Third Quarter 2018 Summary Review

Effective January 1, 2018, the Subsystems business unit was transferred from Others to Analog, MEMS and Sensors Group (AMS). Prior periods have been restated accordingly.

| Net Revenues By Product Group (in US\$ millions) | Q3 2018 | Q2 2018 | Q3 2017 | Y/Y | Q/Q |
|---|---------|---------|---------|-------|-------|
| Automotive and Discrete Group (ADG) | \$901 | \$870 | \$775 | 16.3% | 3.6% |
| Analog, MEMS and Sensors Group (AMS) | 899 | 613 | 657 | 36.7 | 46.6 |
| Microcontrollers and Digital ICs Group (MDG) | 719 | 782 | 701 | 2.5 | (8.1) |
| Others | 3 | 4 | 3 | 9.4 | (2.8) |
| Total Net Revenues | \$2,522 | \$2,269 | \$2,136 | 18.1% | 11.2% |

Net revenues increased 11.2% sequentially, 120 basis points better than the mid-point of the Company's guidance. On a year-over-year basis, third quarter net revenues increased 18.1% with all product groups delivering revenue growth. Year-over-year sales to OEMs and Distribution were up 21.6% and 11.2%, respectively.

Gross profit totaled \$1.0 billion, representing a year-over-year increase of 18.6%. Gross margin was 39.8%, 20 basis points lower than the mid-point of the Company's guidance mainly due to product group mix. Gross margin increased 20 basis points year-over-year, largely driven by a favorable mix shift toward higher value products and improved manufacturing efficiency.

Operating income was \$398 million, compared to \$281 million in the year-ago quarter, with all product groups growing revenues and with ADG and AMS delivering improved profitability. The Company's operating margin increased 270 basis points on a year-over-year basis to 15.8% of net revenues, compared to 13.1% in the 2017 third quarter.

By product group, compared with the year-ago quarter:

Automotive and Discrete Group (ADG):

- Revenue grew double-digits, in both Automotive and Power Discrete.
- Operating profit increased by 36.2% to \$116 million, mainly due to higher revenue and associated gross profit.
- Operating margin increased to 12.8% from 10.9%.

Analog, MEMS and Sensors Group (AMS):

- Revenue grew triple-digits in Imaging and was supported by growth in both Analog and MEMS.
- Operating profit increased by 82.4% to \$157 million, mainly due to higher revenue and associated gross profit.
- Operating margin increased to 17.5% from 13.1%.

Microcontrollers and Digital ICs Group (MDG):

- Revenue grew in Digital ICs while Microcontrollers / Memories were stable.
- Operating profit decreased by 5.4% to \$119 million mainly due to less favorable mix between Microcontrollers and other products. Operating margin decreased to 16.6% from 18.0%.

Net income and diluted earnings per share increased to \$369 million and \$0.41, respectively, compared to \$236 million and \$0.26, respectively, in the year-ago quarter.

U. S. GAAP – Non-U.S. GAAP Reconciliation

The supplemental non-U.S. GAAP information presented in this press release is unaudited and subject to inherent limitations. Such non-U.S. GAAP information is not based on any comprehensive set of accounting rules or principles and should not be considered as a substitute for U.S. GAAP measurements. Also, our supplemental non-U.S. GAAP financial information may not be comparable to similarly titled non-U.S. GAAP measures used by other companies. Further, specific limitations for individual non-U.S. GAAP measures, and the reasons for presenting non-U.S. GAAP financial information, are set forth in the paragraphs below. To compensate for these limitations, the supplemental non-U.S. GAAP financial information should not be read in isolation, but only in conjunction with our consolidated financial statements prepared in accordance with U.S. GAAP.

Operating income (loss) before impairment and restructuring charges and one-time items is used by management to help enhance an understanding of ongoing operations and to communicate the impact of the excluded items, such as impairment, restructuring charges and other related closure costs. Adjusted net earnings and earnings per share (EPS) are used by management to help enhance an understanding of ongoing operations and to communicate the impact of the excluded items like impairment, restructuring charges and other related closure costs attributable to ST and other one-time items, net of the relevant tax impact.

The Company believes that these non-U.S. GAAP financial measures provide useful information for investors and management because they measure the Company's capacity to generate profits from its business operations, excluding the effect of acquisitions and expenses related to the rationalizing of its activities and sites that it does not consider to be part of its on-going operating results, thereby offering, when read in conjunction with the Company's U.S. GAAP financials, (i) the ability to make more meaningful period-to-period comparisons of the Company's on-going operating results, (ii) the ability to better identify trends in the Company's business and perform related trend analysis, and (iii) an easier way to compare the Company's results of operations against investor and analyst financial models and valuations, which usually exclude these items.

Net financial position (non-U.S. GAAP measure): resources (debt), represents the balance between our total financial resources and our total financial debt. Our total financial resources include cash and cash equivalents, marketable securities, short-term deposits and restricted cash, and our total financial debt includes short-term borrowings, current portion of long-term debt and long-term debt, all as reported in our consolidated balance sheet. We believe our net financial position provides useful information for investors and management because it gives evidence of our global position either in terms of net indebtedness or net cash position by measuring our capital resources based on cash, cash equivalents and marketable securities and the total level of our financial indebtedness.

Free cash flow (non-U.S. GAAP measure) is defined as net cash from operating activities minus net cash from (used in) investing activities, excluding payment for purchases (proceeds from the sale of) marketable securities, short-term deposits and restricted cash. We believe free cash flow provides useful information for investors and management because it measures our capacity to generate cash from our operating and investing activities to sustain our operating activities. Free cash flow does not represent total cash flow since it does not include the cash flows generated by or used in financing activities. In addition, our definition of free cash flow may differ from definitions used by other companies.

Q3 2017 amounts have been adjusted to reflect the impact of new 2018 accounting guidance, which requires, on
(1) comparative periods,

the reclassification as operating cash flows of the implied interest paid in the settlement of our convertible bonds.
