Item 7.01 Regulation FD Disclosure.

Through December 31, 2008, the Company's organizational structure consisted of five operating divisions: Compressor, Blower, Engineered Products, Thomas Products and Fluid Transfer. These divisions comprised two reportable segments: Compressor and Vacuum Products and Fluid Transfer Products. The Compressor, Blower, Engineered Products and Thomas Products divisions were aggregated into the Compressor and Vacuum Products segment.

Effective January 1, 2009, the Company reorganized its five former operating divisions into two major product groups: the Industrial Products Group and the Engineered Products Group. The Industrial Products Group includes the former Compressor and Blower Divisions, plus the multistage centrifugal blower operations formerly managed in the Engineered Products Division. The Engineered Products Group is comprised of the former Engineered Products (excluding the multistage centrifugal blower operations), Thomas Products and Fluid Transfer Divisions. These changes were designed to streamline operations, improve organizational efficiencies and create greater focus on customer needs.

In accordance with these organizational changes, the Company realigned its segment reporting structure with the newly formed product groups effective with the reporting period ending March 31, 2009. The Industrial Products Group and Engineered Products Group comprise the Company's two reportable segments in accordance with Statement of Financial Accounting Standards No. 131, *Disclosures about Segments of an Enterprise and Related Information*.

To assist investors in comparing the Company's historical segment financial information with its future segment financial information, unaudited selected segment financial information for each of the four quarters of the year ended December 31, 2008 and the years ended December 31, 2008, 2007 and 2006 has been recast to reflect this realignment and furnished with this report as Exhibit 99.1 and incorporated by reference herein.
