Q: PLEASE DISCUSS HOW THE MARKETS PERFORMED DURING THE FISCAL YEAR ENDED NOVEMBER 30, 2004.

A: The 12-month period began on a positive note for the U.S. stock market, with prices increasing until early April. The market then undertook a rather lengthy period of choppiness, owing to investor uncertainty that stemmed from the political environment, rapidly rising oil prices, ongoing geopolitical unrest, and the potential for slowing economic growth, among other key factors (source: Lipper Inc.).

With the recent conclusion of the presidential election, at least one element of uncertainty has been effectively removed, which is encouraging. Recent data suggests that continued economic growth appears to be intact and that job growth has accelerated (source: U.S. Bureau of Labor Statistics). Also, oil prices reached the lofty level of \$55 per barrel range in October, but retreated somewhat in the final month of the period. In general, higher energy prices have neither caused a spike in overall inflation in the U.S., nor have they held back consumer spending (source: Bloomberg L.P.). Lastly, the Federal Reserve has managed the increase in short-term rates in a way that has not seemed to have had a negative impact on the stock market.

During the 12-month period, some of the best-performing sectors of the S&P 500 Index were those typically preferred by investors for their defensive characteristics, such as the utilities group. Aggressive stocks, like those found in the technology sector, trailed the broad market in 2004, which we take as an indication of the risk aversion present in the market.

Q: HOW DID THE FUND PERFORM VERSUS ITS BENCHMARK INDEX AND FUND PEER GROUP FOR THE 12-MONTH PERIOD ENDED NOVEMBER 30, 2004?

A: Delaware Investments Dividend and Income Fund, Inc. returned +20.29% (at net asset value with distributions reinvested) for the fiscal year ended November 30, 2004. For the same period, the Fund's benchmark, the Standard & Poor's (S&P) 500 Index appreciated +12.85% and its peer group, as measured by the Lipper Closed-End Income and Preferred Stock Funds average, rose +12.61% (source: Lipper Inc.).

Q: HOW DID THE FUND'S FIXED INCOME INVESTMENTS PERFORM FOR THE 12-MONTH PERIOD ENDED NOVEMBER 30, 2004?

A: The Fund invests in high-yield corporate bonds, a market not to be left out of the generally favorable investment climate for the fiscal year ended November 30, 2004. Given the typically low yields associated with many income-oriented securities during 2004, high-yielding corporate bonds appealed to investors, particularly given the generally strengthening nature of corporate balance sheets (source: U.S. Bureau of Economic Analysis). The Bear Stearns High Yield Index, our benchmark for this portion of the Fund, gained a solid +12.02% for the 12-month period (source: Bloomberg L.P.).

We generated excess return across many areas of this high-yield corporate bond market, which we credit to our focus on stringent market and securities research in an attempt to identify securities with appealing fundamentals and attractive valuations. We have continued to dig deeply into both new issue niche credits and battered issues that we believe may recover. Also, we have continued to focus on some smaller issuing companies, which have generally been out of favor but that have tended to possess solid fundamentals and favorable relative value. During the 12-month period, we favored the cable, chemical, and packaging sectors, while we remained cautious of bonds issued by airline, broadcasting, and lodging-type companies.

Q: PLEASE DESCRIBE THE PERFORMANCE OF THE FUND'S STOCKS FOR THE FISCAL YEAR ENDED NOVEMBER 30, 2004.

A: In general, Fund performance benefited from the general shift in investor preference from more aggressive types of common stocks, as with those associated

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

with the technology arena, for those with more stable operations and a general orientation toward paying dividends. Specifically, the Fund's common stocks lagged the Russell 1000 Value Index, with our security selection and sector allocations impacting Fund return (source: Wilshire Associates, Inc.).

Among preferred securities, a light fall calendar kept investor focus on secondary issues, with the bank sector being rather strong. Agency-related preferred securities exhibited volatility due to ongoing concerns about the status of such government-sponsored enterprises (source: Citigroup Global Markets Inc.).

1

Q: WHAT IS THE FUND'S POSITION ON REAL ESTATE INVESTMENT TRUSTS?

A: The Fund invests in real estate investment trusts (REITs), which rebounded nicely from the slump they experienced during the second quarter of 2004. Throughout April, REITs were treated unfairly in our opinion, with many investors treating them like bonds due to competitive income streams. REITs got caught up in a general decline in bond prices, which began when economic data signaled that interest rates might move higher. When the interest rate environment calmed and the economy continued on its expansionary path, investor interest in REITs resumed, leading to strong performances for the 12-month period; the NAREIT Equity REIT Index appreciated +29.88% for the fiscal year (source: NAREIT, Inc.).

Q: WHAT INDIVIDUAL BONDS PERFORMED WELL AND WHICH ONES DISAPPOINTED DURING THE 12-MONTH PERIOD?

A: Portola Packaging faced some short-term financing challenges during the 12 months while Advanced Accessory Holdings experienced weakness that typified the automotive sector. The bonds of chemical manufacturer Rhodia, while struggling through much of the period, exhibited a measure of strength in the closing months of the fiscal year. We believe these bonds continue to hold upside potential, and we thus held them in the portfolio as of fiscal year-end. Bonds that exhibited strength included those of Kmart, which reflected what we believe has been a carefully engineered rebuilding process, including the purchase of Sears and select real estate sales. We sold our holdings during the year. Another retailer whose bonds benefited the Fund was J. Crew. Also, we saw our exposure to Gold Kist appreciate, as the poultry producer announced an initial public offering (IPO) during the period and benefited from rising chicken prices, given health-related concerns involving beef.

Q: PLEASE NAME SOME REIT INVESTMENTS THAT PERFORMED WELL DURING THE FISCAL YEAR AND SOME THAT DID NOT.

A: We underperformed in the apartment sector. Our position in Apartment Investment and Management Company (AIMCO) gained nearly 10 percent during the fiscal year, yet lagged the market due to continued sector weakness brought about by aggressive multifamily construction and the attractiveness of low mortgage rates for potential renters. We sold this position during the period. Within this same sector, we gained 37 percent during the fiscal year with our position in Simon Property Group, which largely manages higher-end retail properties. We maintained our position in Simon Property at period-end, as we did Ramco-Gershenson Properties, a strip mall manager that modestly underperformed the market due to a convertible security issuance and investor concern for the prospects of the stores that anchor Ramco's properties. In the industrial/office space, we benefited from a position in Reckson Associates, which gained 42 percent for the fiscal year. Rising a similar amount was MortgageIT Holdings, a company that performed well due to the continued solid housing environment.

Q: WHAT COMMON STOCKS DID NOT LIVE UP TO YOUR EXPECTATIONS DURING THE FISCAL YEAR?

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

A: We lost a measure of performance with consumer growth stocks, which had the greatest downside influence on Fund performance. Big name pharmaceuticals struggled during the period, and our positions in Merck and Pfizer experienced poor performance. Although our position in Kellogg gained 25 percent during the fiscal year, in general the portfolio's consumer staples names also did not experience a favorable environment for the period, and our overweighting in underperforming food and beverage stocks also caused a drag on Fund return. Lastly, Morgan Stanley, which declined six percent during the period, weighed on the performance of our non-bank financial stocks for the 12-month period.

Q: CONVERSELY, COULD YOU IDENTIFY SOME ISSUES THAT GENERATED EXCESS RETURN FOR THE FUND?

A: Fortunately, we gained excess return in our banking stocks, among which Bank of America led the way with a 27 percent appreciation for the 12-month period. We also enjoyed sound performance with Starwood Hotels and Resorts, which rose 55 percent for the fiscal year due to a resurgence in travel and leisure-related activities. The dramatic run up in petroleum prices during the period greatly affected energy-related companies, with Kerr-McGee and ChevronTexaco gaining 53 percent and 50 percent, respectively. Our belief that the economy's continued expansion might benefit the basic materials group resulted in solid gains for the fiscal year in Dow Chemical, up 38 percent, and Packaging Corporation of America, which rose 21 percent. We sold our holdings of Packaging Corporation during the year.

(1) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for the purpose of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.

(2) Adjusted average net assets excludes debt outstanding.

(3) As required, effective December 1, 2001, the Fund adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies that requires amortization of all premiums and discounts on debt securities. The effect of this change for the year ended November 30, 2002 was a decrease in net investment income per share of \$0.025, an increase in net realized and unrealized gain (loss) per share of \$0.025, a decrease in the ratio of net investment income to average net assets of 0.22%, and a decrease in the ratio of net investment income to adjusted net assets of 0.16%. Per share data and ratios for the periods prior to December 1, 2001 have not been restated to reflect this change in accounting.

(4) The average shares outstanding method has been applied for per share information.

NOTES
TO FINANCIAL STATEMENTS

DELAWARE INVESTMENTS DIVIDEND AND INCOME FUND, INC.
November 30, 2004

Delaware Investments Dividend and Income Fund, Inc. (the "Fund") is organized as a Maryland corporation and is a diversified closed-end management investment

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

company under the Investment Company Act of 1940, as amended. The Fund's shares trade on the New York Stock Exchange under the symbol DDF.

The investment objective of the Fund is to seek high current income. Capital appreciation is a secondary objective.

1. SIGNIFICANT ACCOUNTING POLICIES

The following accounting policies are in accordance with U.S generally accepted accounting principles and are consistently followed by the Fund:

Security Valuation -- Equity securities, except those traded on the Nasdaq Stock Market, Inc. (NASDAQ), are valued at the last quoted sales price as of the time of the regular close of the New York Stock Exchange (NYSE) on the valuation date. Securities traded on the NASDAQ are valued in accordance with the NASDAQ Official Closing Price, which may not be the last sales price. If on a particular day an equity security does not trade, then the mean between the bid and the asked prices will be used. U.S. Government and agency securities are valued at the mean between the bid and asked prices. Long-term debt securities are valued by an independent pricing service and such prices are believed to reflect the fair value of such securities. Short-term debt securities having less than 60 days to maturity are valued at amortized cost, which approximates market value. Other securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith under the direction of the Fund's Board of Directors. In determining whether market quotations are readily available or fair valuation will be used, various factors will be taken into consideration, such as market closures, or with respect to foreign securities, aftermarket trading or significant events after local market trading (e.g., government actions or pronouncements, trading volume or volatility on markets, exchanges among dealers, or news events).

Federal Income Taxes -- The Fund intends to continue to qualify for federal income tax purposes as a regulated investment company and make the requisite distributions to shareholders. Accordingly, no provision for federal income taxes has been made in the financial statements.

Distributions -- The Fund has a managed distribution policy. Under the policy, the Fund declares and pays monthly distributions and is managed with a goal of generating as much of the distribution as possible from ordinary income (net investment income and short-term capital gains). The balance of the distribution then comes from long-term capital gains and if necessary, a return of capital. The current annualized rate is \$0.96 per share. The Fund continues to evaluate its monthly distribution in light of ongoing economic and market conditions and may change the amount of the monthly distributions in the future.

Borrowings -- The Fund issues short-term commercial paper at a discount from par. The discount is amortized as interest expense over the life of the commercial paper using the straight-line method (See Note 6).

Use of Estimates -- The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Other -- Expenses common to all funds within the Delaware Investments Family of Funds are allocated amongst the funds on the basis of average net assets. Management fees and some other expenses are paid monthly. Security transactions are recorded on the date the securities are purchased or sold (trade date).

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

Costs used in calculating realized gains and losses on the sale of investment securities are those of the specific securities sold. Dividend income is recorded on the ex-dividend date and interest income is recorded on the accrual basis. Discounts and premiums are amortized to interest income over the lives of the respective securities. Premiums and discounts on non-convertible debt securities are amortized to interest income over the lives of the respective securities. Distributions received from investments in Real Estate Investment Trusts are recorded as dividend income on ex-dividend date, subject to reclassification upon notice of the character of such distribution by the issuer.

Through December 31, 2003, certain expenses of the Fund were paid through commission arrangements with brokers. The amount of these expenses was \$316 for the year ended November 30, 2004. The expense paid under the above arrangement is included on the Statement of Operations with the corresponding expense offset shown as "expense paid indirectly."

2. INVESTMENT MANAGEMENT, ADMINISTRATION AGREEMENTS AND OTHER TRANSACTIONS WITH AFFILIATES:

In accordance with the terms of its investment management agreement, the Fund pays Delaware Management Company (DMC), a series of Delaware Management Business Trust and the investment manager, an annual fee of 0.55%, which is calculated daily based on the adjusted average weekly net assets.

The Fund has engaged Delaware Service Company, Inc. (DSC), an affiliate of DMC, to provide accounting and administration services. The Fund pays DSC a monthly fee computed at the annual rate of 0.05% of the Fund's adjusted average weekly net assets, subject to an annual minimum of \$85,000.

For purposes of the calculation of investment management fees and administration fees, adjusted average weekly net assets does not include the commercial paper liability.

At November 30, 2004, the Fund had liabilities payable to affiliates as follows:

Investment management fee payable to DMC	\$101,149
Accounting and administration fees and other expenses payable to DSC	23,386
Other expenses payable to DMC and affiliates*	14,478

*DMC, as part of its administration services, pays operating expenses on behalf of the Fund and is reimbursed on a periodic basis. Such expenses include items such as printing of shareholder reports, fees for audit, legal and tax services, stock exchange fees, custodian fees and directors fees.

As provided in the investment management agreement, the Fund bears the cost of certain legal services expenses, including internal legal services, provided to the Fund by DMC employees. For the year ended November 30, 2004, the Fund was charged \$9,189 for internal legal services provided by DMC.

Certain officers of DMC and DSC are officers and/or directors the Fund. These officers and directors are paid no compensation by the Fund.

3. INVESTMENTS

For the year ended November 30, 2004, the Fund made purchases of \$185,579,381 and sales of \$191,295,145 of long-term investment securities other than long-term U.S. government securities and short-term investments. For the year

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

ended November 30, 2004, the Fund made purchases of \$109,699,522 and sales of \$109,195,255 of long-term U.S. government securities.

At November 30, 2004, the cost of investments for federal income tax purposes was \$209,244,109. At November 30, 2004, the net unrealized appreciation was \$30,524,251, of which \$37,171,249 related to unrealized appreciation of investments and \$6,646,998 related to unrealized depreciation of investments.

4. DIVIDEND AND DISTRIBUTION INFORMATION

Income and long-term capital gain distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. The distributions made by the Fund during the fiscal year ended November 30, 2004 were in excess of the net investment income earned by the Fund for financial reporting purposes. This was offset by realized gains and therefore there was not a return of capital for federal income tax purposes. The tax character of dividends and distributions paid during the years ended November 30, 2004 and 2003 was as follows:

	Year Ended	
	11/30/04	11/30/03
Ordinary income	\$12,361,997	\$ 9,189,360
Return of capital	--	5,490,473
Total	\$12,361,997	\$14,679,833

As of November 30, 2004, the components of net assets on a tax basis were as follows:

Shares of beneficial interest	\$151,619,432
Capital loss carryforwards	(15,214,564)
Unrealized appreciation of investments	30,524,251
Net assets	\$166,929,119

The differences between book basis and tax basis components of net assets are primarily attributable to tax deferral of losses on wash sales and tax treatment of market discount and premium on debt instruments.

For financial reporting purposes, capital accounts are adjusted to reflect the tax character of permanent book/tax differences. For the year ended November 30, 2004, the Fund recorded the following permanent reclassifications. Reclassifications are primarily due to tax treatment of market discounts and premiums on certain debt instruments and distributions from net realized gains. Results of operations and net assets were not affected by these reclassifications.

Undistributed net investment income	\$481,792
Accumulated net realized gain (loss)	3,348,318
Paid-in capital	(3,830,110)

For federal income tax purposes, capital loss carryforwards may be carried forward and applied against future capital gains. Such capital loss carryforwards expire as follows: \$13,424,663 expires in 2010 and \$1,789,901 expires in 2011. For the year ended November 30, 2004, the Fund utilized \$8,892,306 of capital loss carryforwards.

5. CAPITAL STOCK

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

The Fund did not repurchase any shares under the Share Repurchase Program or have any transactions in common shares during the year ended November 30, 2004.

Shares issuable under the Fund's dividend investment plan are purchased by the Fund's transfer agent, Mellon Investor Services, LLC, in the open market.

6. COMMERCIAL PAPER

As of November 30, 2004, \$55,000,000 (par value) of commercial paper was outstanding with an amortized cost of \$54,839,657. The weighted average discount rate of commercial paper outstanding at November 30, 2004 was 2.17%. The average daily balance of commercial paper outstanding during the year ended November 30, 2004 was \$54,893,405 at a weighted discount rate of 1.34%. The maximum amount of commercial paper outstanding at any time during the year was \$55,000,000. In conjunction with the issuance of the commercial paper, the Fund entered into a line of credit arrangement with J.P. Morgan Chase for \$30,000,000. Interest on borrowings is based on market rates in effect at the time of borrowing. The commitment fee is computed at the rate of 0.15% per annum on the unused balance. For the year ended November 30, 2004, the Fund was charged fees of \$38,083 which are included in "commercial paper fees" on the Statement of Operations. During the year ended November 30, 2004, there were no borrowings under this arrangement.

7. SECURITIES LENDING

The Fund, along with other funds in the Delaware Investments Family of Funds, may lend its securities pursuant to a security lending agreement (Lending Agreement) with J.P. Morgan Chase. Initial security loans made pursuant to the Lending Agreement are required to be secured by U.S. Treasury obligations and/or cash collateral not less than 102% of the market value of the securities issued in the United States. With respect to each loan, if the aggregate market value of the collateral held on any business day is less than the aggregate market value of the securities which are the subject of such loan, the borrower will be notified to provide additional collateral not less than the applicable collateral requirements. Cash collateral received is invested in fixed-income securities, with a weighted average maturity not to exceed 90 days, rated in one of the top two tiers by Standard & Poor's Ratings Group or Moody's Investors Service, Inc. or repurchase agreements collateralized by such securities. However, in the event of default or bankruptcy by the lending agent, realization and/or retention of the collateral may be subject to legal proceedings. In the event the borrower fails to return loaned securities and the collateral received is insufficient to cover the value of the loaned securities and provided such collateral shortfall is not the result of investment losses, the lending agent has agreed to pay the amount of the shortfall to the Fund, or at the discretion of the lending agent, replace the loaned securities. The Fund continues to record dividends on the securities loaned and is subject to change in value of the securities loaned that may occur during the term of the loan. The Fund has the right under the Lending Agreement to recover the securities from the borrower on demand. The security lending agent and the borrower retain a portion of the earnings from the collateral investments. The Fund records security lending income net of such allocation.

At November 30, 2004, the market value of securities on loan was \$18,826,039, for which cash collateral was received and invested in accordance with the Lending Agreement. Such investments are presented on the Statement of Net Assets under the caption "Securities Lending Collateral."

NOTES
TO FINANCIAL STATEMENTS (CONTINUED)

DELAWARE INVESTMENTS DIVIDEND AND INCOME FUND, INC.

8. CREDIT AND MARKET RISKS

The Fund invests in high-yield fixed income securities, which carry ratings of

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

BB or lower by S&P and/or Ba or lower by Moody's. Investments in these higher yielding securities are generally accompanied by a greater degree of credit risk than higher rated securities. Additionally, lower rated securities may be more susceptible to adverse economic and competitive industry conditions than investment grade securities.

The Fund may invest up to 10% of its total assets in illiquid securities, which may include securities with contractual restrictions on resale, securities exempt from registration under Rule 144A of the Securities Act of 1933, as amended, and other securities which may not be readily marketable. The relative illiquidity of these securities may impair the Fund from disposing of them in a timely manner and at a fair price when it is necessary or desirable to do so.

The Fund invests in real estate investment trusts (REITs) and is subject to some of the risks associated with that industry. If the Fund holds real estate directly as a result of defaults or receives rental income directly from real estate holdings, its tax status as a regulated investment company may be jeopardized. There were no direct holdings during the year ended November 30, 2004. The Fund's REIT holdings are also affected by interest rate changes, particularly if the REITs it holds use floating rate debt to finance their ongoing operations.

9. CONTRACTUAL OBLIGATIONS

The Fund enters into contracts in the normal course of business that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

Item 5. Audit Committee of Listed Registrants

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

Item 6. Schedule of Investments

Included as part of report to shareholders filed under Item 1 of this Form N-CSR.

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies

The registrant has formally delegated to its investment adviser(s) (including any sub-adviser) (the "Adviser") the ability to make all proxy voting decisions in relation to portfolio securities held by the registrant. If and when proxies need to be voted on behalf of the registrant, the Adviser will vote such proxies pursuant to its Proxy Voting Policies and Procedures (the "Procedures"). The Adviser has established a Proxy Voting Committee (the "Committee") which is responsible for overseeing the Adviser's proxy voting process for the registrant. One of the main responsibilities of the Committee is to review and approve the Procedures to ensure that the Procedures are designed to allow the Adviser to vote proxies in a manner consistent with the goal of voting in the best interests of the registrant.

In order to facilitate the actual process of voting proxies, the Adviser has contracted with Institutional Shareholder Services ("ISS") to analyze proxy statements on behalf of the registrant and other Adviser clients and vote proxies generally in accordance with the Procedures. The Committee is responsible for overseeing ISS's proxy voting activities. If a proxy has been voted for the registrant, ISS will create a record of the vote. Beginning no later than August 31, 2004, information (if any) regarding how the registrant voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available without charge (i) through the registrant's website at <http://www.delawareinvestments.com>; and (ii) on the Commission's website at <http://www.sec.gov>.

The Procedures contain a general guideline that recommendations of company management on an issue (particularly routine issues) should be given a fair amount of weight in determining how proxy issues should be voted. However, the Adviser will normally vote against management's position when it runs counter to its specific Proxy Voting Guidelines (the "Guidelines"), and the Adviser will also vote against management's recommendation when it believes that such position is not in the best interests of the registrant.

As stated above, the Procedures also list specific Guidelines on how to vote proxies on behalf of the registrant. Some examples of the Guidelines are as follows: (i) generally vote for shareholder proposals asking that a majority or more of directors be independent; (ii) generally vote against proposals to require a supermajority shareholder vote; (iii) votes on mergers and acquisitions should be considered on a case-by-case basis, determining whether the transaction enhances shareholder value; (iv) generally vote against proposals to create a new class of common stock with superior voting rights; (v) generally vote re-incorporation proposals on a case-by-case basis; (vi) votes with respect to management compensation plans are generally determined on a case-by-case basis; (vii) generally vote for reports on the level of greenhouse gas emissions from a company's operations and products; and (viii) generally vote for proposals requesting the company to report on its policies and practices related to social, environmental and economic sustainability.

Because the registrant has delegated proxy voting to the Adviser, the registrant is not expected to encounter any conflict of interest issues regarding proxy voting and therefore does not have procedures regarding this matter. However, the Adviser does have a section in its Procedures that

Edgar Filing: DELAWARE INVESTMENTS DIVIDEND & INCOME FUND INC - Form N-CSR

addresses the possibility of conflicts of interest. Most proxies which the Adviser receives on behalf of the registrant are voted by ISS in accordance with the Procedures. Because almost all registrant proxies are voted by ISS pursuant to the pre-determined Procedures, it normally will not be necessary for the Adviser to make an actual determination of how to vote a particular proxy, thereby largely eliminating conflicts of interest for the Adviser during the proxy voting process. In the very limited instances where the Adviser is considering voting a proxy contrary to ISS's recommendation, the Committee will first assess the issue to see if there is any possible conflict of interest involving the Adviser or affiliated persons of the Adviser. If a member of the Committee has actual knowledge of a conflict of interest, the Committee will normally use another independent third party to do additional research on the particular proxy issue in order to make a recommendation to the Committee on how to vote the proxy in the best interests of the registrant. The Committee will then review the proxy voting materials and recommendation provided by ISS and the independent third party to determine how to vote the issue in a manner which the Committee believes is consistent with the Procedures and in the best interests of the registrant.

Item 8. Portfolio Managers of Closed-End Management Investment Companies

Applicable to Form N-CSRs filed for fiscal years ending on or after December 31, 2005.

Item 9. Purchases of Equity Securities by Closed-End Management Investment Companies and Affiliated Purchasers

Not applicable.

Item 10. Submission of Matters to a Vote of Security Holders

Not applicable.

Item 11. Controls and Procedures

The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures within 90 days of the filing of this report and have concluded that they are effective in providing reasonable assurance that the information required to be disclosed by the registrant in its reports or statements filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

There were no significant changes in the registrant's internal control over financial reporting that occurred during the second fiscal quarter of the period covered by the report to stockholders included herein (i.e., the registrant's fourth fiscal quarter) that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.
