MERGE EFILM ANNOUNCES RECORD REVENUES AND EARNINGS FOR THIRD QUARTER 2003  
Revenues grow 43%; Strategic acquisition of RIS Logic delivers sales synergies

Milwaukee, WI, October 30, 2003 - Merge Technologies Incorporated (NASDAQ: MRGE), d.b.a. Merge eFilm, today announced financial results for the quarter and nine months ended September 30, 2003.

Revenues for the quarter ended September 30, 2003 were \$7,619,000, an increase of 43% over revenues of \$5,322,000 for the quarter ended September 30, 2002. Revenues were \$20,170,000 for the nine months ended September 30, 2003, an increase of 44% over revenues of \$14,040,000 for the nine months ended September 30, 2002.

Net income for the quarter ended September 30, 2003, was \$1,625,000, an increase of 55% over net income of \$1,046,000 for the quarter ended September 30, 2002. Fully diluted EPS was \$0.12 for the quarter ended September 30, 2003 compared to fully diluted EPS of \$0.09 for the quarter ended September 30, 2002.

Net income for the nine months ended September 30, 2003 was 4,342,000, an increase of 85% over net income of \$2,350,000 for the nine months ended September 30, 2002. Fully diluted EPS was \$0.35 for the nine months ended

## Edgar Filing: MERGE TECHNOLOGIES INC - Form 8-K

September 30, 2003 compared to fully diluted EPS of \$0.22 for the nine months ended September 30, 2002. Gross margins increased to 66% for the quarter ended September 30, 2003, compared to 61% for the quarter ended September 30, 2002. Gross margins for the nine months ended September 30, 2003 increased to 69% compared to 61% for the nine months ended September 30, 2002. The

Company's operating margin, defined as operating income divided by net sales, increased to 23% in the quarter ended September 30, 2003, compared to 20% in the quarter ended September 30, 2002. Operating margin for the nine months ended September 30, 2003 increased to 26%, compared to 17% for the nine months ended September 30, 2002. Cash at September 30, 2003 increased 245% to \$15,238,000 from \$4,411,000 at December 31, 2002, due to strong cash flow from operations and monies raised in a private placement in the third quarter.

The financial results include approximately 2 1/2 months of the operations of RIS Logic. Included in the balance sheet is a new line item, "billings in excess of revenues - contracts in progress", which represents future revenue to the Company. This line item is the result of the Company's determination that the services associated with certain Radiology Information System ("RIS") sales are essential to our customer, resulting in the Company recognizing both the service fees and software license fees for these sales on a percentage-complete basis. As a result, the Company's aggregate deferred revenue increased 143% to \$4,592,000 from \$1,892,000 as the result of the Company's continued growth in new RIS and PACS software solution customers.

### ANALYSIS OF RESULTS:

"I am pleased to report that the strategic initiatives we launched in the third quarter have delivered on expectations," said Richard A. Linden, President and CEO. "Specifically, the RIS Logic acquisition has strengthened our product portfolio to include a full RIS/PACS solution, enhanced our target market positioning and accelerated the effectiveness of our operations. The results are positive financial performance, confirmed alignment with market trends, growing market share, expanding sales pipeline and demonstrable RIS/PACS product innovation, all of which further reinforced our belief that we are well positioned for continued growth and financial success.

"I am proud of our organization's ability to stay focused on operational excellence, bringing the best of Merge eFilm and RIS Logic together with a focus on delivering enhanced value to both our target market customers and our shareholders. Our financial performance this quarter benefited from a combined sales force that increased our U.S. territory coverage and the RIS Logic brand awareness that helped accelerate RIS/PACS lead generation. These results confirm the strategic importance of adding the RIS component to our product portfolio through the acquisition of an established RIS market leader.

"We have refined our product development, sales and marketing strategies based upon the convergence of several important market trends. The shortage of radiologists and radiology technologists is approaching 20% in 2003, and at the same time there has been a 15% growth in the number of

## Edgar Filing: MERGE TECHNOLOGIES INC - Form 8-K

imaging centers, and a 16% increase in average imaging center volume. Hospitals are experiencing similar challenges in radiology growth statistics and workforce shortages. Our product innovation roadmap, marketing and sales strategies are focused on the integration of business and clinical workflow for the purpose of accelerating productivity for a specific target market - imaging centers and small to medium sized hospitals. Our strategy and RIS/PACS product and professional service offerings are aligned to address these market trends.

"Our combined company is now positioned as one of the leading single-vendor RIS/PACS providers focused primarily on the image and information management needs of imaging centers and small to medium-sized hospitals. The marketplace reaction to the RIS Logic acquisition was immediate and positive, as evidenced by our ability to convert RIS/PACS leads to new contracts in the third quarter. We added eighteen new PACS or RIS customers in this quarter. In addition, we added two new RIS/PACS accounts, both of which recognized the unique value proposition in having a single vendor for integrated, end-to-end automation of their clinical and business workflow. We now have over 100 customers utilizing a combination of RIS or PACS software modules. Additionally, marketplace interest in our eFilm Workstation continues to be strong as we are approaching 40,000 downloads of this most widely used desktop diagnostic imaging software in the world. These milestones in our sales efforts, along with the accelerating strength of our pipeline through add-on sales to existing customers and new RIS/PACS opportunities, reinforces our contention that our target market needs a reliable, experienced single-solution provider for RIS/PACS software and professional services.

"We made steady progress on the integration of our product innovation effort. We anticipate our first integrated product, FUSION RIS/PACS, to debut at the RSNA (Radiological Society of North America) tradeshow in December. FUSION RIS/PACS is an integrated workflow management system that provides our customers with a single-vendor solution for their end-to-end business needs, a distinctive advantage in their optimization of revenues and cash flow. We also recently released new versions of our eFilm Workstation and FUSION PACS solutions to current customers. These products, which offer enhanced clinical and technical performance, will also make their public debut at RSNA in December. Finally, we continue to make progress enhancing the productivity

of our RIS and PACS solutions with the integration of embedded dictation and speech recognition. This functionality has been released for use with the RIS solution, and is in clinical trials with the PACS solution, with an expected release in early 2004.

"Finally, the continued strengthening of our balance sheet supports both our operating plans and strategic growth initiatives. Specifically, we successfully raised \$8 million in cash through a private placement, generated record positive operating cash flow for the quarter, significantly increased our aggregate deferred revenue balances representing future revenues to the Company and remain debt-free.

### GUIDANCE:

The Company anticipates market conditions will support the continued growth of its RIS/PACS software product and professional service offerings. The Company's strong year-to-date performance, accelerating pipeline of RIS/PACS opportunities and recognition of certain RIS software sales revenues on a percentage-complete basis, positions the Company to refine its guidance

## Edgar Filing: MERGE TECHNOLOGIES INC - Form 8-K

within the previously stated range. Revenues in 2003 are expected to be \$29 million, with year-over-year growth over 40%. The Company expects fully diluted EPS on an after-tax basis to be \$0.49. Further, the Company anticipates aggregate deferred revenues will continue to grow, representing future software licensing and service revenues. The Company also reaffirms its guidance that the RIS Logic acquisition will be accretive in 2004 and beyond.
