitor the Bank's compliance. We do not believe that compliance with the MOU will have a material adverse effect on our results of operations or financial condition. As set forth in Management's Discussion and Analysis of Financial Condition And Results of Operations - Capital Adequacy, the Bank is well capitalized for regulatory purposes as of March 31, 2009.

Internal Control Over Financial Reporting

The objective of the Company's Internal Control Program is to allow the Bank and management to comply with Part 363 of the FDIC's regulations (FDICIA) and to allow the Company to comply with Section 302 of the Sarbanes-Oxley Act of 2002 (the Act).

Section 302 of the Act requires the CEOs and CFOs of the Company to (i) certify that the annual and quarterly reports filed with the SEC are accurate and (ii) acknowledge that they are responsible for establishing, maintaining and periodically evaluating the effectiveness of the disclosure controls and procedures. Section 404 of the Act requires management to (i) report on internal control over financial reporting, (ii) assess the effectiveness of such internal controls, and, in a later phase of the effectiveness of Section 404, (iii) obtain an external auditor's report on management's assessment of its internal control. The Company is not an accelerated filer as defined in Rule 12b-2 of the Securities Exchange Act of 1934. Therefore, the Company was first required to comply with Section 404 for the fiscal year ended December 31, 2007.

The Committee of Sponsoring Organizations (COSO) methodology may be used to document and test the internal controls pertaining to the accuracy of Company issued financial statements and related disclosures. COSO requires a review of the control environment (including anti-fraud and audit committee effectiveness), risk assessment, control activities, information and communication, and ongoing monitoring.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis is intended to provide a better understanding of the consolidated financial condition and results of operations of Berkshire Bancorp Inc., a Delaware corporation, and its subsidiaries. All references to earnings per share, unless stated otherwise, refer to earnings per diluted share. References to Notes herein are references to the Notes to Consolidated Financial Statements of the Company located in Item 1 herein.

Critical Accounting Policies, Judgments and Estimates

The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States of America (US GAAP) and general practices within the financial services industry. The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

The Company considers that the determination of the allowance for loan losses involves a higher degree of judgment and complexity than any of its other significant accounting policies. The allowance for loan losses is calculated with the objective of maintaining a reserve level believed by management to be sufficient to absorb estimated credit losses. Management's determination of the adequacy of the allowance is based on periodic evaluations of the loan portfolio and other relevant factors. However, this evaluation is inherently subjective as it requires material estimates, including, among others, expected default probabilities, loss given default, the amounts and timing of expected future cash flows on impaired loans, mortgages, and general amounts for historical loss experience. The process also considers economic conditions, uncertainties in estimating losses and inherent risks in the loan portfolio. All of these factors may be susceptible to significant change. To the extent actual outcomes differ from management estimates, additional provisions for loan losses may be required that would adversely impact earnings in future periods.

With the adoption of Statement of Financial Accounting Standards (SFAS) No. 142 *Goodwill and Other Intangible Assets* (SFAS No. 142) on January 1, 2002, the Company discontinued the amortization of goodwill resulting from acquisitions. Goodwill is now subject to impairment testing at least annually to determine whether write-downs of the recorded balances are necessary. The Company tests for impairment based on the goodwill maintained at the Bank. A fair value is determined for each reporting unit based on at least one of three various market valuation methodologies. If the fair values of the reporting units exceed their book values, no write-down of recorded goodwill is necessary. If the fair value of the reporting unit is less, an expense may be required on the Company's books to write down the related goodwill to the proper carrying value. As of December 31, 2008, the goodwill was evaluated for impairment with no recognition of impairment considered necessary. For the three months ended March 31, 2009, management determined that there were no additional impairment indicators since the goodwill was evaluated as of December 31, 2008.

The Company recognizes deferred tax assets and liabilities for the future tax effects of temporary differences, net operating loss carryforwards and tax credits. Deferred tax assets are subject to management's judgment based upon available evidence that future realization is more likely than not. If management determines that the Company may be unable to realize all or part of net deferred tax assets in the future, a direct charge to income tax expense may be required to reduce the recorded value of the net deferred tax asset to the expected realizable amount.

The Company conducts a periodic review and evaluation of its securities portfolio, taking into account the severity and duration of each unrealized loss, as well as management's intent and ability to hold the security until the unrealized loss is substantially eliminated, in order to determine if a decline in market value of any security below its carrying value is either temporary or other than temporary. Unrealized losses on held-to-maturity securities that are deemed temporary are disclosed but not recognized. Unrealized losses on debt or equity securities available-for-sale that are deemed temporary are excluded from net income and reported net of deferred taxes as other comprehensive income or loss. All unrealized losses that are deemed other than temporary on either available-for-sale or held-to-maturity securities are recognized immediately as a reduction of the carrying amount of the security, with a charge recorded in the Company's consolidated statements of income.

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

The following table presents the total dollar amount of interest income from average interest-earning assets and the resultant yields, as well as the interest expense on average interest-bearing liabilities, expressed in both dollars and rates.

For The Three Months Ended March 31,

	2009			2008		
	Average Balance	Interest and Dividends	Average Yield/Rate	Average Balance	Interest and Dividends	Average Yield/Rate
(Dollars in Thousands)						
INTEREST-EARNING ASSETS:						
Loans (1)	\$ 458,820	\$ 7,771	6.77%	\$ 447,020	\$ 8,205	7.34%
Investment securities	302,347	4,403	5.83	557,554	7,867	5.64

Stockholders' equity (5)	66,555			125,160		
Total liabilities and stockholders' equity	\$ 893,903			\$ 1,075,098		
Net interest income		\$ 7,077			\$ 7,163	
Interest-rate spread (3)			3.19%			2.20%
Net interest margin (4)			3.41%			2.78%
Ratio of average interest-earning assets to average interest bearing liabilities	1.09			1.16		

(1) Includes nonaccrual loans.

- (2) Includes interest-bearing deposits, federal funds sold and securities purchased under agreements to resell.
- (3) Interest-rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest bearing liabilities.
- (4) Net interest margin is net interest income as a percentage of average interest-earning assets.
- (5) Average balances are daily average balances except for the parent company which have been calculated on a monthly basis.

Results of Operations

Results of Operations for the Three Months Ended March 31, 2009 Compared to the Three Months Ended March 31, 2008.

General. Berkshire Bancorp Inc., a bank holding company registered under the Bank Holding Company Act of 1956, has one indirect wholly-owned banking subsidiary, The Berkshire Bank, a New York State chartered commercial bank. The Bank is headquartered in Manhattan and has twelve branch locations; seven branches in New York City, four branches in Orange and Sullivan counties New York, and one branch in Ridgefield, New Jersey.

Net Income (Loss) Allocated to Common Stockholders. Net loss for the three-month period ended March 31, 2009 was \$131,000, or \$.02 per common share, compared to net income of \$2.65 million, or \$.38 per common share, for the three-month period ended March 31, 2008. The net loss recorded for the three-month period ended March 31, 2009 includes other than temporary impairment charges on securities of \$1.025 million, or \$.14 per common share, and dividends on our Series A Preferred Stock of \$1.20 million, or \$.17 per common share.

The Company's net income is largely dependent on interest rate levels, the demand for the Company's loan and deposit products and the strategies employed to manage the interest rate and other risks inherent in the banking business.

Net Interest Income. The Company's primary source of revenue is net interest income, or the difference between interest income earned on earning assets, such as loans and investment securities, and interest expense on interest-bearing liabilities such as deposits and borrowings. The amount of interest income is dependent upon many factors including: (i) the amount of interest-earning assets that the Company can maintain based upon its funding sources; (ii) the relative amounts of interest-earning assets versus interest-bearing liabilities; and (iii) the difference between the yields earned on those assets and the rates paid on those liabilities. Non-performing loans adversely affect net interest income because they must still be funded by interest-bearing liabilities, but they do not provide interest income. Furthermore, when we designate an asset as non-performing, all interest which has been accrued but not actually received is deducted from current period income, further reducing net interest income.

For the quarter ended March 31, 2009, net interest income decreased by approximately \$86,000 to \$7.08 million from \$7.16 million for the quarter ended March 31, 2008. The decrease in net interest income was primarily due to the \$200.92 million decrease in the average amounts of interest-earning assets to \$829.54 million in the 2009 quarter from \$1,030.46 million in the 2008 quarter. The decrease in net interest income was substantially offset by the \$121.65 million decrease in the average amounts of interest-bearing liabilities to \$763.41 million in 2009 from \$885.05 million in 2008 and by the 132 basis point decrease in the average rates paid on the average amounts of interest-bearing liabilities to 2.81% in the 2009 quarter from 4.13% in the 2008 quarter. The Company's interest-rate spread, the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities, increased by 99 basis points to 3.19% in the 2009 quarter from 2.20% in the 2008 quarter.

Net Interest Margin. Net interest margin, or annualized net interest income as a percentage of average interest-earning assets, increased by 63 basis points to 3.41% in the quarter ended March 31, 2009 from 2.78% in the quarter ended March 31, 2008. We seek to secure and retain customer deposits with competitive products and rates, while making strategic use of the prevailing interest rate environment to borrow funds at what we believe to be attractive rates. We invest such deposits and borrowed funds in a prudent mix of fixed and adjustable rate loans, investment securities and short-term interest-earning assets. The increase in net interest margin is primarily due to the increase in the average amount of

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

higher yielding loans as a percentage of our total mix of interest-earning assets. The average amount of loans in our portfolio increased by \$11.80 million to \$458.82 million in the quarter ended March 31, 2009 from \$447.02 million in the quarter ended March 31, 2008.

Interest Income. Total interest income for the quarter ended March 31, 2009 decreased by \$3.85 million to \$12.45 million from \$16.30 million for the quarter ended March 31, 2008. The decrease in total interest income was primarily due to the decrease in the average amounts of interest-earning assets as discussed above.

The following table presents the composition of interest income for the indicated periods.

	Three Months Ended March 31,			
	2009		2008	
	Interest Income	% of Total	Interest Income	% of Total
	(In thousands, except percentages)			
Loans	\$ 7,771	62.44%	\$ 8,205	50.35%
Investment Securities	4,403	35.38	7,867	48.28
Other	271	2.18	224	1.37
	\$ 12,445	100.00%	\$ 16,296	100.00%

Loans, which are inherently risky and therefore command a higher return than our portfolio of investment securities and other interest-earning assets, increased to 55.31% of our total amount of average interest-earning assets during the quarter ended March 31, 2009 from 43.38% during the quarter ended March 31, 2008. Investment securities represented 36.45% and 54.11% of total interest-earning assets in the 2009 quarter and the 2008 quarter, respectively. While we actively seek to originate new loans with qualified borrowers who meet the Bank's underwriting standards, our strategy has been to maintain those standards, sacrificing some current income to avoid possible large future losses in the loan portfolio.

At March 31, 2009, our portfolio of investment securities included approximately \$94.12 million at cost of auction rate securities and \$55.50 million of corporate notes for which an other than temporary impairment charge has not been recorded in our financial statements. The fair value of these securities, presently \$45.81 million and \$39.86 million, respectively, could be negatively impacted in the future. Were this to occur, we may be required to reflect a write down of certain of our securities in future periods as a charge to earnings if any of our securities are deemed to be other than temporarily impaired. Such impairment charge could be material to our results of operations.

We are currently negotiating a potential settlement of claims we asserted against the issuing financial institutions of the auction rate securities in our investment portfolio pursuant to the agreement these financial institutions have reached with the SEC and the Attorney General of the State of New York. The outcome of these negotiations and the amount we may recover in a settlement agreement, if any, is uncertain at this time.

As required by SFAS No. 115, securities are classified into three categories: trading, held-to-maturity and available-for-sale. Securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities and are reported at fair value with unrealized gains and losses included in trading account activities in the statement of income. Securities that the Bank has the positive intent and ability to hold to maturity are classified as held-to-maturity and reported at amortized cost. All other securities are classified as available-for-sale.

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

Available-for-sale securities are reported at fair value with unrealized gains and losses included, on an after-tax basis, as a separate component of net worth. The Bank does not have a trading securities portfolio and has no current plans to maintain such a portfolio in the future. The Bank generally classifies all newly purchased debt securities as available for sale in order to maintain the flexibility to sell those securities if the need arises. The Bank has a limited portfolio of securities classified as held to maturity, represented principally by securities purchased a number of years ago.

Federal Home Loan Bank Stock. The Bank owns stock of the FHLBNY which is necessary for it to be a member of the FHLBNY. Membership requires the purchase of stock equal to 1% of the Bank's residential mortgage loans or 5% of the outstanding borrowings, whichever is greater. The stock is redeemable at par, therefore, its cost is equivalent to its redemption value. The Bank's ability to redeem FHLBNY shares is dependent upon the redemption practices of the FHLBNY. At March 31, 2009, the FHLBNY neither placed restrictions on redemption of shares in excess of a member's required investment in stock, nor stated that it will cease paying dividends. The Bank did not consider this asset impaired at either March 31, 2009 or 2008.

Interest Expense. Total interest expense for the quarter ended March 31, 2009 decreased by \$3.77 million to \$5.37 million from \$9.13 million for the quarter ended March 31, 2008. The decrease in interest expense was due primarily to the decrease in the average amounts of interest-bearing liabilities, to \$763.41 million in the 2009 quarter from \$885.05 million in the 2008 quarter, and the decrease in the average rates paid on the average amounts of interest-bearing liabilities to 2.81% in the 2009 quarter from 4.13% in the 2008 quarter.

The following table presents the composition of interest expense for the indicated periods.

	Three Months Ended March 31,			
	2009		2008	
	Interest Expense	% of Total	Interest Expense	% of Total
	(In thousands, except percentages)			
Interest-Bearing Deposits	\$ 716	13.34%	\$ 2,649	29.00%
Time Deposits	3,301	61.49	5,084	55.67
Other Borrowings	1,351	25.17	1,400	15.33
Total Interest Expense	\$ 5,368	100.00%	\$ 9,133	100.00%

Non-Interest Income. Non-interest income consists primarily of realized gains on sales of marketable securities and service fee income. For the three months ended March 31, 2009, total non-interest income decreased by \$67,000 to \$399,000 from \$466,000 for the three months ended March 31, 2008. The decrease was primarily attributable to the decrease of \$33,000 in service charges on deposit accounts and the decrease of \$51,000 in other income.

Non-Interest Expense. Non-interest expense includes salaries and employee benefits, occupancy and equipment expenses, legal and professional fees and other operating expenses associated with the day-to-day operations of the Company. Total non-interest expense for the three months ended March 31, 2009, including the other than temporary impairment charges on securities of \$1.025 million, was \$5.68 million. Excluding the other than temporary impairment charges on securities, non-interest expense increased by \$745,000 to \$4.66 million from \$3.91 million for the three months ended March 31, 2008. The increase was primarily due to the \$577,000 increase in our FDIC assessment.

The following table presents the components of non-interest expense for the indicated periods.

	Three Months Ended March 31,			
	2009		2008	
	Non-Interest Expense	% of Total (In thousands, except percentages)	Non-Interest Expense	% of Total
Salaries and Employee Benefits	\$ 2,361	41.57%	\$ 2,399	61.36%
Net Occupancy Expense	506	8.91	538	13.76
Equipment Expense	99	1.74	95	2.43
FDIC Assessment	683	12.02	106	2.71
Data Processing Expense	94	1.65	111	2.84
Other than temporary impairment charges on securities	1,025	18.05		
Other	912	16.06	661	16.90
Total Non-Interest Expense	\$ 5,680	100.00%	\$ 3,910	100.00%

Provision for Income Tax. During the three-month periods ended March 31, 2009 and 2008, we recorded income tax expense of \$577,000 and \$920,000, respectively. The tax provisions for federal, state and local taxes recorded for the 2009 and 2008 periods represent effective tax rates of 35.05% and 25.78%, respectively. The increase in the effective tax rate in the 2009 period compared to the 2008 period is primarily due to the tax-free income earned on certain of the auction rate securities in our investment portfolio in 2008.

Issuer Purchases of Equity Securities

On May 15, 2003, The Company's Board of Directors authorized the purchase of up to an additional 450,000 shares of its Common Stock in the open market, from time to time, depending upon prevailing market conditions, thereby increasing the maximum number of shares which may be purchased by the Company from 1,950,000 shares of Common Stock to 2,400,000 shares of Common Stock. Since 1990 through March 31, 2009, the Company has purchased a total of 1,898,909 shares of its Common Stock. We did not repurchase shares of the Company's Common Stock during the first quarter of 2009. At March 31, 2009, there were 501,091 shares of Common Stock which may yet be purchased under our stock repurchase plan.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Interest Rate Risk. Fluctuations in market interest rates can have a material effect on the Bank's net interest income because the yields earned on loans and investments may not adjust to market rates of interest with the same frequency, or with the same speed, as the rates paid by the Bank on its deposits.

Most of the Bank's deposits are either interest-bearing demand deposits or short term certificates of deposit and other interest-bearing deposits with interest rates that fluctuate as market rates change. Management of the Bank seeks to reduce the risk of interest rate fluctuations by concentrating on loans and securities investments with either short terms to maturity or with adjustable rates or other features that cause yields to adjust based upon interest rate fluctuations. In addition, to cushion itself against the potential adverse effects of a substantial and sustained increase in market interest rates, the Bank has from time to time purchased off balance sheet interest rate cap contracts which generally provide that the Bank will be entitled to receive payments from the other party to the contract if interest rates exceed specified levels. These contracts, when written, are entered into with major financial institutions.

The Company seeks to maximize its net interest margin within an acceptable level of interest rate risk. Interest rate risk can be defined as the amount of the forecasted net interest income that may be gained or lost due to favorable or unfavorable movements in interest rates. Interest rate risk, or sensitivity, arises when the maturity or repricing characteristics of assets differ significantly from the maturity or repricing characteristics of liabilities.

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

In the banking industry, a traditional measure of interest rate sensitivity is known as gap analysis, which measures the cumulative differences between the amounts of assets and liabilities maturing or repricing at various time intervals. The following table sets forth the Company's interest rate repricing gaps for selected maturity periods:

Berkshire Bancorp Inc.
Interest Rate Sensitivity Gap at March 31, 2009
(in thousands, except for percentages)

	<u>3 Months or Less</u>	<u>3 Through 12 Months</u>	<u>1 Through 3 Years</u>	<u>Over 3 Years</u>	<u>Total</u>

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

- (1) Adjustable-rate loans are included in the period in which the interest rates are next scheduled to adjust rather than in the period in which the loans mature. Fixed-rate loans are scheduled according to their maturity dates.
- (2) Includes nonaccrual loans.
- (3) Investments are scheduled according to their respective repricing (variable rate loans) and maturity (fixed rate securities) dates.
- (4) Investments are stated at book value.
- (5) NOW accounts and savings accounts are regarded as readily accessible withdrawal accounts. The balances in such accounts have been allocated among maturity/repricing periods based upon The Berkshire Bank's historical experience. All other time accounts are scheduled according to their respective maturity dates.

Provision for Loan Losses. The allowance for loan losses is the estimated amount considered necessary to cover credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses that is charged against income. In determining the allowance for loan losses, management makes significant estimates and therefore has identified the allowance as a critical accounting policy. The methodology for determining the allowance for loan losses is considered a critical accounting policy by management due to the high degree of judgment involved, the subjectivity of the assumptions utilized, and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses.

The allowance for loan losses has been determined in accordance with US GAAP, principally SFAS No. 5, *Accounting for Contingencies* and SFAS No. 114, *Accounting by Creditors for Impairment of a Loan*, an amendment to FASB Statements No. 5 and 15, as amended. Under the above accounting principles, we are required to maintain an allowance for probable losses at the balance sheet date. We are responsible for the timely and periodic determination of the amount of the allowance required. Management believes that the allowance for loan losses is adequate to cover specifically identifiable losses, as well as estimated losses inherent in our portfolio for which certain losses are probable but not specifically identifiable.

Management performs a quarterly evaluation of the adequacy of the allowance for loan losses. The analysis of the allowance for loan losses has two components: specific and general allocations. Specific allocations are made for loans determined to be impaired. Impairment is measured by determining the present value of expected future cash flows or, as a practical expedient for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expenses. The Bank considers its investment in one-to-four family real estate loans and consumer loans to be smaller balance homogeneous loans and therefore excluded from separate identification for evaluation of impairment. These homogeneous loan groups are evaluated for impairment on a collective basis under SFAS No. 114.

The general allocation is determined by segregating the remaining loans by type of loan, risk weighting (if applicable) and payment history. Management also analyzes historical loss experience, delinquency trends, general economic conditions, geographic concentrations, and industry and peer comparisons. This analysis establishes factors that are applied to the loan segments to determine the amount of the general allocations. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revisions based upon changes in economic and real estate market conditions. Actual loan losses may be significantly more than the allowance for loan losses management has established which could have a material negative effect on the Company's financial results.

On a quarterly basis, the Bank's management committee reviews the current status of various loan assets in order to evaluate the adequacy of the allowance for loan losses. In this evaluation process, specific loans are analyzed to determine their potential risk of loss. This process includes all loans, concentrating on non-accrual and classified loans. Each non-accrual or classified loan is evaluated for potential loss exposure. Any shortfall results in a recommendation of a specific allowance if the likelihood of loss is evaluated as probable. To determine the adequacy of collateral on a particular loan, an estimate of the fair market value of the collateral is based on the most current appraised value available. This appraised value is then reduced to reflect estimated liquidation expenses.

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisal valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly impact the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable on the related loans. Based on the composition of our loan portfolio, management believes the primary risks are increases in interest rates, a decline in the economy, generally, and a decline in real estate market values in the New York metropolitan area. Any one or combination of these events may adversely affect our loan portfolio resulting in increased delinquencies, loan losses and future levels of loan loss provisions. Management believes the allowance for loan losses reflects the inherent credit risk in our portfolio, the level of our non-performing loans and our charge-off experience.

Although management believes that we have established and maintained the allowance for loan losses at adequate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. Although management uses what it believes is the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. In addition, the Federal Deposit Insurance Corporation, New York State Banking Department, and other regulatory bodies, as an integral part of their examination process, will periodically review our allowance for loan losses. Such agencies may require us to recognize adjustments to the allowance based on its judgments about information available to them at the time of their examination.

The following table sets forth information with respect to activity in the Company's allowance for loan losses during the periods indicated (in thousands, except percentages):

	Three Months Ended March 31,	
	2009	2008
Average loans outstanding	\$ 458,820	\$ 447,020
Allowance at beginning of period	9,204	4,183
Charge-offs:		
Commercial and other loans	102	1
Total loans charged-off	102	1
Recoveries:		
Commercial and other loans	105	66
Total loans recovered	105	66
Net recoveries	3	65
Provision for loan losses charged to operating expenses	150	150
Allowance at end of period	\$ 9,357	\$ 4,398
Ratio of net recoveries to average loans outstanding	0.00%	0.01%
Allowance as a percent of total loans	2.06%	0.98%
Total loans at end of period	\$ 454,986	\$ 446,797

Loan Portfolio.

Loan Portfolio Composition. The Company's loans consist primarily of mortgage loans secured by residential and non-residential properties as well as commercial loans which are either unsecured or secured by personal property collateral. Most of the Company's loans are either made to individuals or personally guaranteed by the principals of the business to which the loan is made. At March 31, 2009 and December 31, 2008, the Company had loans, net of unearned income, of \$453.94 million and \$466.75 million, respectively, and allowances for loan losses of \$9.36 million and \$9.20 million, respectively. From time to time, the Bank may originate residential mortgage loans, sell them on the secondary market, normally recognizing fee income in connection with the sale.

Interest rates on loans are affected by the demand for loans, the supply of money available for lending, credit risks, the rates offered by competitors and other conditions. These factors are in turn affected by, among other things, economic conditions, monetary policies of the federal government, and legislative tax policies.

In order to manage interest rate risk, the Bank focuses its efforts on loans with interest rates that adjust based upon changes in the prime rate or changes in United States Treasury or similar indices. Generally, credit risks on adjustable-rate loans are somewhat greater than on fixed-rate loans primarily because, as interest rates rise, so do borrowers' payments, increasing the potential for default. The Bank seeks to impose appropriate loan underwriting standards in order to protect against these and other credit related risks associated with its lending operations.

In addition to analyzing the income and assets of its borrowers when underwriting a loan, the Bank obtains independent appraisals on all material real estate in which the Bank takes a mortgage. The Bank generally obtains title insurance in order to protect against title defects on mortgaged property.

Commercial and Mortgage Loans. The Bank originates commercial mortgage loans secured by office buildings, retail establishments, multi-family residential real estate and other types of commercial property. Substantially all of the properties are located in the New York City metropolitan area.

The Bank generally makes commercial mortgage loans with loan to value ratios not to exceed 75% and with terms to maturity that do not exceed 15 years. Loans secured by commercial properties generally involve a greater degree of risk than one- to four-family residential mortgage loans. Because payments on such loans are often dependent on successful operation or management of the properties, repayment may be subject, to a greater extent, to adverse conditions in the real estate market or the economy. The Bank seeks to minimize these risks through its underwriting policies. The Bank evaluates the qualifications and financial condition of the borrower, including credit history, profitability and expertise, as well as the value and condition of the underlying property. The factors considered by the Bank include net operating income; the debt coverage ratio (the ratio of cash net income to debt service); and the loan to value ratio. When evaluating the borrower, the Bank considers the financial resources and income level of the borrower, the borrower's experience in owning or managing similar property and the Bank's lending experience with the borrower. The Bank's policy requires borrowers to present evidence of the ability to repay the loan without having to resort to the sale of the mortgaged property. The Bank also seeks to focus its commercial mortgage loans on loans to companies with operating businesses, rather than passive real estate investors.

Commercial Loans. The Bank makes commercial loans to businesses for inventory financing, working capital, machinery and equipment purchases, expansion, and other business purposes. These loans generally have higher yields than mortgages loans, with maturities of one year, after which the borrower's financial condition and the terms of the loan are re-evaluated. At March 31, 2009 and 2008, approximately \$62.64 million and \$67.28 million, respectively, or 15.06% and 16.97%, respectively, of the Company's total loan portfolio consisted of such loans.

Commercial loans tend to present greater risks than mortgage loans because the collateral, if any, tends to be rapidly depreciable, difficult to sell at full value and is often easier to conceal. In order to limit these risks, the Bank evaluates these loans based upon the borrower's ability to repay the loan from ongoing operations. The Bank considers the business history of the borrower and perceived stability of the business as important factors when considering applications for such loans. Occasionally, the borrower provides commercial or residential real estate collateral for such loans, in which case the value of the collateral may be a significant factor in the loan approval process.

Residential Mortgage Loans (1 to 4 family loans). The Bank makes residential mortgage loans secured by first liens on one-to-four family owner-occupied or rental residential real estate. At March 31, 2009 and 2008, approximately \$137.64 million and \$139.26 million, respectively, or 30.25% and 31.17%, respectively, of the Company's total loan portfolio consisted of such loans. The Bank offers both adjustable rate mortgages (ARMS) and fixed-rate mortgage loans. The relative proportion of fixed-rate loans versus ARMs originated by the Bank depends principally upon current customer preference, which is generally driven by economic and interest rate conditions and the pricing offered by the Bank's competitors. At March 31, 2009 and 2008, approximately 13.01% and 12.50%, respectively, of the Bank's residential one-to-four family owner-occupied first mortgage portfolio were ARMs and approximately 86.99% and 87.50%, respectively, were fixed-rate loans. The percentage represented by fixed-rate loans tends to increase during periods of low interest rates. The ARMs generally carry annual caps and life-of-loan ceilings, which limit interest rate adjustments.

The Bank's residential loan underwriting criteria are generally comparable to those required by the Federal National Mortgage Association (FNMA) and other major secondary market loan purchasers. Generally, ARM credit risks are somewhat greater than fixed-rate loans primarily because, as interest rates rise, the borrowers' payments rise, increasing the potential for default. The Bank's teaser rate ARMs (ARMs with low initial interest rates that are not based upon the index plus the margin for determining future rate adjustments) were underwritten based on the payment due at the fully-indexed rate.

In addition to verifying income and assets of borrowers, the Bank obtains independent appraisals on all residential first mortgage loans and title insurance is required at closing. Private mortgage insurance is required on all loans with a loan-to-value ratio in excess of 80% and the Bank requires real estate tax escrows on such loans. Real estate tax escrows are voluntary on residential mortgage loans with loan-to-value ratios of 80% or less.

Fixed-rate residential mortgage loans are generally originated by the Bank for terms of 15 to 30 years. Although 30 year fixed-rate mortgage loans may adversely affect our net interest income in periods of rising interest rates, the Bank originates such loans to satisfy customer demand. Such loans are generally originated at initial interest rates which exceed the fully indexed rate on ARMs offered at the same time. Fixed-rate residential mortgage loans originated by the Bank generally include due-on-sale clauses, which permit the Bank to demand payment in full if the borrower sells the property without the Bank's consent.

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

Due-on-sale clauses are an important means of adjusting the rates on the Bank's fixed-rate mortgage loan portfolio, and the Bank will generally exercise its rights under these clauses if necessary to maintain market yields.

ARMs originated in recent years have interest rates that adjust annually based upon the movement of the one year treasury bill constant maturity index, plus a margin of 2.00% to 2.75%. These loans generally have a maximum interest rate adjustment of 2% per year, with a lifetime maximum interest rate adjustment, measured from the initial interest rate, of 5.5% or 6.0%.

The Bank offers a variety of other loan products including residential single family construction loans to persons who intend to occupy the property upon completion of construction, home equity loans secured by junior mortgages on one-to-four family owner-occupied residences, and short-term fixed-rate consumer loans either unsecured or secured by monetary assets such as bank deposits and marketable securities or personal property. At March 31, 2009 and 2008, the Company's loan portfolio was comprised of \$254.71 million and \$240.26 million, respectively, or 55.98% and 53.17%, respectively, of other loan products.

Capital Adequacy

Quantitative measures established by regulations to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets, and of Tier I capital to average assets. Management believes that, as of March 31, 2009, the Bank meets all capital adequacy requirements to which it is subject.

As of March 31, 2009, the Bank met all regulatory requirements for classification as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier I risk-based and Tier I leverage ratios as set forth in the following table. There are no conditions or events since that date that management believes have changed the Bank's category.

The following table set forth the actual and required regulatory capital amounts and ratios of the Company and the Bank as of March 31, 2009. (dollars in thousands):

	Actual		For capital adequacy purposes		To be well capitalized under prompt corrective action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
March 31, 2009						
Total Capital (to Risk-Weighted Assets)						
Company	\$ 117,945	18.4%	\$ 51,291	≥8.0%		N/A
Bank	86,975	13.9%	50,073	≥8.0%	\$ 61,719	≥10.0%
Tier I Capital (to Risk-Weighted Assets)						
Company	108,588	16.9%	25,645	≥4.0%		N/A
Bank	79,130	12.6%	25,036	≥4.0%	37,031	≥6.0%
Tier I Capital (to Average Assets)						
Company	108,588	12.2%	35,756	≥4.0%		N/A
Bank	79,130	9.3%	34,194	≥4.0%	42,743	≥5.0%

Liquidity

The management of the Company's liquidity focuses on ensuring that sufficient funds are available to meet loan funding commitments, withdrawals from deposit accounts, the repayment of borrowed funds, and ensuring that the Bank and the Company comply with regulatory liquidity requirements. Liquidity needs of the Bank have historically been met by deposits, investments in federal funds sold, principal and interest payments on loans, and maturities of investment securities.

At March 31, 2009, our portfolio of investment securities included approximately \$94.12 million at cost of auction rate securities for which an other than temporary impairment (OTTI) charge has not been recorded in our financial statements. Auction rate securities are generally long-term debt instruments that provide liquidity through a Dutch auction process that resets the applicable interest rate at pre-determined calendar intervals, generally every 28 days. As a result of the auction failures beginning in February 2008, the fair value of these securities, presently \$45.80 million, may be negatively impacted in the future.

The current uncertainties in the credit markets have negatively impacted our ability to liquidate, if necessary, investments in auction rate securities. We are not certain as to when the liquidity issues relating to these investments will improve; however, we have the ability to hold these available for sale securities to maturity, (predominately 19 years after December 31, 2008) thereby recovering our investment. We may be required to reflect a write-down of certain of our auction rate securities in future periods as a charge to earnings if any of our auction rate securities are deemed to be other-than-temporarily impaired. Such impairment charge would be recorded as other expense and could be material to our results of operations. The auction rate securities in our investment portfolio are currently paying interest with rates ranging from 0.765% to 8.791%.

Approximately \$7.0 million principal amount of auction rate securities that became due during the first quarter of 2009 were paid.

Based on our expected operating cash flows, and our other sources of cash, we do not expect the potential lack of liquidity in these investments to affect our capital, liquidity or our ability to execute our current business plan.

For the parent company, Berkshire Bancorp Inc., liquidity means having cash available to fund its operating expenses and to pay stockholder dividends on its preferred and common stock, when and if declared by the Company's Board of Directors. On March 31, 2009, the Company announced that its Board of Directors had temporarily suspended its previously announced policy of paying a regular cash dividend of \$.20 per common share (payable in semi-annual installments), and would not declare or pay a semi-annual dividend in April 2009. We are current as to dividend payments on our preferred stock.

The ability of the Company to meet these obligations, including the payment of dividends on its preferred and common stock, is not currently dependent upon the receipt of dividends from the Bank. At March 31, 2009, the Company had cash of approximately \$9.68 million and investment securities with a fair market value of \$3.38 million.

The Bank maintains financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments, approximately \$25.18 million at March 31, 2009, include commitments to extend credit, stand-by letters of credit and loan commitments. The Bank also had interest rate caps with a notional amount of \$40.0 million.

At March 31, 2009, the Bank had outstanding commitments of approximately \$478.05 million; including \$38.39 million of long-term debt, \$3.55 million of operating leases, and \$436.11 million of time deposits. These commitments include \$440.43 million that mature or renew within one year, \$16.09 million that mature or renew after one year and within three years, \$21.17 million that mature or renew after three years and within five years and \$366,000 that mature or renew after five years.

Impact of Inflation and Changing Prices

The Company's financial statements measure financial position and operating results in terms of historical dollars without considering the changes in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increasing cost of the Company's operations. The assets and liabilities of the Company are largely monetary. As a result, interest rates have a greater impact on the Company's performance than do the effects of general levels of inflation. In addition, interest rates do not necessarily move in the direction, or to the same extent, as the price of goods and services. However, in general, high inflation rates are accompanied by higher interest rates, and vice versa.

ITEM 4 - CONTROLS AND PROCEDURES

Disclosure Controls and Procedures.

As of the end of the period covered by this Quarterly Report on Form 10-Q, the Company evaluated the effectiveness of the design and operation of its disclosure controls and procedures as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (Disclosure Controls). This evaluation (Controls Evaluation) was done under the supervision and with the participation of the Company's management, including the Chief Executive Officer (CEO), who is also the Chief Financial Officer (CFO). Based upon the Controls Evaluation, the CEO/CFO has concluded that the Disclosure Controls are effective in reaching a reasonable level of assurance that information required to be disclosed by the Company is recorded, processed, summarized and reported within the time period specified in the SEC's rules and forms and that any material information relating to the Company is accumulated and communicated with management, including its principal executive/financial officer to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting.

In accordance with SEC requirements, the CEO/CFO notes that during the fiscal quarter ended March 31, 2009, no changes in the Company's Internal Control (as defined below) have occurred that have materially affected or are reasonably likely to materially affect the Company's Internal Control.

Limitations on the Effectiveness of Controls.

The Company's management, including the CEO/CFO, does not expect that its Disclosure Controls and/or its internal control over financial reporting, as defined in Rule 13a-15(f) of the Securities Exchange Act of 1934, as amended (the Internal Control), will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not

absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs.

Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 5. Other Information

On May 7, 2009, in connection with the Bank's most recent examination by the Federal Deposit Insurance Corporation (the "FDIC") the Bank received a Joint Memorandum of Understanding (the "MOU") from the FDIC and the New York State Banking Department (the "NYSBD"), which the Bank's board authorized the bank to execute. The MOU, when effective, will set forth an informal understanding among the Bank, the FDIC and the NYSBD addressing asset quality, loan review, underwriting and administration and certain other concerns identified in the examination. The Bank's board has appointed a committee comprised of three directors to monitor the Bank's compliance. We do not believe that compliance with the MOU will have a material adverse effect on our results of operations or financial condition. As set forth in Management's Discussion and Analysis of Financial Condition And Results of Operations - Capital Adequacy, the Bank is well capitalized for regulatory purposes as of March 31, 2009.

Item 6. Exhibits

<u>Exhibit Number</u>	<u>Description</u>
31	Certification of Principal Executive and Financial Officer pursuant to Section 302 Of The Sarbanes-Oxley Act of 2002.
32	Certification of Principal Executive and Financial Officer pursuant to Section 906 Of The Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
