**Bennett Environmental Invites You to Join Its  
Second Quarter 2003 Results Investor Call**

**Oakville, Ontario, July 17, 2003** Bennett Environmental Inc., a North American leader in the high temperature treatment of contaminated soils, invites you to listen to its conference call via a live teleconference on Friday, July 25th, 2003 at 14:00 Eastern Time. In conjunction with Bennett Environmental's second quarter 2003 earnings release, senior management will discuss the quarter's financial and operating results.

Date: Friday, July 25th, 2003

Time: 14:00 Eastern Time

Dial In Number: 1-888-295-1311

If you are unable to participate in the live teleconference, a rebroadcast will be made available on Bennett Environmental's website at:

<http://www.bennettenv.com/cgi/investor>

**About Bennett Environmental Inc.**

Bennett Environmental Inc. is a North American leader in high temperature treatment services for the remediation of contaminated soil and has provided thermal solutions to contamination problems throughout Canada and the US. Bennett Environmental's proprietary technology provides for the safe, economical and permanent solution to contaminated soil. Independent testing has consistently proven that the technology operates well within the most stringent criteria in North America.

Bennett Environmental is listed on the Toronto Stock Exchange (Trading Symbol BEV ) and the American Stock Exchange (Trading Symbol BEL ). For information, please visit the Bennett Environmental website at [www.bennettenv.com](http://www.bennettenv.com), or contact John Bennett at the Vancouver office (604) 681-8828 or Rick Stern at the Oakville office (905) 339-1540.

## For Immediate Release

### **Bennett Environmental Announces Q2 Results**

#### **Profit and Revenues Increased From Last Year**

**Oakville, Ontario, July 24, 2003** Bennett Environmental Inc., a North American leader in the high temperature treatment of contaminated soils, announces a Q2 profit of \$3,083,870 or \$0.18 per fully diluted share on revenue of \$13,369,587. Compared to the same quarter last year, the Company significantly increased its profit from \$1,119,145 or \$0.06 per share on revenue of \$7,405,649.

Given the weather related challenges of record rainfall levels in the northeast US which impacted the steady flow of shipments, I am pleased with the results we achieved in the quarter, said John Bennett, Chairman and CEO of Bennett Environmental. We have significantly exceeded our operational and financial results from a year ago, nearly doubling sales levels and tripling earnings and we are well on our way to having our best year yet. It is obvious that our corporate strategy of accelerated sales volumes and strategic positioning of the Company in the market announced at our annual general meeting are having the desired impact on profitability.

Mr. Bennett added, With shipments from Resolution Island and Saglek Labrador in the Canadian North, Phase II and Phase III from the Federal Creosote project in New Jersey and shipments from a large electrical manufacturer in Canada along with several other smaller projects, our treatment facility already has 10,000 tonnes housed in our new St. Ambroise, Que., storage facility. This volume is growing steadily and, in addition to operating the plant at full capacity starting in Q3 this year, we expect to have 40,000 tonnes in storage by the end of the year, and enough to carry us through the traditionally weather-sensitive winter months and spring shipping seasons.

#### **Recent Bennett announcements include:**

The Company currently has \$272 million of contracts in backlog representing approximately 400,000 tonnes of soil. These contracts include soil from Phase II and Phase III of the Federal Creosote Superfund project in New Jersey, clean-ups from DEW line (distant early warning) sites in the Canadian north, scheduled shipments from the recently announced 5-year agreement with a major electrical manufacturer, Canadian Government contracts in Eastern Canada, US Government TERC contracts (Total Environmental Restoration Contracts) and several additional projects throughout Canada and the United States.

The new storage facility at our Saint Ambroise, Quebec facility was completed in mid-June and is now accepting shipments. This additional storage will give the Company the ability to store the growing backlog of orders and to dry and optimally blend the soil to more efficiently treat the materials. We expect to have 40,000 tonnes in storage by the end of this year.

---

## For Immediate Release

The Government of New Brunswick is completing its review of our permit application to construct a high temperature soil treatment facility to be located near the Port of Belledune in northeastern New Brunswick and will be the key tenant in the Renviro environmental industrial park. Approval is expected shortly. Construction on this \$20 million project is anticipated to start in August and full production is expected by early Q2 2004.

The Company's current backlog of contracts is expected to keep both its existing and new plants full for the next several years allowing for the healthy growth in revenues and earnings to continue for the foreseeable future.

The Company reiterates that it is confident in achieving the previously stated financial guidance of Cdn. \$70 - \$75 million (U.S. \$50 - \$53 million) in revenue and Cdn. \$1.20 - \$1.30 (U.S. \$0.85 - \$0.92) in earnings per share. This represents a further 50% increase in sales revenue and a 70% increase in earnings over 2002 record levels.

### Results of Operations

Bennett Environmental had a Q2 profit of \$3,083,870 or \$0.18 per fully diluted share versus a profit of \$1,119,145 or \$0.06 per share in the corresponding period last year. Revenues were \$13,369,587 in the quarter versus \$7,405,649 for Q2 2002. On a year-to-date basis profits are \$6,178,567 or \$0.36 per fully diluted share on revenues of \$25,419,700. Compared to the first 6 months of last year, profit was \$4,780,251 or \$0.28 per share on revenues of \$20,238,779.

The Company's operating costs of \$6,503,884 for the second quarter, were higher than the \$3,914,177 for the same period last year and reflect the higher plant utilization in the quarter. In total, 13,000 tonnes of soil were processed in the quarter compared to 8,000 tonnes for the same period last year. So far this year nearly 29,000 tonnes has been thermally treated. Administrative and business development costs of \$1,691,262 for the quarter were higher than the \$1,196,827 incurred in Q2 2002 due to the significant increases in sales and marketing effort this quarter versus the same period last year.

The Company's cash position has decreased slightly in the quarter due to working capital and capital spending demands with cash on hand of \$10,505,182 at June 30 2003, down by \$940,470 from March 31, 2003. Cash balances are reduced by \$3,179,193 from \$13,684,375 at the end of the same period last year. Receivables balance of \$16,163,636 is up from the \$12,505,945 outstanding at the end of December 31 2002 and reflects the higher level of sales activity late in the quarter versus Q4 2002 and a high level of receivables due from the Government of Canada as part of the negotiated payment schedule on the Saglek Labrador project. The Company's net working capital position at March 31 2003 increased to \$21,613,551 from the net working capital position of \$18,206,207 at December 31, 2002. During the quarter the Company invested \$1,924,069 in new plant and equipment at the Saint Ambroise treatment facility, primarily for the construction of a significantly larger soil storage building, which will enhance the Company's ability to service its customers and reduce the Company's dependence on timely customer shipments.
