Commission File Number: 001-31798

Shinhan Financial Group Co., Ltd.

(Exact name of registrant as specified in its charter)

N/A

(Translation of registrant s name into English)

The Republic of Korea (Jurisdiction of incorporation or organization)

120, 2-Ga, Taepyung-Ro, Jung-Gu Seoul 100-102, Korea

(Address of principal executive offices)

Sung Hun Yu, +822 6360 3071(T), <u>irshy@shinhan.com</u>, +822 6360 3082 (F), 120, 2- Ga, Taepyung-Ro, Jung-Gu, Seoul 100-102 Korea

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person))

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of Each Class:

Name of Each Exchange on Which Registered:

Common stock, par value Won 5,000 per share American depositary shares New York Stock Exchange*
New York Stock Exchange

* Not for trading, but only in connection with the listing of American depositary shares on the New York Stock Exchange, pursuant to the requirements of the Securities and Exchange Commission.

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

Indicate the number of outstanding shares of each of Shinhan Financial Group s classes of capital or common stock as of the close of the last full fiscal year covered by this Annual Report: 474,199,587 shares of common stock, par value of Won 5,000 per share.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act: Yes b No o

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934: Yes o No b

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those sections.

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes b No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes o No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer b

Accelerated filer o

Non-accelerated filer o

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP b International Financial Reporting Standards as issued by the International Accounting Standards Board o Other o

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2) of the Exchange Act: Yes o No b

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court: Yes o No o

EXPLANATORY NOTE

Acquisition of LG Card

On March 19, 2007, we acquired the controlling equity interest in LG Card, the largest credit card company in Korea. Effective as of September 21, 2007, we completed the acquisition of the remaining LG Card shares, and LG Card became our wholly-owned subsidiary. On October 1, 2007, LG Card assumed all of the assets, liabilities, and contracts of the former Shinhan Card, our then-existing credit card subsidiary, and changed its name to Shinhan Card. On the same date, the former Shinhan Card changed its name to SHC Management Co., Ltd. SHC Management Co., Ltd. is currently in liquidation proceedings. Unless otherwise indicated, statistical and financial information relating to Shinhan Card for the year ended December 31, 2007 include the corresponding information of the former Shinhan Card for the period from January 1, 2007 through September 30, 2007 and the corresponding information of LG Card (renamed Shinhan Card on October 1, 2007) for the period from March 1, 2007 through December 31, 2007. See Item 5. Operating and Financial Review and Prospects Acquisition of LG Card.

CERTAIN DEFINED TERMS, CONVENTIONS AND CURRENCY OF PRESENTATION

Unless otherwise specified or the context otherwise requires:

the terms we, us, our, Shinhan Financial Group, SFG and the Group mean Shinhan Financial Group C and its consolidated subsidiaries;

the terms Shinhan Financial Group Co., Ltd. , our company and our holding company mean Shinhan Financial Group Co., Ltd.

All references to Korea or the Republic contained in this annual report mean The Republic of Korea. All references to the Government mean the government of The Republic of Korea. The Financial Supervisory Service is the executive body of the Financial Services Commission (FSC). References to MOSF are to the Ministry of Strategy and Finance.

Our fiscal year ends on December 31 of each year. All references to a particular year are to the year ended December 31 of that year.

The currency of the primary economic environment in which we operate is Korean Won.

In this annual report, unless otherwise indicated, all references to Won or W are to the currency of The Republic of Korea, and all references to U.S. Dollars, Dollars, \$ or US\$ are to the currency of the United States of America. Unless otherwise indicated, all translations from Won to Dollars were made at \(\pi\)1163.65 to US\$1.00, which was the noon buying rate in the City of New York on December 31, 2009 for cable transfers according to the H.10 statistical release of the Federal Reserve Board (the Noon Buying Rate). On June 11, 2010, the Noon Buying Rate was \(\pi\)1,245.9 to US\$1.00. The Noon Buying Rate has been volatile recently and the U.S. Dollar amounts referred to in this report should not be relied upon as an accurate reflection of our results of operations. We expect this volatility to continue in the near future. No representation is made that the Won or U.S. Dollar amounts referred to in this report could have been or could be converted into Dollars or Won, as the case may be, at any particular rate or at all.

Unless otherwise indicated, the financial information presented in this annual report has been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Any discrepancies in the tables included herein between totals and sums of the amounts listed are due to rounding.

Table of Contents

FORWARD LOOKING STATEMENTS

This annual report includes forward-looking statements, as defined in Section 27A of the U.S. Securities Act, as amended, and Section 21E of the U.S. Securities Exchange Act of 1934, as amended (the Exchange Act), including statements regarding our expectations and projections for future operating performance and business prospects. The words believe, expect, anticipate, estimate, project and similar words used in connection with any discussion of future operating or financial performance identify forward-looking statements. In addition, all statements other than statements of historical facts included in this annual report are forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. All forward-looking statements are management s present expectations of future events and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements. This annual report discloses, under the caption Item 3.D. Risk Factors and elsewhere, important factors that could cause actual results to differ materially from our expectations (Cautionary Statements). Included among the factors discussed under the caption Item 3.D. Risk Factors are the followings risks related to our business, which could cause actual results to differ materially from those described in the forward-looking statements: the risk of adverse impacts from an economic downturn; increased competition; market volatility in securities and derivatives markets, interest or foreign exchange rates or indices; other factors impacting our operational plans; or legislative or regulatory developments. We caution you not to place undue reliance on the forward-looking statements, which speak only as of the date of this annual report. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the Cautionary Statements.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

ITEM 3.A. Selected Financial Data

The selected consolidated income statement and balance sheet data set forth below for the years ended December 31, 2005, 2006, 2007, 2008 and 2009 have been derived from our consolidated financial statements which have been prepared in accordance with U.S. GAAP. Our consolidated financial statements as of and for the years ended December 31, 2005, 2006, 2007, 2008 and 2009 have been audited by independent registered public accounting firm KPMG Samjong Accounting Corp.

You should read the following data with the more detailed information contained in Item 5. Operating and Financial Review and Prospects and our consolidated financial statements included in Item 18. Financial Statements . Historical results do not necessarily predict future results.

Table of Contents

Notes:

- (1) Basic earnings per share are calculated by dividing the net income available to holders of our common shares by the weighted average number of common shares issued and outstanding for the relevant period.
- (2) Dilutive earnings per share are calculated in a manner consistent with that of basic earnings per share, while giving effect to the potential dilution that could occur if convertible securities, options or other contracts to issue common shares were converted into or exercised for common shares. We have two categories of potentially dilutive common shares: (i) shares issuable upon the exercise of stock options and (ii) shares issuable upon conversion of the redeemable convertible preferred shares. In 2006, there was no dilutive effect on earnings per share due to a change in accounting policy in 2006 which resulted in the use of the number of the outstanding shares as of the beginning of the year and the election by us to grant cash in lieu of stock upon the exercise of stock options by our employees. We may in the future grant shares in lieu of cash upon the exercise of stock options by our employees, which may impact the dilutive earnings per share in the future.
- (3) We applied the equity method of accounting for the previous ownership interest of 7.15% in LG Card in conformity with ASC 323 (formerly APB opinion No. 18). Accordingly, the investment, our results of operation and retained earnings were retroactively adjusted as we acquired control over LG Card in 2007.
- (4) The computations of basic and diluted earnings per share (EPS) were adjusted retrospectively to include the effects of a discount offered to shareholders in connection with the rights offering in March 2009, which was due to the fact that the shares offered in the rights offering were issued and sold at a discount to the market price.

Notes:

- (1) Average balances are based on (a) daily balances for Shinhan Bank and Jeju Bank and (b) quarterly balances for other subsidiaries.
- (2) Does not include the redeemable preferred shares or the redeemable convertible preferred shares, other than the Series 10 redeemable preferred shares and the Series 11 redeemable convertible preferred shares, which were issued in January 2007 partly as funding for the LG Card acquisition. The information for the Series 10 and Series 11 preferred shares is included in the information for 2007. The terms of the Series 10 redeemable preferred shares are different from those of other redeemable preferred shares issued by us, and the terms of the Series 11 redeemable convertible preferred shares are different from those of other redeemable convertible preferred shares issued by us. Unlike the other preferred shares, the Series 10 and Series 11 preferred shares are treated as stockholders—equity under U.S. GAAP. For a description of the Series 10 and Series 11 preferred shares, see Item 10.B. Memorandum and Articles of Incorporation—Description of Preferred Stock—Redeemable Preferred Stock (Series 10)—and—Redeemable Convertible Preferred Stock (Series 11).
- (3) Prior to the issuance of the Series 10 redeemable preferred shares and the Series 11 redeemable convertible preferred shares, we issued several other series of redeemable preferred shares and redeemable convertible preferred shares in August 2003, as part of the funding for the Chohung Bank acquisition. The redeemable preferred shares other than the Series 10 redeemable preferred shares are treated as debt under U.S. GAAP, and their effects on the profitability ratio are not presented in the table. The redeemable convertible preferred shares other than the Series 11 redeemable convertible preferred shares have characteristics of mezzanine securities and are treated as neither debt nor stockholders—equity under U.S. GAAP, and their effects on the profitability ratio are shown in the table above for comparative purposes. For a description of these preferred shares, see—Item 10.B. Memorandum and Articles of Incorporation—Description of Preferred Stock.
- (4) Represents the ratio of total dividends declared on common stock as a percentage of net income attributable to the Group.
- (5) Represents the difference between the yield on average interest-earning assets and the cost of average interest-bearing liabilities.
- (6) Represents the ratio of net interest income to average interest-earning assets.
- (7) Represents the ratio of noninterest expense to the sum of net interest income and noninterest income, a measure of efficiency for banks and financial institutions. Efficiency ratio may be reconciled to comparable line-items in our income statements for the periods indicated as follows:

Notes:

(1) We were restructured as a financial holding company on September 1, 2001, and until 2006, were required to maintain minimum capital as measured by the requisite capital ratio as set forth under the guidelines issued by the Financial Services Commission applicable to financial holding companies. For 2005 and 2006, the minimum requisite capital ratio applicable to us as a holding company was 100%. Starting 2007, under the revised guidelines, the minimum requisite capital ratio applicable to us changed to the Bank for International Settlement (BIS) ratio of 8%. The requisite capital ratio is computed as the ratio of the net aggregate amount of our equity capital to the aggregate amounts of requisite capital. This computation is based on our consolidated financial statements in accordance with Korean GAAP. See Item 4.B. Business Overview

8

Table of Contents

Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Capital Adequacy.

- (2) For 2005, represents information of former Shinhan Bank prior to its merger into Chohung Bank in 2006. For 2005, the total capital adequacy ratio, Tier I capital adequacy ratio and Tier II capital adequacy ratio of Chohung Bank was 10.94%, 6.52% and 4.42%, respectively. The information for 2006 and thereafter represents the information of the surviving entity following the merger.
- (3) Represents the ratio of total adjusted shareholders—equity to total adjusted assets and is computed in accordance with the guidelines issued by the Financial Services Commission for credit card companies. Under these guidelines, a credit card company is required to maintain a minimum adjusted equity capital ratio of 8%. This computation is based on the nonconsolidated financial statements of the credit card company prepared in accordance with Korean GAAP. See Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Capital Adequacy.

The information as of December 31, 2005 includes the information of former Shinhan Card and does not include the information of the credit card division of Chohung Bank. The information as of December 31, 2006 represents the information of former Shinhan Card (including that of the credit card division of Chohung Bank, which was split-merged into former Shinhan Card on April 3, 2006). The information as of December 31, 2007 represents the information for LG Card, renamed as Shinhan Card on October 1, 2007 (including that of the assets and liabilities of former Shinhan Card, which were transferred to LG Card on October 1, 2006). This information as of December 31, 2008 and 2009 represents the information of Shinhan Card.

For comparison, the adjusted equity capital ratio of LG Card as of December 31, 2005 and 2006 was 25.55% and 34.25%, respectively.

(4) Solvency ratio is the ratio of the solvency margin to the standard amount of solvency margin as defined and computed in accordance with the guidelines issued by the Financial Services Commission for life insurance companies. Under these guidelines, Shinhan Life Insurance is required to maintain a minimum solvency ratio of 100%. Shinhan Life Insurance s solvency ratio as of the end of its latest fiscal year on March 31, 2010 was 223.1%. See Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Capital Adequacy.

The Financial Services Commission regulations require that the computation of the capital ratios be based on our consolidated financial statements under Korean GAAP and regulatory guidelines, which vary in certain significant respects from U.S. GAAP. The following table sets forth our capital ratios computed on the basis of our consolidated financial statements under Korean GAAP and the regulatory guidelines of the Financial Services Commission.

ITEM 3.B. Capitalization and Indebtedness

Not applicable.

ITEM 3.C. Reasons for the Offer and Use of Proceeds

Not applicable.

ITEM 3.D. Risk Factors

An investment in the American depositary shares representing our common shares involves a number of risks. You should carefully consider the following information about the risks we face, together with the other information contained in this annual report, in evaluating us and our business.

Risks Relating to the Recent Economic and Market Crisis

Difficult conditions and turbulence in the Korean and global economy and financial markets may adversely affect our business, asset quality, capital adequacy and earnings.

Most of our assets are located in, and we generate most of our income from, Korea. Accordingly, our business and profitability are largely dependent on the general economic and social conditions in Korea, including interest rates, inflation, exports, personal expenditures and consumption, unemployment, demand for business products and

10

Table of Contents

services, debt service burden of households and businesses, the general availability of credit, the asset value of real estate and securities and other factors affecting the financial well-being of our corporate and retail customers.

The Korean economy is closely integrated with, and is significantly affected by, developments in the global economy and financial markets. In recent years, the global economy and financial markets experienced hardship, which also had a significant adverse impact on the Korean economy and in turn on our business and profitability. During the second and third quarters of 2007, credit markets in the United States and globally began to experience significant difficulties and turbulence as a result of uncertainties in the U.S. subprime mortgage market, which then spread to markets involving highly leveraged structured financial products. In September and October 2008, liquidity concerns increased dramatically with the bankruptcy or acquisition of, and/or government assistance to, several major financial institutions based in the United States and Europe, including Lehman Brothers. These developments led to reduced liquidity in the credit markets, greater volatility in financial markets in general and an economic downturn in many of the world s major economies, including Korea. In response to such adversity, governments in the United States, Europe and many other countries, including Korea, have implemented a number of initiatives designed to stabilize the financial markets and the economy in general, including fiscal stimulus measures, reduction of base interest rates and direct and indirect assistance to distressed financial institutions. In part due to such initiatives, the Korean and global economy have shown growing signs of recovery since the second half of 2009. However, there can be no assurance that there will not be further difficulties resulting from the recent financial and economic crisis. For example, in November 2009, the Dubai government announced a moratorium on the outstanding debt of Dubai World, a government-affiliated investment company. In addition, many governments worldwide, in particular in Greece, Spain, Hungary and other countries in Europe, are showing increasing signs of fiscal stress and difficulties meeting debt burdens, which have resulted in turbulences in the financial markets in Europe and elsewhere in the world. The stability of Korean financial markets is also affected in part by the actual and perceived military threats from North Korea. In March 2010, a Korean navy ship sunk allegedly as a result of a covert attack by a North Korean submarine, and this incident has further escalated the level of political and military tension in the Korean peninsula and added to the volatility of the Korean financial markets. Any of these or other developments could potentially trigger another financial and economic crisis, which could have a material impact on our business and profitability.

Furthermore, while many governments worldwide are considering or are in the process of implementing exit strategies in the form of reduced government spending, higher interest rates or otherwise, there can be no guarantee that such strategies will have the desired effect, and such strategies may, for reasons related to timing, magnitude or other factors, have the unintended consequences of prolonging or worsening economic and financial difficulties. In light of the high level of interdependence of the global economy, any of the foregoing developments could have a material adverse effect on the Korean economy and financial markets, and in turn on our business and profitability.

In particular, difficulties in financial and economic conditions could result in significant deterioration in the quality of our assets and accumulation of higher provisioning, allowances for loan losses and charge-offs as an increasing number of our corporate and retail customers declare bankruptcy or insolvency or otherwise face increasing difficulties in meeting their debt obligations. During the recent global financial crisis, our delinquent and non-performing loans increased significantly before returning largely to pre-crisis levels due in part to our preemptive measures and improvements in the general economy. For example, Shinhan bank s delinquent loans (loans with principal payments overdue by one day or more or interest payments overdue for 14 days or more) under Korean GAAP increased during the recent global crisis but decreased as the economy showed signs of recovery, and likewise, Shinhan Bank s delinquency ratio (total delinquent loans to total outstanding loans) under Korean GAAP increased from 0.62% in 2007 to 0.79% in 2008 but decreased to 0.59% in 2009. However, as was the case during the recent global financial crisis, depending on the nature of the difficulties in the financial markets and general economy, we may be forced to scale back certain of our core lending activities and other operations and/or borrow money at a higher funding cost or face a tightening in the net interest spread, any of which may have a negative impact on our earnings and profitability. Furthermore, while we and our principal subsidiaries currently maintain a capital adequacy

ratio at a level higher than the required regulatory minimum, there is no guarantee that an even higher capital requirement will not be imposed by the Government in case of a deepening or renewed crisis.

In addition, given the highly integrated nature of financial systems and economic relationships worldwide, there may be other, unanticipated systemic or other risks that may not be presently predictable. Any of these risks if

11

Table of Contents

materialized may have a material adverse effect on our business, liquidity, financial condition and results of operations.

Risks Relating to Our Overall Business

Competition in the Korean financial services industry is intense, and may further intensify as a result of recent deregulation.

Competition in the Korean financial services industry is, and is likely to remain, intense. In the banking sector, Shinhan Bank competes principally with other major Korean commercial banks and major global banks operating in Korea, as well as Government-run banks, specialized banks and regional banks. In the credit card services factor, Shinhan Card competes principally with existing monoline credit card companies, credit card divisions of commercial banks, consumer finance companies, other financial institutions and, recently, mobile telecommunications service providers in Korea. In other financial services sectors, our other subsidiaries also compete in a highly fragmented market. Some of our competitors, particularly the major global financial institutions, have greater experience and resources than we do.

In the small- and medium-sized enterprise and retail banking segments, which have been Shinhan Bank s traditional core businesses, competition has increased significantly and is expected to increase further. Most Korean banks have been focusing on small- and medium-sized enterprises and retail customers in recent years through aggressive marketing campaigns and other investments, although they have begun to increase their exposure to large corporate borrowers and focus on developing fee income businesses, including bancassurance and investment products, as increasingly important sources of revenue. The competition and market saturation resulting from this common focus may make it more difficult for Shinhan Bank to secure retail and small- and medium-sized corporate customers with the credit quality and on credit terms necessary to maintain or increase its income and profitability. In particular, Shinhan Bank has been pursuing, and intends to continue to pursue, a strategy of maintaining or enhancing its margins where possible and avoid, to the extent possible, entering into price competition. If other banks and financial institutions adopt a strategy of expanding market share through interest rate competition, Shinhan Bank may suffer customer attrition. In addition, Shinhan Bank may in the future decide to compete to a greater extent based on interest rates, which could lead to a decrease in its net interest margins. Any future decline in Shinhan Bank s customer base or its net interest margins as a result of its future competition strategy could have an adverse effect on its results of operations and financial condition.

In the credit card sector, competition has been intensifying and the market has seen further signs of saturation as existing and new credit card service providers have made significant investments and engaged in aggressive marketing campaigns and promotions to acquire new customers and target customers with high credit quality. In addition, other credit card issuers may compete with Shinhan Card for customers by offering lower interest rates and fees, higher credit limits and more attractive promotions and incentives. As a result, Shinhan Card may experience customer attrition or lose service opportunities to competing credit card issuers and/or incur higher marketing expenses. Customer attrition, together with any lowering of interest rates or fees and/or more extensive marketing and promotional campaigns that Shinhan Card might implement to acquire and retain customers, could reduce its revenues and earnings.

Potential consolidation among our rival institutions may make the competitive landscape more adverse to us. For example, in June 2008, the Government announced its plans to privatize Korea Development Bank, one of the Government skey policy banks, and in January 2010, the Government announced that it intends to sell its controlling stake in Woori Financial Group, one of the top three financial holding companies in Korea in terms of assets as of December 31, 2009, to another major bank or financial holding company. If Woori Financial Group were to be acquired by one of our major competitors, the consolidated entity will have a greater scale of operations, including a

larger customer base, and financial resources than us, which may hurt our ability to compete effectively. Moreover, Lone Star Funds is seeking to sell its controlling stake in Korea Exchange Bank, potentially to a major domestic or international financial institution, and there are market rumors related to a potential merger among our rival financial institutions. Any of these developments, if materialized, may place us at a competitive disadvantage.

Furthermore, as the Korean economy further develops and new business opportunities arise, more competitors may enter the financial services industry. For example, in 2009, SK Telecom acquired an equity interest in Hana

12

Table of Contents

Card and Korea Telecom has expressed an interest in acquiring an equity interest in BC Card and both SK Telecom and Korea Telecom have begun to actively provide mobile phone payment services using advanced mobile phone technology. As these two companies are the two largest telecommunications service providers in Korea serving a substantial majority of the Korean population, a widespread consumer acceptance of mobile phone payment services in lieu of credit card services could pose a serious competitive threat to the existing credit card service providers, including our credit card subsidiary.

Competition in the Korean financial services industry may also further intensify as a result of deregulation. For example, the Financial Investment Services and Capital Markets Act (FSCMA), which became effective in February 2009, permits a wider range of financial services providers to engage in a broader sphere of financial activities, including depositary services, and has to a significant extent removed regulatory barriers among securities brokerage, asset management, derivative financial services and trust services in favor of creating financial investment companies that may engage in all of the foregoing activities. Accordingly, the FSCMA enables the creation of large financial institutions that can offer both commercial and investment banking services modeled after the major global financial institutions in the United States and Europe. Recently, in light of the recent global financial crisis, the Government has subjected Korean financial institutions to stricter regulatory requirements and guidelines in areas of asset quality, capital adequacy, liquidity and residential and other lending practices, which has had a dampening effect on competition. However, there is no assurance that these measures will continue to curb competition or that the Government will not reverse or reduce such measures or introduce other deregulatory measures, which may further intensify competition in the Korean financial services industry.

If we are unable to compete effectively in the changing business and regulatory environment, our profit margin and market share may erode and our further growth opportunities may become limited, which could adversely affect our business, results of operation and financial condition.

We and our subsidiaries need to maintain our capital ratios above minimum required levels, and the failure to so maintain could result in the suspension of some or all of our operations.

We and our subsidiaries in Korea are required to maintain specified capital adequacy ratios. For example, we and our banking subsidiaries in Korea are required to maintain a minimum Tier I capital adequacy ratio of 4.0% and a BIS ratio of 8.0%, each on a consolidated Korean GAAP basis. These ratios measure the respective regulatory capital as a percentage of risk-weighted assets on a consolidated basis and are determined based on guidelines of the Financial Services Commission. In addition, our subsidiaries Shinhan Card, Shinhan Life Insurance and Shinhan Investment are required to maintain a consolidated adjusted equity capital ratio of 8.0%, a solvency ratio of 100% and a net operating capital ratio of 150%, respectively.

While we and our subsidiaries currently maintain capital adequacy ratios in excess of the respective required regulatory minimum levels, we or our subsidiaries may not be able to continue to satisfy the capital adequacy requirements for a number of reasons, including an increase in risky assets and provisioning expenses, substitution costs related to the disposal of problem loans, declines in the value of securities portfolio, adverse changes in foreign currency exchange rates, changes in the capital ratio requirements, the guidelines regarding the computation of capital ratios, or the framework set by the Basel Committee on Banking Supervision upon which the guidelines of the Financial Services Commission are based, or other adverse developments affecting our asset quality or equity capital or due to other reasons.

Specifically, beginning on January 1, 2008, the Financial Supervisory Service implemented the new Basel Capital Accord, commonly referred to as Basel II, in Korea, which has affected the measurement of risk by Korean financial institutions, including us and our subsidiaries. Building upon the initial Basel Capital Accord of 1988, commonly referred to as Basel I, which focused primarily on capital adequacy and asset soundness as a measure of risk, Basel II

expanded this approach by considering additional risks such as operational risk. Basel II also instituted new measures that require us and our subsidiaries to take into account individual borrower credit risk and operational risk when calculating risk-weighted assets. Recently, in order to further bolster the soundness of the banking sector in light of the recent global financial crisis, the Basel Committee on Banking Supervision has recently proposed measures, commonly known as Basel III, to further enhance the Basel II framework. While not finalized, these proposals, which are targeted to be implemented by the end of 2012, include, among others,

13

Table of Contents

narrowing the scope of Tier 1 capital, further strengthening capital requirements and introducing leverage ratio requirements. Our holding company is currently in compliance with Basel I requirements and our banking subsidiaries are currently in compliance with Basel II requirements, and we and our banking subsidiaries are taking active steps to comply with the additional requirements under the more advanced Basel levels, as applicable. However, there can be no assurance that the additional requirements under the more advanced Basel level will not require in the future an increase in our or our subsidiaries—risk capital and liquidity requirements, among others, which may require us or our subsidiaries to improve asset quality or raise additional capital.

If the capital adequacy ratios of us or our subsidiaries fall below the required levels, the Financial Services Commission may impose penalties ranging from a warning to suspension or revocation of our or our subsidiaries business licenses. In order to maintain the capital adequacy ratios above the required levels, we or our subsidiaries may be required to raise additional capital through equity financing, but there is no assurance that we or our subsidiaries will be able to do so on commercially favorable terms or at all and, even if successful, any such capital raising may have a dilutive effect on our shareholders with respect to their interest in us or on us with respect to our interest in our subsidiaries.

Liquidity, funding management and credit ratings are critical to our ongoing performance.

Liquidity is essential to our business as a financial intermediary, and we may seek additional funding in the near future to satisfy liquidity needs, meet regulatory requirements, enhance our capital levels or fund the growth of our operations as opportunities arise. A substantial part of the liquidity and funding requirements for our banking subsidiaries is met through short-term customer deposits. While the volume of our customer deposits has generally been stable over time, there have been times when customer deposits declined substantially due to the popularity of other, higher-yielding investment opportunities, namely stocks and mutual funds, during times of bullish stock markets. During such times, our banking subsidiaries were required to obtain alternative funding at higher costs. In addition, following the deregulation of depositary and settlement services as a result of the Financial Investment Services and Capital Markets Act, our banking subsidiaries may experience a decrease in customer deposits due to intensified competition. We and our subsidiaries also raise funds in the capital markets and borrow from other financial institutions, the cost of which depends on the market rates and the general availability of credit and the terms of which may limit our ability to pay dividends, make acquisitions or subject us to other restrictive covenants. In addition, during times of sudden and significant devaluations of Korean Won against the U.S. dollar as was the case recently amid the global liquidity crisis, Korean commercial banks, including our banking and credit card subsidiaries, had temporary difficulties in refinancing or obtaining optimal amounts of foreign currency-denominated funding on terms commercially acceptable to us. While our subsidiaries are not currently facing liquidity difficulties in any material respect, if we or our subsidiaries are unable to obtain the funding we need on terms commercially acceptable to us for an extended period of time for reasons of Won devaluation or otherwise, we may not be able to ensure our financial viability, meet regulatory requirements, implement our strategies or compete effectively.

Credit ratings affect the cost and other terms upon which we and our subsidiaries are able to obtain funding. Domestic and international rating agencies regularly evaluate us and our subsidiaries and their ratings of our and our subsidiaries long-term debt are based on a number of factors, including our financial strength as well as conditions affecting the financial services industry generally and Korea. In light of the ongoing difficulties in the financial services industry and the financial markets, there can be no assurance that the rating agencies will maintain our current ratings or outlooks. Currently, Shinhan Bank maintains credit ratings of A2, A and A- from Moody s Investor Service (Moody s), Fitch and S&P, respectively, and Shinhan Card maintains credit ratings of A- and BBB+ from Fitch and S&P, respectively. There is no assurance that Shinhan Bank, Shinhan Card, any of our major subsidiaries or our holding company will not experience a downgrade in their respective credit ratings and outlooks for reasons related to the general Korean economy or reasons specific to such institutions. Additional downgrades in the credit ratings and outlooks of us and our subsidiaries will likely increase the cost of our funding, limit our access to capital markets and

other borrowings, and require us to post additional collateral in financial transactions, any of which could adversely affect our liquidity, net interest margins and profitability, and in turn, our business, financial condition and results of operation.

14

Table of Contents

Changes in interest rates, foreign exchange rates, bond and equity prices, and other market factors have affected and will continue to affect our business.

The most significant market risks we face are interest rate, foreign exchange and bond and equity price risks. Changes in interest rate levels, yield curves and spreads may affect the interest rate margin realized between lending and borrowing costs. Changes in currency rates, particularly in the Korean Won-U.S. dollar exchange rates, affect the value of our assets and liabilities denominated in foreign currencies, the reported earnings of our non-Korean subsidiaries and income from foreign exchange dealings. The performance of financial markets may affect bond and equity prices and, therefore, cause changes in the value of our investment and trading portfolios. While we have implemented risk management systems to mitigate and control these and other market risks to which we are exposed, it is difficult to predict with accuracy changes in economic or market conditions and to anticipate the effects that such changes could have on our business, financial condition and results of operation.

A significant increase in interest rates could decrease the value of our debt securities portfolio and raise our funding costs while reducing loan demand and the repayment ability of our borrowers, which could have a material adverse effect on our asset quality and profitability.

Commencing in the second half of 2008, interest rates in Korea have declined to historically low levels as the government has sought to stimulate the economy through active rate-lowering measures. However, as the Korean government is reportedly in discussions to increase base interest rates as part of the exit strategy from the recent global financial crisis, there is no assurance that the market interest rates will not significantly rise in the near future. The vast majority of debt securities we hold pay interest at a fixed rate. However, a considerable increase in interest rates in the future could lead to a decline in the value of the debt securities in our portfolio. A sustained increase in interest rates will also raise our funding costs, while reducing loan demand, especially among consumers. A considerable rise in interest rates may therefore require us to rebalance our assets and liabilities in order to minimize the risk of potential mismatches and maintain our profitability. In addition, rising interest rate levels may adversely affect the Korean economy and the financial condition of our corporate and retail borrowers, including holders of our credit cards, which in turn may lead to deterioration of our credit portfolio. Since most of our retail and corporate loans bear interest at rates that adjust periodically based on prevailing market rates, a sustained increase in interest rate levels will increase the interest costs of our retail and corporate borrowers and could adversely affect their ability to make payments on their outstanding loans.

We may incur losses associated with our counterparty exposures.

We face the risk that counterparties will be unable to honor contractual obligations to us or our subsidiaries. These parties may default on their obligations to us or our subsidiaries due to bankruptcy, lack of liquidity, operational failure or other reasons. This risk may arise, for example, from entering into swaps or other derivative contracts under which counterparties have obligations to make payments to us or our subsidiaries or in executing currency or other trades that fail to settle at the required time due to non-delivery by the counterparty or systems failure by clearing agents, exchanges, clearing houses or other financial intermediaries. Counterparty risk has increased especially in light of the recent credit crisis and global economic downturn. For example, Shinhan Investment, our securities brokerage subsidiary, recorded losses of \text{\text{\$\text{W}}91\$ billion in 2008 as a result of the bankruptcy filing by Lehman Brothers. Similar losses in the future may have a material adverse effect on our business, financial condition and results of operation.

Risks Relating to Our Banking Business

We have significant exposure to small- and medium-sized enterprises, and financial difficulties experienced by such enterprises may result in a deterioration of our asset quality.

Our banking activities are conducted primarily through our wholly-owned subsidiary, Shinhan Bank. One of our core banking businesses has historically been and continues to be lending to small- and medium-sized enterprises (as defined in Item 4.B. Business Overview Our Principal Activities Corporate Banking Services Small- and Medium-sized Enterprises Banking). Our loans to such enterprises increased from W62,296 billion as of December 31, 2007 to W71,212 billion as of December 31, 2008 and W69,571 billion

15

Table of Contents

as of December 31, 2009, representing 41.0%, 41.8% and 41.1%, respectively, of our total loan portfolio as of such dates.

Compared to loans to large corporations, which tend to be better capitalized and weather business downturns with greater ease, or loans to individuals and households, which tend to be secured with homes and with respect to which the borrowers are therefore less willing to default, loans to small- and medium-sized enterprises have historically had a relatively higher delinquency ratio. In recent years, loans to such enterprises have been the target of aggressive lending by Korean banks, including Shinhan Bank, as part of their campaigns to increase their respective market shares. As of December 31, 2007, 2008 and 2009, under Korean GAAP, Shinhan Bank s delinquent loans to small- and medium-sized enterprises were \text{\text{\$\psi}453\$ billion, \text{\text{\$\psi}820\$ billion and \text{\text{\$\psi}578\$ billion, respectively, representing delinquency ratios (net of charge-offs and loan sales) of 0.85%, 1.33% and 0.98%, respectively. If Korean or global economy were to experience another economic downturn, the delinquency ratio for our loans to the small- and medium-sized may rise significantly.

Of particular concern is the significant exposure we have to enterprises in the real estate and leasing industry and the construction industry. As of December 31, 2009, our loans to the real estate and leasing industry and the construction industry was \text{\$\psi\$}\text{\$\psi\$}\text{\$18,530\$}\text{ billion} and \text{\$\psi\$}\text{\$\psi\$}\text{\$6,675\$}\text{ billion}, representing 10.9% and 3.9%, respectively, of our total loan portfolio. The enterprises in the real estate development and construction industries are concentrated in the housing market, which has been particularly affected by declining asset prices largely as a result of sustained efforts by the Government to stem speculation in the housing market. We also have a limited exposure to real estate project financing, particularly by construction companies that have built residential units in provinces outside the metropolitan Seoul area, which have experienced a relatively low rate of pre-sales, the proceeds from which the construction companies primarily rely on as a source for their liquidity and cash flow. In addition, we also have a limited exposure to the shipping and shipbuilding industries, which were disproportionately hurt by the recent economic downturn following a particularly robust period and are currently experiencing slow recovery.

The delinquency ratio for the small- and medium-sized enterprises in the construction, shipbuilding and shipping industries may increase significantly if restructuring of troubled companies in these industries intensifies as a result of a Government initiative or concerted efforts by lending institutions to improve their asset quality. Specifically, in December 2008, the Government announced that it would promote swift restructuring of troubled companies in certain industries that have been disproportionately affected by the then ongoing economic difficulties, such as construction and shipbuilding industries. These restructurings have been supervised primarily by major commercial banks that are creditor financial institutions of such companies, with the Government having an oversight role. In accordance with such program, 29 construction companies and eight shipbuilding companies became subject to workouts in February and March 2009, following review by their creditor financial institutions (including Shinhan Bank) and the Korean government. Currently, 10 construction companies and two shipbuilding companies remain under our supervision in connection with such program. In addition, on June 25, 2010, the Government announced that, following review of credit risk relating to 1,985 companies in Korea with outstanding debt of \wxtrackw50 billion or more, 65 of such companies will be subject to restructuring in the form of workout, liquidation or court receivership. Of the 65 companies, 16 are construction companies, three are shipbuilding companies and one is a shipping company. According to the Government s announcement, such restructuring is expected to have a limited impact on the asset quality of the commercial banks in Korea given the relatively strong level of capital adequacy and financial position of commercial banks in Korea to absorb potential losses in respect of these troubled companies, if any. However, there is no assurance that the credit exposure to these trouble companies will not increase in the future as a result of an economic downturn or for other reasons, and additional restructuring may follow as a result of a Government initiative or otherwise. Any of the foregoing developments may result in deterioration in the asset quality of Shinhan Bank.

We are taking active steps to curtail delinquency among our small- and medium-sized enterprise customers, including by way of strengthening loan application review processes and closely monitoring borrowers in troubled sectors. Despite such efforts, there is no assurance that the delinquency ratio for our loans to the small- and medium-sized enterprises will not rise in the future. The current adverse economic developments, which may deepen in terms of length and severity, are likely to cause deterioration in the liquidity and cash flow of these enterprises and result in higher delinquency and impairment of loans. Furthermore, adverse structural changes or macroeconomic trends in the Korean economy may further hurt the ability of such enterprises to generate revenues or service debt. A

16

Table of Contents

significant rise in the delinquency ratios among these borrowers would have a material adverse effect on our business, financial condition and results of operation.

A decline in the value of the collateral securing our loans or our inability to fully realize the collateral value may adversely affect our credit portfolio.

Most of our home and mortgage loans are secured by borrowers homes, other real estate, other securities and guarantees (which are principally provided by the Government and other financial institutions), and a substantial portion of our corporate loans are also secured, including by real estate. As of December 31, 2009, under Korean GAAP, the secured portion of Shinhan Bank s loans amounted to W74,564 billion, or 61.3% of its total loans. Shinhan Bank s general policy for home and mortgage loans is to lend up to 40% to 60% of the appraised value of collateral and to periodically re-appraise its collateral. However, in light of the sustained downturn in the residential property market in Korea, the value of the collateral may fall below the outstanding principal balance of the underlying loans. Declines in real estate prices reduce the value of the collateral securing our mortgage and home equity loans, and such reduction in the value of collateral may result in our inability to cover the uncollectible portion of our secured loans. A decline in the value of the real estate or other collateral securing our loans, or our inability to obtain additional collateral in the event of such declines, may result in the deterioration of our asset quality and require us to make additional loan loss provisions. In Korea, foreclosure on collateral generally requires a written petition to a Korean court. Foreclosure procedures in Korea generally take seven months to one year from initiation to collection depending on the nature of the collateral, and foreclosure applications may be subject to delays and administrative requirements, which may result in a decrease in the recovery value of such collateral. There can be no assurance that we will be able to realize the full value of collateral as a result of, among others, delays in foreclosure proceedings, defects in the perfection of collateral and general declines in collateral value. Our failure to recover the expected value of collateral could expose us to significant losses.

Guarantees received in connection with our real estate financing may not provide sufficient coverage.

Primarily through Shinhan Bank, we, alone or together with other financial institutions, provide financing to real estate development projects, which are concentrated in the construction of residential and, to a lesser extent, commercial complexes. Developers in Korea commonly use project financing to acquire land and pay for related project development costs. As a market practice, lenders in project financing, including Shinhan Bank, generally receive from general contractors a performance guarantee for the completion of projects by the developers as well as a payment guarantee for the loans raised by a special purpose financing vehicle established by the developers in order to procure the construction orders, as the developers tend to be small and highly leveraged. While the general contractors tend to be large and well-established construction companies, given the sustained downturn in the real estate market and the construction industry in general, there is no guarantee that even such companies will have sufficient liquidity to back up their guarantees made for the benefit of the developers if the real estate development projects do not generate sufficient cash flow from pre-sales of the residential or commercial units. This is particularly the case for development projects outside the Seoul metropolitan area, which have had lower than expected levels of pre-sales. If defaults arise under our loans to real development projects and the general contractors fail to pay the guaranteed amount necessary to cover the amount of our financings, this may have a material adverse effect on our business, financial condition and results of operations.

A limited portion of our credit exposure is concentrated in a relatively small number of large corporate borrowers, and future financial difficulties experienced by them may have an adverse impact on us.

Of our 20 largest corporate exposures as of December 31, 2009, seven were companies that are or were members of the main debtor groups identified by the Governor of the Financial Supervisory Service, which are largely comprised of *chaebols*. As of such date, the total amount of our exposures to the main debtor groups was \alpha22,658 billion, or

17

Table of Contents

operations and capital adequacy. We cannot assure you that the allowances we have established against these exposures will be sufficient to cover all future losses arising from such exposures, especially in light of the possibility of another economic downturn. Specifically, starting in April 2009, the major creditor financial institutions to large corporations with outstanding unsecured debt of \text{\$\psi\$}50 billion conducted credit review on 433 such corporations under the supervision of the Government as part of a campaign to promote swift restructuring in the Korean corporate sector, and on June 11, 2009, the Financial Supervisory Service reportedly announced that, after the credit review, 22 and 11 of such corporations will become subject to workouts and liquidation, respectively.

In addition, the creditor financial institutions also entered into agreements with nine main debtor groups, largely comprised of chaebols, under which such groups will undertake plans to improve their financial conditions, including through sale of subsidiaries. Detailed information regarding the exposure to the foregoing corporations and main debtor groups is not publicly available. While Shinhan Bank is not the main creditor financial institution to any of these main debtor groups, Shinhan Bank is one of the creditor financial institutions and has exposure to a limited number of such corporations and main debtor groups. In particular, Shinhan Bank had significant exposure (including loans and guarantees related to project financing) to Kumho Asiana in the amount of \(\psi\)706 billion as of December 31, 2009. Kumho Asiana, an airline company and a flagship member of the Kumho group, recently faced liquidity difficulties as a result of a put option which Kumho Industrial Co. Ltd., also a member of the Kumho group, in a consortium with Kumho Asiana provided to certain financial investors in connection with the acquisition of Daewoo Construction in 2006. Kumho Asiana is currently negotiating the terms of the put option with the financial investors and the Kumho group is currently negotiating with the creditors, led by Korea Development Bank, as to the liquidity issues facing the Kumho group, including Kumho Asiana, including an offer to sell certain of the group s core assets, but there is no guarantee that such negotiations will be successfully completed. If Kumho Asiana or other companies to which Shinhan Bank has substantial exposure are in or in the future enter into a workout, restructuring or liquidation, Shinhan Bank may not be able to make full recoveries against such companies. Bankruptcies or financial difficulties of large corporations, including chaebol groups, may have the adverse ripple effect of triggering delinquencies and impairment of our loans to small- and medium-sized enterprises that supply parts or labor to such corporations. If we experience future losses from our exposures to large corporations, including *chaebol* groups, it may have a material adverse impact on our business, financial condition and results of operation. See Item 4.B. Business Overview Description of Assets and Liabilities Loans Loan Portfolio Exposure to Main Debtor Groups.

Any deterioration in the asset quality of our guarantees and acceptances will likely have a material adverse effect on our financial condition and results of operations.

In the normal course of banking activities, we make various commitments and incur certain contingent liabilities in the form of guarantees and acceptances. Certain guarantees issued or modified after December 31, 2002 which are not derivative contracts have been recorded on our consolidated balance sheet at their fair value at inception. Other guarantees are recorded as off-balance sheet items in the footnotes to our financial statements and those guarantees that we have confirmed to make payments on become acceptances, which are recorded on the balance sheet. As of December 31, 2009, we had aggregate guarantees and acceptances of \(\formall \)17,823 billion, for which we provided allowances for losses of \(\forall 322\) billion. Such guarantees and acceptances include refund guarantees provided by us to shipbuilding companies, which involve guaranteeing a refund payment of the initial cash payment (typically 25% of the contract amount for ship orders) received by shipbuilders from buyers in the event that such shipbuilders are unable to deliver the ships in time or otherwise default under the shipbuilding contracts. Recently, small- and medium-sized shipbuilding companies have faced increasing financial difficulties due to the global economic downturn and the resulting slowdown in shipbuilding orders, which has increased the risk that they may default on their shipbuilding contracts and we may have to make payments under the refund guarantees. The refund guarantees provided by us to small- and medium-sized shipbuilding companies amounted to approximately \(\frac{\psi}{9}\)50 billion as of December 31, 2009. If there is significant deterioration in the quality of assets underlying our guarantees and acceptances, our allowances may be insufficient to cover actual losses resulting in respect of these liabilities, or the

losses we incur on the relevant guarantees and acceptances may be larger than the outstanding principal amount of the underlying loans.

18

Table of Contents

Risks Relating to Our Credit Card Business

Future changes in market conditions as well as other factors may lead to reduced revenues and deterioration in the asset quality of credit card receivables.

As of December 31 2007, 2008 and 2009, Shinhan Card s credit card assets amounted to W8,600 billion, W8,578 billion and W10,941 billion, respectively, on a reported basis and W14,066 billion, W14,011 billion and W14,569 billion, on a managed basis. Our large exposure to credit card and other consumer debt means that we are exposed to changes in economic conditions affecting Korean consumers in general. For example, a rise in unemployment, an increase in interest rates and other difficulties affecting the Korean economy may lead Korean consumers to reduce spending (a substantial portion of which is conducted through credit card transactions), which in turn leads to reduced earnings for our credit card business, as well as to higher default rates on credit card loans, deterioration in the quality of our credit card assets and increased difficulties in recovering written-off assets from which a significant portion of Shinhan Card s revenues is derived. Any of these developments could have a material adverse effect on our business, financial condition and results of operation.

Growing market saturation in the credit card sector may adversely affect growth prospects and profitability of Shinhan Card.

In recent years, substantially all commercial banks and financial institutions in Korea have focused their businesses on, and engaged in aggressive marketing campaigns in, the credit card sector. The growth, market share and profitability of our credit card subsidiary s operations may decline or become negative as a result of growing market saturation in this sector, intensified interest rate competition, pressure to lower the fee rates and incur higher marketing expenses, as well as Government regulation and social and economic developments in Korea, such as changes in consumer confidence levels, spending patterns or public perception of credit card usage and consumer debt. As the credit card market further saturates with increasing maturation in terms of the number of cardholders and transaction volume, it may become difficult for Shinhan Card to attract and maintain qualified customers.

Shinhan Card s ability to continue its asset growth in the future will depend on, among others, its ability to develop and market new products and services that are attractive to its customers, to source sufficient funding on commercially reasonable terms, to develop the personnel and systemic infrastructure necessary to manage its growing and increasingly diversified business operations and to more effectively handle delinquencies. In addition, external factors such as competition and Government regulation in Korea may limit Shinhan Card s ability to maintain its growth, and economic and social developments in Korea, such as changes in consumer confidence levels or spending patterns, as well as changes in the public perception of credit card usage and consumer debt, could have an adverse impact on the growth of Shinhan Card s credit card assets and the level of delinquency in its assets in the future, any of which could have a material adverse affect on our business, financial condition and results of operation.

Shinhan Card may not be able to increase consumer and business spending and borrowing on its card products or manage the costs of its cardholder benefits intended to stimulate such use.

Increasing consumer and corporate spending and borrowing through credit cards depends in part on Shinhan Card s ability to develop and issue new or enhanced card and prepaid products and increase revenue from such products and services. Shinhan Card s future earnings and profitability also depend on its ability to attract new cardholders, reduce cardholder attrition, increase merchant coverage and capture a greater share of customers—total credit card spending in Korea and overseas. Shinhan Card may not be able to manage and expand cardholder benefits in a cost-effective manner, and may experience unprofitable growth in marketing, promotion and reward expenses. If Shinhan Card is not successful in increasing consumer and business spending or in properly managing costs or cardholder benefits, its financial condition, results of operation and cash flow could be negatively affected.

Table of Contents

Risks Relating to Our Other Businesses

We may incur significant losses from our investments and, to a lesser extent, trading activities due to market fluctuations.

We enter into and maintain large investment positions in fixed income products, primarily through our treasury and investment operations. We describe these activities in Item 4.B. Business Overview Our Principal Activities Treasury and Securities Investment. We also maintain smaller trading positions, including equity and equity-linked securities and derivative financial instruments as part of our operations. Taking these positions entails making assessments about financial market conditions and trends. The revenues and profits we derive from many of these positions and related transactions are dependent on market prices, which are beyond our control. When we own assets such as debt securities, a decline in market prices, for example as a result of fluctuating market interest rates, can expose us to trading and valuation losses. In addition, when markets are volatile and subject to rapid changes in the price directions, the actual market prices may be contrary to our assessments and lead to lower than anticipated revenues or profits, or even result in losses, with respect to the related transactions and positions.

We may generate losses from brokerage and other commission- and fee-based business.

We through our investment and other subsidiaries currently provide, and seek to increase the offerings of, brokerage and other commission-and fee-based services. Downturns in stock markets typically lead to a decline in the volume of transactions that we execute for our customers and, therefore, to a decline in our non-interest revenues. In addition, because the fees that we charge for managing our clients—portfolios are often based on the size of the assets under management, a downturn in the stock market which has the effect of reducing the value of our clients—portfolios or increasing the amount of withdrawals also generally reduces the fees we receive from our securities brokerage, trust account management and other asset management services. Even in the absence of a market downturn, below-market performance by our securities, trust account or asset management subsidiaries may result in increased withdrawals and reduced cash inflows, which would reduce the revenue we receive from these businesses. In addition, protracted declines of asset prices can reduce liquidity for assets held by us and lead to material losses if we cannot close out or otherwise dispose of deteriorating positions in a timely way or at commercially reasonable prices.

Other Risks Relating to Us

Our ability to continue to pay dividends and service debt will depend on the level of profits and cash flows of our subsidiaries.

We are a financial holding company with minimal operating assets other than the shares of our subsidiaries. Our primary source of funding and cash flow is dividends from, or disposition of our interests in, our subsidiaries or our cash resources, most of which are currently the result of borrowings. Since our principal assets are the outstanding capital stock of our subsidiaries, our ability to pay dividends on our common and preferred shares and service debt will mainly depend on the dividend payments from our subsidiaries.

Companies in Korea are subject to certain legal and regulatory restrictions with respect to payment of dividends. For example, under the Korean Commercial Code, dividends may only be paid out of distributable income, which is calculated by subtracting the aggregate amount of a company s paid-in capital and certain mandatory legal reserves from its net assets, in each case as of the end of the prior fiscal year. In addition, financial companies in Korea, including banks, credit card companies, securities companies and life insurers, such as our subsidiaries, must meet minimum capital requirements and capital adequacy ratios applicable to their respective industries before dividends can be paid. For example, under the Banking Act, a bank also is required to credit at least 10% of its net profit to a legal reserve each time it pays dividends on distributable income until such time when this reserve equals the amount

of its total paid-in capital, and under the Banking Act, the Specialized Credit Financial Business Act and the regulations promulgated by the Financial Services Commission, if a bank or a credit card company fails to meet its required capital adequacy ratio or is otherwise subject to the management improvement measures imposed by the Financial Services Commission, then the Financial Services Commission may restrict the declaration and payment of dividend by such a bank or credit card company. In addition, if the capital adequacy

20

Table of Contents

ratios of us or our subsidiaries fall below the required levels, our ability to pay dividends may be restricted by the Financial Services Commission.

Damage to our reputation could harm our business.

We are one of the largest and most influential financial institutions in Korea by virtue of our financial track records, market share and the size of our operations and customer base. Our reputation is critical in maintaining our relationships with clients, investors, regulators and the general public. Our reputation can be damaged in numerous ways, including, among others, employee misconduct (including embezzlement), litigation, compliance failures, failure to properly address potential conflicts of interest, the activities of customers and counterparties over which we have limited or no control, prolonged or exacting scrutiny from regulatory authorities and customers regarding our trade practices, or uncertainty about our financial soundness and our reliability. If we are unable to prevent or properly address these concerns, we could lose our existing or prospective customers and investors, which could adversely affect our business, financial condition and results of operation.

Our risk management policies and procedures may not be fully effective at all times.

In the course of our operations, we must manage a number of risks, such as credit risks, market risks and operational risks. Although we devote significant resources to developing and improving our risk management policies and procedures and expect to continue to do so in the future, our risk management techniques may not be fully effective at all times in mitigating risk exposures in all market environments or against all types of risk, including risks that are unidentified or unanticipated. For example, from time to time, our and our subsidiaries—employees have engaged in embezzlement of substantial amounts for an extended period of time before such activities were detected by our risk management systems. In response to these incidents, we have strengthened our internal control procedures by, among others, implementing a real-time monitoring system, but there is no assurance that such measures will be sufficient to prevent similar employee misconducts in the future. Management of credit, market and operational risk requires, among others, policies and procedures to record properly and verify a large number of transactions and events, and we cannot assure you that these policies and procedures will prove to be fully effective at all times against all the risks we face.

Legal claims and regulatory risks arise in the conduct of our business.

In the ordinary course of our business, we are subject to regulatory oversight and potential legal and administrative liability. We are also subject to a variety of other claims, disputes, legal proceedings and government investigations in Korea and other jurisdictions where we are active. These types of proceedings expose us to substantial monetary damages and legal defense costs, injunctive relief, criminal and civil penalties and the potential for regulatory restrictions on our businesses. The outcome of these matters cannot be predicted and they could adversely affect our future business.

In 2009, we became a defendant in individual and collective lawsuits in connection with the sale of foreign currency derivatives products known as KIKOs, which stands for knock-in knock-out, to certain of our customers comprised mostly of small- and medium-sized enterprises. The KIKOs, which are intended to be hedging instruments, operate so that if the value of Korean Won increases to a certain level, then we are required to pay the purchasers a certain amount, and if the value of Korean Won falls below a certain level, then the purchasers of KIKOs are required to pay us a certain amount. As the Korean Won significantly depreciated against the U.S. dollar in the second half of 2008, purchasers of KIKOs were required under the relevant contracts to make large payments to us, and some of such purchasers have filed lawsuits to nullify their obligations. The aggregate amount of such claims as of December 31, 2009 was \times 21 billion, which may increase if the Korean Won depreciates against the U.S. dollar. While we have won a limited number of preliminary injunction cases at the lower court level, other cases are pending and additional cases

may be filed against us. Other commercial banks facing similar claims have lost some of their preliminary injunction cases. If we lose any of these cases, the relevant court may nullify the contracts under which KIKO products were sold and order us to return payments received from the customers. On February 8, 2010, Woori Bank and Citibank won the first case on the merits in respect of KIKOs. While the facts of the cases to which Shinhan Bank is a party are similar to those of the case ruled in favor of Woori Bank and Citibank, the actual outcomes of the cases to which Shinhan Bank is a party remain uncertain. While the final outcome of such

21

Table of Contents

litigation is uncertain and we plan to rigorously defend our position, the lawsuits, especially if the courts finally rule against us, may have a material adverse effect on our business, financial condition and results of operations.

In addition, due to the recent global economic slowdown and a deteriorating Korean stock market in the second half of 2008, investment funds whose performance was tied to domestic and foreign stock market indexes experienced a sharp fall in their rates of return. Consequently, investors in these funds brought lawsuits against commercial banks in Korea that sold such investment fund products based on the allegation that such banks used defective sales practices in selling such funds, such as failing to comply with disclosure requirements or unfairly inducing them to invest in the funds. There have been cases in which the courts required the banks to compensate their customers for inadequate disclosure and unfair inducement. We cannot assure you that, despite due training, all of our employees in charge of such sales have not breached disclosure requirements, engaged in unfair inducement or committed similar acts or will not do the same in the future. As of December 31, 2009, there were 32 cases filed against Shinhan Bank in an aggregate amount of \(\mathbf{W}5.0\) billion. The total amount in dispute may increase during the course of litigation and other lawsuits may be brought against us based on similar allegations. While it is difficult to predict the outcome of each lawsuit against us as it will ultimately depend on the specific facts and circumstances underlying such lawsuit, if the courts rule against us, the lawsuits may have a material adverse effect on our business, financial condition and results of operations.

We may incur significant costs in preparing for and complying with the new IFRS accounting standards, we may not be able to fully comply with such standards within the prescribed timeline, and the IFRS may significantly impact the results of our financial reporting.

In March 2007, the Government announced that all companies listed on the Korea Exchange, including us, would be required to comply with the International Financial Reporting Standards (IFRS) by 2011. The IFRS is the financial reporting standard adopted in more than 110 countries and has requirements that are substantially different from those under Korean GAAP or U.S. GAAP. We have established a task force team and built out a financial reporting system upgrade and other infrastructure to assist in the preparation for our IFRS compliance. Such preparation, as well as actual compliance with IFRS, may result in significant costs for us and may have a material adverse effect on our results of operations. In addition, we may not be able to comply with the IFRS requirements within the prescribed timeline, and such non-compliance may result in regulatory sanctions and harm to our reputation. Furthermore, compared to our current reporting standards under Korean GAAP or U.S. GAAP, the IFRS provides for differing reporting requirements with respect to the scope of consolidation, goodwill valuation, allowance for losses, revenue recognition and determination of employee compensation, which may make it difficult for our shareholders and other investors to compare our reported financial results under the IFRS to our reported financial results under the existing Korean GAAP or U.S. GAAP and thereby make their investment decisions on a sufficiently informed basis.

We may experience disruptions, delays and other difficulties relating to our information technology systems.

We rely on our information technology systems for our daily operations including billing, settling online and offline financial transactions and record keeping. We also upgrade from time to time our groupwide customer data-sharing and other customer relations management systems. We may experience disruptions, delays or other difficulties relating to our information technology systems, and may not timely upgrade our systems as needed. Any of these developments may have an adverse effect on our business and adversely impact our customers confidence in us.

Risks Relating to Law, Regulation and Government Policy

We are a heavily regulated entity and operate in a legal and regulatory environment that is subject to change, and violations could result in penalties and other regulatory actions.

As a financial services provider, we are subject to a number of regulations that are designed to maintain the safety and soundness of Korea s financial system, to ensure our compliance with economic and other obligations and to limit our risk exposure. These regulations may limit our activities, and changes in these regulations may

22

Table of Contents

increase our costs of doing business. Regulatory agencies frequently review regulations relating to our business and implement new regulatory measures, including increasing the minimum required provisioning levels, capital ratios or capital adequacy ratios applicable to us and our subsidiaries from time to time. We expect the regulatory environment in which we operate to continue to change. Changes to regulations applicable to us and our business or changes in their implementation or interpretation could affect us in unpredictable ways and could adversely affect our business, results of operations and financial conditions.

In addition, violations of law and regulations could expose us to significant liabilities and sanctions. For example, If the Financial Services Commission determines that our financial condition, including the financial conditions of our operating subsidiaries, is unsound, or if we or our operating subsidiaries fail to meet the applicable requisite capital ratio or the capital adequacy ratio, as the case may be, set forth under Korean law, the Financial Services Commission may order, among others, at the level of the holding company or that of the relevant subsidiary, capital increases or reductions, stock cancellations or consolidations, transfers of business, sales of assets, closures of branch offices, mergers with other financial institutions, or suspensions of a part or all of our business operations. If any of such measures is imposed on us or on our subsidiaries as a result of unsound financial condition or failure to comply with minimum capital adequacy requirements or for other reasons, it will have a material adverse effect on our business, financial condition and results of operation.

For further details on the principal laws and regulations applicable to us as a holding company and our principal subsidiaries, see Item 4.B. Business Overview Supervision and Regulation.

Increased government involvement in the economy and tighter regulation of the financial services industry in Korea in response to a financial crisis or economic downturn could impose greater restrictions on our business and hurt our profitability.

In response to the recent global financial crisis and the ensuing economic downturn, many governments worldwide, including the Government, have played a more active role in the economy through a variety of fiscal and macroeconomic measures, including increased government spending and lowering of base interest rates. In addition, the governments at times became directly involved in providing assistance, by direct investment otherwise, to troubled financial institutions and corporations, typically in exchange for increased government monitoring and guidance of the operations of such entities. In Korea, for example, in November 2008, in response to the high volatility in foreign exchange rates, several major commercial banks, including Shinhan Bank, entered into a memorandum of understanding with the Government under which they would accept greater government monitoring of their operations if they were to receive government guarantees for foreign currency-denominated borrowings. In addition, in the first half of 2009, in response to the tightened market liquidity, several major commercial banks, including Shinhan Bank, applied for a Government-backed credit line designed to ensure greater liquidity and capital adequacy, which however would impose, upon a drawdown, greater Government scrutiny of bank operations and conditionality on the use of proceeds. Shinhan Bank did not make actual use of either program, and as the volatility in foreign exchange rates and the liquidity crisis have abated to a large extent, both programs have since been terminated. However, there can be no assurance that if the Korean or global economy were to experience another severe crisis, the commercial banks in Korea, including Shinhan Bank, will not require similar or more stringent forms of Government assistance, or that the Government would be able or willing to provide assistance to the extent required. In addition, even if available, receipt of Government assistance may result in heightened Government scrutiny and guidance of bank operations to the extent that it may have a material adverse effect on Shinhan Bank s business, results of operations and financial condition.

Currently, as the global economy shows growing signs of recovery, many governments worldwide, including the Korean government, have implemented or are considering implementing exit strategies, including reduced government spending and an increase of base interest rates. There can be no assurance that the implementation of such

strategies will have the desired effect on the economy, and depending on the timing and magnitude, such strategies may result in a prolonged or more severe economic downturn, which would have a material adverse effect on our business, results of operations and financial condition.

In light of the widely held perception that the recent global liquidity crisis is at least partly attributable to deficiencies in the risk management systems and capital adequacy of financial institutions, many governments

23

Table of Contents

worldwide have taken or are considering taking measures to increase regulatory oversight in these and other areas. Examples of such measures currently being considered by the Government include proposals to further regulate capital and liquidity of financial institutions in line with the additional requirements established or being proposed to be established by the Basel Committee. There can be no assurance that such measures will have the desired consequences or not have untended adverse consequences which could hurt our business, results of operation and financial condition or profitability.

The Korean government may encourage targeted lending to and investment in certain sectors in furtherance of policy initiatives, and we may take this factor into account.

The Government has encouraged and may in the future encourage lending to or investment in the securities of certain types of borrowers and other financial institutions in furtherance of government initiatives. The Government, through its regulatory bodies such as the Financial Services Commission, has in the past announced lending policies to encourage Korean banks and financial institutions to lend to or invest in particular industries or customer segments, and, in certain cases, has provided lower cost funding through loans made by the Bank of Korea for further lending to specific customer segments. While all of our loans or securities investments are reviewed in accordance with our credit review policies or internal investment guidelines and regulations, we, on a voluntary basis, may factor the existence of such policies and encouragements into consideration in making loans or securities investments. In addition, while the ultimate decision whether to make loans or securities investments remains with us and is made based on our internal credit approval procedures and risk management systems independently of Government policies, the Government may in the future request financial institutions in Korea, including us, to make investments in or provide other forms of financial support to particular sectors of the Korean economy as a matter of policy, which financial institutions, including us, may be required to make or may otherwise decide to accept. For example, the Government took various initiatives to support small- and medium-sized enterprises, which were disproportionately affected by the recent downturn in the Korean and global economy. As part of such initiatives, Shinhan Bank, like other commercial banks in Korea, entered into a memorandum of understanding in April 2009 with the Government under which Shinhan Bank would make efforts, among others, to provide greater liquidity into the general economy by extending a sizable volume of loans to small- to medium-sized enterprises. We may incur costs or losses as a result of providing such financial support.

The level and scope of government oversight of our lending business, particularly regarding home equity and mortgage loans, may change depending on the economic or political climate.

Curtailing excessive speculation in the real estate market has historically been a key policy initiative for the Government, and it has in the past adopted several regulatory measures, including in relation to retail banking, to effect such policy. Some of the measures undertaken in the past include requiring financial institutions to impose stricter debt-to-income ratio and loan-to-value ratio requirements for mortgage loans for real property located in areas deemed to have engaged in high speculation, raising property tax on real estate transactions for owners of multiple residential units, adopting a ceiling on the sale price of newly constructed housing units and recommending that commercial banks restrain from making further mortgage and home equity lending, among others.

In light of the deepening slump in the housing market, the Government took or considered taking various initiatives to support the economy, such as deregulating the real estate sector and lowering tax rates. However, if the housing market shows signs of recovery, the Government may from time to time take measures to regulate the housing market in order to preempt undue speculation, including by way of imposing restrictions on retail lending, including mortgage and home equity lending. For example, in September 2009, in light of the growing concerns about the rising level of household debt in Korea, which is in large part secured by residential property, the Financial Supervisory Service announced that it will apply stricter debt-to-income ratios for mortgage and home equity lending. Any measures by the Government that is designed to stimulate or curb growth in the real property sector may be premature, result in

unintended consequences or contribute to substantial future declines in real estate prices in Korea, which will reduce the value of the collateral securing our mortgage and home equity loans. See Risks Relating to Our Banking Business A decline in the value of the collateral securing our loans or our inability to fully realize the collateral value may adversely affect our credit portfolio. Such measures may also have the effect

24

Table of Contents

of limiting the growth and profitability of our retail banking business, especially in the area of mortgage and home equity lending.

Korea s legislation allowing class action suits related to securities transactions may expose us to additional litigation risk.

The Act on Class Actions regarding Securities allows class action suits to be brought by shareholders of companies listed on the Korea Exchange, including ours, for losses incurred in connection with the purchase and sale of securities and other securities transactions arising from (i) false or inaccurate statements provided in registration statements, prospectuses and business reports; (ii) insider trading and (iii) market manipulation. This law permits 50 or more shareholders who collectively hold 0.01% or more of the shares of a company at the time when the cause of such damages occurred to bring a class action suit against, us and our subsidiaries and its and their respective directors and officers. It is uncertain how the courts will apply this law, however, as this law has been enacted only recently and there are few precedents. Litigation can be time-consuming and expensive to resolve, and can divert valuable management time and attention from the operation of a business. We are not aware of any basis for such suit being brought against us, nor, to our knowledge, are there any such suits pending or threatened. Any such litigation brought against us could have a material adverse effect on our business, financial condition and results of operations.

Risks Relating to Korea

Unfavorable financial and economic conditions in Korea and globally may have a material adverse impact on our asset quality, liquidity and financial performance.

We are incorporated in Korea, where most of our assets are located and most of our income is generated. As a result, we are subject to political, economic, legal and regulatory risks specific to Korea, and our business, results of operation and financial condition are substantially dependent on developments relating to the Korean economy. As Korea s economy is highly dependent on the health and direction of the global economy, and investor s reactions to developments in one country can have adverse effects on the securities price of companies in other countries, we are also subject to the fluctuations of the global economy and financial markets. Factors that determine economic and business cycles in Korea and globally are for the most part beyond our control and inherently uncertain. In addition to discussions of recent developments regarding the global economic and market uncertainties and the risks relating to us as provided elsewhere in this section, factors that could hurt Korea s economy in the future include, among others:

volatility in foreign currency reserve levels, commodity prices (including oil prices), exchange rates (particularly against U.S. dollar), interest rates and stock markets;

increased reliance on exports to service foreign currency debts, which could cause friction with Korea s trading partners;

adverse developments in the economies of countries to which Korea exports goods and services (such as the United States, China and Japan), or in emerging market economies in Asia or elsewhere that could result in a loss of confidence in the Korean economy;

the continued emergence of China, to the extent its benefits (such as increased exports to China) are outweighed by its costs (such as competition in export markets or for foreign investment and relocation of the manufacturing base from Korea to China);

social and labor unrest or declining consumer confidence or spending resulting from lay-offs, increasing unemployment and lower levels of income;

uncertainty and volatility in real estate prices arising, in part, from the Government s policy-driven tax and other regulatory measures;

a decrease in tax revenues and a substantial increase in the Government s expenditures for unemployment compensation and other social programs that together could lead to an increased Government budget deficit;

25

Table of Contents

political uncertainty or increasing strife among or within political parties in Korea, including as a result of the increasing polarization of the positions of the ruling conservative party and the progressive opposition;

a deterioration in economic or diplomatic relations between Korea and its trading partners or allies, including such deterioration resulting from trade disputes or disagreements in foreign policy; and

any other developments that has a material adverse effect in the global economy, such as an act of war, a terrorist act or a breakout of an epidemic such as SARS, avian flu or swine flu.

Any future deterioration of the Korean economy could have an adverse effect on our business, financial condition and results of operation.

Tensions with North Korea could have an adverse effect on us, the price of our common stock and our American depositary shares.

Relations between Korea and North Korea have been tense throughout Korea's modern history. The level of tension between the two Koreas has fluctuated and may increase abruptly as a result of current and future events. In recent years, there have been heightened security concerns stemming from North Korea's nuclear weapons and long-range missile programs and uncertainty regarding North Korea's actions and possible responses from the international community. In April 2009, after launching a long-range rocket over the Pacific Ocean which led to protests from the international community, North Korea announced that it would permanently withdraw from the six-party talks that began in 2003 to discuss Pyongyang's path to denuclearization. On May 25, 2009, North Korea conducted its second nuclear testing by launching several short-ranged missiles. In response to such actions, the Republic decided to join the Proliferation Security Initiative, an international campaign aimed at stopping the trafficking of weapons of mass destruction, over Pyongyang's harsh rebuke and threat of war. After the United Nations Security Council passed a resolution on June 12, 2009, to condemn North Korea's second nuclear test and impose tougher sanctions such as a mandatory ban on arms exports, North Korea announced that it would produce nuclear weapons and take resolute military actions against the international community. In addition, the military and political tension in the Korean peninsula may further escalate as a result of allegations of a covert involvement by a North Korean submarine in the sinking of a Korean navy ship in March 2010.

There recently has been increased uncertainty about the future of North Korea s political leadership and its implications for the economic and political stability of the region. In June 2009, American and South Korean officials announced that Kim Jong-il, the North Korean ruler who reportedly suffered a stroke in August 2008, designated his third son, who is reportedly to be in his twenties, to become his successor. The succession plan, however, remains uncertain. In addition, North Korea s economy faces severe challenges. For example, on November 30, 2009, the North Korean government redenominated its currency at a ratio of 100 to 1 in an attempt to control inflation and reduce income gaps. In tandem with the currency redenomination, the North Korean government banned the use or possession of foreign currency by its residents and closed down privately run markets, which led to severe inflation and food shortages. Such developments may further aggravate social and political tensions within North Korea, and in turn the entire Korean peninsula.

There can be no assurance that the level of tension and instability in the Korean peninsula will not escalate in the future, or that the political regime in North Korea may not suddenly collapse. Any further increase in tension or uncertainty relating to the military or economic stability in the Korean peninsula, including a breakdown of diplomatic negotiations over the North Korean nuclear program, occurrence of military hostilities or heightened concerns about the stability of North Korea s political leadership, could have a material adverse effect on our business, financial condition and results of operation and could lead to a decline in the market value of our common shares and our

American depositary shares.

Risks Relating to Our American Depositary Shares

There are restrictions on withdrawal and deposit of common shares under the depositary facility.

Under the deposit agreement, holders of shares of our common stock may deposit those shares with the depositary bank s custodian in Korea and obtain American depositary shares, and holders of American depositary shares may surrender American depositary shares to the depositary bank and receive shares of our common stock.

26

Table of Contents

However, under current Korean laws and regulations, the depositary bank is required to obtain our prior consent for the number of shares to be deposited in any given proposed deposit which exceeds the difference between (1) the aggregate number of shares deposited by us for the issuance of American depositary shares (including deposits in connection with the initial and all subsequent offerings of American depositary shares and stock dividends or other distributions related to these American depositary shares) and (2) the number of shares on deposit with the depositary bank at the time of such proposed deposit. We have consented to the deposit of outstanding shares of common stock as long as the number of American depositary shares outstanding at any time does not exceed 20,216,314. As a result, if you surrender American depositary shares and withdraw shares of common stock, you may not be able to deposit the shares again to obtain American depositary shares.

The value of your investment may be reduced by future conversion of our redeemable convertible preferred shares.

As part of the financing for the LG Card acquisition, we issued to 12 entities in Korea an aggregate of 14,721,000 redeemable convertible preferred shares, which are convertible into 3.01% of our total issued common shares on a fully diluted basis. These redeemable convertible preferred shares may be converted into our common shares at any time from January 26, 2008 through January 25, 2012. Currently, we do not know when or what percentage of our redeemable convertible preferred shares will be converted, or disposed of following the conversion. Accordingly, we cannot currently predict the impact of such conversion or disposal.

Ownership of our shares is restricted under Korean law.

Under the Financial Holding Companies Act, any single shareholder (together with certain persons in a special relationship with such shareholder) may acquire beneficial ownership of up to 10% of the total issued and outstanding shares with voting rights of a bank holding company controlling national banks such as us. In addition, any person, except for a non-financial business group company (as defined below), may acquire in excess of 10% of the total voting shares issued and outstanding of a financial holding company which controls a national bank, provided that a prior approval from the Financial Services Commission is obtained each time such person s aggregate holdings exceed 10% (or 15% in the case of a financial holding company controlling regional banks only), 25% or 33% of the total voting shares issued and outstanding of such financial holding company. The Government and the Korea Deposit Insurance Corporation are exempt from this limit. Furthermore, certain non-financial business group companies (i.e., (i) any same shareholder group with aggregate net assets of all non-financial business companies belonging to such group of not less than 25% of the aggregate net assets of all members of such group; (ii) any same shareholder group with aggregate assets of all non-financial business companies belonging to such group of not less than \text{\text{\$\psi}}2 trillion; or (iii) any mutual fund in which a same shareholder group identified in (i) or (ii) above owns more than 4% of the total shares issued and outstanding of such mutual fund) may not acquire beneficial ownership in us in excess of 4% of our outstanding voting shares, provided that such non-financial business group companies may acquire beneficial ownership of up to 10% of our outstanding voting shares with the approval of the Financial Services Commission under the condition that such non-financial business group companies will not exercise voting rights in respect of such shares in excess of the 4% limit. See Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Restrictions on Financial Holding Company Ownership. To the extent that the total number of shares of our common stock that you and your affiliates own together exceeds these limits, you will not be entitled to exercise the voting rights for the excess shares, and the Financial Services Commission may order you to dispose of the excess shares within a period of up to six months. Failure to comply with such an order would result in a fine of up to \$\forall 50\$ million, plus an additional charge of up to 0.03% of the book value of such shares per day until the date of disposal.

Holders of our ADSs will not have preemptive rights in certain circumstances.

The Korean Commercial Code and our articles of incorporation require us, with some exceptions, to offer shareholders the right to subscribe for new shares in proportion to their existing ownership percentage whenever new shares are issued. If we offer any rights to subscribe for additional shares of our common stock or any rights of any other nature, the depositary bank, after consultation with us, may make the rights available to you or use

27

Table of Contents

reasonable efforts to dispose of the rights on your behalf and make the net proceeds available to you. The depositary bank, however, is not required to make available to you any rights to purchase any additional shares unless it deems that doing so is lawful and feasible and:

a registration statement filed by us under the U.S. Securities Act of 1933, as amended, is in effect with respect to those shares; or

the offering and sale of those shares is exempt from or is not subject to the registration requirements of the U.S. Securities Act.

We are under no obligation to file any registration statement with the U.S. Securities and Exchange Commission. If a registration statement is required for you to exercise preemptive rights but is not filed by us, you will not be able to exercise your preemptive rights for additional shares and you will suffer dilution of your equity interest in us.

The market value of your investment in our ADSs may fluctuate due to the volatility of the Korean securities market.

Our common stock is listed on the KRX KOSPI Division of the Korea Exchange, which has a smaller market capitalization and is more volatile than the securities markets in the United States and many European countries. The market value of ADSs may fluctuate in response to the fluctuation of the trading price of shares of our common stock on the Stock Market Division of the Korea Exchange has experienced substantial fluctuations in the prices and volumes of sales of listed securities and the Stock Market Division of the Korea Exchange has prescribed a fixed range in which share prices are permitted to move on a daily basis. Like other securities markets, including those in developed markets, the Korean securities market has experienced problems including market manipulation, insider trading and settlement failures. The recurrence of these or similar problems could have a material adverse effect on the market price and liquidity of the securities of Korean companies, including our common stock and ADSs, in both the domestic and the international markets.

The Korean government has the potential ability to exert substantial influence over many aspects of the private sector business community, and in the past has exerted that influence from time to time. For example, the Korean government has promoted mergers to reduce what it considers excess capacity in a particular industry and has also encouraged private companies to publicly offer their securities. Similar actions in the future could have the effect of depressing or boosting the Korean securities market, whether or not intended to do so. Accordingly, actions by the government, or the perception that such actions are taking place, may take place or has ceased, may cause sudden movements in the market prices of the securities of Korean companies in the future, which may affect the market price and liquidity of our common stock and ADSs.

Your dividend payments and the amount you may realize upon a sale of your ADSs will be affected by fluctuations in the exchange rate between the Dollar and the Won.

Investors who purchase the American depositary shares will be required to pay for them in U.S. dollars. Our outstanding shares are listed on the Korea Exchange and are quoted and traded in Won. Cash dividends, if any, in respect of the shares represented by the American depositary shares will be paid to the depositary bank in Won and then converted by the depositary bank into Dollars, subject to certain conditions. Accordingly, fluctuations in the exchange rate between the Won and the Dollar will affect, among other things, the amounts a registered holder or beneficial owner of the American depositary shares will receive from the depositary bank in respect of dividends, the Dollar value of the proceeds which a holder or owner would receive upon sale in Korea of the shares obtained upon surrender of American depositary shares and the secondary market price of the American depositary shares.

If the government deems that certain emergency circumstances are likely to occur, it may restrict the depositary bank from converting and remitting dividends in Dollars.

If the Government deems that certain emergency circumstances are likely to occur, it may impose restrictions such as requiring foreign investors to obtain prior Government approval for the acquisition of Korean securities or

28

Table of Contents

for the repatriation of interest or dividends arising from Korean securities or sales proceeds from disposition of such securities. These emergency circumstances include any or all of the following:

sudden fluctuations in interest rates or exchange rates;

extreme difficulty in stabilizing the balance of payments; and

a substantial disturbance in the Korean financial and capital markets.

The depositary bank may not be able to secure such prior approval from the government for the payment of dividends to foreign investors when the Government deems that there are emergency circumstances in the Korean financial markets.

Holders of American depositary shares may be required to pay a Korean securities transaction tax upon withdrawal of underlying common shares or the transfer of American depositary shares.

Under Korean tax law, a securities transaction tax (including an agriculture and fishery special surtax) is imposed on transfers of shares listed on the Korea Exchange, including our common shares, at the rate of 0.3% of the sales price if traded on the Korea Exchange. According to a tax ruling issued by Korean tax authorities, securities transaction tax could be imposed on the transfer of American depositary shares. In May 2007, the Seoul Administrative Court held that depositary receipts do not constitute share certificates subject to the securities transaction tax. The case was upheld by the Seoul High Court, and the Supreme Court in 2008 dismissed the tax authorities—appeal against the Seoul High Court decision, rendering the Seoul High Court—s decision final. However, having dismissed the tax authorities appeal without ruling on the substantive law, it is unclear how much precedential value the Supreme Court—s ruling will have on this subject. Even if depositary receipts, including the ADSs, constitute share certificates subject to securities transaction tax under the Securities Transaction Tax Law, capital gains from a transfer of depositary receipts listed on the New York Stock Exchange, the NASDAQ National Market or other qualified foreign exchanges are exempt from the securities transaction tax. See—Item 10.E. Taxation—Korean Taxation.

Other Risks

We do not prepare interim financial information on a U.S. GAAP basis.

We, including our subsidiaries such as Shinhan Bank and Shinhan Card, are not required to and do not prepare interim financial information on a U.S. GAAP basis. U.S. GAAP differs in significant respects from Korean GAAP, particularly with respect to the establishment of provisions and loan loss allowance and determination of the scope of consolidation. See Item 5.B. Liquidity and Capital Resources Selected Financial Information under Korean GAAP and Reconciliation with Korean Generally Accepted Accounting Principles.

We are generally subject to Korean corporate governance and disclosure standards, which differ in significant respects from those in other countries.

Companies in Korea, including us, are subject to corporate governance standards applicable to Korean public companies which differ in many respects from standards applicable in other countries, including the United States. As a reporting company registered with the Securities and Exchange Commission and listed on the New York Stock Exchange, we are, and in the future will be, subject to certain corporate governance standards as mandated by the Sarbanes-Oxley Act of 2002. However, foreign private issuers, including us, are exempt from certain corporate governance requirements under the Sarbanes-Oxley Act or under the rules of the New York Stock Exchange. For significant differences, see Item 16G. Corporate Governance. There may also be less publicly available information

about Korean companies, such as us, than is regularly made available by public or non-public companies in other countries. Such differences in corporate governance standards and less public information could result in less than satisfactory corporate governance practices or disclosure to investors in certain countries.

29

Table of Contents

You may not be able to enforce a judgment of a foreign court against us.

We are a corporation with limited liability organized under the laws of Korea. Substantially all of our directors and officers and other persons named in this annual report reside in Korea, and all or a significant portion of the assets of our directors and officers and other persons named in this annual report and substantially all of our assets are located in Korea. As a result, it may not be possible for holders of the American depository shares to effect service of process within the United States, or to enforce against them or us in the United States judgments obtained in United States courts based on the civil liability provisions of the federal securities laws of the United States. There is doubt as to the enforceability in Korea, either in original actions or in actions for enforcement of judgments of United States courts, of civil liabilities predicated on the United States federal securities laws.

We may become a passive foreign investment company (PFIC), which could result in adverse U.S. tax consequences to U.S. investors.

Based upon the past and projected composition of our income and valuation of our assets, we do not believe that we were a PFIC for 2009, and we do not expect to be a PFIC in 2010 or to become one in the foreseeable future, although there can be no assurance in this regard. If, however, we become a PFIC, such characterization could result in adverse U.S. tax consequences to you if you are a U.S. investor. For example, if we become a PFIC, our U.S. investors will become subject to increased tax liabilities under U.S. tax laws and regulations and will become subject to burdensome reporting requirements. Our PFIC status is determined on an annual basis and depends on the composition of our income and assets. Specifically, we will be classified as a PFIC for U.S. tax purposes if either: (i) 75% or more of our gross income in a taxable year is passive income, or (ii) the average percentage of our assets by value in a taxable year which produce or are held for the production of passive income (which generally includes cash) is at least 50%. Special rules treat certain income earned by a non-U.S. corporation engaged in the active conduct of a banking business as non-passive income. We cannot assure you that we will not be a PFIC for 2010 or any future taxable year.

ITEM 4. INFORMATION ON THE COMPANY

ITEM 4.A. History and Development of the Company

Introduction

Incorporated on September 1, 2001, Shinhan Financial Group is the first privately-held financial holding company to be established in Korea. Since inception, we have developed and introduced a wide range of financial products and services in Korea and aimed to deliver comprehensive financial solutions to clients through a convenient one-portal network. According to reports by the Financial Supervisory Service, we are one of the three largest financial services providers in Korea as measured by total assets as of December 31, 2009 and operate the third largest banking business (as measured by total assets as of December 31, 2009) and the largest credit card business (as measured by the total credit purchase volume as of December 31, 2009) in Korea.

We have experienced substantial growth through several mergers and acquisitions. Most notably, our acquisition of Chohung Bank in 2003 has enabled us to have one of the three largest banking operations in Korea and enhanced our banking client base by adding Chohung Bank s large corporate clients to our traditional client base of small- and medium-sized enterprises. In addition, our acquisition in March 2007 of LG Card, the then and now largest credit card company in Korea, has significantly expanded our non-banking business capacity and helped us to achieve a balanced business portfolio.

We currently have 12 direct subsidiaries and 20 indirect subsidiaries offering a wide range of financial products and services, including commercial banking, corporate banking, private banking, credit card, asset management, brokerage

and insurance services. We believe that such breadth of services will help us to meet the diversified needs of our present and potential clients. We currently serve approximately 16.5 million active customers, which we believe is the largest customer base through approximately 17,300 employees at approximately 1,400 network branches groupwide. While substantially all of our revenues have been historically derived from Korea, we aim to serve the needs of our clients through a global network of our 52 offices in the United States, Canada, the United

30

Kingdom, Japan, the People s Republic of China, Germany, India, Hong Kong, Vietnam, Cambodia, Kazakhstan and Singapore.

Our registered office and corporate headquarters are located at 120, 2-Ga, Taepyung-Ro, Jung-Gu, Seoul 100-102, Korea, and our telephone number is +822 6360 3000.

Our Strategy

Prior to the recent global financial crisis, we primarily focused on increasing our market share in the domestic financial services industry and achieving an economy of scale in our major business operations, including through acquisition of Chohung Bank and LG Card, and seeking synergy opportunities therefrom. However, in the face of the recent global financial crisis, we adopted a more conservative back-to-basics approach by strengthening our business fundamentals and competitive sustainability, primarily through enhanced risk management and programs designed to heighten customer retention.

We believe that the preemptive steps we undertook at the outset of the recent global financial crisis have been instrumental to our successfully overcoming the immediate challenges created by the crisis. However, significant uncertainties remain in the aftermath of the recent global financial crisis. While Korean economy has experienced a relatively speedy recovery, there is significant risk for another worldwide recession, including as a result of the ongoing fiscal crisis in select European countries. On the regulatory front, the recent global financial crisis is likely to usher in heightened regulatory scrutiny over key operational aspects of the financial sector as well as and more stringent capital adequacy and liquidity requirements. Furthermore, competition in the Korean financial services sector may intensify as a result of further industry consolidation and privatization in the banking sector and the introduction of mobile phone payment services by leading telecommunication companies in Korea, which services, if widely adopted, may potentially replace existing credit card services.

Notwithstanding these and other challenges, we believe we must cautiously realign our strategic priorities in order to capture available opportunities and strengthen our platform for sustained future growth so that we may attain our long-term objectives of becoming the number-one leading financial brand in Korea and a world-class financial service provider in terms of customer value creation. More specifically, our realigned strategic priorities include the following:

Secure the leading position in our core businesses. We plan to increase our market share and otherwise achieve quantitative growth in our banking and credit card businesses through quality customer service that is tailored to meet the varying needs of our diverse customer segments and is differentiated from that offered by our competitors.

Strengthen non-interest income generating businesses. While we will continue to focus on our core, interest-income generating businesses of banking and credit card services, in order to attain a more balanced overall business portfolio we plan to strengthen our non-interest income generating businesses such as asset management, insurance and securities investment by enhancing brand awareness, economy of scale and product development and distribution capabilities with respect to these businesses. We believe that this approach will help us to generate our overall revenues and earnings more consistently by reducing our interest rate exposure and we believe that such approach is timely in light of the anticipated impending end of the low interest rate environment as part of the Government s exit strategy, which development is likely to drive up funding costs in general.

Enhance groupwide synergy with focus on the customer. In light of the wide range of financial services offered by our many subsidiaries, we believe a key driver to our future growth is to provide our customers with

enhanced access to our diverse product offerings and greater incentives to use them through a more customer-friendly, one-portal financial service platform. To that end, we are developing a groupwide customer relationship management system tailored to the lifestyle and spending patterns of each customer, in order to facilitate the sharing of customer data and product distribution channels among our member companies and further strengthen our groupwide product recommendation systems for cross-selling and up-selling opportunities such as wealth management. We also seek to reduce cost at a groupwide level by encouraging our operating subsidiaries to share a common platform for general and administrative services.

31

Table of Contents

Gain competitiveness in strategic growth areas. We intend to seek new business opportunities by sharing management and other resources groupwide to identify and develop potential strategic growth areas. We also plan to enhance our competitiveness in the investment banking business by redefining its business strategy at the group level. To further strengthen our foundation to become a leading global financial institution, we plan to increase our presence in select Asian markets.

In order to achieve the foregoing strategic objectives, we plan to continue to enhance our business fundamentals in the following areas:

Operational management system. We plan to optimize the use of our groupwide resources by streamlining our corporate governance and organizational structure and enhancing our operational management system, establishing of a fairer and more accurate performance-based compensation system and further encouraging collaboration among our various business units.

Employee training. In order to attract highly qualified new recruits which are vital to sharpening our competitive edge, we plan to enhance groupwide training programs and introduce other career development programs such as the accelerated promotion of local hires in our overseas offices.

Brand promotion and corporate culture. In order to further upgrade our brand image and foster a culture of unity among our employees and synergy across our various business units in servicing our common customers, we plan to introduce a centralized brand management system, reinforce our social responsibility initiatives and encourage greater interaction and communication among staffs of our different business units.

Balanced risk-return management. In a continuing effort to attain a healthy and balanced risk-return profile, we will promote growth within the pre-defined risk tolerance level by further fine-tuning our risk management system, selectively seeking further business opportunities and strengthening our capital adequacy and liquidity groupwide.

At the subsidiary level, the following outlines in greater detail our specific strategies for our core business lines:

in commercial banking, our primary objective is to strengthen our competitive position and become the leading bank in Korea through enhancing customer satisfaction, locking in the loyalty of our existing banking customers and further enlarging our customer base. To this end, we plan to fully leverage the scale of our banking operation afforded by our extensive branch network, emphasize cross-selling non-banking products at our banking network, offer total financial service packages, bolster our brand image and further upgrade our customer service infrastructure, risk management systems and other operating processes. We also intend to enter, on a selective basis, into promising new businesses by strengthening our investment banking, private banking and other fee-based businesses, making significant inroads into the retirement pension market, and offering differentiated wealth management strategies and portfolios.

in credit card business, our primary objective is to further solidify our market leadership as the largest credit card service provider in Korea through differentiated and tailored customer service based on a strategy that emphasizes soft and smart aspects of enhancing customer loyalty, brand recognition and revenue expansion. We will also emphasize further optimizing our risk management through preemptive risk prevention, creating new synergy opportunities through collaboration with our other Shinhan affiliates and enhanced use of the groupwide customer relationship management system, and identifying and developing new potential growth areas.

in securities and asset management business, our primary objective is to establish a solid platform for providing leading brokerage, financial advisory and asset management services in Korea in light of the recent deregulations of the securities and asset management industries in Korea. We aim to selectively develop competitive business models and capture promising business opportunities, including wealth management and investment advisory services. We have recently merged our investment advisory affiliates to promote economy of scale and solidify our brand recognition in this market. Our near-term strategic objective is to promote cross-selling, and in order to achieve this end, we have implemented strategies to

32

Table of Contents

enhance our research and preemptive risk management capabilities and maximize our groupwide synergy base.

in insurance business, our primary objective is to enhance our market position as one of the leading insurers in Korea. To that end, we aim to maximize the use of our groupwide distribution channels, particularly in banking and credit card businesses, in order to foster direct interaction with customers. We also aim to train specialists and offer differentiated products targeting the fast-growing senior citizen population in Korea.

Our History and Development

On September 1, 2001, we were formed as a financial holding company under the Financial Holding Companies Act, as a result of acquiring all of the issued shares of the following four entities from their former shareholders in exchange for shares of our common stock: (i) Shinhan Bank, a nationwide commercial bank listed on the Korea Exchange, (ii) Shinhan Securities Co., Ltd., a securities brokerage company listed on the Korea Exchange, (iii) Shinhan Capital Co., Ltd., a leasing company listed on the Korea Exchange Korean Securities Dealers Automated Quotations (KRX KOSDAQ), and (iv) Shinhan Investment Trust Management Co., Ltd., a privately held investment trust management company. On September 10, 2001, the common stock of our holding company was listed on what is currently the KRX KOSPI Market.

Since our inception, we have expanded our operations, in large part, through strategic acquisitions or formation of joint ventures. Our key acquisitions and joint venture formations are described as below:

Date of Acquisition	Entity	Principal Activities	Method of Establishment
April 2002	Jeju Bank	Regional banking	Acquisition from Korea Deposit Insurance Corporation
July 2002	Shinhan Investment Corp.(1)	Securities and investment	Acquisition from the SsangYong Group
August 2002	Shinhan BNP Paribas Investment Trust Management Co., Ltd.(2)	Investment advisory	50:50 joint venture with BNP Paribas
August 2003	Chohung Bank(3)	Commercial banking	Acquisition from creditors
December 2005	Shinhan Life Insurance	Life insurance services	Acquisition from shareholders
March 2007	LG Card(4)	Credit card services	Acquisition from creditors

- *Notes:*
- (1) Renamed as Shinhan Investment Corp. from Goodmorning Shinhan Securities Co., Ltd. effective August 2009.
- (2) In August 2002, we signed a joint venture agreement with BNP Paribas Asset Management, the asset management arm of BNP Paribas, in respect of Shinhan Investment Trust Management. In October 2002, we sold to BNP Paribas Asset Management 3,999,999 shares of Shinhan Investment Trust Management, representing 50% less one share, which was subsequently renamed as Shinhan BNP Paribas Investment Trust Management Co., Ltd. (Shinhan BNP Paribas Investment Trust Management Co., Ltd. (SH Asset Management) and Shinhan BNP Paribas Investment Trust Management merged to form Shinhan BNP Paribas Asset Management Co., Ltd. (Shinhan BNP Paribas Asset Management).

- (3) In August 2003, we acquired 80.04% of common shares of Chohung Bank, a nationwide commercial bank in Korea. We subsequently acquired the remaining interest in Chohung Bank through a series of transactions and delisted Chohung Bank from the Korea Exchange in July 2004. We merged former Shinhan Bank and Chohung Bank in April 2006, with Chohung Bank becoming the legal surviving entity. The newly merged bank then changed its name to Shinhan Bank.
- (4) In June 2002, the credit card division of Shinhan Bank was split off and established as our wholly-owned subsidiary, Shinhan Card Co., Ltd. In April 2006, concurrently with the merger of former Shinhan Bank and Chohung Bank, we also split off Chohung Bank s credit card business and merged it into the former Shinhan

33

Table of Contents

Card. In March 2007, we acquired from the creditor committee and other shareholders of LG Card the controlling equity interest in LG Card following a public tender offer. After our further acquisition of shares in July 2007 following a second public tender offer and a share swap with our shares in September 2007, LG Card became our wholly-owned subsidiary. On October 1, 2007, LG Card assumed all of the assets and liabilities of former Shinhan Card, and changed its name to Shinhan Card. On the same date, former Shinhan Card changed its name to SHC Management Co., Ltd. and commenced its liquidation process on October 1, 2009.

We list below some of the recent developments relating to our organizational structure.

In January 2009, Shinhan BNP Paribas Investment Trust Management Co., Ltd. and SH Asset Management, two our asset management subsidiaries, were merged, with Shinhan BNP Paribas Investment Trust Management Co., Ltd. Being the surviving legal entity and renamed as Shinhan BNP Paribas Asset Management Co., Ltd. Shinhan BNP Paribas Investment Trust Management was a 50:50 joint venture with BNP Paribas S.A., and SH Asset Management was our wholly-owned subsidiary. Following the merger, we and BNP Paribas own 65% and 35% equity interest in Shinhan BNP Paribas Asset Management, respectively.

In June 2009, we sold 3,290,002 common shares, or approximately 35%, of Cardif Life Insurance Company (formerly SH&C Life Insurance Co., Ltd.), a 50:50 joint venture with BNP Paribas Assurance (formerly known as Cardif S.A.), to BNP Paribas Assurance for \(\formall^2\)23 billion. Following this transaction, BNP Paribas Assurance owns approximately 85% equity interest in Cardif Life Insurance Company. In consideration of our extensive business partnership with BNP Paribas and Shinhan Bank s role in selling the bancassurance products, we transferred a 15% equity interest in Cardif Life Insurance Company to Shinhan Bank for \(\formall^7\).26 billion. Following this transaction, Cardif Life Insurance Company is no longer our subsidiary.

In September 2009, Shinhan Bank established Shinhan Bank Japan as its wholly-owned subsidiary to provide banking services in Japan, which were formerly provided at a branch level.

In October 2009, Shinhan Bank established Shinhan Vietnam Bank as its wholly-owned subsidiary to provide banking services in Vietnam, which were formerly provided at a branch level.

In December, 2009, Shinhan Capital made a capital contribution of \widetilde{\pi}10 billion to form Petra PEF, a private equity fund specializing in equity investments, in which Shinhan Capital holds a 23.8% equity interest.

In January 2010, Shinhan Data System, an information technology service provider which was formerly a subsidiary of Shinhan Bank, became a direct subsidiary of Shinhan Financial Group in order to integrate and promote efficiency in information technology operations at the groupwide level.

On June 4, 2010, CHB Valuemeet 2001 First SPC, a special purpose company wholly owned by Shinhan Bank, was disaffiliated from Shinhan Financial Group. CHB Valuemeet 2001 First SPC was established by Shinhan Bank to securitize its impaired loan assets.

Rights Offering

On February 2, 2009, our board of directors decided to issue 78,000,000 new common shares, or approximately 19.7% of our then outstanding common shares, to our existing shareholders in order to, among others, enhance our capital position to prepare for potential contingencies that might result from the prevailing economic environment, notwithstanding that we and our subsidiaries had fully satisfied (as also is the case now) the capital adequacy ratios required under applicable laws and regulations and were not (as also is the case now) facing any significant liquidity constraints or financial distress. The subscription price per share was determined as \textstyle{\textstyle{W}16,800} based on a pricing

formula prescribed by the rules of the Financial Services Commission. On March 19, 2009, the offering was completed with substantially all of the rights shares subscribed by our existing shareholders, and following settlement on March 24, 2009, the newly issued shares were listed on the Korea Exchange on March 30, 2009. The aggregate proceeds from the rights offering was approximately \$1,310,400,000,000 (prior to adjustments for underwriting commissions and other offering expenses). The rights offering resulted in a capital increase by approximately 16.4%. The proceeds from the rights offering were used to support our existing business operations and other general corporate purposes.

Table of Contents

ITEM 4.B. Business Overview

Unless otherwise specifically mentioned, the following business overview is presented on a consolidated basis under U.S. GAAP.

Our Principal Activities

We provide comprehensive financial services, principally consisting of the following:

commercial banking services, consisting of:

retail banking services;

corporate banking services, primarily consisting of:

small- and medium-sized enterprises banking; and

large corporate banking;

treasury and securities investment;

other banking services, including trust account management services provided by Shinhan Bank;

credit card services;

securities brokerage services;

insurance services, primarily consisting of:

life insurance services; and

bancassurance;

asset management services, including brokerage and trading of various securities, related margin lending and deposit and trust services, and other asset management services; and

other services, including leasing and equipment financing, investment trust management, regional banking, investment banking advisory and loan collection and credit reporting.

In addition to the above-mentioned business activities, we have a corporate center at the holding company level whose primary function is to support the cross-divisional management of our organization.

Our principal business activities are not subject to any material seasonal trends. While we have a number of overseas branches and subsidiaries, substantially all of our assets are located, and substantially all of our revenues are generated, in Korea.

Deposit-Taking Activities

Principally through Shinhan Bank, we offer many deposit products that target different customer segments with features tailored to each segment s financial and other profile. Our deposit products consist principally of the following:

Demand deposits. Demand deposits do not accrue interest or accrue interest at a lower rate than time or savings deposits and allow the customer to deposit and withdraw funds at any time. If interest-bearing, demand deposits have interest accruing at a fixed or variable rate depending on the period and the amount of deposit. Demand deposits constituted approximately 7.8% and 7.3% of our total deposits as of December 31, 2008 and 2009, respectively. Our demand deposits paid average interest of 0.78% and 0.45% in 2008 and 2009, respectively.

Savings deposits. Savings deposits allow the customer to deposit and withdraw funds at any time and accrue interest at an adjustable interest rate, which is typically lower than the rate applicable to time or installment deposits. In 2009, the interest rate on savings deposits ranged from zero to 3.31%. Saving deposits constituted approximately 25.6% of our total deposits as of December 31, 2008 and paid average

35

Table of Contents

interest of 2.32% in 2008, and approximately 26.1% of our total deposits as of December 31, 2009 and paid average interest of 1.22% in 2009.

Certificates of deposit. Certificates of deposit typically have maturities from 30 days to five years. Interest rates on certificates of deposit are determined based on the length of the deposit and prevailing market interest rates. Certificates of deposit are sold at a discount to their face value, reflecting the interest payable on the certificates of deposit. Certificates of deposit constituted approximately 11.3% and 5.4% of our total deposits as of December 31, 2008 and 2009, respectively. Our certificates of deposit paid average interest of 5.94% and 5.48% in 2008 and 2009, respectively.

Other time deposits. Other time deposits generally require the customer to maintain a deposit for a fixed term during which the deposit accrues interest at a fixed rate or a variable rate based on certain financial indexes, including the Korea Composite Stock Price Index (KOSPI). If the deposit is withdrawn prior to the end of the fixed term, the customer is paid a lower interest rate than that originally offered. The term typically ranges from one month to five years. Other time deposits constituted approximately 55.1% and 61.1% of our total deposits as of December 31, 2008 and 2009, respectively, and paid average interest of 4.94% and 3.91% in 2008 and 2009, respectively.

Mutual installment deposits. Mutual installment deposits generally require the customer to make periodic deposits of a fixed amount over a fixed term (usually six months to five years) during which the deposit accrues interest at a fixed rate. If the deposit is withdrawn prior to the end of the fixed term, the customers are paid a lower interest rate than that originally offered. Mutual installment deposits constituted approximately 0.2% and 0.1% of our total deposits as of December 31, 2008 and 2009, respectively, and paid average interest of 3.78% and 3.70% in 2008 and 2009, respectively.

We also offer deposits which provide the customer with preferential rights to housing subscriptions under the Housing Construction Promotion Law, and eligibility for mortgage loans. These products include:

Housing subscription time deposits. These deposit products are special purpose time deposits providing the customer with a preferential right to subscribe for new private apartment units under the Housing Construction Promotion Law. This law provides various measures supporting the purchase of houses and the supply of such houses by construction companies. Under this law, if a potential home-buyer subscribes for these deposit products and holds them for a certain period of time set forth in the Housing Construction Promotion Law, such customer obtains the right to subscribe for new private apartment units on a priority basis. Such preferential rights are neither transferable nor marketable in the open market. These products accrue interest at a fixed rate for one year and at an adjustable rate after one year, which are consistent with other time deposits. Required deposit amounts per account range from \text{\text{\$\text{\$W\$}}2} million to \text{\$\text{\$\text{\$\text{\$W\$}15}} million depending on the size and location of the dwelling unit. These deposit products target high- and middle-income households as customers.

Housing subscription installment savings deposits. These deposit products are monthly installment savings products providing the customer with a preferential subscription right for new private apartment units under the Housing Construction Promotion Law. Such preferential rights are neither transferable nor marketable in the open market. These deposits require monthly installments of \(\pi\)50,000 to \(\pi\)500,000, have maturities between three and five years and accrue interest at fixed rates depending on the term, which are consistent with other installment savings deposits. These deposit products target low- and middle -income households as customers. For information on our deposits in Korean Won based on the principal types of deposit products we offer, see Description of Assets and Liabilities Funding Deposits.

We offer a range of interest rates on our deposit products depending on the rate of return on our interest-earning assets, average funding costs and interest rates offered by other major commercial banks.

We also offer court deposit services for litigants in Korean courts, which involve providing effectively an escrow service for litigants involved in certain types of legal or other proceedings. Chohung Bank historically was a dominant provider of such services since 1958, and following the acquisition of Chohung Bank, we continue to hold a dominant market share in these services. Such deposits typically carry interest rates lower than the market rates

36

Table of Contents

(by approximately 1% per annum) and amounted to \$5,167 billion, \$5,100 billion and \$5,706 billion as of December 31, 2007, 2008 and 2009, respectively.

The Monetary Policy Committee of the Bank of Korea imposes a reserve requirement on Won currency deposits of commercial banks which ranges from 0% to 7%, based generally on the term to maturity and the type of deposit instrument. See Supervision and Regulation Principal Regulations Applicable to Banks Liquidity.

The Depositor Protection Act provides for a deposit insurance system where the Korea Deposit Insurance Corporation guarantees to depositors the repayment of their eligible bank deposits. The deposit insurance system insures up to a total of \times 50 million per depositor per bank. See Supervision and Regulation Principal Regulations Applicable to Banks Deposit Insurance System.

Retail Banking Services

Overview

We provide retail banking services primarily through Shinhan Bank, and, to a significantly lesser extent, through Jeju Bank, a regional commercial bank. The retail loans, excluding credit card receivables, amounted to \(\pi\)63,329 billion as of December 31, 2009.

Retail banking services include mortgage and retail lending as well as demand, savings and fixed deposit-taking, checking account services, electronic banking and ATM services, bill paying services, payroll and check-cashing services, currency exchange and wire fund transfer. We believe that providing modern and efficient retail banking services is important to maintaining our public profile and as a source of fee-based income. We believe that our retail banking services and products will become increasingly important in the coming years as the domestic banking sector further develops and becomes more complex.

Retail banking has been and will continue to remain one of our core businesses. Our strategy in retail banking is to provide prompt and comprehensive services to retail customers through increased automation and improved customer service, as well as a streamlined branch network. The retail segment places an emphasis on targeting high net worth individuals.

Retail Lending Activities

We offer various retail loan products, consisting principally of household loans, which target different segments of the population with features tailored to each segment s financial profile and other characteristics, including each customer s profession, age, loan purpose, collateral requirements and the duration of the customer s relationship with Shinhan Bank. Household loans consist principally of the following:

Mortgage and home equity loans, which are mostly comprised of mortgage loans that are used to finance home purchases and are generally secured by the home being purchased; and

Other retail loans, which are loans made to customers for any purpose other than mortgage and home equity loans and the terms of which vary based primarily upon the characteristics of the borrower and which are either unsecured or secured, or guaranteed by deposits or a third party.

As of December 31, 2009, our mortgage and home-equity loans and other retail loans accounted for 63.2% and 36.8%, respectively, of our retail loans (excluding credit card loans).

For secured loans, including mortgage and home equity loans, our policy is to lend up to 40% to 60% of the appraisal value of the collateral, after taking into account the value of any lien or other security interest (other than petty claims) that is prior to our security interest. As of December 31, 2009, the loan-to-value ratio of mortgage and home equity loans, under Korean GAAP, of Shinhan Bank was approximately 46.3%. As of December 31, 2009, substantially all of our mortgage and home equity loans were secured by residential property.

Due to the rapid increase in mortgage and home equity loans in Korea, in 2005 and 2006, the Financial Services Commission implemented stringent regulations and guidelines that are designed to suppress the increase of loans secured by housing. These regulations include restrictions on banks maximum loan-to-value ratios,

37

Table of Contents

evaluation of the borrower s debt-to-income ratio, guidelines with respect to appraisal of collateral, internal control and credit approval policy requirements with regard to housing loans as well as provisions designed to discourage commercial banks or other financial institutions from instituting incentive-based marketing and promotion of housing loans. In addition to the existing regulations and guidelines, from the second half of 2005 to the first quarter of 2007, the Financial Services Commission implemented additional guidelines to reduce mortgage and home equity loans and stabilize the real estate market, including (i) restricting the number of extensions on loans secured by the borrower s apartment to one, (ii) reducing the maximum loan-to-value ratio for loans secured by the borrower s apartment in highly speculated areas, (iii) forbidding to extend mortgage or home equity loans to minors and (iv) lowering the minimum loan-to-value ratio to 40% in respect of loans by banks and insurance companies for the purpose of assisting the purchase of apartments located in highly speculated areas with a purchase price of less than \text{\$\psi}600\$ million. Following the onset of the new administration of President Lee Myung Bak, whose campaign platform included promises of market-oriented deregulation, and in response to the ongoing recession in the housing market, the Government has rolled back some of the restrictive regulatory initiatives, including raising the loan-to-value ratio to 60% except in three designated highly speculative areas. However, in the second half of 2009 amid concerns about the rising level of household debt, of which a substantial majority is secured by residential properties, the Government has expanded the application of the restrictive debt-to-income ratio and the loan-to-value ratio to all metropolitan areas.

The following table sets forth the portfolio of our retail loans.

	As of December 31,					
	2007	2008	2009			
	(In billions of Won, except percentag					
Retail loans(1)						
Mortgage and home-equity(2)	₩ 31,495	₩ 36,183	₩ 40,022			
Other consumer(2)	25,475	25,026	23,307			
Percentage of retail loans to total gross loans	37.5%	35.9%	37.4%			

Notes:

- (1) Before allowance for loan losses and excludes credit card accounts.
- (2) In Korea, construction companies typically require buyers of new homes (including apartment units) to make installment payments of the purchase price well in advance of the title transfer. Commercial banks, including Shinhan Bank, provide advance loans, on an unsecured basis for the time being, to retail borrowers where the use of proceeds is restricted to financing of home purchases. A significant portion of these loans are guaranteed by third parties, which may include the construction company receiving the installment payment, until construction of the home is completed. Once construction is completed and the titles to the homes are transferred to the borrowers, which may take several years, these loans become secured by the new homes purchased by these borrowers. In recognition of the unsecured nature of such loans, we classify such loans as other consumer loans.

Pricing

The interest rates on retail loans made by Shinhan Bank are either floating rates (which are periodically reset based on a base rate determined for three-month, six-month or twelve-month periods derived using an internal transfer price system, which reflects the cost of funding in the market, expenses related to lending and the profit margin) or fixed rates that reflect the cost of funding, expenses related to lending and the profit margin. Fixed rate loans currently have

maturities of three years or less and offered only on a limited basis. For unsecured loans, we incorporate into the offered rates a margin based on, among other things, the borrower s credit score as determined during our loan approval process. For secured loans, the credit limit is based on the type of collateral, priority with respect to the collateral and the loan to value ratio. We can adjust the pricing of these loans to reflect the borrower s current and/or expected future contribution to our profitability. The applicable interest rate is determined at the time a loan is extended. If a loan is terminated prior to its maturity, the borrower is obligated to pay us an early termination fee of approximately 0.5% to 2.0% of the loan amount in addition to the accrued interest, depending on the timing, the nature of the credit and the amount.

38

Table of Contents

As of December 31, 2009, Shinhan Bank's three-month, six-month and twelve-month base rates were approximately 2.85%, 3.49% and 4.05%, respectively. As of December 31, 2009, Shinhan Bank's fixed rates for mortgage and home equity loans with a maturity of one year, two years and three years were 6.60%, 7.10% and 7.20%, respectively, and Shinhan Bank's fixed rates for other retail loans with a maturity of one year were from 9.00% to 13.50%, depending on the retail credit scores of its customers.

As of December 31, 2009, approximately 85.9% of Shinhan Bank s total retail loans were priced based on floating rates and approximately 14.1% were priced based on fixed rates. As of the same date, approximately 96.9% of Shinhan Bank s retail loans with maturity of more than one year were priced based on floating rates and approximately 3.1% were priced based on fixed rates.

Prior to February 2010, major commercial banks in Korea, including Shinhan Bank, principally used the certificate of deposit, or CD, rates set by Bank of Korea, in determining the base rate for secured housing loans, which represent the bulk of retail loans. However, amid concerns that the CD rates do not accurately represent the banks—cost of capital as certificates of deposit constitute relatively a minor fraction of the banks—assets and in light of the substantial variance in recent periods between the CD rates and the actual market rates, in February 2010 the Korean Federation of Banks began to publish the—cost of funding index—, or COFIX, which is computed based on the weighted average interest of select funding products (including time deposits, housing and other installment savings deposits, repos, discounted bills and senior non-convertible financial debentures) of nine major Korean banks (comprised of Kookmin Bank, Shinhan Bank, Woori Bank, Hana Bank, Korea Exchange Bank, NH Bank, Industrial Bank of Korea, Citibank Korea and Standard Chartered Korea First Bank). Each bank can then independently determine the interest rate applicable to the end customer by adding a spread to the COFIX based on the difference between the COFIX and such bank—s general funding costs, administration fees, the customer—s credit score, the maturity of the loan and other customer-specific premiums and discounts based on the customer relationship with such bank. In the case of floating rate notes, the end-user interest rates are adjusted on every three months, six months and 12 months, depending on the reset period of the base rate.

Private Banking

Historically, we have focused on customers with high net worth. Our retail banking services include providing private banking services to high net worth customers who seek personal advice in complex financial matters. Our aim in private banking is to help enhance wealth accumulation by, and increase the financial sophistication of, our high net-worth clients by offering them portfolio and fund management, tax consulting and real estate management services, among others.

As of December 31, 2009, Shinhan Bank operated 19 private banking centers nationwide, including 15 in the greater Seoul metropolitan area, which serviced approximately 4,000 private banking customers. Our private banking customers are typically required to have \times 500 million in deposit with us to qualify for private banking services.

Corporate Banking Services

Overview

We provide corporate banking services, primarily through Shinhan Bank, to small- and medium-sized enterprises, including enterprises known as small office, home office (SOHO), which are small enterprises operated by individuals or households, and, to a lesser extent, to large corporations, including corporations that are affiliated with *chaebols*. We also lend to government-controlled enterprises.

Table of Contents

The following table sets forth the balances and percentage of our total lending attributable to each category of our corporate lending business as of the dates indicated.

		2007	As of December 31, 2008 (In billions of Won, except percentage				ıtage	2009 s)	
Small- and medium-sized enterprises loans(1) Large corporate loans(2)	₩	62,296 17,871	41.0% 11.8%	₩	71,212 23,483	41.8% 13.7%	₩	69,571 21,238	41.1% 12.5%
Total corporate loans	₩	80,167	52.8%	₩	94,695	55.5%	₩	90,809	53.6%

Notes:

- (1) Represents the principal amount of loans extended to corporations meeting the definition of small- and medium-sized enterprises under the Basic Act on Small- and Medium-sized Enterprises and its Presidential Decree.
- (2) Includes loans to government-controlled companies.

Small- and Medium-sized Enterprises Banking

Under the Basic Act on Small- and Medium-sized Enterprises and its Presidential Decree, small- and medium-sized enterprises are defined as companies which (i) do not have employees, sales, paid-in capital or assets exceeding the number or the amount, as the case may be, specified in the Presidential Decree in accordance with their types of businesses and (ii) do not belong to a conglomerate as defined in the Monopoly Regulations and Fair Trade Act. In order to qualify as a small- and medium-sized enterprise, none of its shareholders holding 30% or more of its total issued and outstanding voting shares can have (i) full-time employees of 1,000 or more and (ii) assets of \$\pi\$500 billion or more as of the end of the immediately preceding fiscal year. As of December 31, 2009, we made loans to 186,003 small- and medium-sized enterprises for an aggregate amount \$\pi\$69,571 billion.

Our small- and medium-sized enterprises banking business has traditionally been and is expected to remain one of our core businesses, subject to prevailing market conditions. For example, as a result of the adoption of restrictive regulatory measures in 2005 to 2007 designed to curb speculation in the housing market, lending to the small- and medium-sized enterprises was an area of intense competition among the commercial banks in Korea as opportunities to expand home and mortgage loans diminished. However, since the onset of the global financial crisis and economic downturns in Korea starting in the second half of 2008, we have sharply reduced new lending to the small- and medium-sized enterprises and are currently focusing on maintaining the asset quality of existing loans to these enterprises. Depending on the level and scope of economic recovery, we may seek to focus on asset growth on a selective basis.

We believe that Shinhan Bank, which has traditionally focused on small- and medium-sized enterprises lending, is well-positioned to succeed in the small- and medium-sized enterprises market in light of its marketing capabilities (which we believe have provided Shinhan Bank with significant brand loyalty) and its prudent risk management practices, including conservative credit rating system for credit approval. To maintain or increase its market share of small- and medium-sized enterprises lending, Shinhan Bank:

has positioned itself based on accumulated expertise. We believe Shinhan Bank has a good understanding of the credit risks embedded in this market segment and to develop loan and other products specifically tailored to the needs of this market segment;

operates a relationship management system to provide targeted and tailored customer service to small-and medium-sized enterprises. Shinhan Bank currently has relationship management teams in 142 corporate banking branches, of which 38 are corporate banking branches and 104 are hybrid banking branches designed to serve retail as well as small-business corporate customers. These relationship management teams market products and review and approve smaller loans that pose less credit risks; and

continues to focus on cross-selling loan products with other products. For example, when Shinhan Bank lends to small- and medium-sized enterprises, it also explores opportunities to cross-sell retail loans or deposit products to the employees of those companies or to provide financial advisory services.

40

Table of Contents

Large Corporate Banking

Large corporate customers consist primarily of member companies of *chaebols* and financial institutions. Our large corporate loans amounted to \(\foware 21,238\) billion as of December 31, 2009.

Shinhan Bank aims to be a one-stop financial solution provider and partner with its corporate clients in their corporate expansion and growth endeavors. To this end and in order to take advantage of the recent deregulation in the Korean financial industry as a result of the adoption of the Financial Investment Services and Capital Markets Act, Shinhan Bank provides investment banking services, including real estate financing, overseas real estate project financing, large development project financing, infrastructure financing, structured financing, equity investments/venture investments, mergers and acquisitions financing, ship and aircraft financing, corporate finance and asset securitization. Shinhan Bank, through Shinhan Asia Limited, a subsidiary in Hong Kong, also arranges financing for, and offer consulting services to, Korean companies expanding their business overseas, particularly in Asia.

Electronic Corporate Banking

Shinhan Bank offers to corporate customers a web-based total cash management service through Shinhan Bizbank. Shinhan Bizbank supports all types of banking transactions from basic transaction history inquiries and fund transfers to opening letters of credit, trade finance, payment management, collection management, sales settlement service, acquisition settlement service, B2B settlement service, sweeping and pooling.

Corporate Lending Activities

Our principal corporate loan products are working capital loans and facilities loans. Working capital loans, which include discounted notes and trade financing, are generally loans used for general working capital purposes. Facilities loans are provided to finance the purchase of equipment and construction of manufacturing plants. As of December 31, 2009, working capital loans and facilities loans amounted to \(\frac{\psi}{44}\), 960 billion and \(\frac{\psi}{41}\), 754 billion, respectively, representing 75.7% and 24.3% of Shinhan Bank s total Won-denominated corporate loans under Korean GAAP. Working capital loans generally have a maturity of one year, but may be extended on an annual basis for an aggregate term of three years in the case of unsecured loans and five years in the case of secured loans. Facilities loans, which are generally secured, have a maximum maturity of ten years.

Corporate loans may be unsecured or secured by real estate, deposits or guaranty certificates. As of December 31, 2009, under Korean GAAP, secured loans and guaranteed loans (including loans secured by guaranty certificates issued by credit guarantee insurance funds) accounted for 44.8% and 10.2%, respectively, of Shinhan Bank s Won-denominated loans to small- and medium-sized enterprises. Among total corporate loans, approximately 40% were secured by real estate.

When evaluating the extension of loans to corporate customers, Shinhan Bank reviews their creditworthiness, credit scoring, value of any collateral or third party guarantee. The value of collateral is defined using a formula that takes into account the appraised value of the collateral, any prior liens or other claims against the collateral and an adjustment factor based on a number of considerations including the average value of any nearby property sold in a court-supervised auction during the previous year. Shinhan Bank revalues any collateral when a secured loan is renewed or if a trigger event occurs with respect to the underlying loan.

Pricing

Shinhan Bank prices its corporate loan products based principally on the cost of funding and the expected loss rate based on the borrower scredit risk. As of December 31, 2009, 80.2% of Shinhan Bank scorporate loans with outstanding maturities of one year or more had variable interest rates.

Shinhan Bank determines the interest rate charged for its corporate loans as the sum of (i) Shinhan Bank s periodic market floating rate or reference rate, (ii) transaction cost, (iii) credit spread and (iv) risk premium, as adjusted by (v) a discretionary adjustment rate.

41

Table of Contents

Depending on the market condition and the agreement with the borrower, Shinhan Bank may use either its periodic market floating rate or the reference rate as the base rate in calculating its pricing. As of December 31, 2009, Shinhan Bank s periodic market floating rates (which are based on a base rate determined for three-month, six-month, one-year, two-year, three-year or five-year periods derived using Shinhan Bank s market rate system) were 2.85% for three months, 3.49% for six months, 4.05% for one year, 4.85% for two years, 5.16% for three years and 5.70% for five years. As of the same date, Shinhan Bank s reference rate was 8.75%.

Transaction cost is added to reflect the standardized transaction cost assigned to each loan product and other miscellaneous costs, including contributions to the Credit Guarantee Fund, and education taxes. The Credit Guarantee Fund is a statutorily created entity that provides credit guarantees to loans made by commercial banks and is funded by mandatory contributions from commercial banks in the amount of approximately 0.2% of all loans made by them.

The credit spread is added to the periodic floating rate to reflect the expected loss based on the borrower s credit rating and the value of any collateral or payment guarantee. In addition, Shinhan Bank adds a risk premium that is measured by an unexpected loss that exceeds the expected loss from the credit rating assigned to a particular borrower.

A discretionary adjustment rate is added or subtracted to reflect the borrower s current and/or future contribution to Shinhan Bank s profitability. In the event of additional credit provided by way of a guarantee of another loan, a subtraction is made by the amount of the adjustment rate in order to reflect such change in the credit spread. In addition, depending on the price and other terms set by competing banks for similar borrowers, Shinhan Bank may reduce the interest rate charged in order to compete more effectively with other banks.

Treasury and Securities Investment

Shinhan Bank engages in treasury and securities investment business, which involves, among other things, the following activities:

treasury;
securities investment and trading;
derivatives trading; and
international business.

Treasury

Shinhan Bank s treasury division provides funds to all of Shinhan Bank s business operations and ensures the liquidity of its operation. To secure stable long-term funds, Shinhan Bank uses fixed and floating rate notes, debentures, structured financing, and other advanced funding methods. As for overseas funding, Shinhan Bank closely monitors the feasibility of raising funds in currencies other than the U.S. dollar, such as Japanese Yen and Euro. In addition, Shinhan Bank makes call loans and borrows call money in the short-term money market. Call loans are short-term lending among banks and financial institutions in either Korean Won or foreign currencies with minimum transaction amounts of \textstyle{\textstyle{W}}100 million and maturities of typically one day.

Securities Investment and Trading

Shinhan Bank invests in and trades securities for its own accounts in order to maintain adequate sources of liquidity and generate interest and dividend income and capital gains. Shinhan Bank strading and investment portfolios consist

primarily of Korean treasury securities and debt securities issued by Korean government agencies, local governments or certain government-invested enterprises and debt securities issued by financial institutions, and equity securities listed in the KRX KOSPI Market and KRX KOSDAQ Market of the Korea Exchange. For a detailed description of our securities investment portfolio, see Description of Assets and Liabilities Investment Portfolio.

42

Table of Contents

Derivatives Trading

Shinhan Bank provides and trades a range of derivatives products, including:

interest rate swaps, options, and futures relating to Korean Won interest rate risks and LIBOR risks, respectively;

cross-currency swaps largely for Korean Won against U.S. dollars, Japanese Yen and Euros;

equity and equity-linked options;

foreign currency forwards, swaps and options;

commodity forwards, options and swaps;

credit derivatives; and

KOSPI 200 indexed equity options.

Shinhan Bank s trading volume in notional amount was W395,015 billion and W621,776 billion, in 2008 and 2009, respectively. Such derivative operations generally focus on addressing the needs of Shinhan Bank s corporate clients to hedge their risk exposure and back-to-back derivatives entered into to hedge Shinhan Bank s risk exposure that results from such client contracts.

Shinhan Bank also enters into derivative contracts to hedge the interest rate and foreign currency risk exposures related to its own assets and liabilities. In addition, to a limited extent, Shinhan Bank engages in proprietary trading of derivatives within our regulated open position limits. See Description of Assets and Liabilities Derivatives.

International Business

Shinhan Bank also engages in treasury and investment activities in international capital markets, principally including foreign currency-denominated securities trading, foreign exchange trading and services, trade-related financial services, international factoring services and foreign retail banking operations through its overseas branches and subsidiaries. Shinhan Bank aims to become a leading bank in Asia and expand its international business and by focusing on further bolstering its overseas network, localizing its overseas operations and diversifying its product offerings, particularly in terms of asset management, in order to meet the various financing needs of its current and potential customers overseas.

Trust Account Management Services

Overview

Shinhan Bank s trust account management services include management of trust accounts, primarily in the form of money trusts. Trust account customers are typically individuals seeking higher rates of return than those offered by bank account deposits. Because deposit reserve requirements do not apply to deposits held in trust accounts as opposed to deposits held in bank accounts, and regulations over trust accounts tend to be less strict, Shinhan Bank is generally able to offer higher rates of return on trust account products than on bank deposit products. However, due to the ongoing low interest environment, in recent years, Shinhan Bank has not been able to offer attractive rates of return on its trust account products.

Trust account products generally require higher minimum deposit amounts than those required by comparable bank account deposit products. Unlike bank deposit products, deposits in trust accounts are invested primarily in securities and, to a lesser extent, in loans, as the relative shortage of funding sources require that trust accounts be invested in a higher percentage of liquid assets.

Under the Banking Act of 1950, as amended, assets in trust accounts are required to be segregated from other assets of the trustee bank and are not available to satisfy the claims of the depositors or other creditors of such bank.

Accordingly, trust accounts are accounted for and reported separately from the bank accounts. See Supervision and Regulation. Trust accounts are regulated by the Trust Act and the Financial Investment Services and Capital

43

Table of Contents

Markets Act, and most national commercial banks offer similar trust account products. Shinhan Bank earns income from trust account management services, which is recorded as net trust management fees. See Item 5.A. Operating Results Results of Operation 2009 Compared to 2008 Non-interest Income.

As of December 31, 2008 and 2009, under Korean GAAP, Shinhan Bank had total trust assets of \(\pi37,123\) billion and \(\pi32,537\) billion, respectively, comprised principally of real property investments of \(\pi9,942\) billion and \(\pi10,030\) billion, respectively, securities investments of \(\pi10,628\) billion and \(\pi7,208\) billion, respectively, and loans in the principal amount of \(\pi744\) billion and \(\pi623\) billion, respectively. Securities investments consisted of corporate bonds, government-related bonds and other securities, primarily commercial paper. As of December 31, 2007, 2008 and 2009, equity securities constituted 3.4%, 3.0% and 3.1%, respectively, of Shinhan Bank s total trust assets under Korean GAAP. Loans made by trust accounts are similar in type to those made by bank accounts, except that they are made only in Korean Won. As of December 31, 2007, 2008 and 2009, under Korean GAAP, approximately 60.4%, 64.4% and 61.6%, respectively, of the amount of loans from the trust accounts were collateralized or guaranteed. In making investment from funds received for each trust account, each trust product maintains investment guidelines applicable to each such product which sets forth, among other things, company-, industry- and security-type limitations.

Trust Products

Money trusts managed by Shinhan Bank s trust account business amounted to W12,822 billion and W9,905 billion as of December 31, 2008 and 2009, under Korean GAAP. In Korea, a money trust is a discretionary trust over which (except in the case of a specified money trust) we have investment discretion subject to applicable law and is commingled and managed jointly for each type of trust account. The specified money trusts are established on behalf of customers who give specific directions as to the investment of trust assets.

Shinhan Bank offers primarily two types of money trust accounts through its retail branch network: guaranteed fixed rate trusts and variable rate trusts.

variable rate trust accounts. Variable rate trust accounts are not entitled to a guaranteed return on the deposits, except in the limited cases of principal guaranteed variable rate trust accounts, for which payment of the principal amount is guaranteed. As of December 31, 2008 and 2009, under Korean GAAP, Shinhan Bank s variable rate trust accounts amounted to \(\pi\9,311\) billion and \(\pi\6,425\) billion, respectively, and its principal guaranteed variable rate trust accounts amounted to \(\pi\3,510\) billion and \(\pi\3,479\) billion, respectively. Shinhan Bank charges a lump sum or a fixed percentage of the assets held in such trusts as a management fee, and, depending on the trust products, is also entitled to additional fees in the event of early termination of the trusts by the customer. Korean banks, including Shinhan Bank, are currently allowed to guarantee the principal of the following types of variable rate trust account products: (i) existing individual pension trusts, (ii) new individual pension trusts, (iii) existing retirement pension trusts, (iv) new retirement pension trusts, (v) pension trusts and (vi) employee retirement benefit trusts.

guaranteed fixed rate trust accounts. Guaranteed fixed rate trust accounts are entitled to a guaranteed return of the principal as well as an additional fixed rate of return. Upon termination of these trusts, Shinhan Bank is entitled to investment returns from the management of these trusts, net of the guaranteed returns paid to customers and any related expenses. In the past, Korean commercial banks, including Shinhan Bank, offered two types of guaranteed fixed rate trust products: general unspecified money trusts and development money trusts. However, since January 1999, banks in Korea have been prohibited from offering new guaranteed fixed rate trust products, and the guaranteed fixed rate trust products currently serviced are carryovers from the past and have been dwindling in volume as the products mature. As of December 31, 2008 and 2009, the guaranteed fixed rate trust products maintained by Shinhan Bank amounted to \(\pi\)1.0 billion and \(\pi\)1.0 billion, respectively,

under Korean GAAP. If income from a guaranteed fixed rate trust account is insufficient to pay the guaranteed amount, such deficiency must be satisfied from (i) first, special reserves maintained in such trust accounts, (ii) secondly, trust fees and (iii) lastly, funds transferred from the bank accounts of Shinhan Bank.

Credit Card Services

Overview

We currently provide credit card services through our credit card subsidiary, Shinhan Card.

Former Shinhan Card was originally formed as a result of the spin-off of Shinhan Bank s credit card business in June 2002. In April 2006, the credit card division of Chohung Bank was split and merged into former Shinhan Card concurrently with the merger of Chohung Bank and Shinhan Bank. Following such split-merger, former Shinhan Card had, as of April 3, 2006, \(\pi 3.4\) trillion (reported basis) or \(\pi 3.8\) trillion (managed basis) in assets, in each case, under Korean GAAP. Prior to the merger of former Shinhan Bank and Chohung Bank in April 2006, Chohung Bank had an active credit card business division. Chohung Bank was a member of BC Card Co., Ltd. (BC Card), which is owned by consortium banks. Shinhan Card currently holds 14.85% equity interest in BC Card. BC Card issues credit cards under the names of the member banks, substantially all of which are licensed to use MasterCard, Visa or JCB. This enables holders of BC Card to use their cards at any establishment which accepts MasterCard, Visa or JCB, as the case may be.

In March 2007, we acquired the controlling equity interest in LG Card. On October 1, 2007, LG Card assumed all of the assets and liabilities of former Shinhan Card and changed its name to Shinhan Card. We believe that the acquisition of LG Card, which was the largest credit card company in Korea in terms of the number of cardholders, has contributed to our having the largest market share in the Korean credit card industry and diversifying our revenue sources from our non-banking operations.

Products and Services

Shinhan Card offers a wide range of credit card and other services, principally consisting of the following:

credit card services, which involve providing cardholders with limited credit to purchase products and services. Cardholders can repay either (i) on a lump-sum basis in full at the end of a monthly billing cycle or (ii) to a lesser extent, on a revolving basis subject to a minimum monthly payment which is the lesser of (x) 5.0% of the amount outstanding or (y) \times 30,000. Currently, the outstanding credit card balance generally accrues interest at an annual rate of approximately 9.8% to 26.9%, depending on the credit profile of the cardholder.

cash advances, for which cardholders can repay either on a lump-sum basis or a revolving basis. Currently, the lump-sum cash advances generally accrue interest at an annual rate of approximately 9.8% to 26.6% and the revolving cash advances generally accrue interest at a minimum rate of 5.0% of the outstanding balance. Cash advances may be obtained from ATM machines and bank branches.

installment purchases, which provides customers with an option to purchase products and services from select merchants on an equal principal installment basis over a fixed term, which ranges from three months to a maximum of 60 months. Currently, the outstanding installment purchase balances generally accrue interest at an annual rate of approximately 5.5% to 26.0%.

card loans, which may be unsecured, and which cardholders must repay on an equal principal installment basis over an initial fixed term of two to 24 months or in full at maturity. Currently, the outstanding principal amount of card loans accrue interest at an annual rate of approximately 7.6% to 25.8% and an upfront fee of up to 1.0% is charged on the principal amount of the loan. For delinquent cardholders, outstanding credit card receivables

can also be restructured into loan, which are recorded as card loans and payment for which is made on an installment basis over a maximum term of 60 months.

Shinhan Card also derives fee income in the form of lump-sum fees, installment purchase fees and cash advance fees and, to a lesser extent, annual membership fees and penalty interest on late and deferred payments and fees paid by merchants. Shinhan Card passes onto its customers the transaction fees charged by financial institutions (other than Shinhan Bank) for cash advances made through ATMs of such financial institutions. Any accounts that are unpaid when due are deemed to be delinquent accounts, for which Shinhan Card charges a penalty interest in the range of 25.0% to 29.9% per annum in lieu of the interest rates applicable prior to default.

45

Table of Contents

The annual membership fees for credit cards vary depending on the type of the card and the benefits offered for such card. For our standard cards, we charge an annual membership fee ranging from \(\mathbb{W}3,000\) to \(\mathbb{W}1,000,000\) per card, depending on the type of the credit card and the cardholder profile. Annual membership fees for various affinity and co-branded cards are higher and vary from \(\mathbb{W}5,000\) to \(\mathbb{W}500,000\).

Merchant discount fees, which are processing fees Shinhan Card charges to the merchants, can be up to 4.5% of the purchased amount depending on the merchant used, with the average charge being 2.15% in 2009.

Although making payments on a revolving basis is quite common in many other countries, this payment method is still in its early stages of implementation in Korea. Cardholders in Korea are generally required to repay their purchases within approximately 15 to 45 days of purchase depending on their payment cycle, except in the case of installment purchases. Installment purchases typically have a repayment term of three to six months and charge different rates depending on the duration of the repayment term.

In addition to credit card services, Shinhan Card also offers check cards, which are similar to debit cards in the United States, to its retail customers as well as corporate customers. A check card can be used at any of the merchants that accept credit cards issued by Shinhan Card and the amount charged to a check card is directly debited from the cardholder s designated bank account. Although Shinhan Card does not charge annual membership fees on check cards, merchants are charged fees on the amount purchased using check cards at a rate similar to those used for credit card purchases.

Customers and Merchants

In addition to internal growth through cross-selling, we also seek to enhance our market position by selectively targeting new customers with high net worth and solid credit quality through the use of a sophisticated and market-oriented risk management system. Shinhan Card screens its credit card applicants and sets individualized credit limits for such applicants according to internal guidelines based on a comprehensive credit scoring system.

The following table sets forth the number of customers and merchants of Shinhan Card as of the dates indicated.

	As of December 31,					
	2007	2008	2009			
	(In thousands, except percentages)					
Shinhan Card:						
Number of credit card holders(1)	13,425	13,718	14,435			
Personal accounts	13,346	13,617	14,324			
Corporate accounts	79	101	111			
Active ratio(2)	69.7%	74.9%	73.7%			
Number of merchants	2,154	2,268	2,425			

Notes:

- (1) Represents the number of cardholders not subject to suspension or termination as of the relevant date.
- (2) Represents the ratio of accounts used at least once within the last six months to the total accounts as of yearend.

Financial and Statistical Information

The following table sets forth certain financial and statistical information relating to the credit card, installment sales and leasing operations of Shinhan Card as of the dates or for the period indicated.

Notes:

- (1) The information of Shinhan Card for 2007 includes that of LG Card (renamed as Shinhan Card on October 1, 2007) for the period from March 1, 2007 through December 31, 2007 (including that for the assets and liabilities of former Shinhan Card assumed by LG Card on October 1, 2007) and that of former Shinhan Card for the period from January 1, 2007 through September 30, 2007, presented on an aggregated basis.
- (2) Card loans consist of loans that are provided on either a secured or unsecured basis to cardholders according to prior agreement. Payment of principal, fees and interest on such a loan can be due either in one payment or in installments over a fixed period following a grace period.
- (3) Merchant fees consist of merchant membership and maintenance fees, charges associated with prepayment by Shinhan Card (on behalf of customers) of sales proceeds to merchants, processing fees relating to sales and membership applications.
- (4) Represents the aggregate cumulative amount charged during the year.

- (5) Represents amounts before allowance for loan losses.
- (6) Includes the unbilled balances of installment purchases.
- (7) Represents the ratio of delinquent balances to outstanding balances for the year.
- (8) The charge-off policy is generally to charge off credit card balances which are 180 days past due following internal review.
- (9) Represents the delinquent credit card balances for credit card purchase and cash advances which are rewritten as credit card loans, thereby reducing the balance of delinquent accounts before the application of Accounting Standard Codification (ASC) 310-30, (formerly SOP 03-3) relating to the acquisition of LG Card, which reduced the outstanding balances by \text{\psi}322 billion, \text{\psi}165 billion and \text{\psi}84 billion as of December 31, 2007, 2008 and 2009, respectively.
- (10) Represents the ratio of gross charge-offs for the year to the average balance for the year.

Table of Contents

- (11) Represents the ratio of net charge-offs for the year to the average balances for the year.
- (12) The reported information is presented on the Korean GAAP basis. The managed information includes, subject to certain adjustments, financial receivables that Shinhan Card has sold in asset-backed securitizations.
- (13) Represents credit card balances that were transferred in asset securitization transactions as presented on the Korean GAAP basis. Under U.S. GAAP, most of these transfers are not recognized as sales but are recognized as secured borrowings.

Presentation of Managed Data for Shinhan Card s Asset Securitization transactions

Shinhan Card periodically securitizes and sells credit card receivables to diversify its funding sources. The effect of these transactions under Korean GAAP is to remove such receivables from Shinhan Card s balance sheet although Shinhan Card retains recourse liabilities for ineligible receivables and generally repurchases the securitized receivables upon their maturity. However, under U.S. GAAP, such securitization transactions can be accounted for as sales transactions and be removed from our balance sheet only if certain specific criteria are met. Most of the transactions do not meet those criteria, and thus the removal treatment performed under Korean GAAP is reversed and those receivables are included in our balance sheet. Shinhan Card continues to manage such securitized and sold receivables including billing and payment as well as record keeping, and receives service fees from the securitization vehicles for servicing such receivables. We believe that the disclosure of the credit experience of Shinhan Card s managed portfolio presents a more complete presentation of our credit exposure because the managed data reflects not only on-balance sheet receivables but also securitized assets as to which Shinhan Card retains a risk of loss in the underlying assets, primarily in the form of subordinated retained interests. In addition, because Shinhan Card tends to transfer to securitization vehicles assets which generally are in the higher asset qualification categories, the managed basis figures generally tend to exhibit higher net interest spreads and net interest margins and lower delinquency ratios. The managed financial information and operating data are not audited and are not presented or prepared in accordance with Korean GAAP or on the same basis as the audited financial information included in this offering circular. Managed financial data is derived from an arithmetic summation of Shinhan Card s on-balance sheet receivables together with receivables sold in off-balance sheet transactions subject to certain adjustments. As a result of these adjustments, managed financial data is not the simple sum of the reported accounts and Shinhan Card s off-balance sheet transactions. Accordingly, the financial information contained in the reported accounts and the managed financial data are not directly comparable and should not be so compared. While Shinhan Card prepares managed financial data based upon assumptions and methods it deems reasonable, the managed financial data do not accurately represent its financial condition or results of operations as if it had not conducted any ABS transactions and the managed operating data do not accurately reflect its results of operations.

Securities Brokerage Services

Overview

Through Shinhan Investment, we provide a wide range of financial investment services to our diversified customer base including corporations, institutional investors, governments and individuals. Financial investment services offered by Shinhan Investment range from securities brokerage to our retail and institutional customers, investment advice and financial planning services to our retail customers, as well as investment banking services such as underwriting and M&A advisory services to our institutional customers.

As of December 31, 2009, according to internal data, Shinhan Investment s annual market share of Korean equity brokerage market was 5.39% (consisting of 4.38% in the retail segment, 0.52% in the institutional segment and 0.49%

in the international segment) in terms of total brokerage volume, ranking fourth among securities firms in Korea, excluding discount brokers such as Mirae Asset Securities and Kiwoom Securities. As of the same date, according to internal data, Shinhan Investment held the largest annual market shares in the Kospi200 futures and options brokerage segments of 8.30% and 9.45%, respectively, in terms of total brokerage volume with respect to these products, which we believe will enable Shinhan Investment to further solidify its market position in its futures trading and brokerage services as it expands these services.

49

Table of Contents

Following the implementation of the Financial Investment Services and Capital Markets Act in February 2009, Shinhan Investment has obtained requisite approvals for its existing businesses in investment banking services, securities brokerage services, trust services, investment advisory service and discretionary account asset management services. In November 2009, Shinhan Investment also obtained the requisite approval for existing and new derivatives businesses, which enables Shinhan Investment to provide not only its existing services in equity- and stock index-linked derivatives sales and brokerage, but also proprietary trading and brokerage services for futures involving interest rates, currency and commodities as well as foreign exchange margin trading. Shinhan Investment currently provides all of the foregoing services, subject to prevailing market conditions, and is currently preparing to submit a license application to engage in collective investment development businesses.

Products and Services

Shinhan Investment provides principally the following services:

retail client services. These services include equity and bond brokerage, investment advisory and financial planning services to retail customers, with a focus on high net worth individuals. The fees generated include brokerage commissions for the purchase and sale of securities, asset management fees, interest income from credit extensions, including in the form of stock subscription loans, margin transaction loans and loans secured by deposited securities.

institutional client services:

brokerage services. These services include brokerage of stocks, corporate bonds, futures and options provided to Shinhan Investment s institutional and international customers and sale of institutional financial products. These services are currently supported by a team of 62 research analysts that specialize in equity, bonds and derivatives research.

investment banking services. These services include a wide array of investment banking services to Shinhan Investment s corporate customers, such as domestic and international initial public offerings, M&A advisory services, bond issuances, underwriting, capital increase, asset-backed securitizations, issuance of convertible bonds and bonds with warrants, structured financing, issuance of asset-backed commercial papers, mergers and acquisitions advisory services and project financings involving infrastructure, real estate and shipbuilding.

Shinhan Investment also engages, to a limited extent, in proprietary trading in equity and debt securities, derivative products and over-the-counter market products.

With respect to brokerage services, in the face of intense competition in the domestic brokerage industry, Shinhan Investment primarily focuses on strengthening profitability through service differentiation and efficient management of its distribution network rather than enlarging its market share indiscriminately through lowering fees and commissions. Shinhan Investment service differentiation efforts include offerings its customers opportunities to purchase stocks in a wide range of countries (currently more than 20 countries), leveraging synergy opportunities afforded by affiliation with other Shinhan entities such as offering brokerage accounts maintained at Shinhan Bank and Shinhan Capital.

With respect to investment banking services, Shinhan Investment provides such services through four divisions consisting of equity capital markets, corporate finance, project finance and mergers and acquisitions, as well as two overseas service centers in Hong Kong and Shanghai

Insurance Services

Life Insurance

We provide life insurance products and services primarily through Shinhan Life Insurance. Shinhan Life Insurance provides its services through diversified distribution channels consisting of financial planners, telemarketers, agency marketers and bancassurance specialists. As of the end of fiscal years ended March 31, 2009 and March 31, 2010, under Korean GAAP, Shinhan Life Insurance had total assets of \(\mathbb{W}8,816.8\) billion and \(\mathbb{W}10,437\) billion and net profits of \(\mathbb{W}134.2\) billion and \(\mathbb{W}190\) billion, respectively. During its fiscal year 2009,

50

Table of Contents

among 22 life insurance companies in Korea, Shinhan Life Insurance ranked second in terms of net profit and sixth in terms of insurance premium received, principally due to increased sales of health insurance policies, stable asset portfolio management and prudent risk management. We expect the insurance premium received by Shinhan Life Insurance to increase as a result of growing demands for both investment and annuity products and potential synergy effects from cross-selling between Shinhan Life Insurance and our banking and other subsidiaries

Asset Management Services

In addition to personalized wealth management services provided as part of our private banking and securities brokerage services, we also provide asset management services through Shinhan BNP Paribas Asset Management, a joint venture with BNP Paribas Investment Partners, of which we and BNP Paribas Investment Partners hold 65:35 interests, respectively. Shinhan BNP Paribas Asset Management was formed on January 1, 2009 through the merger of Shinhan BNP Paribas Investment Trust Management, our 50:50 joint venture with BNP Paribas Investment Partners, and SH Asset Management, our wholly-owned subsidiary, in order to streamline our asset management services capabilities. Shinhan BNP Paribas Asset Management ranked third among asset managers in Korea in terms of assets under management as of December 31, 2009, and provides a wide range of investment products, including traditional equity/fixed income funds as well as alternative investment products, to retail and institutional clients. As a joint venture with BNP Paribas Investment Partners, we believe Shinhan BNP Paribas Asset Management has significantly benefited from BNP Paribas s global network of investment professionals and expertise in the asset management industry. On January 1, 2010, Shinhan BNP Paribas Asset Management had assets under management amounting to approximately \(\frac{\psi}{2}\)32.4 trillion. To a limited extent, Shinhan Investment also provide asset management services for discretionary accounts See

Securities Brokerage Services.

We expect that competition will intensify in the asset management industry as a result of the Financial Investment Services and Capital Markets Act, which became effective in February 2009. Under this Act, a financial investment company, which formerly included securities companies, asset management companies, futures companies and other entities previously engaged in what is currently characterized as financial investment businesses, is now permitted to provide asset management services by obtaining new licenses under the new Act. For more information on the Act, see Supervision and Regulation Financial Investment Services and Capital Markets Act.

Other Services

Through our other subsidiaries, we also provide leasing and equipment financing, regional banking and investment banking and advisory services.

Leasing and Equipment Financing

We provide leasing and equipment financing services to our corporate customers mainly through Shinhan Capital. Established as a leasing company in 1991, Shinhan Capital provides customers with leasing, installment financing and new technology financing, equipment leasing, and corporate credit financing. Shinhan Capital s strength has traditionally been in leasing of ships, printing machines, automobiles and other specialty items, but also offers other leasing and financing services, such as corporate restructuring services for financially troubled companies and financing provided to real estate development projects and infrastructure investments, and following a business transfer from Shinhan Card in November 2007, corporate leasing and equipment financing.

Regional Banking Services

We provide regionally focused commercial banking services, primarily in Jeju Island of Korea, through a majority-owned banking subsidiary, Jeju Bank. Jeju Bank provides retail banking, corporate banking, treasury and

trust account management services, and has a network of 40 branches as of December 31, 2009.

Investment Banking and Advisory Services

In addition to the investment banking services provided by Shinhan Bank and Shinhan Investment, we also provide a variety of investment banking and advisory services through Shinhan Macquarie Financial Advisory, a

51

Table of Contents

51:49 joint venture with Macquarie Bank of Australia. The advisory services offered by Shinhan Macquarie Financial Advisory include project and infrastructure finance, capital and debt raisings, corporate finance advisory, structured finance, mergers and acquisitions, cross-border leasing and infrastructure and specialized fund management advisory services. Since its inception Shinhan Macquarie Financial Advisory has grown to become one of the leading infrastructure-related financial advisory companies in Korea.

Loan Collection and Credit Reporting

We centralize credit collection and credit reporting operations for our subsidiaries through Shinhan Credit Information Co. Ltd., which also provides similar services to third party customers. We plan to expand Shinhan Credit Information s services to other areas such as credit inquiry, credit card rating, civil application/petition services, lease and rental research and advisory and consulting services related to non-performing loan management.

Our Distribution Network

We offer a wide range of financial services to retail and corporate customers through a variety of distribution networks and channels established by our subsidiaries. The following table presents the geographical distribution of our distribution network based on the branch offices and other distribution channels of our principal subsidiaries, as of December 31, 2009.

Distribution Channels in Korea

					Shinhan

Notes:

(1) Includes 12 card sales branches, 11 installment sales branches, 10 collection branches and 15 combined operating branches.

Banking Service Channels

Our banking services are primarily provided through an extensive branch network, complemented with self-service terminals and electronic banking.

As of December 30, 2009, Shinhan Bank s branch network in Korea currently comprised of 925 service centers, consisting of 783 retail banking service centers, 38 corporate banking service centers primarily designed to

52

Table of Contents

serve large corporate customers and 104 hybrid banking branches designed to serve retail as well as small-business corporate customers. Shinhan Bank s banking branches are designed to provide one-stop banking services tailored to their respective target customers.

Retail Banking Channels

In Korea, many retail transactions are conducted in cash or with credit cards, and conventional checking accounts are generally not offered or used as widely as in other countries such as the United States. As a result, an extensive retail branch network plays an important role for Korean banks as customers generally handle most transactions through bank branches. Recently, one of the key initiatives at Shinhan Bank has been to target high net worth individuals through private banking. Our private banking services are provided principally through private banking relationship managers who, within target customer groups, assist clients in developing individual investment strategies. We believe that such relationship managers help us foster enduring relationships with our clients. Private banking customers also have access to Shinhan Bank s retail branch network and other general banking products Shinhan Bank offers through its retail banking operations.

Corporate Banking Channels

Shinhan Bank currently provides corporate banking services through corporate banking service centers primarily designed to serve large corporate customers and hybrid banking branches designed to serve retail as well as small-business corporate customers. Prior to 2009, Shinhan Bank maintained within certain of its retail banking branches corporate relationship management teams (which counted as separate corporate banking branches for classification purposes) in order to serve its small-and medium-sized enterprises customers though its extensive retail banking branch network. In 2009, Shinhan Bank undertook an organizational restructuring to convert such retail banking branches with corporate banking functionalities into hybrid banking branches with the aim that this will help it to better service the small business corporate customers. Small-and medium-sized enterprises have traditionally been Shinhan Bank s core corporate customers and we plan to continue to maintain Shinhan Bank s strength vis-à-vis these customers.

Self-Service Terminals

In order to complement its banking branch network, Shinhan Bank maintains an extensive network of automated banking machines, which are located in branches and in unmanned outlets. These automated banking machines consist of ATMs, cash dispensers and passbook printers. As of December 31, 2009, Shinhan Bank had 942 cash dispensers and 6,264 ATMs. Shinhan Bank actively promotes the use of these distribution outlets in order to provide convenient service to customers, as well as to maximize the marketing and sales functions at the branch level, reduce employee costs and improve profitability. In 2009, automated banking machine transactions accounted for approximately 27.8% and 53.2% of total deposit and withdrawal transactions of Shinhan Bank in terms of the number of transactions and fee revenue generated, respectively.

Electronic Banking

Shinhan Bank s internet banking services are more comprehensive than those available at the counter, including such services as 24 hour account balance posting, real-time account transfer, overseas remittance and loan requests. Shinhan Bank also provides the Mobile Banking service, which enables customers to make speedy, convenient and secure banking transactions using mobile phones. As the purpose of electronic banking is primarily cost-saving rather than profit generation, the substantial majority of Shinhan Bank s electronic banking transactions do not generate fee income.

Uzbekistan Representative Office	Tashkent, Uzbekistan	2009		

Notes:

- (1) While Shinhan Bank established the subsidiary in Japan in 2009, Shinhan Bank provided banking services in Japan through a branch structure since 1986.
- (2) While Shinhan Bank established the subsidiary in Vietnam in 2009, Shinhan Bank provided banking services in Vietnam through a branch structure since 1995.

Currently, our overseas subsidiaries and branches are primarily engaged in servicing Korean companies and Korean nationals in the overseas markets in the areas of trade financing and local currency funding services as well as providing foreign exchange services in conjunction with Shinhan Bank s headquarters and, to a limited extent, investment and trading of securities of foreign issuers. Going forward, as part of our globalization efforts, we plan to

expand our coverage of local customers in the overseas markets by providing a wider range of services in retail and corporate banking, and to that end, we have increasingly established subsidiaries in lieu of branches in select markets, Japan being among the recent examples, in order to make our presence more prominent and enable a greater flexibility in our service offerings in these markets.

Credit Card Distribution Channels

Shinhan Card primarily uses three distribution channels to attract new credit card customers: (i) the banking and credit card branch network, (ii) sales agents, and (iii) business partnerships and affiliations with vendors.

54

Table of Contents

The branch network for our credit card operations consists of 925 banking branches of Shinhan Bank and 27 card sales branches of Shinhan Card. The use of the established branch network of Shinhan Bank is part of the groupwide cross-selling efforts of selling credit card products to the existing banking customers. In 2009, the number of new cardholders acquired through our banking branch network accounted for approximately 18.2% of the total number of new cardholders. We believe that the banking branch network will continue to provide a stable and low-cost venue for acquiring high-quality credit cardholders.

The sales agents represented the most significant source of new cardholders in 2009, and the number of our new cardholders acquired through sales agents accounted for approximately 54.3% of the total number of new cardholders in 2009. As of December 31, 2009, Shinhan Card had 7,339 sales agents, of which 6,454 were independent contractors and 885 were sales agents of Shinhan Card s business partners and affiliates. These sales agents assist prospective customers with the application process and customer service. The compensation to these sales agents is tied to the transaction volume and repayment behavior of the customers introduced by them, and we believe this system helps to minimize credit risk and enhance profitability.

As a way of acquiring new cardholders, Shinhan Card also has business partnership and affiliation arrangements with a number of vendors, including gas stations, major retailers, airlines and telecommunication and Internet service providers, and it plans to continue to leverage its alliances with such vendors to attract new cardholders.

Securities Brokerage Distribution Channels

Our securities brokerage services are conducted principally through Shinhan Investment. As of December 31, 2009, Shinhan Investment had 118 service centers nationwide, and three overseas subsidiaries based in New York, London and Hong Kong to service our corporate customers.

Approximately two-thirds of our brokerage branches are located in the Seoul metropolitan area with a focus on attracting high net worth individual customers as well as enhancing synergy with our retail and corporate banking branch network. We plan to continue to explore new business opportunities, particularly in the corporate customer segment, through further cooperation between Shinhan Investment and Shinhan Bank.

Insurance Sales and Distribution Channels

We sell and provide our insurance services primarily through Shinhan Life Insurance. Shinhan Life Insurance, in addition to distributing bancassurance products through our bank branches, also distributes a wide range of life insurance products through its own branch network, an agency network of financial planners and telemarketers as well as through the Internet. As of December 31, 2009, Shinhan Life Insurance had 160 branches and seven customer support centers. These branches are staffed by financial planners, telemarketers, agent marketers and bancassurance to meet the various needs of our insurance and lending customers. Our groupwide customer support centers arrange for policy loans (namely loans secured by the cash surrender value of the underlying insurance policy) for our insurance customers and, to a limited extent, other loans to other customers, and also handle insurance payments.

Information Technology

We dedicate substantial resources to maintaining a sophisticated information technology system to support our operations management and provide high quality customer service. In order to maximize synergy among our subsidiaries, we are currently continuing to build and implement a single groupwide enterprise information technology system known as enterprise data warehouse. The enterprise data warehouse, which is being continuously upgraded, serves as the foundation to our enhanced customer relations management capabilities, our risk management system as well as our new data processing center currently under development. In addition, we are currently continuing to

upgrade the information technology systems for each of our subsidiaries to enhance the quality of our customer service specific to such subsidiary. We have completed the implementation of improved systems for Shinhan Life Insurance in November 2008 and Shinhan Investment in August 2009, and completed the IT integration for LG Card and former Shinhan Card in August 2008. Since October 2009, we have operated our information and technology system at a groupwide level (rather than the previous subsidiary-specific level) based on a comprehensive groupwide information collection and processing.

55

Table of Contents

Our current information technology initiatives also include installing a financial reporting system meeting the IFRS standards starting the fiscal year 2011 and building a groupwide security management system to further ensure secure financial transactions for our customers. Specifically, we are currently developing a groupwide security monitoring system in order to counter external cyber invasions such as DDoS attacks.

Our information technology system for each of our subsidiaries is currently backed up on a real-time basis. We have established a completely duplicative back-up IT system in different locations in Korea, depending on the subsidiary, to provide a back-up system in the event of any system failure of our primary information technology center located in the suburbs of Seoul. See Item 4.D. Properties. Our information technology system at the group level is currently able to fully resume operation within an hour even in the case of a complete disruption of the information technology system at our headquarters.

Competition

Competition in the Korean financial services industry is, and is likely to remain, intense. In the banking sector, Shinhan Bank competes principally with other major Korean commercial banks and major global banks operating in Korea, as well as Government-run banks, specialized banks and regional banks. In the credit card services factor, Shinhan Card competes principally with existing monoline credit card companies, credit card divisions of commercial banks, consumer finance companies, other financial institutions and recent even mobile telecommunications service providers in Korea. In other financial services sectors, our other subsidiaries also compete in a highly fragmented market. Some of our competitors, particularly the major global financial institutions, have greater experience and resources than we do.

In the small- and medium-sized enterprise and retail banking segments, which have been Shinhan Bank s traditional core businesses, competition has increased significantly and is expected to increase further. Most Korean banks have been focusing on small- and medium-sized enterprises and retail customers in recent years through aggressive marketing campaigns although they have begun to increase their exposure to large corporate borrowers and focus on developing fee income businesses, including bancassurance and investment products, as increasingly important sources of revenue. The competition and market saturation resulting from this common focus may make it more difficult for Shinhan Bank to secure retail and small- and medium-sized customers with the credit quality and on credit terms necessary to maintain or increase its income and profitability. In particular, Shinhan Bank has been pursuing, and intends to continue to pursue, a strategy of maintaining or enhancing its margins where possible and avoid, to the extent possible, entering into price competition. If other banks and financial institutions adopt a strategy of expanding market share through interest rate competition, Shinhan Bank may suffer customer attrition due to rate sensitivity. In addition, Shinhan Bank may in the future decide to compete to a greater extent based on interest rates, which could lead to a decrease in its net interest margins. Any future decline in Shinhan Bank s customer base or its net interest margins as a result of its future competition strategy could have an adverse effect on its results of operations and financial condition.

In the credit card sector, competition has been intensifying and the market has seen further signs of saturation as existing and new credit card service providers have made significant investments and engaged in aggressive marketing campaigns and promotions to acquire new customers and target customers with high credit quality. In addition, other credit card issuers may compete with Shinhan Card for customers by offering lower interest rates and fees, higher credit limits and more attractive promotions and incentives. As a result, Shinhan Card may existing customers, or may lose service opportunities, to competing credit card issuers and/or incur higher marketing expenses. Customer attrition, together with any lowering of interest rates or fees and/or more extensive marketing and promotional campaigns that Shinhan Card might implement to acquire and retain customers, could reduce its revenues and earnings.

Potential consolidation among our rival institutions may make the competitive landscape more adverse to us. For example, in June 2008, the Government announced its plans to privatize Korea Development Bank, one of the Government skey policy bank, and in January 2010, the Government announced its intent to sell its controlling stake in Woori Financial Group, one of the top three financial holding companies in Korea in terms of assets as of December 31, 2009 with a similarly ranked banking operation. If Woori Financial Group were to be acquired by a rival bank or financial holding company, the consolidated entity will have a greater scale of operations, including a

56

Table of Contents

larger customer base, and financial resources than us, which may hurt our ability to compete effectively. Moreover, Lone Star Funds is seeking to sell its controlling stake in Korea Exchange Bank, potentially to a major domestic or international financial institution, and there are market rumors related to a potential merger among our rival financial institutions. Any of these developments, if materialized, may place us at a competitive disadvantage.

Furthermore, as the Korean economy further develops and new business opportunities arise, more competitors may enter the financial services industry. For example, in 2009, SK Telecom acquired an equity interest in Hana Card and Korea Telecom has expressed an interest in acquiring an equity interest in BC Card and both SK Telecom and Korea Telecom have begun to actively provide mobile phone payment services using advanced mobile phone technology. As these two companies are the two largest telecommunications service providers in Korea serving a substantial majority of the Korean population, a widespread consumer acceptance of mobile phone payment services in lieu of credit card services could pose a serious competitive threat to the existing credit card service providers, including our credit card subsidiary.

Competition in the Korean financial services industry may also intensify as a result of deregulation. For example, the Financial Investment Services and Capital Markets Act (FSCMA), which became effective in February 2009, permits a wider range of financial services providers to engage in a broader sphere of financial activities, including depositary services, and has ,to a significant extent, removed the regulatory barriers between securities brokerage, asset management, derivative financial services and trust services in favor of creating financial investment companies that may engage in all of the foregoing activities. Accordingly, the FSCMA enables the creation of large financial institutions that can offer both commercial and investment banking services modeled after the major global financial institutions based in the United States and Europe. In addition, in 2008, the Korean legislature proposed an amendment to the Bank Act, which would permit certain qualified entities to provide online banking services as their primary business without being required to establish a branch network. Such amendment, if passed, may further intensify competition in the Korean banking industry. Recently, in light of the recent global financial crisis, the Government has subjected Korean financial institutions to stricter regulatory requirements and guidelines in areas of asset quality, capital adequacy, liquidity and residential and other lending practices, which has had a dampening effect on competition. However, there is no assurance that these measures will continue to curb competition or that the Government will not reverse or reduce such measures or introduce other deregulatory measures, which may further intensify competition.

If we are unable to compete effectively in the changing business and regulatory environment, our profit margin and market share may erode and our further growth opportunities may become limited, which could adversely affect our business, results of operation and financial condition. See Item 3.D. Risk Factors Risks Relating to Our Overall Business Competition in the Korean financial services industry is intense, and may further intensify as a result of recent deregulation and Item 4.B. Business Overview Supervision and Regulation Financial Investment Services and Capital Markets Act.

57

Table of Contents

Description of Assets and Liabilities

Unless otherwise specifically mentioned or the context otherwise requires, the following description of assets and liabilities is presented on a consolidated basis under U.S. GAAP.

Loans

As of December 31, 2009, our total gross loan portfolio was \psi169,255 billion, which represented a decrease of 0.75% from \ppi170,541 billion at December 31, 2008. The decrease in the portfolio primarily reflects a 7.62% decrease in other commercial loans and 6.87% decrease in other consumers loans.

Loan Types

The following table presents our loans by type for the periods indicated. Except where specified otherwise, all loan amounts stated below are before deduction for loan loss allowances. Total loans reflect our loan portfolio, including past due amounts.

	As of December 31,									
		2005		2006		2007		2008		2009
				(Iı	n billi	ions of Wo	n)

We may roll over our working capital loans and retail loans (which are not payable in installments) after we conduct our normal loan reviews in accordance with our loan review procedures. Working capital loans may be extended on an annual basis for an aggregate term of three years for unsecured loans and five years for secured loans and retail loans may be extended for additional terms of up to 12 months for an aggregate term of ten years for unsecured loans and secured loans.

Interest Rate Sensitivity

The following table shows our loans by interest rate sensitivity as of December 31, 2009.

		As	of Decem	ber 31, 2009			
		Within Year	Due After 1 Year (In billions of Won)			Total	
Fixed rate loans(1) Variable rate loans(2)	W	40,611 67,836	₩	10,898 49,910	₩	51,509 117,746	

Notes:

- (1) Fixed rate loans are loans for which the interest rate is fixed for the entire term of the loan.
- (2) Variable or adjustable rate loans are for which the interest rate is not fixed for the entire term of the loan.

For additional information regarding our management of interest rate risk, see Risk Management.

Nonaccrual Loans and Past Due Accruing Loans

Except in the case of repurchased loans, we generally do not recognize interest income on nonaccrual loans unless it is collected. Generally, we discontinue accruing of interest on loans (other than repurchased loans) when payment of interest and/or principal becomes past due by one day. Interest is recognized on these loans on a cash basis from the date the loan is reclassified as non-accruing. Loans (other than repurchased loans) are not reclassified as accruing until interest and principal payments are brought current.

63

Table of Contents

We generally do not request borrowers to make immediate repayment of the whole outstanding principal balances and related accrued interest on nonaccrual loans whose interest payments are past due for one to 14 days in case of commercial loans and 1 to 30 days in case of retail loans. Except where specified otherwise, the amount of such past due loans within the grace period is excluded from the amount of non-accrual loans disclosed in this annual report and from calculation of related foregone interest.

Interest foregone is the interest due on nonaccrual loans that has not been accrued in our books of account. In 2005, 2006, 2007, 2008 and 2009, we would have recorded gross interest income of \times 186 billion, \times 140 billion, \times 155 billion, \times 202 billion and \times 151 billion, respectively, on loans accounted for on a nonaccrual basis throughout the respective years, or since origination for loans held for part of the year, had the loans been current with respect to their original contractual terms. The amount of interest income on those loans that was included in our net income in 2005, 2006, 2007, 2008 and 2009 were \times 117 billion, \times 107 billion, \times 77 billion, \times 109 billion and \times 90 billion, respectively.

The category accruing but past due one day includes loans which are still accruing interest but on which principal or interest payments are contractually past due one day or more. We continue to accrue interest on loans where the total amount of loan outstanding, including accrued interest, is fully secured by cash on deposits.

The following table shows, at the dates indicated, the amount of loans that are placed on a nonaccrual basis and accruing loans which are past due one day or more.

Notes:

⁽¹⁾ Excludes past due loans within the grace period in the amount of ₩334 billion, ₩1,128 billion, ₩1,119 billion and ₩823 billion as of December 31, 2006, 2007, 2008 and 2009 respectively.

- (2) Includes accruing loans which are contractually past due 90 days or more in the amount of \(\pi\)5 billion, \(\pi\)5 billion, \(\pi\)10 billion and \(\pi\)8 billion that are corporate loans as of December 31, 2005, 2006, 2007, 2008 and 2009, respectively.
- (3) Includes accruing loans which are contractually past due 90 days or more in the amount of \(\pi\)7 billion, \(\pi\)23 billion, \(\pi\)27 billion, \(\pi\)13 billion and \(\pi\)8 billion that are consumer loans as of December 31, 2005, 2006, 2007, 2008 and 2009, respectively.

64

Table of Contents

Troubled Debt Restructurings

The following table presents, at the dates indicated, our loans which are troubled debt restructurings as defined under U.S. GAAP. These loans mainly consist of corporate loans that have been restructured through the process of workout, court receivership and composition. See Credit Exposures to Companies in Workout, Court Receivership and Composition. These loans accrue interest at rates lower than the original contractual terms, or involve the extension of the original contractual maturity as a result of a variation of terms upon restructuring.

	As of December 31,								
	As of December 2005 2006 2007 (In billions of ₩ 735 ₩ 111 ₩ 124	2007	2008	2009					
		(In	billions of V	Von)

(excluding nonaccrual and past due loans)	₩ 735	₩ 111	₩ 124	₩ 557	₩ 932				

For the year ended December 31, 2005, 2006, 2007, 2008 and 2009, interest income that would have been recorded under the original contract terms of restructured loans amounted to \text{\text{\text{W}}26} billion, \text{\text{\text{\text{W}}5} billion, \text{\text{\text{\text{W}}5} billion, \text{\text{\text{\text{W}}21} billion and \text{\text{\text{\text{W}}26} billion, \text{\text{\text{\text{W}}28} billion, \text{\text{\text{\text{W}}28} billion, \text{\text{\text{\text{W}}28} billion and \text{\text{\text{\text{W}}28} billion was reflected as our interest income, respectively.}

Credit Exposures to Companies in Workout, Court Receivership or Composition

Our credit exposures to restructuring are managed and collected by our Corporate Credit Collection Department. As of December 31, 2009, 0.65% of our total loans, or \text{\text{\$\text{\$W}\$}}1,097 billion, was under restructuring. Restructuring of our credit exposures principally takes the legal form of workout, court receivership or composition.

Workout

Under the Corporate Restructuring Promotion Act, which became reinstated in August 2007 to remain effective until December 31, 2010, all creditors to borrowers that are financial institutions are required to participate in a creditors committee. The Corporate Restructuring Promotion Act is mandatorily applicable to a wide range of financial institutions in Korea, which include commercial banks, insurance companies, asset management companies, securities companies, merchant banks, the Korea Deposit Insurance Corporation and the Korea Asset Management Corporation. Under this act, the approval of financial institution creditors holding not less than 75% of the total debt outstanding of a borrower is required for such borrower s restructuring plan, including debt restructuring and provision of additional funds, which plan is binding on all the financial institution creditors of the borrower, provided that any financial institution creditor that disagrees with the final restructuring plan approved by the creditors committee has the right to request the creditors committee to purchase its claims at a mutually agreed price. In the event that the creditors committee and the dissenting financial institution creditor fail to come to an agreement, a mediation committee consisting of seven experts is set up to resolve the matter. There is a risk that these procedures may require us to participate in a plan we do not agree with or may require us to sell our claims at prices that we do not believe are adequate. With respect to any workout for which the lead creditor bank calls for a meeting of the creditors committee while the old Corporate Restructuring Promotion Act was still effective, the procedures applicable to such creditors committee and the related workout remain subject to the Corporate Restructuring Promotion Act until the suspension or conclusion of such workout, provided that such workout becomes subject to the procedures under the reinstated Corporate Restructuring Promotion Act as of its effective date, as opposed to the old Corporate Restructuring Promotion Act, even if such workout began while the old law was in effect. Under the reinstated Corporate

Restructuring Promotion Act, if any of our borrowers becomes subject to corporate restructuring procedures, we may be forced to (i) restructure our credits pursuant to restructuring plans approved by other creditor financial institutions holding 75% or more of the total outstanding debt (and 75% or more of the total outstanding secured debt, if the restructuring plan includes the restructuring of existing secured debt) of the borrower or (ii) dispose of our credits to other creditors on unfavorable terms. This law will remain effective until December 31, 2010.

The total loan amount currently undergoing workout as of December 31, 2009 was \text{\textsup}866 billion.

65

Table of Contents

Court Receivership and Composition

The Debtor Rehabilitation and Bankruptcy Act, which took effect on April 1, 2006, is designed to consolidate all existing bankruptcy-related laws in Korea, namely the Corporate Reorganization Act, the Composition Act, the Bankruptcy Act and the Individual Debtor Recovery Act. Under the Debtor Rehabilitation and Bankruptcy Act, composition proceedings have been abolished and recovery proceedings have been introduced to replace the court receiverships. In a recovery proceeding, unlike court receivership proceedings where the management of the debtor company was vested in a court appointed receiver, the existing chief executive officer of the debtor company may continue to manage the debtor company, provided, that (i) neither fraudulent conveyance nor concealment of assets existed, (ii) the financial failure of the debtor company was not due to gross negligence of such chief executive officer, and (iii) no creditors meeting was convened to request, based on reasonable cause, a court-appointed receiver to replace such chief executive officer. While a court receivership proceeding was permitted only with respect to joint stock companies (chushik-hoesa), the recovery proceeding may be commenced by any insolvent debtor. In addition, in an effort to meet the global standards, international bankruptcy procedures are introduced in Korea, under which a receiver of a foreign bankruptcy proceeding may, upon receiving Korean court s approval of the ongoing foreign bankruptcy proceeding, apply for or participate in a Korean bankruptcy proceedings conducted in a Korean court. Similarly, a receiver in a domestic recovery proceeding or a bankruptcy trustee is allowed to perform its duties in a foreign country where an asset of the debtor is located to the extent the applicable foreign law permits.

However, any composition, corporate reorganization, bankruptcy and rehabilitation proceedings for individual debtors pending as of April 1, 2006, the effective date of the Debtor Rehabilitation and Bankruptcy Act, continue to proceed in accordance with the respective applicable laws.

The total loan amount currently subject to court receivership as of December 31, 2009 was \(\formaller{W}\)0.4 billion.

The total amount currently subject to composition proceedings as of December 31, 2009 was \text{\text{\text{\$\psi}}}11 billion.

Loans in the process of workout, court receivership or composition are reported as loans on our balance sheet and are included as nonaccrual loans described in Nonaccrual Loans and Past Due Accruing Loans above since they are generally past due more than one day and interest generally does not accrue on such loans. Restructured loans that meet the U.S. GAAP definition of a troubled debt restructuring are included within Troubled Debt Restructurings described above. These are disclosed as loans or securities after the restructuring on our balance sheet depending on the type of instrument we receive.

Credit Rehabilitation Programs for Delinquent Consumer and Small- and Medium-sized Enterprise Borrowers

In light of the rapid increase in delinquencies in credit card and other consumer credit in recent years, and concerns regarding potential social issues posed by the growing number of individuals with bad credit, the Korean government has implemented a number of measures intended to support the rehabilitation of the credit of delinquent consumer borrowers. These measures may affect the amount and timing of our collections and recoveries on our delinquent consumer credits.

In 2002, the Financial Services Commission established the Credit Counseling and Recovery Service based upon an agreement among approximately 160 financial institutions in Korea. Upon application to the Credit Counseling and Recovery Service and approval of a majority of unsecured and two-thirds of secured creditor financial institutions, a qualified credit delinquent person with outstanding debts to two or more financial institutions in an aggregate amount not exceeding \(\formalfont{W}\)500 million may participate in an individual work-out program designed to restructure such person s debt and rehabilitate such person s credit.

On April 1, 2006, the Law Concerning Credit Restoration and Bankruptcy took effect and replaced the Individual Debtor Rehabilitation Law. Under the Law Concerning Credit Restoration and Bankruptcy, a qualified individual debtor with outstanding debts in an aggregate amount not exceeding threshold amounts of \(\pi\)500 million of unsecured debt and/or \(\pi\)1 billion of secured debt may restructure his or her debts through a court-supervised debt restructuring that is binding on creditors.

66

Table of Contents

On September 2, 2008, to support consumer borrowers with low credit scores, the Financial Services Commission established the Credit Rehabilitation Fund to purchase from creditors the loans of such borrowers that are in default and to provide guarantees so that such loans may be refinanced at lower rates. The Credit Rehabilitation Fund provides support to (i) individuals with low credit scores who are in default on loans not exceeding \(\pi\)30 million in principal amount in the aggregate (which requirement will be waived for individuals who are basic living welfare recipients) for a period of three months or more and (ii) individuals with low credit scores ranging from category 7 to 10 who are in default on loans not exceeding \(\pi\)30 million in principal amount in the aggregate (which requirement will be waived for individuals who are basic living welfare recipients) and the interest rate of which is 20% or more.

In October 2008, the Financial Supervisory Service requested Korean banks, including us, to establish a fast track program to provide liquidity assistance to small- and medium-sized enterprises on an expedited basis. Under the fast track program we established, which is effective through June 30, 2009, we provide liquidity assistance to small- and medium-sized enterprise borrowers applying for such assistance, in the form of new short-term loans or maturity extensions or interest rate adjustments with respect to existing loans, after expedited credit review and approval by us.

In March 2009, the Financial Services Commission requested Korean banks, including us, to establish a pre-workout program, including a credit counseling and recovery service, for retail borrowers with short-term outstanding debt. The pre-workout program is expected to be in operation from April 2009 to April 2011. Under the pre-workout program, maturity extensions and/or interest rate adjustments are provided for retail borrowers with total loans of less than \forall 500 million who are in arrears on their payments for more than 30 days but less than 90 days.

Potential Problem Loans

As of December 31, 2009, we had \text{\text{\$\psi}}332 billion of loans rated as normal or precautious under the guidelines of the Financial Services Commission, which represent loans that are current as to payment of principal and interest but carry serious doubt as to the ability of the borrower to repay in the near future. These loans are classified as impaired and included in the calculation of loan loss allowance under U.S. GAAP.

We have certain other interest-earning assets which, if they are loans, are required to be disclosed as part of the nonaccrual, past due or troubled debt restructuring or potential problem loans as discussed above. As of December 31, 2009, the book value of such interest-earning assets on which interest was past due was \(\frac{\text{W}}{2}\)8.6 billion.

Provisioning Policy

We conduct periodic and systematic detailed reviews of our loan portfolios to identify credit risks and to evaluate the adequacy of the overall allowance for loan losses. Our management believes the allowance for loan losses reflects the best estimate of the probable loan losses incurred as of each balance sheet date.

Our loan loss allowance determined under U.S. GAAP consists of a specific allowance and a general allowance. The specific allowance is applied to corporate loans that are considered to be impaired and are either individually or collectively evaluated for impairment. The general allowance is applied to all other loans to reflect losses that have been incurred but not specifically identified.

67

Table of Contents

Loan Classifications

For Korean GAAP and regulatory reporting purposes, we base our provisioning on the following loan classifications that classify corporate and retail loans as required by the Financial Services Commission.

Loan Classification

Loan Characteristics

Normal
Loans made to customers whose financial position, future cash flows and nature of business are deemed financially sound. No problems in recoverability are expected.

Precautionary
Loans made to customers whose financial position, future cash flows and nature of business show potential weakness, although there is no immediate risk of nonrepayment.

Substandard
Loans made to customers whose adverse financial position, future cash flows and nature of business have a direct effect on the repayment of the loan.

Doubtful
Loans made to customers whose financial position, future cash flows and nature of business are so weak that significant risk exists in the recoverability of the loan, to the extent the

outstanding amount exceeds any collateral pledged.

Estimated loss Loans where write-off is unavoidable.

Corporate Loans

We review corporate loans annually for potential impairment through a formal credit review. In addition, our loan officers consider the credits for impairment throughout the year if there is an indication that an impairment event has occurred.

Under U.S. GAAP, a loan is impaired when, based on current information and events, it is probable that the creditor will be unable to collect all amounts due according to the contractual terms of the agreement. We use our loan classifications for identifying impaired loans. We consider the following loans to be impaired for the purpose of determining our specific allowance:

loans classified as substandard or below according to the asset classification guidelines of the Financial Services Commission;

loans that are more than 90 days past due; and

loans which are troubled debt restructurings as defined under U.S. GAAP.

Specific loan loss allowances for corporate loans are established based on whether a particular loan is impaired. Corporate loans with relatively small balances are evaluated collectively for impairment as they are managed collectively.

Loans individually identified for review and considered impaired

Consistent with the internal credit risk monitoring policies, we evaluate impaired loans with relatively large balances (typically more than \,\text{W3}\) billion) individually for impairment. Loan loss allowances for these loans are generally established by discounting the estimated future cash flows (both principal and interest) we expect to receive using the loan s effective interest rate. We consider the likelihood of all possible outcomes in determining our best estimate of expected future cash flows. Management consults closely with individual loan officers and reviews the cash flow assumptions used to ensure these estimates are valid.

Alternatively, for impaired loans that are considered collateral dependent, the amount of impairment is determined by reference to the fair value of the collateral which is based on the present value of the appraisal value as indicated in third party valuation reports. We consider the reliability and timing of appraisals and determine the reasonableness of fair value estimates, taking into account the time to value the collateral, the cost incurred in selling the collateral and current market conditions. After the fair value of collateral is determined, an impairment charge is established as specific loan loss allowances for an amount equal to the excess of the carrying amount of the subject loan over the fair value of the collateral.

68

Table of Contents

For more details regarding determination of the fair value of collateral for collateral dependent loans, see Item 5.A. Operating Results Critical Accounting Policies and Note 28 to our consolidated financial statements.

We may also measure impairment by reference to the loan s observable market price, however the availability of this information is not commonplace in Korea.

We establish a specific allowance when the discounted cash flow (or collateral value) of the loan is lower than its carrying amount. The specific allowance is equal to the difference between the discounted cash flow (or collateral value) amount of the loan and its carrying amount.

Loans collectively evaluated for impairment

We also establish specific allowances for impaired corporate loans with relatively small balances (typically \(\fomag{W}\)3 billion or less). We manage these loans on a portfolio basis and are therefore collectively evaluate for impairment since it is impractical to analyze each such loans on an individual basis. The specific allowance for such loans is determined based on loss factors taking into consideration past performance of the portfolio, previous loan loss history and charge-off information.

We identify loss factors through a migration model, which uses a statistical tool to monitor the progression of loans through different classifications over a specific time period. We adjust these loss factors based on other qualitative or quantitative factors that affect the collectability of the portfolio as of the evaluation date, including:

prevailing economic and business conditions within Korea and foreign jurisdictions in which we operate;

industry concentrations;

changes in the size and composition of the relevant underlying portfolios; and

changes in lending policies and procedures, including underwriting standards and collection, charge-offs and recovery practices.

The following table sets out, as of the dates indicated, our loan loss allowances as a percentage of outstanding loans allocable to our corporate borrowers based on their loan classification.

	As of December 31,		
	2007	2008	2009
	(Percentages)		
Normal	1.94%	0.77%	0.82%
Precautionary	31.36	11.66	8.78
Substandard	37.28	23.27	39.49
Doubtful	83.78	81.97	86.47
Estimated loss	88.81	89.19	86.55

Loans not specifically identified as impaired

We establish a general allowance for non-impaired corporate loans to reflect losses incurred within the portfolio which have not yet been specifically identified as impaired. The general allowance is also determined based on loss factors

developed through a migration model and are adjusted as appropriate using similar criteria as above.

Leases

For leases, we follow a similar approach to that used for corporate loans that are collectively evaluated for impairment and establish allowances based on loss factors developed through a migration model as adjusted for specific circumstances related to individual borrowers of the leased assets.

69

Table of Contents

Retail Loans

Retail loans are segmented into the following product types for the purposes of credit risk evaluation:

mortgage and home equity loans; and

other retail loans (consisting of unsecured and secured retail loans).

For loan losses on mortgages, home equity loans and other retail loans, we also establish allowances based on loss factors taking into consideration the historical performance of the portfolio, previous loan loss history and charge-off information.

We further adjust the loss factors derived from the migration analysis based on factors that may impact loss recognition which have not been adequately captured by our historical analysis. These factors include:

changes in economic and business conditions such as levels of unemployment and housing price;

changes in the nature and volume of the portfolio, including any concentration of credits; and

external factors such as regulatory or government requirements.

Credit cards

We establish an allowance for the credit card portfolio using a roll-rate model. A roll-rate model is a statistical tool used to monitor the progression of loans based on aging of the balance and established loss rates. The actual loss rates derived from this model are used to project the percentage of losses within each aging category based on performance over an established period of time.

The expected percentage of loss reflects estimates of both default probability within each loan aging category and severity of loss. Generally, loans that are six months or more past due are charged off. We adjust our loan loss rate for severity of loss when considering historical recovery of charged off credits when establishing the allowance.

We segment our credit card portfolio into several product types and perform separate roll-rate analysis for such product types to reflect the different risks and characteristics of each such product type.

We further adjust the results from the roll-rate analysis based on factors that may impact loss recognition which have not been adequately captured by our historical analysis. These factors include:

delinquency levels of cardholders;

government policies toward the credit card industry; and

key retail performance indicators (such as ratios of household debt to disposable income and household liabilities to financial assets).

The actual amount of incurred loan losses may vary from the estimate of incurred losses due to changes in economic conditions or industry or geographic concentrations. We also monitor differences between estimated and actual incurred loan losses through procedures including detailed periodic assessments by senior management of both individual loans and credit portfolios and the models used to estimate incurred loan losses in those portfolios.

We consider a credit card or card loan to be delinquent if payment on such account is not received when first due and the amount outstanding is greater than \(\frac{\text{\text{W}}}{10,000}\). Our general policy is to be proactive in its collection procedures. We believe that card accounts which are in early stages of delinquency are easier to collect than those accounts which have been delinquent for a longer period of time and, therefore, we emphasize collections at an early stage of delinquency although we increase the level of collection efforts as the delinquency period increases with respect to the relevant account. Efforts to collect from cardholders whose account balances are up to 30 days past due are generally made by our credit support centers at Shinhan Card. Our credit support centers classify delinquent customers based upon three criteria: the expected level of difficulty in collection, the nature of the customer and the customer s contribution to Shinhan Card s profitability. By implementing collection activities tailored to each such category of customers, we seek to maximize efficiency in our collection efforts.

70

Table of Contents

For card accounts with balances that are more than 30 days past due, we assign collection to our collection branches. During the first two months of their appointment, these collection branches rely on postal or telephone notice and take measures to locate and provisionally attach accounts receivables or other properties of the delinquent cardholders. After the initial two months period, the collection branches commence compulsory execution procedures against the delinquent cardholders—accounts receivables or other properties to secure the amount of outstanding balances. During the entire period managed by branches, we offer restructured card loan and reduction programs. For card accounts that are charged off, we outsource collection to external collection centers such as Shinhan Credit Information, which is our subsidiary, and Mirae Credit Information Services Corp.

For card accounts with balances that are more than 180 days past due, we charge off the past due amounts on a quarterly basis in accordance with the guidelines, or subject to the approval, of the Financial Supervisory Service.

Following the implementation of a policy by the Korean Fair Trade Commission effective April 2008 that prohibited a unilateral lowering by the credit card company of the credit card limit of a cardholder except in the case of an impairment in the cardholder sability to repay, we established additional allowance for unfunded credit card commitments with respect to the unused credit card limit as we no longer control the unfunded credit card commitments.

We also began to apply, with respect to the off-balance sheet unused credit card limits, the same methodology used in calculating probabilities of default (PDs) with respect to credit card receivables, considering the current unstable financial market conditions as well as increased gross charge offs in the fiscal year 2009 compared to the fiscal year 2008. Previously, we applied a lower set of PDs to off-balance sheet unused credit limits than to credit card receivables.

Loan Aging Schedule

The following table shows our loan aging schedule (excluding accrued interest) for all loans as of the dates indicated.

	Curre	nt	Past I Up to 3 M		Past I 3-6 Mo		Past Due Than 6 M		Total
As of December 31,	Amount	%	Amount	%	Amount	%	Amount	%	Amount

Non-Performing Loan Strategy

One of our primary objectives is to prevent our loans from becoming non-performing. Through our corporate credit rating system which is designed to prevent our loan officers from extending new loans to borrowers with high credit risks based on the borrower s credit rating, we seek to reduce credit risk related to future non-performing loans. Our early warning system is designed to alert any sudden increase in a borrower s credit risk to our loan officers, who then closely monitor such loans.

If a loan becomes non-performing notwithstanding such preventive mechanism, an officer at the branch level responsible for monitoring non-performing loans will commence due diligence on the borrower s assets, send a notice demanding payment or a notice that we will take or prepare for legal action.

At the same time, we also initiate our non-performing loan management process, which includes:

identifying loans subject to a proposed sale by assessing the estimated losses from such sale based on the estimated recovery value of collateral, if any, for such non-performing loans;

identifying loans subject to charge-off based on the estimated recovery value of collateral, if any, for such non-performing loans and the estimated rate of recovery of unsecured loans; and

to a limited extent, identifying commercial loans subject to normalization efforts based on the cash-flow situation of the borrower.

73

Table of Contents

Once the details of a non-performing loan are identified, we pursue early solutions for recovery. Actual recovery efforts for non-performing loans are handled by the relevant department, depending on the nature of such loans and the borrower, among others. The officers or agents of the responsible departments and units use a variety of methods to resolve non-performing loans, including:

making phone calls and paying visits to the borrower to request payment;

continuing to assess and evaluate assets of our borrowers; and

if necessary, initiating legal action such as foreclosures, attachment and litigation.

In order to promote speedy recovery on loans subject to foreclosures and litigation, the branch responsible for handling these loans may transfer them to the relevant unit at headquarters or regional headquarters.

Our policy is to commence legal action three months after delinquency of payment on loans. For loans to insolvent or bankrupt borrowers or when we conclude that it is not possible to recover through normal procedures, we take prompt legal actions regardless of the grace period.

In addition to making efforts to collect on these non-performing loans, we take other measures to reduce the level of our non-performing loans, including:

selling non-performing loans to third parties including the Korea Asset Management Corporation;

entering into asset-backed securitization transactions with respect to non-performing loans;

using third-party collection agencies including credit information companies.

Allocation of Allowance for Loan Losses

Our total allowance for loan losses increased by \text{\$\psi437\$ billion, or 13.65%, to \$\psi3,638\$ billion as of December 31, 2009 from \$\psi3,201\$ billion as of December 31, 2008. During 2009, the allowance for loan losses increased by primarily as a result of an increase of loss rate in corporate loans.

Table of Contents

Analysis of the Allowance for Loan Losses

Loan Charge-Offs

Our level of gross charge-offs increased from \text{\psi}701 billion in 2007 to \text{\psi}917 billion in 2008 primarily due to an increase in charge-off for corporate loans and credit card loans. Our level of gross charge-offs increased from

₩917 billion in 2008 to ₩1,891 billion in 2009 primarily due to an increase in charge-off for corporate and consumer loans, primarily as a result of the prudent charge-off policy undertaken by us in response to the recent global financial crisis.

Basic Principles

We attempt to minimize loans to be charged off, by practicing a sound credit approval process based on credit risk analysis prior to extending loans and a systematic management of outstanding loans.

75

Table of Contents

Loans To Be Charged-Off

Loans are charged-off if they are deemed to be uncollectible by falling under any of the following categories:

loans for which collection is not foreseeable due to insolvency or bankruptcy, dissolution or the termination of the debtor s business;

loans for which collection is not foreseeable due to the death or disappearance of debtors;

loans for which collection expenses exceed the collectable amount;

loans for which collection is not possible through legal or any other means;

payments in arrears in respect of credit cards that are overdue for more than six months;

payments outstanding on unsecured retail loans that are overdue for more than six months;

payments in arrears in respect of leases that are overdue for more than 12 months; or

the portion of loans classified as estimated loss, net of any recovery from collateral, which is deemed to be uncollectible.

Procedure for Charge-off Approval

An application for Shinhan Bank s loans to be charged-off is submitted by a branch to the Corporate Credit Collection Department in the case of corporate loans and foreign branches, and Consumer Credit Collection Department in the case of individual loans. An application for charge off must be submitted by a deadline set by the applicable departments. The General Manager in charge of review evaluates the application. The General Manager of Audit and Examination Department conducts review of compliance with our internal procedures for charge-offs. The General Manager in charge of review gets approval from the President of Shinhan Bank. As for Shinhan Card, it generally charges off receivables that are 180 days past due following internal review.

Treatment of Loans Charged-Off

Once loans are charged-off, they are derecognized from our balance sheet. We still continue our collection efforts in respect of these loans through third-party collection agencies including the Korea Asset Management Corporation and Shinhan Credit Information.

Treatment of Collateral

When we determine that a loan collateralized by real estate cannot be recovered through normal collection channels, we generally petition a court to foreclose and sell the collateral through a court-supervised auction within one month after default and insolvency and within four months after delinquency. However, this procedure does not apply to companies under restructuring, composition, workout or other court proceedings where there are restrictions on such auction procedures. Filing of such petition with the court generally encourages the debtor to repay the overdue loan. If a debtor ultimately fails to repay and the court grants its approval for foreclosure, we sell the collateral and recover the principal amount and interest accrued up to the sales price, net of expenses incurred from the auction. Foreclosure proceedings in Korea typically take seven months to one year from initiation to collection depending on the nature of the collateral.

U.S. GAAP Financial Statement Presentation

Our U.S. GAAP financial statements include as charges-offs all unsecured retail loans, including credit cards, which are overdue for more than six months. Leases are charged off when past due for more than twelve months. For collateral dependent loans, we charge off the excess of the book value of the subject loan over the amount received or to be received from the sale of the underlying collateral when the collateral is sold as part of a foreclosure proceeding and its sale price becomes known through court publication as part of such proceeding.

Investment Portfolio

Investment Policy

Companies.

We invest in and trade Won-denominated and, to a lesser extent, foreign currency-denominated securities for our own account in order to:

maintain the stability and diversification of our assets;

maintain adequate sources of back-up liquidity to match our funding requirements; and

supplement income from our core lending activities.

In making securities investments, we take into account a number of factors, including macroeconomic trends, industry analysis and credit evaluation in determining whether to make investments in particular securities.

Our investments in securities are subject to a number of regulatory guidelines, including limitations prescribed under the Financial Holding Companies Act and the Banking Act. Generally, a financial holding company is prohibited from acquiring more than 5% of the total issued and outstanding shares of another company (other than its direct and indirect subsidiaries). Furthermore, under these regulations, Shinhan Bank must limit its investments in shares and securities with a maturity in excess of three years (other than monetary stabilization bonds issued by the Bank of Korea and national government bonds) to 60.0% of its total Tier I and Tier II capital. Generally, Shinhan Bank is also prohibited from acquiring more than 15.0% of the shares with voting rights issued by any other corporation (other than for the purpose of establishing or acquiring a subsidiary). Further information on the regulatory environment governing our investment activities is set out in Supervision and Regulation Principal Regulations Applicable to Banks Restrictions on Shareholdings in Other Companies, Principal Regulations Applicable to Financial Holding Companies Liquidity and Principal Regulations Applicable to Financial Holding Companies Restrictions on Shareholdings in Other

Total	W	22,484	₩	22,491		

All of the above entities are controlled and owned by the Korean government.

Credit-Related Commitments and Guarantees

In the normal course of our operations, we make various commitments and guarantees to meet the financing and other business needs of our customers. Commitments and guarantees are usually in the form of, among others, commitments to extend credit, commercial letters of credit, standby letter of credit and performance guarantees. The contractual amount of these financial instruments represents the maximum possible loss amount if the account party draws down the commitment or we should fulfill our obligation under the guarantee and the account party fails to perform under the contract.

The following table sets forth our credit-related commitments and guarantees as of the dates indicated.

		2007		December 3 2008 ions of Wo	,	2009
Commitments to extend credit:						
Corporate	W	65,611	₩	49,873	₩	49,590

Consumer		6,968		8,350		8,795
Commercial letters of credit(2)		3,518		3,006		3,319
Standby letters of credit, other financial and performance						
guarantees and liquidity facilities to special purpose entities		12,573		14,859		13,392
Total	W	134,749	₩	128,665	W	140,000

Notes:

- (1) Credit card commitments relate to unused portion of credit card limits that may be cancelled by us, after notice to the customer, if we determine that the customer s repayment ability is significantly impaired. Prior to January 2008, we were able to change credit card limits of all customers whose account is inactive for more than 12 months without their approval. However, following a change in the Korea Fair Trade Commission s policy related to credit card limits effective January 2008, we now require the customer s agreement before changing the credit card limits for customers whose repayment ability is not significantly impaired.
- (2) These are generally short-term and collateralized by the underlying shipments of goods to which they relate.

We have credit-related commitments that are not reflected on the balance sheet, which primarily consist of commitments to extend credit and commercial letters of credit. Commitments to extend credit, including credit lines, represent unfunded portions of authorizations to extend credit in the form of loans. These commitments

80

Table of Contents

expire on fixed dates and a customer is required to comply with predetermined conditions to draw funds under the commitments.

Commercial letters of credit are undertakings on behalf of customers authorizing third parties to draw drafts on us up to a stipulated amount under specific terms and conditions. They are generally short-term and collateralized by the underlying shipments of goods which they relate to and therefore have less risk.

We also have guarantees that are recorded on the balance sheet at their fair value at inception which are amortized over the life of the guarantees. Such guarantees generally include standby letters of credit, other financial and performance guarantees and liquidity facilities to special purpose entities.

Standby letters of credit are irrevocable obligations to pay third party beneficiaries when our customers fail to repay loans or debt instruments, which are generally in foreign currencies. A substantial portion of these standby letters of credit are secured by underlying assets, including trade-related documents.

Other financial and performance guarantees are irrevocable assurance that we make payments to beneficiaries in the event that our customers fail to fulfill their obligations or to perform under certain contracts. Liquidity facilities to special purpose entities represent irrevocable commitments to provide contingent liquidity credit lines to special purpose entities established by our customers in the event that a triggering event such as shortage of cash occurs.

The commitments and guarantees do not necessarily represent our exposure since they often expire unused.

Derivatives

As discussed under Business Overview Our Principal Activities Treasury and Securities Investment above, we engage in derivatives trading activities primarily on behalf of our customers so that they may hedge their risks and also enter into back-to-back derivatives with other financial institutions to cover exposures arising from such transactions. In addition, we enter into derivatives transactions to hedge against risk exposures arising from our own assets and liabilities, some of which are nontrading derivatives that do not qualify for hedge accounting treatment.

The following shows, as of December 31, 2009, the gross notional or contractual amounts of derivatives held or issued for (i) trading (ii) nontrading that qualify for hedge accounting and (iii) nontrading that do not qualify for hedge accounting.

Notes:

⁽¹⁾ Notional amounts in foreign currencies were converted into Won at prevailing exchange rates as of December 31, 2009.

(2) While we engage in derivatives trading activities to hedge the interest rate risk and foreign exchange risk exposure that arise from our own assets and liabilities, as these nontrading derivative contracts do not qualify for hedge accounting under U.S. GAAP, they are accounted for as trading derivatives in the financial statements. These contracts include interest rate swaps, forward contracts and cross-currency swaps held for nontrading that do not qualify for hedge accounting treatment.

Funding

We obtain funding from a variety of sources, both domestic and foreign. Our principal source of funding is customer deposits obtained from our banking operations, and we from time to time issue equity and debt securities, including preferred shares to fund large-scale acquisitions such as Chohung Bank and LG Card and a recent rights offering in anticipation of greater liquidity and capital requirements during the recent global financial crisis. In addition, our subsidiaries acquire funding through call money, borrowings from the Bank of Korea, other short-term

82

Table of Contents

borrowings, corporate debentures, other long-term debt and asset-backed securitizations. For further details relating to funding by us and our subsidiaries, see
Item 5. Operating and Financial Review and Prospects
Liquidity and Capital Resources.

Deposits

Although the majority of our bank deposits are short-term, the majority of our depositors have historically rolled over their deposits at maturity, providing our banking operation with a stable source of funding.

The following table shows the average balances of our deposits and the average rates paid on our deposits for the periods indicated.

		2007	7		2008	3		2009	i

Total interest-bearing											
deposits(3)	₩	99,477	3.53%	₩	113,543	4.15%	₩	134,227	3.12%		

Notes:

- (1) Average balances are based on daily balances for Shinhan Bank and Jeju Bank and quarterly balances for other subsidiaries.
- (2) Shinhan Bank offers mutual installment deposits which are interest-bearing deposits made periodically for a contracted term. The mutual installment deposit account enables customers to become eligible for loans which would be secured by the deposits already made. Prior to qualifying for a loan, a customer must make required periodic deposits to the mutual installment account for a contracted term of less than five years. A customer is not obliged to make the periodic deposits for the full term of the contract to obtain a loan from Shinhan Bank, but loan amounts and terms are not as favorable in the event a loan request is made prior to completion of the deposit contract term.
- (3) Under U.S. GAAP, interest-bearing assets do not include cover bills sold or bonds sold under repurchase agreements, which are offered to our customers as deposit products. These are reflected as short-term borrowings and secured borrowings, respectively.

For a breakdown of deposit products, see Our Principal Activities Deposit-taking Activities, except that cover bills sold are reflected on short-term borrowings and securities sold under repurchase agreements are reflected as secured borrowings.

83

Table of Contents

Certificates of Deposit and Other Time Deposits

The following table presents the balance and remaining maturities of our other time deposits, certificates of deposit and mutual installment deposits which had a fixed maturity in excess of \text{\psi}100 million or more as of December 31, 2009.

	As of December 31, 2009											
	Certificates of Deposit			Other Time Deposits (In billion		Mutual Installment Deposits s of Won)		Total

A majority of our certificates of deposit accounts and other time deposits issued by our foreign offices is in the amount of US\$100,000 or more.

Notes:

- (1) Average outstanding balances are calculated using daily balances for Shinhan Bank and Jeju Bank and quarterly balances for other subsidiaries.
- (2) Weighted-average interest rates during this year are calculated by dividing the total interest expenses by the average amount borrowed.
- (3) Borrowings from the Bank of Korea generally mature within one month for borrowings in Won and six months for borrowings in foreign currencies.
- (4) Other short-term borrowings included borrowings from trust accounts, bills sold, borrowings in domestic and foreign currencies and short-term debentures.

Our short-term borrowings have maturities of less than one year which are generally unsecured with the exception of borrowings from the Bank of Korea.

Risk Management

Overview

As a financial services provider, we are exposed to various risks relating to our lending, credit card, insurance, securities investment, trading and leasing businesses, our deposit taking and borrowing activities and our operating environment. The principal risks to which we are exposed are credit risk, market risk, liquidity risk and operational risk. These risks are recognized, measured and reported in accordance with risk management guidelines established at our holding company level and implemented at the subsidiary level through a carefully stratified checks-and-balances system.

We believe that our risk management system has been instrumental to building our reputation as a well-managed and prudent financial service provider and withstanding various external shocks. In particular, during the recent global financial crisis, we believe our risk management has provided effective early warning signals which helped us to proactively reconfigure our asset portfolio and substantially reduce our exposure to troubled debtors and thereby avoid what could have been a substantially greater credit loss during such crisis.

In particular, our groupwide risk management is guided by the following core principles:

identifying and managing all inherent risks;

standardizing risk management process and methodology;

ensuring supervision and control of risk management independent of business activities;

continuously assessing risk preference;

preventing risk concentration;

operating a precise and comprehensive risk management system including statistical models; and

balancing profitability and risk management through risk-adjusted profit management.

The primary risk management tools we have adopted at a groupwide level to implement the foregoing principles are as follows:

an embedded culture of risk management As a basic matter, we emphasize that all of our employees embrace, adhere and are guided in their daily operations by a culture of strict risk management and the core groupwide risk management principles.

detailed risk tolerance prescriptions Risk tolerance, defined as the allowable level of risk, is prescribed for each subsidiary and for each business segment based on a groupwide analysis of possible losses. Each of our subsidiaries is required to manage its operations within the bounds of the specified risk tolerance and not incur a concentration risk though detailed and specific risk limit control systems.

integrated groupwide risk monitoring system We have adopted a groupwide comprehensive risk monitoring system that collects extensive risk-related information from both external and internal sources and assesses related risks based on such information. Our risk monitoring system emphasize early warning signals and

preemptive measures.

development of a groupwide risk experts network In order to enhance our overall risk management capabilities, we have a designated team of risk experts, each of whom have experience and knowledge in risk management, in charge of our groupwide risk education and build out of groupwide risk management competence.

Organization

Our risk management system is organized along the following hierarchy: from the top and at the holding company level,, the Group Risk Management Committee, the Group Risk Management Council, the Chief Risk Officer and the Group Risk Management Team, and at the subsidiary level, the Risk Management Committees and the Risk Management Team of the relevant subsidiary. Further details follow.

86

Table of Contents

At the holding company level:

Group Risk Management Committee The Group Risk Management Committee consists of three outside directors of our holding company. The Group Risk Management Committee convenes at least once every quarter and may also convene on an *ad hoc* basis as needed. Specifically, the Group Risk Management Committee does the following: (i) establish the overall risk management policies consistent with management strategies, (ii) set risk limits for the entire group and each of our subsidiaries, (iii) approve appropriate investment limits or allowed loss limits, (iv) enact and amends risk management regulations, and (v) decide other risk management-related issues the board of directors or the Group Risk Management Committee sees fit to discuss. The results of the Group Risk Management Committee meetings are reported to the board of directors of our holding company. The Group Risk Management Committee makes decisions through affirmative votes by a majority of the committee members.

Group Risk Management Council Comprised of the holding company s chief risk officer, risk management team head, and risk officers of each of our subsidiaries, the Group Risk Management Council provides a forum for risk management executives from each subsidiary to discuss our groupwide risk management guidelines and strategy in order to maintain consistency in the groupwide risk policies and strategies. Specifically, the Group Risk Management Council deliberates on the following: (i) changes in risk management policies and strategies for each subsidiary, (ii) matters warranting discussion of risk management at the group level and cooperation among the subsidiaries, (iii) the effect of external factors on the groupwide risk, (iv) determination of the risk appetite for our group as a whole and each of our subsidiaries, (vi) operation of risk measuring systems for our group as a whole and each of our subsidiaries, (vii) matters requiring joint deliberation in relation to groupwide risk management and (viii) matters related to providing funds to our subsidiaries. The Group Risk Management Council has a sub-council consisting of working-level risk management officers, to discuss the above-related matters in advance.

Group Chief Risk Officer The Group Chief Risk Officer aids the Group Risk Management Committee by implementing the risk policies and strategies as well as ensuring consistency of risk management systems among our subsidiaries. Furthermore, the Group Chief Risk Officer evaluates the risk officers of each subsidiary in addition to monitoring the risk management practices of each subsidiary.

Group Risk Management Team This team provides support and assistance to the Group Chief Risk Officer in carrying out his responsibilities.

At the subsidiary level:

Risk Management Committee In order to maintain the groupwide risk at an appropriate level, we have established a hierarchical risk limit system, where the Group Risk Management Committee establishes risk limits for us and our subsidiaries, and each of our subsidiaries establishes and manages risk limits in more detail by type of risk and type of product for each department and division within such subsidiary. In accordance with the group risk management policies and strategies, the risk management committee at the subsidiary level establishes its own risk management policies and strategies in more detail and the respective risk management department implements those policies and strategies.

Risk Management Team The risk management team, operating independently from the business units of each of our subsidiaries, monitors, assesses, manages and controls the overall risk of its operations and reports all major risk-related issues to the Group Risk Management Team at the holding company level, which then reports to the Group Chief Risk Officer.

Table of Contents

The following is a flowchart of our risk management system at the holding company level and the subsidiary level.

Credit Risk Management

Credit risk, which is the risk of loss from default by an obligor or counter-party, is our greatest risk. A substantial majority of our credit risk relates to the operations of Shinhan Bank and Shinhan Card.

Credit Risk Management of Shinhan Bank

Shinhan Bank s credit risk management is guided by the following principles:

achieve profit level corresponding to the level of risks involved;

improve asset quality and achieve optimal industrial and rating loan portfolios;

focus on the small- and medium-sized enterprises and markets;

avoid excessive loan concentration to a particular borrower or sector;

focus on the borrower s ability to repay the debt; and

provide financial support to advance the growth of select customers.

Major policies for Shinhan Bank s credit risk management are determined by the Credit Policy Committee of Shinhan Bank, the executive decision-making body for management of credit risk. The Credit Policy Committee is led by the Deputy President and head of the Risk Management Group. The Credit Policy Committee further consists of chief officers from eight business groups. Apart from the Credit Policy Committee, Shinhan Bank has a Credit Review Committee in place to perform credit review evaluation, thereby separating the credit policy decision-makings and loan approvals. Both committees make decisions by two-thirds or more votes of the attending members, based on a two-third quorum requirement.

Shinhan Bank complies with credit risk management procedures pursuant to internal guidelines and regulations and continually monitors and improves these guidelines and regulations. Its credit risk management procedures include:

credit evaluation and approval;

credit review and monitoring; and

credit risk assessment and control.

88

Table of Contents

Credit Evaluation and Approval

All loan applicants and guarantors are subject to credit review evaluation before approval of any loans. Credit evaluation of loan applicants are carried out separately by Credit Officer and Senior Credit Officer and (senior) credit officer committees consisting of loan evaluation specialists from different subject areas. Loan evaluation is carried out by a group rather than at an individual level through an objective and deliberative process. Shinhan Bank uses a credit scoring system for retail loans and a credit-risk rating system for corporate loans.

Retail loans

Loan applications for retail loans are reviewed in accordance with Shinhan Bank s credit scoring system and the objective statistics models for secured and unsecured loans maintained and operated by Shinhan Bank s Retail Banking Division. Shinhan Bank s credit scoring system is an automated credit approval systems used to evaluate loan applications and determine the appropriate pricing for the loan, and takes into account factors such as a borrower s personal information, transaction history with Shinhan Bank and other financial institutions and other relevant credit information. The applicant is assigned a score, based upon which the decision is made as to whether to approve the loan application and determine its amount. The applicant s score also determines whether the applicant is approved for credit, conditionally approved, subject to further assessment, or denied. If the applicant becomes subject to further assessment, the appropriate discretionary body, either at the branch level or at the headquarters level, makes a reassessment based on qualitative as well as quantitative factors, such as credit history, occupation and past relationship with Shinhan Bank.

For mortgage loans and loans secured by real estate, Shinhan Bank evaluates the value of the real estate offered as collateral using a proprietary database, which contains information about real estate values throughout Korea. In addition, Shinhan Bank uses up-to-date information provided by third parties regarding the real estate values in Korea. While Shinhan Bank uses internal staff from the processing centers to appraise the value of the real estate collateral, Shinhan Bank also hires certified appraisers to review the appraisal value of real estate collateral that have an appraisal value exceeding \(\formallow\)5 billion, as initially determined by the processing centers. Shinhan Bank also performs internal revaluations, on a summary basis, the appraisal value of collateral at least every year.

For loans secured by securities, deposits or other assets other than real estate, Shinhan Bank requires borrowers to observe specified collateral ratios in respect of secured obligations.

Corporate loans

Shinhan Bank rates all of its corporate borrowers using internally developed credit evaluation systems. These systems consider a variety of criteria in order to standardize credit decisions and focuses on the quality of borrowers rather than the size of loans. The relevant criteria include quantitative factors related to the borrower s financial and other data, and qualitative factors such as the judgment of Shinhan Bank s credit officers. Shinhan Bank also considers financial variables and ratios based on customer s financial statements, such as return on assets and cash flow to total debt ratios, as well as non-financial evaluation factors such as the industry in which the borrower operates, its competitive position in its industry, its operating and funding capabilities, the quality of its management and controlling stockholders (based in part on interviews with its officers and employees), technological capabilities and labor relations.

In addition, Shinhan Bank reviews reports prepared by external credit rating services, such as Korea Information Service, which are used to confirm the accuracy of Shinhan Bank s internal credit reviews.

Shinhan Bank monitors and improves the effectiveness of the credit risk-rating systems using a database that it updates continually with actual default records.

Based on the scores calculated under the credit rating system, which takes into account the evaluation criteria described above and the probability of default, Shinhan Bank assigns the borrower one of 22 grades (from the highest of AAA to the lowest of D). Grades AA through B are further broken down into +, 0 or -. Grades AAA through B-are classified as normal, grade CCC precautionary, and grades CC through D non-performing. The credit risk-rating model is further differentiated by the size of the corporate borrower and the type of credit facilities.

89

Table of Contents

Loan approval process

Loans are generally approved after a joint evaluation and approval by the relationship manager at the branch level. The approval limit for retails loan is made based on automated credit scoring system by Shinhan Bank. In the case of large corporate loans, approval limits are also reviewed and approved by a Credit Officer at the headquarters level. Depending on the size and the importance of the loan, the approval process is further reviewed by the Credit Officer Committee or the Senior Credit Officer Committee. If the loan is considered significant or the amount exceeds the discretion limit of the Senior Credit Officer Committee, further evaluation is made by the Credit Review Committee, which is Shinhan Bank s highest decision-making body in relation to credit approval. The Credit Review Committee s evaluation and approval of loan limits vary depending on the credit ratings of the borrowers. For example, for borrowers with B ratings, the Credit Review Committee evaluates and approves credits in excess of W10 billion for unsecured lending and W15 billion for secured lending, whereas for borrowers with AAA ratings, the Credit Review Committee evaluates credits exceeding W30 billion for unsecured lending and W80 billion for secured lending. Meetings to approve these large credits are held twice a week. The Credit Review Committee makes decisions by a vote of two-thirds or more of the attending members, which must constitute at least two-thirds of the committee members to satisfy the quorum.

The chart below summarizes the credit approval process of our banking operation. The Senior Credit Officer and the Head of Business Division do not make individual decisions on loan approval, but are part of the decision-making process at the group level.

The reviewer at each level of the review process may in its discretion approve loans up to a maximum amount per loan assigned to such level. The discretionary loan approval limit for each level of the loan approval process takes into account the total amount of loans extended to the borrower, the credit level of the applicant based on credit review, the existence and value of collateral and the level of credit risk established by the credit rating system. The discretionary loan amount approval limit ranges from \(\mathbf{W}\)30 million (which is applicable to corporate loans to a borrower with a B-rating to be approved by the head of a banking branch) to \(\mathbf{W}\)80 billion (which is applicable to corporate loans to a borrower with a AAA rating to be approved by the Senior Credit Officer Committee). Any loans exceeding the maximum discretionary loan amount approval limit must be approved by the Credit Review Committee.

Credit Review and Monitoring

Shinhan Bank continually reviews and monitors existing credit risks primarily with respect to borrowers. In particular, Shinhan Bank s automated early warning system conducts daily examination for borrowers using over 163 financial and non-financial factors, and the relationship manager and the credit officer must conduct periodic loan review and report to independent loan review team which analyzes in detail the results and adjusts credit rating accordingly. Based on these reviews, Shinhan Bank adjusts a borrower s credit rating, credit limit, applied interest rates and credit policies. In addition, the group credit rating of the borrower s group, if applicable, may be adjusted following a periodic review of the main debtor groups, mostly comprised of *chaebols*, as identified by the Governor

90

Table of Contents

of the Financial Supervisory Service based on their outstanding credit exposures, of which 43 were identified as such as of December 31, 2009. Shinhan Bank also continually reviews other factors, such as industry-specific conditions for the borrower s business and its domestic and overseas asset base and operations, in order to ensure the appropriateness of the assigned ratings. The Credit Review Department provides credit review reports, independent of underwriting, to Chief Risk Officer on a monthly basis.

The early warning system performs automatic daily checks for borrowers to whom Shinhan Bank has more than \text{\text{\$\psi}}2 billion of exposure. The relationship manager and the Credit Officer in the Credit Review Department monitor those borrowers, and then the Credit Review Department further reviews the results of the monitoring. In addition, Shinhan Bank carries out a planned review of each borrower in accordance with changing credit risk factors based on changing economic environment. The results of such planned review are continually reported to the Chief Risk Officer of Shinhan Bank.

Depending on the nature of the items detected by the early warning system, a borrower may be classified as a deteriorating credit and become subject to evaluation for a possible downgrade in rating, or may be initially classified as a borrower showing early warning signs or become reinstated to the normal borrower status. For borrowers classified as showing early warning signs, the relevant relationship manager gathers information and conducts a review of the borrower to determine whether it should be classified as a deteriorating credit or whether to impose management improvement warnings or implement joint creditors management. In the case where the borrower becomes non-performing, Shinhan Bank s collection department directly manages such borrower s account in order to maximize recovery rate, and conducts auctions, court proceedings, sale of assets or corporate restructuring as needed.

Credit Risk Assessment and Control

In order to assess credit risk in a systematic manner, Shinhan Bank has developed and upgraded systems designed to quantify credit risk based on selection and monitoring of various statistics, including delinquency rate, non-performing loan ratio, expected loan loss and weighted average risk rating.

Shinhan Bank controls loan concentration by monitoring and managing loans at two levels: portfolio level and individual loan account level. In order to prevent undue concentration of loans, Shinhan Bank has a credit limit per country, industry, affiliates, corporation and financial institution, and encourages extension of credit to customers with good credit and reduction of credit to customers with less than good credit. In addition, Shinhan Bank utilizes the results of credit portfolio analysis in allocating asset quality based on forward looking criteria, increasing discretion and adjusting loan to value ratio.

Shinhan Bank measures credit risk using internally accumulated data. Shinhan Bank measures expected and unexpected losses with respect to total assets monthly, which Shinhan Bank refers to when setting risk limits for, and allocate capital to, its business groups. Expected loss is calculated based on the probability of default, the loss given default, the exposure at default and the past bankruptcy rate and recovery rate, and Shinhan Bank provides allowance for loan losses under Korean GAAP accordingly. Shinhan Bank makes provisioning at a level which is the higher of the Financial Supervisory Service requirement or Shinhan Bank s internal calculation. Unexpected loss is predicted based on value at risk (VaR), which is used to determine compliance with the aggregate credit risk limit for Shinhan Bank as well as the credit risk limit for the relevant department within Shinhan Bank. We use the Monte Carlo simulation method to compute the VaR, compared to the historical simulation method used previously, as the Monte Carlo method provides a more systematic method for reflecting concentration risks and correlation effects.

Credit Risk Management of Shinhan Card

Major policies for Shinhan Card s credit risk management are determined by Shinhan Card s Risk Management Council, and Shinhan Card s Risk Management Committee is responsible for approving them. Shinhan Card s Risk Management Council is comprised of the heads of Shinhan Card s 14 business units. Shinhan Card s Risk Management Council convenes at least once every month and may also convene on an *ad hoc* basis as needed. Shinhan Card s Risk Management Committee is comprised of three Non-Standing Directors. Shinhan Card s Risk Management Committee convenes at least once every quarter and may also convene on an *ad hoc* basis as needed.

91

Table of Contents

The risk of loss from default by an obligor or counter-party is Shinhan Card s greatest risk. Shinhan Card manages credit risk based on the following principles:

achieve profit at a level corresponding to the level of risks involved;

improve asset quality and achieve optimal asset portfolios; and

focus on borrower s ability to repay the debt.

Credit Card Approval Process

Shinhan Card uses an automated credit scoring system to approve credit card applications or credit card authorizations. The credit scoring system is divided into two sub-systems: the application scoring system and the behavior scoring system. The behavior scoring system is based largely on the credit history, and the application scoring system is based largely on personal information of the applicant. The credit scoring system automatically conducts credit checks on all credit card applicants. Shinhan Card gathers information about applicants transaction history with financial institutions, including banks and credit card companies, from a number of third party credit reporting agencies including, among others, National Information & Credit Evaluation Inc., Korea Information Service and Korea Credit Bureau. These credit checks reveal a list of the delinquent customers of all the credit card issuers in Korea.

If a credit score awarded to an applicant is above a minimum threshold, then the application is approved unless overridden based on other considerations such as delinquencies with other credit card companies. For credit card applications by a long-standing customer with good credit history, Shinhan Card has discretion to waive the assigned credit score unless overridden by other considerations.

Monitoring

Shinhan Card continually monitors all accountholders and accounts using a behavior scoring system. The behavior scoring system predicts a cardholder s payment pattern by evaluating the cardholder s credit history, card usage and amounts, payment status and other relevant data. The behavior score is recalculated each month and is used to manage the accounts and approval of additional loans and other products to the cardholder. Shinhan Card also uses the scoring system to monitor its overall risk exposure and to modify its credit risk management strategy.

Loan Application Review and On-going Credit Review

When reviewing new applications and conducting an on-going credit review for retail loans, installment purchase loans and personal leases, Shinhan Card uses substantially similar criteria used in the credit underwriting system and credit review system for credit card customers. For retail loans, installment purchase loans and personal leases to existing cardholders, Shinhan Card reviews their card usage history in addition to other factors such as their income, occupation and assets.

Fraud Loss Prevention

Shinhan Card seeks to minimize losses from the fraudulent use of credit cards issued by it. Shinhan Card focuses on preventing fraudulent uses and, following the occurrence of a fraudulent use, makes investigations in order to make the responsible party bear the losses. Misuses of lost credit cards account for a substantial majority of Shinhan Card s fraud losses. Through its fraud loss prevention system, Shinhan Card seeks to detect, on a real-time basis, transactions that are unusual or inconsistent with prior usage history and calls are made to the relevant cardholders to confirm their

purchases. A team at Shinhan Card dedicated to investigating fraud losses also examines whether the cardholder was at fault by, for example, not reporting a lost card or failing to endorse the card, or whether the relevant merchant was negligent in checking the identity of the user. Fault may also lie with delivery companies that fail to deliver credit cards to the relevant applicant. In such instances, Shinhan Card attempts to recover fraud losses from the responsible party. To prevent misuse of a card as well as to manage credit risk, Shinhan Card s information technology system will automatically suspend the use of a card:

when it receives a report of a card s fraudulent use or loss;

92

Table of Contents

at the request of a cardholder;

for cash advances, immediately upon recognition by the system that the relevant cardholder became delinquent; or

for other types of transactions, one day to three months (depending on the customer s credit score) after recognition by the system that the relevant cardholder became delinquent.

Approximately a quarter of Shinhan Card s cardholders have consented to Shinhan Card accessing their travel records to detect any misuse of credit cards while they are traveling abroad. Shinhan Card also offers cardholders additional fraud protection through a fee-based short message service. At the cardholder s option, Shinhan Card notifies the cardholder of any credit card activity in his or her account by sending a text message to his or her mobile phone. This monitoring service allows customers to quickly and easily identify any fraudulent use of their credit cards.

Credit Risk Management of Shinhan Investment

In accordance with the guidelines of the Financial Supervisory Service, Shinhan Investment assesses its credit risks (including through VaR analyses) and allocates the maximum limit for the credit amount at risk by department. Shinhan Investment also assesses the counterparty risks in all credit-related transactions, such as loans, acquisitions financing and derivative transactions and takes corresponding risk management measures. In assessing the credit risk of a corporate counterparty, Shinhan Investment considers such counterparty s corporate credit rating obtained from Shinhan Bank s internal corporate rating database. Through its risk management system, Shinhan Investment also closely monitors credit risk exposures by counterparty, industry, conglomerates, credit ratings and country. Shinhan Investment conducts credit risk stress tests on a daily basis based on hypothetical extreme market scenarios and also conducts more advanced stress tests from time to time, the results of which are then reported to its management as well as Shinhan Financial Group s credit risk officer to support groupwide credit risk management.

Market Risk Management

Market risk is the risk of loss generated by fluctuations in market prices such as interest rates, foreign exchange rates and equity prices. The principal market risks to which we are exposed are interest rate risk and, to a lesser extent, equity price risk, foreign exchange risk and commodity risk. These risks stem from our trading and non-trading activities relating to financial instruments such as loans, deposits, securities and financial derivatives. We divide market risk into risks arising from trading activities and risks arising from non-trading activities.

Our market risks arise primarily from Shinhan Bank, and to a lesser extent, Shinhan Investment, our securities trading and brokerage subsidiary, which incurs market risk relating to its trading activities. For Shinhan Bank s market risk management, Shinhan Bank s Risk Management Committee establishes overall market risk management principles for both the trading and nontrading activities of Shinhan Bank. Based on these principles, Shinhan Bank s Asset & Liability Management Committee, or the ALM Committee, assesses and controls market risks arising from trading and non-trading activities. The ALM Committee, which consists of 10 executive vice presidents and the head of the Treasury Department of Shinhan Bank, is the executive decision-making body for Shinhan Bank s risk management and asset and liability management operations. At least on a monthly basis, the ALM Committee reviews and approves reports, which include the position and VaR with respect to Shinhan Bank s trading activities and the position, VaR, duration gap and market value analysis and net interest income simulation with respect to its non-trading activities. Shinhan Bank measures market risk with respect to all assets and liabilities in the bank accounts and trust accounts in accordance with the regulations promulgated by the Financial Services Commission.

Shinhan Investment manages its market risk based on its overall risk limit established by its risk management committee as well as the risk limits and detailed risk management guidelines for each product and department established by its management s committee. Shinhan Investment assesses the adequacy of these limits at least annually. In addition, Shinhan Investment assesses the market risks of its trading assets. The assessment procedure is based on the standard procedures set by the Financial Supervisory Services as well as an internally developed

93

Table of Contents

model. Shinhan Investment assesses the risk amount and VaR, and manages the risk by setting a risk limit per sector as well as a VaR limit.

Shinhan Life Insurance manages its market risk based on its overall risk limit established by its risk management committee. Shinhan Life Insurance manages market risk in regard to assets that are subject to trading activities and foreign exchange positions.

Shinhan Card does not have any assets with significant exposure to market risks and therefore does not maintain a risk management policy with respect to market risks.

We use Korean GAAP numbers on a non-consolidated basis for our market risk management and, unless otherwise specified, the numbers presented for quantitative market risk disclosure have been prepared in accordance with Korean GAAP on a non-consolidated basis.

Market Risk Exposure from Trading Activities

Shinhan Bank s trading activities principally consist of:

trading activities to realize short-term trading profits in debt and stock markets and foreign exchange markets based on Shinhan Bank s short-term forecast of changes in market situation and customer demand, for its own account as well as for the account of the trust accounts of Shinhan Bank s customers; and

trading activities primarily to realize profits from arbitrage transactions in derivatives such as swap, forward, futures and option transactions, and, to a lesser extent, to sell derivative products to Shinhan Bank s customers and to cover market risk incurred from those trading activities.

Shinhan Investment s trading activities principally consist of trading for customers and for proprietary accounts equity and debt securities and derivatives based on stocks, stock indexes, interest rates, foreign exchange and commodity.

As a result of these trading activities, Shinhan Bank is exposed principally to interest rate risk, foreign exchange risk and equity risk, and Shinhan Investment is exposed principally to equity risk and interest rate risk.

Interest rate risk

Shinhan Bank s exposure to interest rate risk arises primarily from Won-denominated debt securities, directly held or indirectly held through beneficiary certificates, and, to a lesser extent, from interest rate derivatives. Shinhan Bank s exposure to interest rate risk arising from foreign currency-denominated trading debt securities is minimal since its net position in those securities is not significant. As Shinhan Bank s trading accounts are marked-to-market daily, it manages the interest rate risk related to its trading accounts using VaR, a market value-based tool.

Shinhan Investment s interest rate risk arises primarily from management of its interest rate-sensitive asset portfolio, which mainly consists of debt securities, interest rate swaps and government bond futures, and the level of such risk exposure depends largely on the variance between the interest rate movement assumptions built into the asset portfolio and the actual interest rate movements and the spread between a derivative product and its underlying assets. Shinhan Investment quantifies and manages the interest rate-related exposure by daily conducting VaR and stress tests on a marked-to-market basis.

Foreign exchange risk

Foreign exchange risk arises because of Shinhan Bank s assets and liabilities, including derivatives such as foreign exchange forwards and futures and currency swaps, which are denominated in currencies other than the Won. Shinhan Bank manages foreign exchange risk on an overall position basis, including its overseas branches, by covering all of its foreign exchange spot and forward positions in both trading and non-trading accounts.

Shinhan Bank s net foreign currency open position, which is the difference between its foreign currency assets and liabilities as offset against forward foreign exchange positions, is Shinhan Bank s foreign exchange risk. The ALM Committee oversees Shinhan Bank s foreign exchange exposure for both trading and non-trading activities by establishing limits for the net foreign currency open position, loss limits and VaR limits. The management of

94

Table of Contents

Shinhan Bank s foreign exchange position is centralized at the FX & Derivatives Department. Dealers in the FX & Derivatives Department manage Shinhan Bank s overall position within the set limits through spot trading, forward contracts, currency options, futures and swaps and foreign exchange swaps. Shinhan Bank sets a limit for net open positions by currency and the limits for currencies other than the U.S. dollars and Japanese yen are set in a conservative manner in order to minimize other foreign exchange trading.

The net open foreign currency positions held by our other subsidiaries are insignificant. In the case of Shinhan Capital which incurs a considerable amount of foreign exchange exposure from its leasing business, it maintains its net exposure below US\$1 million by hedging its foreign exchange positions using forwards and currency swaps.

The following table shows Shinhan Bank s net foreign currency open positions as of December 31, 2007, 2008 and 2009. Positive amounts represent long exposures and negative amounts represent short exposures.

Currency	As of December 31, 2007 2008 2009 (In millions of US\$)

Equity risk

Equity positions held by our other subsidiaries are insignificant.

95

Management of Market Risk from Trading Activities

The following tables present an overview of market risk, measured by VaR, from trading activities of Shinhan Bank and Shinhan Investment, respectively, for the year ended and as of December 31, 2009. For market risk management purposes, Shinhan Bank includes its trading portfolio in bank accounts and assets in trust accounts for which it guarantees principal or fixed return in accordance with the Financial Services Commission regulations.

Total VaR	W	16.33	₩	5.29	₩	41.45	₩	6.19

Notes:

- (1) Shinhan Bank and Shinhan Investment s ten-day VaR is based on a 99% confidence level.
- (2) Includes both trading and non-trading accounts as Shinhan Bank manages foreign exchange risk on a total position basis.
- (3) Volatility implied from the option price using the Black-Scholes or a similar model.
- (4) Calculation of portfolio diversification effects may occur on different days for different risk components. Total VaRs are less than the simple sum of the risk component VaRs due to offsets resulting from portfolio diversification.
- (5) Includes trading portfolio in Shinhan Bank s bank accounts and assets in trust accounts for which it guarantees principal or fixed return.

(6) The average change in market value of the portfolio of Shinhan Investment was \(\psi\)1.1 billion per day in 2009.

Shinhan Bank generally manages its market risk from trading activities of its portfolios on an aggregated basis, uses position limits, VaR limits, and stop loss limits. In addition, it establishes appropriate limits for investment securities. Shinhan Bank maintains risk control and management guidelines for derivative trading based on the regulations and guidelines promulgated by the Financial Services Commission, and measures market risk from trading activities to monitor and control the risk of its operating divisions and teams that perform trading activities.

Value-at-risk analysis. Shinhan Bank uses ten-day and one-day VaRs to measure its market risk. Shinhan Bank calculates VaRs on a daily basis based on data for the previous 12 months for the holding periods of ten days. A ten-day VaR is a statistically estimated maximum amount of loss that can occur for ten days under normal market conditions. We use a 99.9% confidence level to measure the VaRs, which means the actual amount of loss may exceed the VaR, on average, once out of 100 business days. One-day VaR is used as VaR limit for each trading desk.

Shinhan Investment uses one-day VaRs to measure its market risk. Shinhan Investment calculates VaRs on a daily basis based on data for the previous 12 months for the holding periods of one day. We use a 99% confidence

96

Table of Contents

level to measure the VaRs for Shinhan Investment Shinhan Investment is currently using a variance-covariance methodology called delta-gamma method for its overall VaR calculation and uses historical simulation and Monte Carlo simulation for stress test and calculation of VaRs for individual risks of options. Variance-covariance method assumes a normal distribution of risks which may underestimate market risk when the distribution of market risk is not normal. This method also does not provide accurate analysis for risks of non-linear products such as options.

Value-at-risk is a commonly used market risk management technique. However, VaR models have the following shortcomings:

VaR estimates possible losses over a certain period at a particular confidence level using past market movement data. Past market movement, however, is not necessarily a reliable indicator of future events, particularly potential future events that are extreme in nature.

VaR may underestimate the probability of extreme market movements.

Shinhan Bank s VaR models assume that a holding period of generally one to ten days is sufficient prior to liquidating the underlying positions, but the length of the holding period so assumed may actually be insufficient or excessive.

VaR does not capture all complex effects of various risk factors on the value of positions and portfolios and could underestimate potential losses.

Currently, Shinhan Bank and Shinhan Investment conduct back-testing of VaR results against actual outcomes on a daily basis.

Shinhan Bank operates an integrated market risk management system which manages Shinhan Bank s Won-denominated and foreign-denominated accounts. This system uses historical simulation to measure both linear risks arising from such products as equity and debt securities and nonlinear risks arising from other products including options. We believe that this system enables Shinhan Bank to generate elaborate and consistent VaR numbers and perform sensitivity analysis and back testing to check the validity of the models on a daily basis.

Stress test. In addition to VaR, Shinhan Bank performs stress test to measure market risk. As VaR assumes normal market situations, Shinhan Bank assesses its market risk exposure to unlikely abnormal market fluctuations through stress test. Stress test is an important way of supplement VaR since VaR does not cover potential loss if the market moves in a manner which is outside Shinhan Bank s normal expectations. Stress test projects the anticipated change in value of holding positions under certain scenarios assuming that no action is taken during a stress event to change the risk profile of a portfolio.

Shinhan Bank uses relatively simple but fundamental seven scenarios for stress test taking into account four market risk components such as foreign exchange rates, stock prices and Won-denominated and foreign currency-denominated interest rates. For the worst case scenario, we assumed instantaneous and simultaneous movements in the four market risk components—depreciation of Won by 20%, decrease in Korea Exchange Composite Index by 30%, and increases in Won-denominated and U.S. dollar-denominated interest rates by 200 basis point and 200 basis point, respectively. In the case of this worst-case scenario, the change in market value of Shinhan Bank s trading portfolio was a decline of \$\forall 50.9\$ billion as of December 31, 2009. Shinhan Bank performs stress test at least monthly and reports the results to the ALM Committee and the Risk Management Committee.

Shinhan Investment uses five scenarios for stress tests, taking into account two market risk components: stock prices (both in terms of stock market indices and \(\mathbb{B}\)-based individual stock prices) and interest rates for Won-denominated

loans. As of December 31, 2009, for the worst case scenario, which was in the case of instantaneous and simultaneous drops in Korea Stock Price Index 200 by 10% and a 1% point increase in the three-year government bond yield, the change in market value of Shinhan Investment s trading portfolio was W19.3 billion for one day.

Shinhan Life Insurance conducts a stress test semi-annually based on a bad scenario and a worst-case scenario, and the results of the stress test include expected losses and impacts on capital adequacy. Shinhan Life Insurance takes preemptive measures on the basis of the results from its stress tests.

97

Table of Contents

Shinhan Bank sets limits on stress testing for its overall operations. Although Shinhan Life Insurance does not set any limits on stress testing, it monitors the impact of market turmoil or any abnormality. Shinhan Investment sets limits on stress testing for its overall operations as well as at its department level. In the case of Shinhan Bank, Shinhan Investment and Shinhan Life Insurance, if the impact is large, their respective chief risk officer may request a portfolio restructuring or other proper action.

Hedging and Derivative Market Risk

The principal objective of our groupwide hedging strategy is to manage market risk within established limits. We use derivative instruments to hedge our market risk as well as to make profits by trading derivative products within pre-approved risk limits. Our derivative trading includes interest rate and cross-currency swaps, foreign currency forwards and futures, stock index and interest rate futures, and stock index and currency options.

While we use derivatives for hedging purposes, derivative transactions by nature involve market risk since we take trading positions for the purpose of making profits. These activities consist primarily of the following:

arbitrage transactions to make profits from short-term discrepancies between the spot and derivative markets or within the derivative markets:

sales of tailor-made derivative products that meet various needs of our corporate customers, principally of Shinhan Bank and Shinhan Investment, and related transactions to reduce its exposure resulting from those sales (in the case of Shinhan Investment, these activities commenced from February 2003 when it acquired the relevant license);

taking positions in limited cases when we expect short-swing profits based on its market forecasts; and

trading to hedge our interest rate and foreign currency risk exposure as described above.

In relation to our adoption of ASC 820-10 (formerly SFAS No. 157, *Fair Value Measurements*), we have implemented internal processes which include a number of key controls designed to ensure that fair value is measured appropriately, particularly where a fair value model is internally developed and used to price a significant product.

Shinhan Bank assesses the adequacy of the fair market value of a new product derived from its internal model prior to the launch of such product. The assessment process involves the following:

computation of an internal dealing system market value (based on assessment by the quantitative analysis team of the adequacy of the formula and the model used to compute the market value as derived from the dealing system);

computation of the market value as obtained from an outside credit evaluation company; and

following comparison of the market value derived from an internal dealing system to that obtained from outside credit evaluation companies, determination as to whether to use the internally developed market value based on inter-departmental agreement.

The dealing system market value, which is used officially by Shinhan Bank after undergoing the assessment process above, does not undergo a sampling process that confirms the value based on review of individual transactions, but is subject to an additional assessment procedure of comparing such value against the profits derived from the dealing systems based on the deal portfolio sensitivity.

Shinhan Investment follows an internal policy as set by its Fair Value Evaluation Committee for computing and assessing the adequacy of fair value of all of its over-the-counter derivative products. Shinhan Investment computes the fair value based on an internal model and internal risk management systems and assesses the adequacy of the fair value through cross-departmental checks as well as comparison against fair values obtained from outside credit evaluation companies.

See Item 5.A. Operating Results Critical Accounting Policies and Notes 28 and 29 of the notes to our consolidated financial statements.

98

Table of Contents

Market risk from derivatives is not significant since derivative trading activities of Shinhan Bank and Shinhan Investment are primarily driven by arbitrage and customer deals with very limited open trading positions. Market risk from derivatives is also not significant for Shinhan Life Insurance as its derivative trading activities are limited to those within pre-approved risk limits and are subject to heavy regulations imposed on the insurance industry. Market risk from derivatives is not significant for our other subsidiaries since the amount of such positions by our other subsidiaries is insignificant.

Market Risk Management for Non-trading Activities

Interest Rate Risk

Principal market risk from non-trading activities of Shinhan Bank is interest rate risk. Interest rate risk is the risk of loss resulting from interest rate fluctuations that adversely affect the financial condition and results of operations of Shinhan Bank. Shinhan Bank is interest rate risk arises primarily due to differences between the timing of rate changes for interest-earning assets and interest-bearing liabilities.

Interest rate risk affects Shinhan Bank s earnings and the economic value of Shinhan Bank s net assets:

Earnings: interest rate fluctuations have an effect on Shinhan Bank s net interest income by affecting its interest-sensitive operating income and expenses.

Economic value of net assets: interest rate fluctuations influence Shinhan Bank s net worth by affecting the present value of cash flows from the assets, liabilities and other transactions of Shinhan Bank.

Accordingly, Shinhan Bank measures and manages interest rate risk for non-trading activities by taking into account effects of interest rate changes on both its income and net asset value. Shinhan Bank measures and manages interest rate risk on a daily/monthly basis with respect to all interest-earning assets and interest-bearing liabilities in Shinhan Bank s bank accounts (including derivatives denominated in Won which are interest rate swaps for the purpose of hedging) and in the trust accounts, except that it measures VaRs on a monthly basis. Most of Shinhan Bank s interest-earning assets and interest-bearing liabilities are denominated in Won.

Interest Rate Risk Management

The principal objectives of Shinhan Bank s interest rate risk management are to generate stable net interest income and to protect Shinhan Bank s net asset value against interest rate fluctuations. To this end, the ALM Committee sets out Shinhan Bank s interest rate risk limits at least annually and the Risk Management Department monitors Shinhan Bank s compliance with these limits and reports the monitoring results to the ALM Committee on a monthly basis. Shinhan Bank uses interest rate swaps to control its interest rate exposure limits.

On a daily/monthly basis, Shinhan Bank uses various analytical methodologies to measure and manage its interest rate risk for nontrading activities, including the following:

Interest Rate Gap Analysis: Interest rate gap analysis measures the difference in the amounts of interest-earning assets and interest-bearing liabilities at each maturity and re-pricing date for a specific time frame.

Duration Gap Analysis: Duration gap analysis measures durations of Shinhan Bank s interest-earning assets and interest-bearing liabilities, which are weighted average maturities of these assets and liabilities calculated based on discounted cash flows from these assets and liabilities using yield curves.

Market Value Analysis: Market value analysis measures changes in the market value of Shinhan Bank s interest-earning assets and interest-bearing liabilities based on the assumption of parallel shifts in interest rates.

Net Interest Income Simulation Analysis: Net interest income simulation analysis uses deterministic analysis methodology to measure changes in Shinhan Bank s annual net interest income (interest income less interest expenses) under the current maturity structure, using different scenarios for interest rates (assuming parallel shifts) and funding requirements.

99

Interest Rate Gap Analysis

Interest rate gap analysis measures the difference in the amounts of interest-earning assets and interest-bearing liabilities at each maturity and re-pricing date by preparing interest rate gap tables in which Shinhan Bank s interest-earning assets and interest-bearing liabilities are allocated to the applicable time categories based on the expected cash flows and re-pricing dates. On a daily basis, Shinhan Bank performs interest rate gap analysis for Won and foreign currency denominated assets and liabilities in its bank and trust accounts. Shinhan Bank s gap analysis includes Won-denominated derivatives (which are interest rate swaps for the purpose of hedging) and foreign currency-denominated derivatives (which are currency swaps for the purpose of hedging) whose management is centralized at the FX & Derivatives Department. Through the interest rate gap analysis that measures interest rate sensitivity gaps, cumulative gaps and gap ratios, Shinhan Bank assesses its exposure to future interest risk fluctuations. For interest rate gap analysis, Shinhan Bank assumes and uses the following maturities for different assets and liabilities:

With respect to the maturities and re-pricing dates of Shinhan Bank s assets, Shinhan Bank assumes that the maturity of Shinhan Bank s prime rate-linked loans is the same as that of its fixed-rate loans. Shinhan Bank excludes equity securities from interest-earning assets.

With respect to the maturities and re-pricing of Shinhan Bank's liabilities, Shinhan Bank assumes that money market deposit accounts and non-core demand deposits under the Financial Services Commission guidelines have a maturity of one month or less for Won-denominated accounts and three months or less for foreign currency-denominated accounts. With respect to core demand deposits under the Financial Services Commission guidelines, Shinhan Bank assumes that they have maturities of eight different intervals ranging from one month to five years.

The following tables show Shinhan Bank s interest rate gaps as of December 31, 2009 for (1) Won-denominated non-trading bank accounts, including derivatives for the purpose of hedging and (2) foreign currency-denominated non-trading bank accounts, including derivatives for the purpose of hedging.

Duration Gap and Market Value Analysis

Shinhan Bank performs a duration gap analysis to measure effects of interest rate risk on the market value of its assets and liabilities. Shinhan Bank measures, on a daily basis and for each operating department, account, product and currency, durations of interest-earning assets and interest-bearing liabilities. Shinhan Bank also measures, on a daily basis, changes in the market value of Shinhan Bank s interest-earning assets and interest-bearing liabilities.

The following tables show duration gaps and market values of Shinhan Bank s Won-denominated interest-earning assets and interest-bearing liabilities in its not-trading accounts as of December 31, 2009 and changes in these market values when interest rate increases by one percentage point.

Duration as of December 31, 2009 (for non-trading Won-denominated bank accounts(1))

Duration as of December 31, 2009(1) (In months)

Interest-earning assets	9.22
Interest-bearing liabilities	9.01

Net Interest Income Simulation

Shinhan Bank performs net interest income simulation to measure the effects of the change in interest rate on its results of operations. Such simulation measures the estimated changes in Shinhan Bank s annual net interest income (interest income less interest expenses) under the current maturity structure, using different scenarios for interest rates. For such simulation, Shinhan Bank applies three scenarios of parallel shifts in interest rate: (1) no change, (2) a 1% point increase in interest rates and (3) a 1% point decrease in interest rates.

101

Table of Contents

The following tables illustrate by way of an example the simulated changes in Shinhan Bank s annual net interest income for 2009 with respect to Won-denominated interest-earning assets and interest-bearing liabilities, using Shinhan Bank s net interest income simulation model, when it assumes (a) the maturity structure and funding requirement of Shinhan Bank as of December 31, 2009 and (b) the same interest rates as of December 31, 2009 and a 1% point increase or decrease in the interest rates.

Simulated Net Interest Income for 2009 (For Non-Trading Won-Denominated Bank Accounts)(1)

	Assu	ımed Interest	Rates	U	e in Net Income %	Change in Net Interest Income		
	No Change	1% Point Increase	1% Point Decrease (In billions o	Amount (1% Point Increase) f Won, excep	Change (1% Point Increase)	Amount (1% Point Decrease)	% Change (1% Point Decrease)	
Simulated interest income Simulated interest	₩ 9,463	₩ 10,556	₩ 8,370	₩ 1,093	11.55%	₩ (1,093)	(11.55)%	
expense Net interest income	5,507 3,956	6,318 4,237	4,696 3,675	811 281	14.73% 7.11%	(811) (281)	(14.73)% (7.11)%	

Note:

(1) Excludes Merchant Banking account and derivatives for the purpose of hedging.

Shinhan Bank s Won-denominated interest earning assets and interest-bearing liabilities in non-trading accounts have a maturity structure that benefits from an increase in interest rates, because the re-pricing periods of the interest-earning assets in Shinhan Bank s non-trading accounts tend to be shorter than those of the interest-bearing liabilities in these accounts. This is primarily due to a continuous decrease in interest rate in the recent years in Korea, which resulted in a significant increase in floating rate loans, resulting in the maturities or re-pricing periods of Shinhan Bank s loans shorter. As a result, Shinhan Bank s net interest income tends to increase when the market interest rates rise.

Interest Rate VaRs for Non-trading Assets and Liabilities

Shinhan Bank measures VaRs for interest rate risk from non-trading activities on a monthly basis. The following table shows, as of and for the year ended December 31, 2009, the VaRs of interest rate mismatch risk for other assets and liabilities, which arises from mismatches in the re-pricing dates of Shinhan Bank s non-trading interest-earning assets and interest-bearing liabilities including available-for-sale investment securities. Under the Financial Services Commission regulations, Shinhan Bank includes in calculation of these VaRs interest-earning assets and interest-bearing liabilities in its bank accounts and its merchant banking accounts.

VaR for the Year 2009(1)

			As of
Average	Minimum	Maximum	December 31

(In billions of Won)

Interest rate mismatch nontrading assets and liabilities \www.279 \www.238 \www.311 \www.379

Note:

(1) One-year VaR results with a 99% confidence level.

Equity Risk

Substantially all of Shinhan Bank s equity risk results from its portfolio of stocks of Korean companies. As of December 31, 2009, Shinhan bank held an aggregate amount of \(\psi\)0 billion of equity interest in unlisted foreign companies (including \(\psi\)0 billion invested in unlisted private equity funds).

The equity securities in Won held in Shinhan Bank s investment portfolio consist of stocks listed on the KRX KOSPI Market or the KRX KOSDAQ Market of the Korea Exchange and certain non-listed stocks. Shinhan Bank measures VaRs for all of these equity securities but does not manage most of the related risk using VaR limits, as

102

Table of Contents

most of these securities are held for reasons other than normal investment purposes. As of December 31, 2009, Shinhan Bank held equity securities in an aggregate amount of \(\frac{\pmathbf{W}}{4}\),342.5 billion in its non-trading accounts, including equity securities in the amount of \(\frac{\pmathbf{W}}{3}\),163.5 billion that it held, among other reasons, for management control purposes and as a result of debt-to-equity conversion as a part of reorganization proceedings of the companies to which it had extended loans.

As of December 31, 2009, Shinhan Bank held Won-denominated convertible bonds in the amount of \(\pi\)2 billion and foreign currency-denominated exchangeable bonds in the amount of \(\pi\)0 billion in its non-trading accounts. Shinhan Bank does not measure equity risk with respect to convertible and exchangeable bonds and the interest rate risk of these bonds are measured together with the other debt securities. As such, Shinhan Bank measures interest rate risk VaRs but not equity risk VaRs for these equity-linked securities.

The following table shows the VaRs of Shinhan Bank s equity risk for listed equity for the year and as of December 31, 2009.

		VaR	for t	he Yea	r 2009(1)	
	Average	Minim			kimum (Won)		s of aber 31
Listed equities	₩ 9.4	₩	3.8	W	26.4	₩	3.8

Note:

Liquidity Risk Management

Liquidity risk is the risk of insolvency, default or loss due to disparity between inflow and outflow of funds, including having to obtain funds at a high price or to dispose of securities at an unfavorable price due to lack of available funds or losing attractive investment opportunities.

Shinhan Bank applies the following basic principles for liquidity risk management:

maintain an appropriate level of liquidity risk through liquidity risk management based on liquidity gap or debt-to-equity ratio at each maturity date;

assess and monitor net cash flows by currency and by maturity and continuously evaluate available sources of funds and possibility of disposal of any liquid assets;

diversify sources and uses of funds by product and by maturity to prevent excessive concentration in certain periods or products; and

prepare contingency plans to cope with liquidity crisis.

Each subsidiary manages liquidity risk in accordance with the risk limits and guidelines established internally as well as those directed by the relevant regulatory authorities. Pursuant to principal regulations applicable to financial

holding companies and banks as promulgated by the Financial Services Commission, we, at the holding company, are required to keep specific Won and foreign currency liquidity ratios. These ratios require us to keep the ratio of liquid assets to liquid liabilities above certain minimum levels.

Shinhan Bank manages its liquidity risk within the limits set on Won and foreign currency accounts in accordance with the regulations of the Financial Services Commission. The Financial Services Commission requires Korean banks to maintain a Won liquidity ratio of at least 100.0% and a foreign currency liquidity ratio of at least 85%. The Financial Services Commission defines the foreign currency liquidity ratio as foreign currency-denominated liquid assets (including marketable securities) due within three months divided by foreign currency-denominated liabilities due within three months. As for the Won liquidity ratio, prior to October 2008 the Financial Services Commission defined it as Won-denominated liquid assets (including marketable securities) due within three months divided by Won-denominated liabilities due within three months, but since October 2008 defines it as Won-denominated liquid assets (including marketable securities) due within one month divided by Won-denominated liabilities due within one month.

103

Table of Contents

Shinhan Bank s Treasury Department is in charge of liquidity risk management with respect to Shinhan Bank s Won and foreign currency funds. The Treasury Department submits Shinhan Bank s monthly funding and asset management plans to Shinhan Bank s ALM Committee for approval, based on the analysis of various factors, including macroeconomic indices, interest rate and foreign exchange movements and maturity structures of Shinhan Bank s assets and liabilities. Shinhan Bank s Risk Management Department measures Shinhan Bank s liquidity ratio and liquidity gap ratio on a daily basis and reports whether they are in compliance with the limits to Shinhan Bank s ALM Committee on a monthly basis.

The following tables show Shinhan Bank's liquidity status and limits for Won-denominated and foreign currency-denominated accounts (including derivatives and merchant banking accounts) as of December 31, 2009 in accordance with the regulations of the Financial Services Commission.

Note:

(1) In October 31, 2008, the criterion for Won-denominated liquidity ratio was changed from three months of residual maturity to one month of residual maturity.

Shinhan Bank maintains diverse sources of liquidity to facilitate flexibility in meeting its funding requirements. Shinhan Bank funds its operations principally by accepting deposits from retail and corporate depositors, accessing the call loan market (a short-term market for loans with maturities of less than one month), issuing debentures and borrowing from the Bank of Korea. Shinhan Bank uses the funds primarily to extend loans or purchase securities. Generally, deposits are of shorter average maturity than loans or investments.

Shinhan Card manages its liquidity risk according to the following principles: (i) it must be able to provide a sufficient volume of necessary funding in a timely manner at a reasonable cost, (ii) it must establish an overall liquidity risk management strategy, including in respect of liquidity management targets, policy and internal control

104

Table of Contents

systems, and (iii) it must manage its liquidity risk in conjunction with other risks based on a comprehensive understanding of the interaction among the various risks. In managing its liquidity risks, Shinhan Card focuses on a prompt response system based on periodic monitoring of the relevant early signals, stress testing and contingency plan formulations. Shinhan Card identifies its funding needs on a daily, monthly, quarterly and annual basis based on the maturity schedule of its liabilities as well as short-term liquidity needs, based upon which it formulates its funding plans using diverse sources such as corporate debentures, commercial papers, asset-backed securitizations and credit line facilities. Shinhan Card also has in place master asset-backed securitization arrangements through which it can securitize assets with minimum delay, and when entering into asset-backed securitizations, it provides sufficient credit enhancements to avoid triggering early amortization events. In addition, Shinhan Card formulates long-term funding plans with a time horizon of three years, enters into derivative arrangements to hedge interest rate- and foreign currency-related risks and conducts pre-transaction risk analyses before entering into any new type of derivative arrangements.

Furthermore, Shinhan Card also manages its liquidity risk within the limits set on Won accounts in accordance with the regulations of the Financial Services Commission. The Financial Services Commission requires Korean credit card companies to maintain a Won liquidity ratio of at least 100.0%,

The following tables show Shinhan Card s liquidity status and limits for Won-denominated accounts as of December 31, 2009 in accordance with the regulations of the Financial Services Commission.

Shinhan Card s Won-denominated accounts

Won-Denominated Accounts	7 Days or Less	1 Months or Less	3 Months or Less	6 Months or Less	1 Year or Less	Over 1 Year	Total			
	(In billions of Won)									
Assets	1,647.24	7,294.93	10,780.70	12,247.84	14,416.72	3,558.80	17,975.52			
Liabilities	447.95	1,983.77	2,684.70	3,443.44	4,857.58	6,302.77	11,160.36			
Liquidity ratio			401.56%							

Shinhan Investment manages its liquidity risk for its Won-denominated accounts by setting a limit of \text{\$\psi\$100 billion on each of its seven-day and one-month liquidity gap, a limit of 110% on its three-months liquidity ratio and a limit of \text{\$\psi\$10 billion on its liquidity VaR. As for its foreign currency-denominated accounts, Shinhan Investment manages the liquidity risk on a quarterly basis in compliance with the guidelines of the Financial Supervisory Service, which requires the one-week and one-month maturity mismatch ratios to be 0% and -10% or less, respectively, and the three months liquidity ratio to be 80% or higher.

Our other subsidiaries fund their operations primarily through call money, bank loans, commercial paper, corporate debentures and asset-backed securities. Our holding company acts as a funding vehicle for long-term financing of our subsidiaries whose credit ratings are lower than the holding company, including Shinhan Card and Shinhan Capital, to lower the overall funding costs within regulatory limitations. Under the Monopoly Regulation and Fair Trade Act of Korea, however, a financial holding company is prohibited from borrowing funds in excess of 200% of its total stockholders equity. In addition, pursuant to our liquidity risk management policies designed to ensure compliance with required capital adequacy and liquidity ratios, we have set limits to the amount of liquidity support by our holding company to our subsidiaries to 70% of our total stockholders equity and the amount of liquidity support to a single subsidiary to 35% of our total stockholders equity.

In addition to liquidity risk management under the normal market situations, we have contingency plans to effectively cope with possible liquidity crisis. Liquidity crisis arises when we would not be able to effectively manage the situations with our normal liquidity management measures due to, among other reasons, inability to access our normal sources of funds or epidemic withdrawals of deposits as a result of various external or internal factors, including a collapse in the financial markets or abrupt deterioration of our credit. We have contingency plans corresponding to different stages of liquidity crisis, cautionary stage, near-crisis stage and crisis stage, based on the following liquidity indices:

indices that reflect the market movements such as interest rates and stock prices;

105

Table of Contents

indices that reflect financial market psychology such as the size of money market funds; and indices that reflect our internal financial condition.

Operational Risk Management

Operational risk is difficult to quantify and subject to different definitions. The Basel Committee defines operational risk as the risk of loss resulting from inadequate or failed internal processes, people and systems or from other external events. Similarly, we define operational risk as the risks related to our overall management other than credit risk, market risk, interest rate risk and liquidity risk. These include risks arising from system failure, human error or non-adherence to policy and procedures, from fraud or inadequate internal controls and procedures, from environmental changes, resulting in financial and non-financial loss, including reputational loss. We monitor and assess operational risks related to our business operations, including administrative risk, information technology risk, managerial risk, legal risk and reputation risk, with a view to minimizing such losses.

The Group Internal Audit Department at our holding company, reporting directly to our Audit Committee, is directly responsible for overseeing our operational risk management with a focus on legal, regulatory, operational and reputational risks. Our holding company s Audit Committee oversees and monitors our operational compliance with legal and regulatory requirements. At the holding company level, we define each subsidiary s operational process and establish an internal review system applicable to each subsidiary. Each subsidiary s operational risk is internally monitored and managed at the subsidiary level and the Group Internal Audit Activity continuously monitors the integrity of our subsidiaries—operational risk management system. Our holding company s Board of Directors and the Group Risk Management Committee establish our basic policies for operational risk management at the group level. To monitor and manage operational risks, Shinhan Bank maintains, a system of comprehensive policies and has in place a control framework designed to provide a stable and well-managed operational environment throughout the organization. Currently, the primary responsibility for ensuring compliance with our banking operational risk procedures remains with each of the business units and operational teams. In addition, the Audit Department, the Risk Management Department and the Compliance Department of Shinhan Bank also play important roles in reviewing and maintaining the integrity of Shinhan Bank s internal control environment.

The operational risk management system of Shinhan Bank is managed by the operational risk team under the Risk Management Department. The current system principally consists of risk control self-assessment, risk quantification using key risk indicators, loss data collection, scenario management and operational risk capital measurement. Shinhan Bank operates several educational and awareness programs with a view to familiarizing all of its employees to this system. In addition, Shinhan Bank has a designated operational risk manager at each of its departments and branch offices, serving the role of a coordinator between the operational risk team at the headquarters and the employees in the field and seeking to provide centralized feedback to further improve the operational risk management system.

As of December 31, 2009, Shinhan Bank has conducted risk control self-assessments on its departments as well as domestic and overseas branch offices, from which it collects systematized data on all of its branch offices, and uses the findings from such self-assessments to improve the procedures and processes for the relevant departments or branch offices. In addition, Shinhan Bank has accumulated risk-related data since 2003, improved the procedures for monitoring operational losses and is developing risk simulation models. In addition, Shinhan Bank selects and monitors, at the department level, approximately 188 key risk indicators.

Shinhan Investment, through its operational risk management system, conducts self-assessments of risks, collects loss data and manages key risk indicators. The operational risk management system is supervised by its audit department,

compliance department and operational risk management department, as well as a risk management officer in each of Shinhan Investment departments.

The audit committee of Shinhan Bank, which consists of three board members, including two outside directors, is an independent inspection authority that supervises Shinhan Bank s internal controls and compliance with established ethical and legal principles. The audit committee performs internal audits of, among other matters, Shinhan Bank s overall management and accounting, and supervises its Audit Department that assists Shinhan

106

Table of Contents

Bank s audit committee. Shinhan Bank s audit committee also reviews and evaluates Shinhan Bank s accounting policies and their changes, financial and accounting matters and fairness of financial reporting.

Shinhan Bank s Audit Committee and the Audit Department supervise and perform the following audits:

general audits, including full-scale audits performed annually for the overall operations, sectional audits of selected operations performed when necessary, and periodic and irregular spot audits;

special audits, performed when the Audit Committee or standing auditor deems it necessary or pursuant to requests by the chief executive officer or supervisory authorities such as the Financial Supervisory Service;

day-to-day audits, performed by the standing auditor for material transactions or operations that are subject to approval by the heads of Shinhan Bank s operational departments or senior executives;

real-time monitoring audits, performed by the computerized audit system to identify any irregular transactions and take any necessary actions; and

self-audits as a self-check by each operational department to ensure its compliance with our business regulations and policies, which include daily audits, monthly audits and special audits.

In addition to these audits and compliance activities, Shinhan Bank s Audit Department designates operational risk management examiners to monitor the appropriateness of operational risk management frameworks and the functions and activities of the board of directors, relevant departments and business units, and conducts periodic checks on the operational risk and reports such findings. Shinhan Bank s Audit Department also reviews in advance proposed banking products or other business or service plans with a view to minimizing operational risk.

As for Shinhan Investment, its audit department conducts an annual inspection as to whether the internal policy and procedures of Shinhan Investment relating to its overall operation risk management are being effectively complied. The inspection has a particular focus on the appropriateness of the scope of operational risks and the collection, maintenance and processing of relevant operating data.

General audits, special audits, day-to-day audits and real-time monitoring audits are performed by our examiners, and self-audits are performed by the self-auditors of the relevant operational departments.

In addition to internal audits and inspections, the Financial Supervisory Service conducts general annual audits of our and our subsidiaries operations. The Financial Supervisory Service also performs special audits as the need arises on particular aspects of our and our subsidiaries operations such as risk management, credit monitoring and liquidity. In the ordinary course of these audits, the Financial Supervisory Service routinely issue warning notices where it determines that a regulated financial institution or such institution s employees have failed to comply with the applicable laws or rules, regulations and guidelines of the Financial Supervisory Service. We and our subsidiaries have in the past received, and expect in the future to receive, such notices and we have taken and will continue to take appropriate actions in response to such notices. For example, in January 2009, we reported to the Financial Supervisory Service that an employee at a regional branch of Shinhan Bank had embezzled approximately \textsquare\texts

We consider legal risk as a part of operational risk. The uncertainty of the enforceability of obligations of our customers and counterparties, including foreclosure on collateral, creates legal risk. Changes in laws and regulations could also adversely affect us. Legal risk is higher in new areas of business where the law is often untested in the courts although legal risk can also increase in our traditional business to the extent that the legal and regulatory landscape in Korea is changing and many new laws and regulations governing the banking industry remain untested. We seek to minimize legal risk by using stringent legal documentation, employing procedures designed to ensure that transactions are properly authorized and consulting legal advisers. The Compliance Department operates Shinhan Bank s compliance inspection system. This system is designed to ensure that all of Shinhan Bank s employees comply with the law. The compliance inspection system s main function is to monitor the degree of improvement in compliance with the law, maintain internal controls (including ensuring that each

107

Table of Contents

department has established proper internal policies and that it complies with those policies) and educate employees about observance of the law. The Compliance Department also supervises the management, execution and performance of the self-audits. Shinhan Investment also maintains a legal department and a compliance department to manage legal risks and compliance risks, respectively. The functions of these are department are similar to those of their counterparts at Shinhan Bank.

Upgrades and Integration of Risk Management

In December 2007, Shinhan Bank obtained approval from the Financial Supervisory Service to use an internal market risk evaluation model, and in April 2008, Shinhan Bank became the first commercial bank in Korea to obtain approval from the Financial Supervisory Service to use the foundation internal rating-based (F-IRB) method with respect to the Basel II credit risks related to loan portfolios of large companies, small- and medium-sized enterprises and retail outlets. In December 2008, Shinhan Bank applied for approval from the Financial Supervisory Service to use the advanced measurement approach (AMA) with respect to operational risks and is currently undergoing the review process. The approval to use the internal market risk evaluation model enables Shinhan Bank to gain a pricing advantage compared to other banks, as this model makes it easier for Shinhan Bank to manage its capital and meet the BIS equity ratio through a differentiated risk assessment based on the borrower s credit rating.

In compliance with the Basel II requirements, Shinhan Bank reflects the cost of credit based on expected loss in the computation of its pre-tax profits and also adopted the Risk Adjusted Return on Capital (RAROC) system to evaluate risk adjustments.

Shinhan Bank aims to apply the Basel II standards and principles more systematically in its systems governing the lending process, price determination, portfolio and risk management, allocation of capital, performance evaluations and incentive determinations. In particular, Shinhan Bank aims to further develop portfolio management techniques to optimize the investment of its own capital in light of the differentiated determination of regulatory capital based on the level of risk under Basel II.

Supervision and Regulation

Principal Regulations Applicable To Financial Holding Companies

General

The Korean financial holding companies and their subsidiaries are regulated by the Financial Holding Companies Act (last amended on July 31, 2009, Law No. 9788). In addition, Korean financial holding companies and their subsidiaries are subject to the regulations and supervision of the Financial Services Commission and the Financial Supervisory Service.

Pursuant to the Financial Holding Companies Act, the Financial Services Commission regulates various activities of financial holding companies. For instance, it approves the application for setting up a new financial holding company and promulgates regulations on the capital adequacy of financial holding companies and their subsidiaries and other regulations relating to the supervision of financial holding companies.

The Financial Supervisory Service is subject to the instructions and directives of the Financial Services Commission and carries out supervision and examination of financial holding companies and their subsidiaries. In particular, the Financial Supervisory Service sets forth liquidity and capital adequacy requirements for financial holding companies and reporting requirements pursuant to the authority delegated to the Financial Supervisory Service under the Financial Services Commission regulations, pursuant to which financial holding companies are required to submit

quarterly reports on business performance, financial status and other matters prescribed in the Presidential Decree of the Financial Holding Companies Act.

Under the Financial Holding Companies Act, the establishment of a financial holding company must be approved by the Financial Services Commission. A financial holding company is required to be mainly engaged in controlling its subsidiaries by holding the shares or equities of the subsidiaries in the amount of not less than 50% of

108

Table of Contents

aggregate amount of such financial holding company s assets based on the latest balance sheet. A financial holding company is prohibited from engaging in any profit-making businesses other than controlling the management of its subsidiaries and certain ancillary businesses as prescribed in the Presidential Decree of the Financial Holding Companies Act which include the following businesses:

financially supporting its subsidiaries and the subsidiaries of its subsidiaries (the direct and indirect subsidiaries);

raising capital necessary for the investment in subsidiaries or providing financial support to its direct and indirect subsidiaries;

supporting the business of its direct and indirect subsidiaries for the joint development and marketing of new product and the joint utilization of facilities or IT systems; and

pursuing any other activities exempted from authorization, permission or approval under the applicable laws and regulations.

The Financial Holding Companies Act requires every financial holding company (other than any financial holding company that is controlled by any other financial holding company) or its subsidiaries to obtain the prior approval from the Financial Services Commission before acquiring control of another company or to file with the Financial Services Commission a report within thirty (30) days after acquiring such control. Permission to liquidate or to merge with any other company must be obtained in advance from the Financial Services Commission. A financial holding company must report to the Financial Services Commission regarding certain events including:

when there is a change of its officers;

when there is a change of its largest shareholder;

when there is a change of principal shareholders of a bank holding company;

when the shareholding of the largest shareholder or a principal shareholder as prescribed under the Financial Holding Companies Act or a person who is in a special relationship with such largest or principal shareholder (as defined under the Presidential Decree of the Financial Holding Companies Act) changes by 1% or more of the total issued and outstanding voting shares of the financial holding company;

when there is a change of its name;

when there is a cause for dissolution; and

when it or its subsidiary ceases to control any of its respective direct and indirect subsidiaries by disposing of the shares of such direct and indirect subsidiaries.

Capital Adequacy

The Financial Holding Companies Act does not provide for a minimum paid-in capital of financial holding companies. All financial holding companies, however, are required to maintain a specified level of solvency. In addition, in its allocation of the net profit earned in a fiscal term, a financial holding company is required to set aside in its legal reserve an amount equal to at least 10% of the net income after tax each time it pays dividends on its net profits earned until its legal reserve reaches at least the aggregate amount of its paid-in capital.

From January 1, 2007, a financial holding company controlling banks or other financial institutions conducting banking business as prescribed in the Financial Holding Company Act (hereinafter, the bank holding company) is required to maintain a minimum consolidated equity capital ratio of 8.0%. Consolidated equity capital ratio is defined as the ratio of equity capital as a percentage of risk-weighted assets on a consolidated basis, determined in accordance with the Financial Services Commission requirements that have been formulated based on the Bank of International Settlements standards. Equity capital, as applicable to bank holding companies, is defined as the sum of Tier I capital, Tier II capital, and Tier III capital less any deductible items, each as defined under the Regulation on the Supervision of Financial Holding Companies. Risk-weighted assets is defined as the sum of credit risk-weighted assets and market risk-weighted assets.

109

Table of Contents

Liquidity

All financial holding companies are required to match the maturities of their assets to those of liabilities in accordance with the Financial Holding Companies Act in order to ensure liquidity. Financial holding companies are required to submit quarterly reports regarding their liquidity to the Financial Supervisory Service and must:

maintain a Won liquidity ratio (defined as Won assets due within three months, including marketable securities, divided by Won liabilities due within three months) of not less than 100%;

maintain a foreign currency liquidity ratio (defined as foreign currency liquid assets due within three months divided by foreign currency liabilities due within three months) of not less than 80% except for financial holding companies with a foreign currency liability to total assets ratio of less than 1%;

maintain a ratio of foreign currency liquid assets due within seven days less foreign currency liabilities due within seven days divided by total foreign currency assets of not less than 0%, except for financial holding companies with a foreign currency liability to total assets ratio of less than 1%; and

maintain a ratio of foreign currency liquid assets due within a month less foreign currency liabilities due within a month divided by total foreign currency assets of not less than negative 10% except for financial holding companies with a foreign currency liability to total assets ratio of less than 1%.

Financial Exposure to Any Single Customer and Major Shareholders

Subject to certain exceptions, the total sum of credit (as defined in the Financial Holding Companies Act, the Banking Act and the Financial Investment Services and Capital Markets Act, respectively) of a financial holding company and its direct and indirect subsidiaries which are banks, merchant banks or securities companies (Financial Holding Company Total Credit) extended to a single group of companies that belong to the same conglomerate as defined in the Monopoly Regulations and Fair Trade Act will not be permitted to exceed 25% of the Net Total Equity Capital.

Net Total Equity Capital for the purpose of the calculation of financial exposure to any single customer and Major Shareholder (as defined below) is defined under the Presidential Decree of the Financial Holding Companies Act as

- (a) the sum of:
- (i) in case of a financial holding company, the net asset which is total assets less total liabilities on balance sheet as of the end of the most recent quarter;
- (ii) in case of a bank, the capital amount which is the sum of Tier I and Tier II capital amounts determined according to the standards set by the BIS;
- (iii) in case of a merchant bank, the capital amount which is the sum of Tier I and Tier II capital amounts determined according to the standards set by the BIS, subject to further adjustments determined by the Financial Services Commission; and
- (iv) in case of a financial investment company with a dealing or brokerage license, the total asset amount less the total liability amount in the balance sheet as of the end of the most recent fiscal year and adjusted as determined by the Financial Services Commission, such as the amount of increase or decrease in paid-in capital after the end of the most recent fiscal year;

- (b) less the sum of:
- (i) the amount of shares of direct and indirect subsidiaries held by the financial holding company;
- (ii) the amount of shares which are cross-held by each direct and indirect subsidiary that is a bank, a merchant bank or a financial investment company with a dealing or brokerage license; and
- (iii) the amount of shares of a financial holding company held by such direct and indirect subsidiaries which are banks, merchant banks or financial investment companies with a dealing or brokerage license.

110

Table of Contents

The Financial Holding Company Total Credit to a single individual or legal entity will not be permitted to exceed 20% of the Net Total Equity Capital.

Furthermore, the total sum of credits (as defined under the Financial Holding Companies Act, the Banking Act and the Financial Investment Services and Capital Markets Act, respectively) of a bank holding company and its direct and indirect subsidiaries (Bank Holding Company Total Credit) extended to a Major Shareholder (together with the persons who have special relationship with such Major Shareholder) (as defined below) will not be permitted to exceed the smaller of (x) 25% of the Net Total Equity Capital and (y) the amount of the equity capital of the financial holding company multiplied by the shareholding ratio of such Major Shareholder, except in certain cases.

Major Shareholder is defined under the Financial Holding Companies Act as follows:

- (a) a shareholder holding (together with persons who have a special relationship with such shareholder as defined in the Presidential Decree of the Financial Holding Companies Act) in excess of 10% (or in the case of a financial holding company controlling regional banks only, 15%) in the aggregate of the financial holding company s total issued and outstanding voting shares; or
- (b) a shareholder holding (together with persons who have a special relationship with such shareholder as defined in the Presidential Decree of the Financial Holding Companies Act) more than 4% in the aggregate of the total issued and outstanding voting shares of the financial holding company controlling national banks (other than a financial holding company controlling regional banks only), excluding shares related to the shareholding restrictions on non-financial business group companies as described below, where such shareholder is the largest shareholder or has actual control over the major business affairs of the financial holding company through, for example, appointment and dismissal of the officers pursuant to the Presidential Decree of the Financial Holding Companies Act.

In addition, the total sum of the Bank Holding Company Total Credit extended to all of a bank holding company s Major Shareholder must not exceed 25% of the Net Total Equity Capital. Furthermore, the bank holding company and its direct and indirect subsidiaries that intend to extend the Bank Holding Company Total Credit to the bank holding company s Major Shareholder not less than the lesser of (i) the amount equivalent to 0.1% of the Net Total Equity Capital or (ii) \(\frac{\text{W}}{5}\) billion, with respect to a single transaction, must obtain prior unanimous board resolutions and then, immediately after the completion of the transaction, must file a report with the Financial Services Commission and publicly disclose the filing of such report (for example, through a website).

Restrictions on Transactions Among Direct and Indirect Subsidiaries and Financial Holding Company

Generally, a direct or indirect subsidiary of a financial holding company may not extend credit to the financial holding company which directly or indirectly controls such subsidiary. In addition, a direct or indirect subsidiary of a financial holding company may not extend credit to any other single direct or indirect subsidiary of the financial holding company in excess of 10% of its stockholders—equity and to any other direct and indirect subsidiaries of the financial holding company in excess of 20% of its stockholders—equity in the aggregate. The direct or indirect subsidiaries of a financial holding company must obtain an appropriate level of collateral for the credits extended to the other direct and indirect subsidiaries unless otherwise approved by the Financial Services Commission. The appropriate level of collateral for each type of such collateral is as follows:

(i) For deposits and installment savings, obligations of the Korean government or The Bank of Korea, obligations guaranteed by the Korean government or The Bank of Korea, obligations secured by securities issued or guaranteed by the Korean government or The Bank of Korea: 100% of the amount of the credit extended;

(ii) (a) For obligations of local governments under the Local Autonomy Act, local public enterprises under the Local Public Enterprises Act, and investment institutions and other quasi-investment institutions under the Basic Act on the Management of Government-Invested Institution (hereinafter, the public institutions and others); (b) obligations guaranteed by the public institutions and others, and (c) obligations secured by the securities issued or guaranteed by public institutions and others: 110% of the amount of the credit extended; and

111

Table of Contents

(iii) For any property other than those set forth in the above (i) and (ii): 130% of the amount of the credit extended.

Subject to certain exceptions, a direct or indirect subsidiary of a financial holding company is prohibited from owning the shares of any other direct or indirect subsidiaries (other than those directly controlled by the direct and indirect subsidiaries in question) in common control by the financial holding company. However, a direct or indirect subsidiary of a financial holding company may invest as a limited partner in a private equity fund that is a direct or indirect subsidiary of the same financial holding company. The transfer of certain assets subject to or below the precautionary criteria between the financial holding company and its direct or indirect subsidiary or between the direct and indirect subsidiaries of a financial holding company is prohibited except for (i) the transfer to an asset-backed securitization company, typically a special purpose entity, or the entrustment with a trust company, under the Asset-Backed Securitization Act, (ii) the transfer to a mortgage-backed securitization company under the Mortgage-Backed Securitization Company Act, (iii) the transfer or in-kind contribution to a corporate restructuring vehicle under the Corporate Restructuring Investment Company Act or (iv) the acquisition by a corporate restructuring company under the Industrial Development Act.

Disclosure of Management Performance

For the purpose of protecting the depositors and investors in the subsidiaries of the financial holding companies, the Financial Services Commission requires financial holding companies to disclose certain material matters including (i) financial condition and profit and loss of the financial holding company and its direct and indirect subsidiaries, (ii) how capital was raised by the financial holding company and its direct and indirect subsidiaries and how such capital was used, (iii) any sanctions levied on the financial holding company and its direct and indirect subsidiaries under the Financial Holding Companies Act or any corrective measures or sanctions under the Law on Improvement of Structure of Financial Industry or (iv) occurrence of any non-performing assets or financial incident which may have a material adverse effect.

Restrictions on Shareholdings in Other Companies

Subject to certain exceptions, a bank holding company may not own more than 5% of the total issued and outstanding shares of another company (other than its direct and indirect subsidiaries). If the financial holding company owns shares of another company (other than its direct and indirect subsidiaries) which is not a finance-related company, the financial holding company is required to exercise its voting rights in the same manner and same proportion as the other shareholders of the company exercise their voting rights in favor of or against any resolutions under consideration at the shareholders meeting of the company.

Restrictions on Shareholdings by Direct and Indirect Subsidiaries

Generally, a direct subsidiary of a financial holding company is prohibited from controlling any other company; *provided* that a direct subsidiary of a financial holding company may control (as an indirect subsidiary of the financial holding company): (i) subsidiaries in foreign jurisdiction which are engaged in a financial business, (ii) certain financial institutions which are engaged in the business that the direct subsidiary may conduct without any licenses or permits, (iii) certain financial institutions whose business is related to the business of the direct subsidiary as prescribed under the Presidential Decree of the Financial Holding Companies Act (e.g., the companies which a bank subsidiary may control are limited to credit information companies, credit card companies, trust business companies, securities investment management companies, investment advisory companies, futures business companies, and asset management companies), (iv) certain financial institutions whose business is related to financial business as prescribed by the regulations of the Ministry of Strategy and Finance, and (v) certain companies which are not financial institutions but whose business is related to the financial business of the financial holding company as prescribed by the Presidential Decree of the Financial Holding Companies Act (e.g. finance-related research company,

finance-related information technology company, etc.). Acquisition by the direct subsidiaries of such indirect subsidiaries requires a prior permission from the Financial Services Commission or a report to be submitted to the Financial Services Commission, depending on the types of the indirect subsidiaries and the amount of total assets of the indirect subsidiaries.

112

Table of Contents

An indirect subsidiary of a financial holding company is prohibited from controlling any other company, provided, however, that in the case where a company held control over another company at the time such company initially became an indirect subsidiary of a financial holding company, such indirect subsidiary shall be required to dispose of its interest in such other company within two (2) years after becoming an indirect subsidiary of a financial holding company.

A subsidiary of a financial holding company may invest in a special purpose company as its largest shareholder for purposes of making investments under the Act on Private Investment in Social Infrastructure without being deemed as controlling such special purpose company.

In addition, a private equity fund established in accordance with the Financial Investment Services and Capital Markets Act is not considered to be a subsidiary of a financial holding company even if the financial holding company is the largest investor in the private equity fund unless the financial holding company is the asset management company for the private equity fund.

Restrictions on Transactions between a Financial Holding Company and its Major Shareholder

A bank holding company and its direct and indirect subsidiaries are prohibited from acquiring (including acquisition by a trust account of its subsidiary bank) shares issued by such bank holding company s Major Shareholder in excess of 1% of the Net Total Equity Capital. In addition, the financial holding company and its direct and indirect subsidiaries which intend to acquire shares issued by such Major Shareholder not less than the lesser of (i) the amount equivalent to 0.1% of the Equity Capital or (ii) \times 5 billion, with respect to a single transaction, must obtain prior unanimous board resolutions and then, immediately after the acquisition, must file a report with the Financial Services Commission and publicly disclose the filing of such report (for example, through a website).

Restrictions on Financial Holding Company Ownership

Under the Financial Holding Companies Act, subject to certain exceptions, a financial institution may not control any financial holding company. In August 2007, the Financial Holding Companies Act was amended to permit foreign financial institutions to establish financial holding companies in Korea. Pursuant to the Presidential Decree of the Financial Holding Companies Act, which was also amended in November 2007 to reflect the change in the statute, a foreign financial institution can control a financial holding company if, subject to satisfying certain other conditions, it, together with its specially-related persons, holds 100% of the total shares in the financial holding company.

In addition, any single shareholder and persons who stand in a special relations with such shareholder (as defined under the Presidential Decree to the Financial Holding Companies Act) may acquire beneficial ownership of up to 10% of the total issued and outstanding shares with voting rights of a financial holding company controlling national banks (or 15% in the case of a financial holding company controlling regional banks only). The Government and the Korea Deposit Insurance Corporation are not subject to such a ceiling.

However, non-financial business group companies (as defined below) may not acquire beneficial ownership of shares of a bank holding company in excess of 9% of such financial holding company s outstanding voting shares, provided that such non-financial business group companies may acquire beneficial ownership of up to 10% of such financial holding company s outstanding voting shares with the approval of the Financial Services Commission under the condition that such non-financial business group companies will not exercise voting rights in respect of such shares in excess of the 9% limit. In addition, any person (whether a Korean national or a foreigner), with the exception of non-financial business group companies described above, may also acquire in excess of 10% of total voting shares issued and outstanding of a financial holding company which controls national bank, provided that an approval from the Financial Services Commission is obtained in instances where the total holding exceeds 10% (or 15% in the case

of a financial holding company controlling regional banks only), 25% or 33% of the total voting shares issued and outstanding of such bank holding company. Also, in the event a person (whether a Korean national or a foreigner, but excluding persons prescribed under the Presidential Decree to the Financial Holding Companies Act) (i) acquires in excess of 4% of the total voting shares issued and outstanding of any financial holding company (other than a financial holding company controlling regional banks only), (ii) becomes the largest

113

Table of Contents

shareholder of such financial holding company in which such person acquired in excess of 4% of the total voting shares issued and outstanding, or (iii) has its shareholding in such financial holding company, in which it had acquired in excess of 4% of the total voting shares issued and outstanding shares, changed by not less than 1% of the total voting share issued and outstanding of such financial holding company, a report as prescribed by the Presidential Decree to the Financial Holding Companies Act shall be filed with the Financial Services Commission.

Non-financial business group companies are defined under the Financial Holding Companies Act as the companies, which include:

- (i) any same shareholder group with aggregate net assets of all non-financial business companies belonging to such group of not less than 25% of the aggregate net assets of all members of such group;
- (ii) any same shareholder group with aggregate assets of all non-financial business companies belonging to such group of not less than \(\forall 2\) trillion; or
- (iii) any mutual fund in which a same shareholder group identified in (1) or (2) above holds more than 9% of the total shares issued and outstanding of such mutual fund.

Financial Investment Services and Capital Markets Act

General

On July 3, 2007, the National Assembly of Korea passed the Financial Investment Services and Capital Markets Act, a new law consolidating six laws regulating capital markets. The Financial Investment Services and Capital Markets Act became effective as of February 4, 2009.

Consolidation of Capital Markets-Related Laws

Prior to the effective date of the Financial Investment Services and Capital Markets Act, separate laws (for example, the Securities and Exchange Act, the Futures Business Act, and the Indirect Investment Asset Management Business Act) regulated various types of financial institutions depending on the type of the financial institution (for example, securities companies, futures companies, trust business companies, and asset management companies) and subjected financial institutions to different licensing and ongoing regulatory requirements. By applying a uniform set of rules to the same financial business having the same economic function, the Financial Investment Services and Capital Markets Act attempts to improve and address issues caused by the previous regulatory system under which same economic functions relating to capital markets-related business were governed by multiple regulations. To this end, the Financial Investment Services and Capital Markets Act categorizes capital markets-related business into six different functions, as follows:

dealing (trading and underwriting of financial investment products (as defined below));

brokerage (brokerage of financial investment products);

collective investment (establishment of collective investment schemes and the management thereof);

investment advice;

discretionary investment management; and

trusts (together with the five business set forth above, the Financial Investment Businesses).

Accordingly, all financial business relating to financial investment products are reclassified as one or more of the Financial Investment Businesses described above, and financial institutions are subject to the regulations applicable to their relevant Financial Investment Businesses, irrespective of the type of the financial institution it is. For example, under the Financial Investment Services and Capital Markets Act, derivative businesses conducted by securities companies and future companies will be subject to the same regulations under the Financial Investment Services and Capital Markets Act, at least in principle.

The banking business and insurance business are not subject to the Financial Investment Services and Capital Markets Act and will continue to be regulated under separate laws; provided, however, that they may become

114

Table of Contents

subject to the Financial Investment Services and Capital Markets Act if their activities involve any financial investment businesses requiring a license based on the Financial Investment Services and Capital Markets Act.

Comprehensive Definition of Financial Investment Products

In an effort to encompass the various types of securities and derivative products available in the capital markets, the Financial Investment Services and Capital Markets Act sets forth a comprehensive term—financial investment products, defined to mean all financial products with a risk of loss in the invested amount (in contrast to—deposits,—which are not financial investment products for which the invested amount is protected or preserved). Financial investment products are classified into two major categories: (i)—securities—(relating to financial investment products where the risk of loss is limited to the invested amount) and (ii)—derivatives—(relating to financial investment products where the risk of loss may exceed the invested amount). As a result of the general and open-ended manner in which financial investment products are defined, any future financial product could potentially fall under the definition of financial investment products, which would enable Financial Investment Companies (as defined below) to handle a broader range of financial products. Under the Financial Investment Services and Capital Markets Act, securities companies, asset management companies, futures companies and other entities engaging in any Financial Investment Business are classified as—Financial Investment Companies.

New License System

Financial Investment Companies will be able to choose what Financial Investment Business to engage in (through the check the box method set forth in the relevant license application), by specifying the desired (i) Financial Investment Business, (ii) financial investment product and (iii) target customers to which financial investment products may be sold (i.e., general investors or professional investors). Licenses will be issued under the specific business sub-categories described above. For example, it would be possible for a Financial Investment Company to obtain a license to engage in the Financial Investment Business of (i) dealing (ii) over the counter derivatives products (iii) only with professional investors.

Expanded Business Scope of Financial Investment Companies

Under the previous regulatory regime in Korea, it was difficult for a financial institution to explore a new line of business or expand upon its existing line of business. For example, a financial institution licensed as a securities company generally could not engage in the asset management business. In contrast, under the Financial Investment Services and Capital Markets Act, pursuant to the integration of its current business involving financial investment products into a single Financial Investment Business, a licensed Financial Investment Company is permitted to engage in all types of Financial Investment Businesses, subject to compliance with the relevant regulations, for example, maintaining an adequate Chinese Wall, to the extent required. As to incidental businesses (i.e., a financial related business which is not a Financial Investment Business), the Financial Investment Services and Capital Markets Act generally allows a Financial Investment Company to freely engage in such incidental businesses by shifting away from the previous system of permitting only the listed activities towards a more comprehensive system. In addition, a Financial Investment Company is permitted (i) to outsource marketing activities by contracting with introducing brokers that are individuals but not employees of the Financial Investment Company, (ii) to engage in foreign exchange business related to their Financial Investment Business and (iii) to participate in the settlement network, pursuant to an agreement among the settlement network participants.

Improvement in Investor Protection Mechanism

While the Financial Investment Services and Capital Markets Act broadens the scope of financial businesses in which financial institutions are permitted to engage, a more rigorous investor-protection mechanism is imposed upon

Financial Investment Companies dealing in financial investment products. The Financial Investment Services and Capital Markets Act makes a distinction between general investors and sophisticated investors and provides new or enhanced protections to general investors. For instance, the Financial Investment Services and Capital Markets Act expressly provides for strict know-your-customer rules for general investors and imposes an obligation on Financial Investment Companies that they should market financial investment products suitable to each general investor considering his or her personal attributes, including investment objective, net worth, and investment

115

Table of Contents

experience. Under the Financial Investment Services and Capital Markets Act, a Financial Investment Company can be held liable if a general investor proves (i) damages or losses relating to such general investor s investment in financial investment products solicited by such Financial Investment Company and (ii) absence of explanation, false explanation, or omission of material fact (without having to prove fault or causation). In case there are any conflicts of interest between the Financial Investment Companies and investors, the Financial Investment Services and Capital Markets Act expressly requires (i) disclosure of any conflict of interest to investors and (ii) mitigation of conflicts of interest to a comfortable level or abstention from the relevant transaction.

Other Regulatory Changes Related to Securities and Investments

The Financial Investment Services and Capital Markets Act brought changes to various rules in securities regulations including those relating to public disclosure, insider trading and proxy contests, which had previously been governed by the Securities and Exchange Act. For example, the 5% and 10% reporting obligations under the Securities and Exchange Act have become more stringent under the Financial Investment Services and Capital Markets Act. For instance, the numbers of events requiring an investor to update its 5% report have increased under the Financial Investment Services and Capital Markets Act. Previously, only a change in the shareholding of 1% or more or in the purpose of shareholding (such as an intention to influence management) could trigger the obligation to update the 5% report. The Government has issued detailed regulations stipulating additional events requiring updates to 5% reports, such as the change in the type of holding and change in any major aspect of the relevant contract. As for the 10% report filing obligation, the initial filing is expected to be required to be made within five business days of the date of the event triggering the 10% reporting obligation, compared to 10 calendar days under the previous law. The due date for reporting a subsequent change after the initial 10% report filing has been reduced from the 10th day of the first month immediately following the month in which such change took place to five business days of the date of such change. Under the previous law, there had been a limitation on the type of investment vehicles that could be used in a collective investment scheme (namely, to trusts and corporations), the type of funds that could be used for collective investments, and the types of assets and investment securities a fund could invest in. However, the Financial Investment Services and Capital Markets Act significantly liberalizes these restrictions, permitting all legal entities, including limited liability companies or partnerships, to be used for the purpose of collective investments, allowing the formation of fund complexes and permitting investment funds to invest in a wide variety of different assets and investment instruments.

Principal Regulations Applicable to Banks

General

The banking system in Korea is governed by the Banking Act of 1950, as amended (the Banking Act) and the Bank of Korea Act of 1950, as amended (the Bank of Korea Act). In addition, Korean banks are subject to the regulations and supervision of the Bank of Korea, the Bank of Korea s Monetary Policy Committee, the Financial Services Commission and its executive body, the Financial Supervisory Service.

The Bank of Korea, established in June 1950 under the Bank of Korea Act, performs the customary functions of a central bank. It seeks to contribute to the sound development of the national economy by price stabilization through establishing and implementing efficient monetary and credit policies. The Bank of Korea acts under instructions of the Monetary Policy Committee, the supreme policy-making body of the Bank of Korea.

Under the Bank of Korea Act, the Monetary Policy Committee s primary responsibilities are to formulate monetary and credit policies and to determine the operations, management and administration of the Bank of Korea. The Financial Services Commission, established on April 1, 1998, regulates commercial banks pursuant to the Banking Act, including establishing guidelines on capital adequacy of commercial banks, and promulgates regulations relating

to supervision of banks. Furthermore, pursuant to the Amendment to the Government Organization Act and the Banking Act on May 24, 1999, the Financial Services Commission, instead of the Ministry of Strategy and Finance, now regulates market entry into the banking business.

The Financial Supervisory Service is subject to the instructions and directives of the Financial Services Commission and carries out supervision and examination of commercial banks. In particular, the Financial Supervisory Service sets requirements both for the prudent control of liquidity and for capital adequacy and

116

Table of Contents

establishes reporting requirements pursuant to the authority delegated to it under the Financial Services Commission regulations, pursuant to which banks are required to submit annual reports on financial performance and shareholdings, regular reports on management strategy and non-performing loans, including write-offs, and management of problem companies and plans for the settlement of bad loans.

Under the Banking Act, approval to commence a commercial banking business or a long-term financing business must be obtained from the Financial Services Commission. Commercial banking business is defined as the lending of funds acquired predominantly from the acceptance of deposits for a period not exceeding one year or, subject to the limitation established by the Financial Services Commission, for a period between one year and three years. Long-term financing business is defined as the lending, for periods in excess of one year, of funds acquired predominantly from paid-in capital, reserves or other retained earnings, the acceptance of deposits with maturities of at least one year, or the issuance of bonds or other securities. A bank wishing to enter any business other than commercial banking and long-term financing businesses, such as the trust business, must obtain approval from the Financial Services Commission. Approval to merge with any other banking institution, to liquidate, to close a banking business or to transfer all or a part of a business must also be obtained from the Financial Services Commission.

If the Korean government deems a bank s financial condition to be unsound or if a bank fails to meet the applicable capital adequacy ratio set forth under Korean law, the government may order:

capital increases or reductions;

stock cancellations or consolidations;

transfers of a part or all of business;

sale of assets;

closures of branch offices;

mergers or becoming a subsidiary under the Financial Holding Companies Act of a financial holding company;

acquisition of a bank by a third party;

suspensions of a part or all of business operation; or

assignments of contractual rights and obligations relating to financial transactions.

Capital Adequacy

The Banking Act requires nationwide banks to maintain a minimum paid-in capital of \text{\psi}100 billion and regional banks to maintain a minimum paid-in capital of \text{\psi}25 billion.

In addition to minimum capital requirements, all banks including foreign bank branches in Korea are required to maintain a prescribed solvency position. A bank must also set aside as its legal reserve an amount equal to at least 10% of its net profits after tax each time it pays dividends on net profits earned until such time when the reserve equals the amount of its total paid-in capital.

Under the Banking Act, the capital of a bank is divided into two categories: Tier I and Tier II capital. Tier I capital (core capital) consists of stockholders equity, capital surplus, retained earnings and equity representing new types of

equity securities deemed to be functionally equivalent to capital which are designated by the Financial Services Commission. Tier II capital (supplementary capital) consists of revaluation reserves, gain on valuation of investment in securities, allowance for bad debts set aside for loans classified as normal or precautionary, perpetual subordinated debt, cumulative preferred shares, redeemable preferred shares (with a right to redeem after the fifth anniversary of the date of issuance) and certain other subordinated debt.

All banks must meet standards regarding minimum ratios of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets, determined in accordance with the Financial Services Commission requirements that have been formulated based on the Bank for International Settlement (BIS) Standards. These

117

Table of Contents

standards were adopted and became effective in 1996. Under these regulations, all domestic banks and foreign bank branches were required to meet the minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets of 8%.

The Financial Services Commission amended the Regulation on the Supervision of the Banking Business in November 2002 to introduce a more conservative risk-weighting system on certain newly extended mortgage and home equity loans, requiring Korean banks to apply the risk-weighted ratio of 50%, 60%, or 70% in respect of home mortgage loans depending on the borrowers debt ratios and whether the home mortgage loans are overdue. On June 28, 2007, the Financial Services Commission further amended the Detailed Regulations on the Supervision of the Banking Business, and, as a result, Korean banks have been applying the following risk-weight ratios in respect of their home mortgage loans starting from 1st January, 2008:

- (1) for those banks adopting a standardized approach for calculating credit risk capital requirements, the risk-weight ratio of 35%; and
- (2) for those banks adopting an internal ratings-based approach for calculating credit risk capital requirements, a risk-weight ratio calculated with reference to the probability of default, loss given default and exposure at default, each as defined in the Detailed Regulations on the Supervision of the Banking Business.

In Korea, Basel II, the new convention entered into by the Basel committee in June 2004 for the purpose of improving risk management and increasing capital adequacy of banks, was implemented in January 2008. Pursuant to Basel II, operational risk, such as inadequate procedure, loss risk by employees, internal system, occurrence of unexpected event, as well as credit risk and market risk, is taken into account in calculating the risk-weighted assets, in addition to maintaining the capital adequacy ratio of 8% for banks. Under Basel II, the capital requirements for credit risk can be calculated by the internal rating based (IRB) approach or the standardized approach.

Under the standardized approach, a home mortgage loan fully secured by a residential property, which is or will be occupied by a borrower, is risk-weighted at 35%.

Under the Regulation on the Supervision of the Banking Business, banks generally must maintain allowances for credit losses in respect of their outstanding loans and other credits (including confirmed guarantees and acceptances and trust account loans) in an aggregate amount covering not less than:

0.85% of normal credits (or 0.9% in the case of normal credits comprising loans to certain industries including construction, retail and wholesale sales, accommodations, restaurant, real estate and lease, and 1.0% in the case of normal credits comprising loans to individuals and households and 1.5% in the case of normal credits comprising outstanding credit card receivables and card loans);

7% of precautionary credits (or 10% in the case of precautionary credits comprising loans to individuals and households, and 15% in the case of precautionary credits comprising outstanding credit card receivables and card loans);

20% of substandard credits;

50% of doubtful credits (or 55% in the case of doubtful credits comprising loans to individuals and households, and 60% in the case of doubtful credits comprising outstanding credit card receivables and card loans); and

100% of estimated loss credits.

Furthermore, under an amendment in 2006 to the Regulation on the Supervision of the Banking Business, banks must maintain allowances for credit losses in respect of their confirmed guarantees (including confirmed acceptances) and outstanding non-used credit lines as of the settlement date in an aggregate amount calculated at the same rates applicable to normal, precautionary, substandard and doubtful credits comprising their outstanding loans and other credits as set forth above.

118

Table of Contents

Liquidity

All banks are required to match the maturities of their assets and liabilities in accordance with the Banking Act in order to ensure adequate liquidity. Banks may not invest in excess of an amount exceeding 60% of their Tier I and Tier II capital (less any capital deductions) in stocks and other securities with a period remaining to maturity of over three years. However, this restriction does not apply to government bonds or to Monetary Stabilization Bonds issued by the Bank of Korea.

The Financial Services Commission requires each Korean bank to maintain a Won liquidity ratio (defined as Won assets due within one month, including marketable securities, divided by Won liabilities due within one month) of not less than 100% and to make monthly reports to the Financial Supervisory Service. The Financial Services Commission also requires each Korean bank to (1) maintain a foreign-currency liquidity ratio due within three months (defined as foreign-currency liquid assets due within three months) of not less than 85%, (2) maintain a ratio of foreign-currency liquid assets due within seven days (defined as foreign-currency liquid assets due within seven days, divided by total foreign-currency assets) of not less than 3% and (3) maintain a ratio of foreign-currency liquid assets due within a month (defined as foreign-currency liquid assets due within a month less foreign currency liabilities due within a month, divided by total foreign-currency assets) of not less than negative 10%. The Financial Services Commission also requires each Korean bank to submit monthly reports with respect to its compliance with these ratios.

The Monetary Policy Committee is authorized to fix and alter minimum reserve requirements that banks must maintain against their deposit liabilities. The current minimum reserve ratio is 7.0% of average balances for Won-denominated demand deposits outstanding, 0.0% of average balances for Won-denominated employee asset establishment savings deposits, employee long-term savings deposits, employee house purchase savings deposits, long-term house purchase savings deposits, household long-term savings deposits and employee preferential savings deposits outstanding and 2.0% of average balances for Won-denominated time and savings deposits, mutual installments, housing installments and certificates of deposit outstanding. For foreign currency deposit liabilities, a 2.0% minimum reserve ratio is applied to savings deposits outstanding and a 7.0% minimum reserve ratio is applied to demand deposits, while a 1.0% minimum reserve ratio is applied for offshore accounts, immigrant accounts and resident accounts opened by foreign exchange banks.

Financial Exposure to Any Single Customer and Major Shareholders

Under the Banking Act, the sum of material credit exposures by a bank, namely, the total sum of its credits to single individuals, legal entities or business groups that exceed 10% of the sum of Tier I and Tier II capital (less any capital deductions), must not exceed five times the sum of Tier I and Tier II capital (less any capital deductions), subject to certain exceptions. Subject to certain exceptions, no bank is permitted to extend credit (including loans, guarantees, purchases of securities (only in the nature of a credit) and such other transactions which directly or indirectly create credit risk) in excess of 20% of the sum of Tier I and Tier II capital (less any capital deductions) to a single individual or a legal entity, and no bank may grant credit in excess of 25% of the sum of Tier I and Tier II capital (less any capital deductions) to a single group of companies that belong to the same conglomerate as defined in the Monopoly Regulations and Fair Trade Act.

Under the Banking Act, certain restrictions apply to extending credits to a major shareholder. The definition of a major shareholder is as follows:

a shareholder holding (together with persons who have a special relationship with such shareholder as defined in the Presidential Decree of the Banking Act) in excess of 10% (or in the case of regional banks, 15%) in the

aggregate of the bank s total issued and outstanding voting shares; or

a shareholder holding (together with persons who have a special relationship with such shareholder as defined in the Presidential Decree of the Banking Act) more than 4% in the aggregate of the total issued and outstanding voting shares of a bank (other than a regional bank), where such shareholder is the largest shareholder or is able to actually control the major business affairs of the bank, for example, through appointment and dismissal of the chief executive officer or of the majority of the executives.

119

Table of Contents

According to such amendment, banks are prohibited from extending credits in the amount greater than the lesser of (1) 25% of the sum of such bank s Tier I and Tier II capital (less any capital deductions) and (2) the relevant major shareholder s shareholding ratio multiplied by the sum of the bank s Tier I and Tier II capital (less any capital deductions) to a major shareholder (together with persons who have special relationship with such major shareholder as defined in the Presidential Decree of the Banking Act). Also, no bank is allowed to grant credit to its major shareholders in the aggregate in excess of 25% of its Tier I and Tier II capital (less any capital deductions).

When managing the credit risk of banks, among the methods for providing credit support by banks, a loan agreement, a purchase agreement for asset-backed commercial papers, purchase of subordinate beneficiary certificates, and assumption of liability by providing warranty against default under asset-backed securitization are examples of creating financial exposure to banks.

Interest Rates

Korean banks remain dependent on the acceptance of deposits as their primary source of funds. Currently, there are no legal controls on interest rates on bank loans in Korea except for the cap of 49% on the default interest rate under the Act on Lending Business. Historically, interest rates on deposits and lending rates were regulated by the Monetary Board of the Bank of Korea. Under the government s Financial Reform Plan issued in May 1993, controls on deposit interest rates in Korea have been gradually reduced. In February 2004, the Korean government removed restrictions on all interest rates, except for the prohibition on interest payments on current account deposits. Deregulation of interest rates on deposits has increased competition for deposits based on interest rates offered and therefore may increase our banking operation s interest expense.

Lending to Small- and Medium-Sized Enterprises

In order to obtain funding from the Bank of Korea at concessionary rates for their small- and medium-sized enterprise loans, banks are required to extend to small- and medium-sized enterprises a certain minimum percentage of any monthly increase in their Won-denominated lending. Currently, this minimum percentage is 45% in the case of national banks and 60% in the case of regional banks. If a bank does not comply with the foregoing, all or a portion of the Bank of Korea funds provided to such bank in support of loans to small-and medium-sized enterprises may have to be prepaid to the Bank of Korea or the credit limit from the Bank of Korea for such bank may be decreased.

Disclosure of Management Performance

For the purpose of enforcing mandatory disclosure of management performance so that the general public, especially depositors and stockholders, will be in a better position to monitor banks, the Financial Services Commission requires commercial banks to disclose certain matters as follows:

loans bearing no profit made to a single business group in an amount exceeding 10% of the sum of the bank s Tier I and Tier II capital (less any capital deductions) as of the end of the previous month (where the loan exposure to such borrower is calculated as the sum of substandard credits, doubtful credits and estimated loss credits) except where the loan exposure to a single business group is not more than \(\forall 4\) billion;

occurrence of any financial event involving embezzlement, malfeasance or misappropriation of funds the amount of which exceeds 1% of the sum of the bank s Tier I and Tier II capital (less any capital deductions), unless the bank has lost or expects to lose not more than \text{\text{\$\text{\$W\$}\$}}1 billion as a result thereof, or the Governor of the Financial Supervisory Service has made a public announcement regarding such an occurrence;

any loss due to court judgments or similar decisions in civil proceedings in an amount exceeding 1% of the sum of the bank s Tier I and Tier II capital (less any capital deductions) as of the end of the previous month except where the loss is not more than $\mathbf{W}1$ billion;

any event which can cause a material change in the financial status, such as resolutions for a capital increase or reduction, issuance of convertible bonds, bonds with warrants, exchangeable bonds, or depositary receipts or cancellation of shares with profit;

120

Table of Contents

any event which can cause a material change in a bank s management, such as knowledge of a proposal or confirmation of a litigation that can have a material effect on the management of the bank such as litigation regarding the effectiveness of securities issuance or amendments of rights thereunder, appointment or dismissal of an officer, or a change in bank s largest shareholder, major shareholder, affiliate company, or a resolution for change of business objective;

any event which can cause a material change in the bank s property, such as a natural disaster which causes damages in an amount exceeding 5% (or 2.5% in the case of a Large Listed Company, which refers to a company that has total assets as of the end of the most recent fiscal year of \(\formall2 trillion or more) or more of its total assets as of the end of the most recent fiscal year;

any event which can cause a material change in the bank s investment, such as investment in other companies in an amount exceeding 5% (or 2.5% in the case of a Large Listed Company) or more of the bank s Tier I and Tier II capital;

any event which can cause a material change in the bank s profit or loss; and

any other events which can have material effects on the bank s operation, including, among others, payment of cash dividend, acquisition or disposal of treasury shares, or distribution of stock option.

Restrictions on Lending

According to the Banking Act, commercial banks are prohibited from making any of the following categories of loans:

loans made for the purpose of speculation in commodities or securities;

loans made directly or indirectly on the pledge of a bank s own shares, or on the pledge of shares in excess of 20% of the issued and outstanding shares of any other corporation (subject to certain exceptions with respect to financing for infrastructure projects);

loans made directly or indirectly to enable a natural or a legal person to buy the bank s own shares;

loans made directly or indirectly to finance political campaigns and other related activities; and

loans made to any of the bank s officers or employees other than de minimis loans of up to (1)-W20 million in the case of a general loan, (2) W50 million in the case of a general loan plus a housing loan, or (3) W60 million in the aggregate for general loans, housing loans and loans to pay damages arising from wrongful acts of employees in financial transactions.

Restrictions on Investments in Property

A bank may possess real estate property only to the extent necessary for conducting its business; provided that the aggregate value of such real estate property must not exceed 60% of the sum of its Tier I and Tier II capital (less any capital deductions). Any property acquired by a bank (1) through the exercise of its rights as a secured party or (2) the acquisition of which is prohibited by the Banking Act must be disposed of within one year, subject to certain exceptions.

Restrictions on Shareholdings in Other Companies

Under the Banking Act, a bank may not own more than 15% of shares outstanding with voting rights of another company, except where, among other reasons:

the company issuing such shares is engaged in a business that falls under the category of financial businesses set forth by the Financial Services Commission (including private equity funds); or

the acquisition of shares by the bank is necessary for corporate restructuring of such company and is approved by the Financial Services Commission.

121

Table of Contents

In the above cases, a bank must satisfy either of the following requirements:

the total investment in companies in which the bank owns more than 15% of the outstanding shares with voting rights does not exceed 15% of the sum of Tier I and Tier II capital (less any capital deductions); or

the acquisition satisfies the requirements determined by the Financial Services Commission.

The Banking Act provides that a bank using its bank accounts and its trust accounts is not permitted to acquire the shares issued by the Major Shareholder of such bank in excess of an amount equal to 1% of the sum of Tier I and Tier II capital (less any capital deductions).

Restrictions on Bank Ownership

Under the Banking Act, subject to certain exceptions, a single shareholder and persons who stand in a special relationship with such shareholder (as described in the Presidential Decree to the Banking Act) may acquire beneficial ownership of up to 10% of a national bank s total issued and outstanding shares with voting rights and up to 15% of a regional bank s total issued and outstanding shares with voting rights. The government, the Korea Deposit Insurance Corporation and financial holding companies qualifying under the Financial Holding Companies Act are not subject to such ceilings. However, non-financial business group companies i.e., (1) any same shareholder group with an aggregate net assets of all non-financial companies belonging to such group of not less than 25% of the aggregate net assets of all corporations that are members of such group; (2) any group with aggregate assets of all non-financial companies belonging to such group of not less than \(\foatsize{4}\)2 trillion; (3) any mutual fund in which a same shareholder group, as described in items (1) and (2) above, owns more than 9% of the total shares issued and outstanding; (4) a private equity fund (under the Financial Investment Services and Capital Markets Act) where (i) the general partner of such private equity fund, (ii) the limited partner whose equity holding ratio in such private equity fund is 18% or more, or (iii) the limited partners, being member companies of a single group of companies that belong to the same conglomerate as defined in the Monopoly Regulations and Fair Trade Act, whose aggregate equity holding ratio in such private equity fund is 36% or more falls under either of item (1) to (3) above; or (5) a special purpose company of a private equity fund where a private equity fund, as described in item (4) above, owns 9% or more of the special purpose company s issued and outstanding shares or has actual control over the major business affairs of the special purpose company through, for example, appointment and dismissal of the officers may not acquire beneficial ownership of shares of a national bank in excess of 4% of such bank s outstanding voting shares, provided that such non-financial business group companies may acquire beneficial ownership of:

up to 10% of a national bank s outstanding voting shares with the approval of the Financial Services Commission under the condition that such non-financial group companies will not exercise voting rights in respect of such shares in excess of the 4% limit; and

in the event that a foreigner, as defined in the Foreign Investment Promotion Act, owns in excess of 4% of a national bank s outstanding voting shares, up to 10% of such bank s outstanding voting shares without the approval of the Financial Services Commission, and in excess of 10%, 25% or 33% of such bank s outstanding voting shares, with the approval of the Financial Services Commission, up to the number of shares owned by such foreigner.

In addition, any person (whether a Korean national or a foreigner), with the exception of non-financial business group companies described above, may also acquire in excess of 10% of a national bank s total voting shares issued and outstanding, provided that an approval from the Financial Services Commission is obtained in instances where the total holding exceeds 10% (or 15% in the case of regional banks), 25% or 33% of the bank s total voting shares issued

and outstanding.

Deposit Insurance System

The Depositor Protection Act provides, through a deposit insurance system, insurance for certain deposits of banks in Korea. Under the Depositor Protection Act, all banks governed by the Banking Act, including Shinhan Bank and Jeju Bank, are required to pay to the Korea Deposit Insurance Corporation an insurance premium on a quarterly basis at such rate as determined by the Presidential Decree to the Depositor Protection Act, which shall

122

Table of Contents

not exceed 0.5% of the bank s insurable deposits in any given year. The current insurance premium is 0.02% of insurable deposits for each quarter. If the Korea Deposit Insurance Corporation pays the insured amount, it will acquire the claims of the depositors within the payment amount. Under current rules, the Korea Deposit Insurance Corporation insures only up to a total of \(\forall 50\) million per an individual for deposits and interest in a single financial institution, regardless of when the deposits were made and the size of the deposits.

Restrictions on Foreign Exchange Position

Under the Korean Foreign Exchange Transaction Regulations, a bank s net over purchased and oversold positions are each limited to 50% of the stockholders equity as of the end of the prior month.

Trust Business

A bank that intends to enter into the trust business must obtain the approval of the Financial Services Commission. Trust activities of banks are governed by the Financial Investment Services and Capital Markets Act. Banks engaged in the banking business and trust business are subject to certain legal and accounting procedures requirements, including the following:

under the Banking Act, assets accepted in trust by a bank in Korea must be segregated from its other assets in the accounts of such bank; accordingly, banks engaged in the banking and trust businesses must maintain two separate accounts, the banking accounts and the trust accounts, and two separate sets of records which provide details of their banking and trust businesses, respectively; and

assets comprising the trust accounts are not available to depositors or other general creditors of such bank in the event the trustee is liquidated or is wound up.

In addition, a trustee bank must deposit with a court an amount equal to 0.02% of its paid-in capital each year until the aggregate amount of such court deposits reaches 2.5% or more of its paid-in capital. In the event that a trustee bank breaches its duty of care as a trustee and causes loss to its customers, the court deposits will be available as a source of compensation for such loss.

On January 17, 2005, in accordance with the amendment to the Trust Business Act, a comprehensive trust system was introduced to allow banks engaged in trust businesses to accept in trust two or more properties such as money, securities, or real estate with one trust deed. In addition, intellectual property rights can also be held as trust asset.

The Indirect Investment Asset Management Business Act, which applied to unspecified money trust account products under the Trust Business Act, securities investment trusts under the Securities Investment Trust Business Act, securities investment companies under the Securities Investment Company Act and variable insurance products under the Insurance Business Act, took effect on January 5, 2004. In accordance with the Indirect Investment Asset Management Business Act, we ceased offering unspecified money trust account products from Shinhan Bank and instead began to offer products developed by our investment trust management business that fulfills the requirements as an asset management company.

Since February 4, 2009, a trust business conducted by a bank has been governed by the Financial Investment Services and Capital Markets Act which replaced and superseded the Trust Business Act and the Indirect Investment Asset Management Business Act. In the event that a bank qualifies and operates as an asset management company, a trustee, a custodian or a general office administrator under the Financial Investment Services and Capital Markets Act, it is required to establish relevant operation and management systems to prevent potential conflicts of interest among the banking business, the asset management business, the trustee or custodian business and general office administration.

These measures include:

prohibitions against officers, directors and employees of one particular business operation from serving as an officer, director and employee in another business operation, except where an officer or a director (1) serving in two or more business operations with no significant conflict of interest in accordance with the Presidential Decree on the Financial Investment Services and Capital Markets Act or (2) serving in a trustee

123

Table of Contents

business or a custodian business and simultaneously serving in a general office administrator business in accordance with the Financial Investment Services and Capital Markets Act;

prohibitions against the joint use or sharing of computer equipment or office equipment; and

prohibitions against the sharing of information by and among officers, directors and employees engaged in the different business operations.

A bank which qualifies and operates as an asset management company may engage in the sale of beneficiary certificates of investment trusts which are managed by such bank. However, such bank is prohibited from engaging in the following activities:

acting as trustee of an investment trust managed by such bank;

purchasing with such bank s own funds beneficiary certificates of an investment trust managed by such bank;

using in its sales activities information relating to the trust property of an investment trust managed by such bank:

selling through a financial institution established under the Banking Act beneficiary certificates of an investment trust managed by such bank;

establishing a short-term financial indirect investment vehicle; and

establishing a mutual fund.

Laws and Regulations Governing Other Business Activities

To enter the foreign exchange business, a bank must register with the Minister of the Ministry of Strategy and Finance. The foreign exchange business is governed by the Foreign Exchange Transaction Law. To enter the securities business, a bank must obtain the approval of the Financial Services Commission. The securities business is governed by regulations under the Financial Investment Services and Capital Markets Act. Pursuant to the above-mentioned laws, banks are permitted to engage in the foreign exchange business and the underwriting business for government and other public bonds.

Principal Regulations Applicable to Credit Card Companies

General

Any person, including a bank, wishing to engage in the credit card business must obtain a license from the Financial Services Commission. In addition, in order to enter the credit card business, a bank must obtain a license from the Financial Services Commission (hereinafter, a bank which obtains such license is defined as licensed bank engaged in the credit card business). The credit card business is regulated and governed by the Specialized Credit Financial Business Act. Under the Specialized Credit Financial Business Act and regulations thereunder, a company in the same conglomerate group (as defined in the Monopoly Regulation and Fair Trade Act) may engage in the credit card business even though another company in the same conglomerate group is already engaged in such business, which was previously not permitted.

The Specialized Credit Financial Business Act establishes guidelines on capital adequacy and provides for other regulations relating to the supervision of credit card companies. The Specialized Credit Financial Business Act delegates regulatory authority over credit card companies to the Financial Services Commission and its executive body, the Financial Supervisory Service.

A licensed bank engaging in the credit card business is regulated by the Financial Services Commission and the Financial Supervisory Service.

The Financial Services Commission regulates credit card companies and licensed banks engaged in the credit card business by establishing guidelines or regulations on management of such companies. Moreover if the Financial Services Commission deems the financial condition of a credit card company or a licensed bank engaged

124

Table of Contents

in the credit card business to be unsound or such companies fail to satisfy the guidelines or regulations, the Financial Services Commission may take certain measures to improve the financial condition of such companies.

Restrictions on Scope of Business

Under the Specialized Credit Financial Business Act, a credit card company may conduct only the following types of business: (i) credit card business as licensed or other specialized credit finance businesses as registered pursuant to the Specialized Credit Financial Business Act; (ii) the businesses ancillary to the credit card business, (for example, providing cash advance loans to existing credit card members, issuing and settling of debit cards and issuing, selling and settling of pre-paid cards); (iii) provision of unsecured or secured loans; (iv) provision of discount on notes; (v) purchase, management and collection of account receivables originated by companies in the course of providing goods and services; (vi) provision of payment guarantee; (vii) asset management business under the Asset Backed Securitization Act; (viii) credit investigation; and (ix) other incidental businesses related to the foregoing. As a result of the amendment to the Specialized Credit Financial Business Act on January 27, 2005, a credit card company s scope of business presently includes businesses that utilize existing manpower, assets or facilities in a credit card company, as designated by the Financial Services Commission. Under the current regulation established by the Financial Services Commission, a credit card company may engage in various types of business including, but not limited to, e-commerce, operation of insurance agency, delegation of card issuance, supply of payment settlement system, loan brokerage and brokerage of collective investment securities.

Pursuant to the Presidential Decree of the Specialized Credit Financial Business Act, as of the end of each quarter, a credit card company s average balance of claim amounts during such quarter from engaging in the businesses set forth above in (iii) and (iv), excluding claim amounts arising from the provision of loans to companies, extension of new loans in connection with rescheduling of outstanding loans, the provision of mortgage loans and the provision of cash advances or any other loans to credit card members, may not exceed the average balance of claim amounts during such quarter from engaging in the businesses set forth above in (i), excluding a credit card business, and (v); provided, however, that with respect to any excess amount existing as of April 21, 2004, credit card companies have until December 31, 2008 to eliminate such excess amount.

Capital Adequacy

The Specialized Credit Financial Business Act provides for a minimum paid-in capital amount of: (i) \(\mathbb{W}\)20 billion in the case of a specialized credit financial business company which wishes to engage in no more than two kinds of core businesses (i.e. credit card, installment finance, leasing and new technology business) and (ii) \(\mathbb{W}\)40 billion in the case of an specialized credit financial business company, which wishes to engage in three or more kinds of core businesses.

Under the Specialized Credit Financial Business Act and regulations thereof, a credit card company must maintain a capital adequacy ratio, defined as the ratio of adjusted equity capital to adjusted total asset, of 8% or more and a delinquent claim ratio, defined as the ratio of delinquent claims to total claims as set forth under the regulations relating to the Specialized Credit Financial Business Act, of less than 10%.

Under the Specialized Credit Financial Business Act and regulations thereof, the minimum ratio of allowances for losses on loans, leased assets (except assets subject to an operating lease) and suspense receivables as of the date of accounting settlement (including semiannual preliminary accounts settlement) would be 0.5% of normal assets, 1% of precautionary assets and 20% of substandard assets, 75% of doubtful assets and 100% of estimated loss assets, and the minimum ratio of allowances for losses on credit card receivables and cash advances would be 1.5% of normal assets, 15% of precautionary assets, 20% of substandard assets, 60% of doubtful assets and 100% of estimated loss assets. In addition, a credit card company has to reserve a certain amount calculated according to relevant regulations as loss allowances for unused credit limits.

Liquidity

Under the Specialized Credit Financial Business Act and regulations thereunder, a credit card company must maintain a Won liquidity ratio (Won-denominated current assets/Won-denominated current liabilities) of 100% or more. In addition, once a credit card company is registered as a foreign exchange business institution with the

125

Table of Contents

Minister of the Ministry of Strategy and Finance, such credit card company is required to (1) maintain a foreign-currency liquidity ratio within three months (defined as foreign-currency liquid assets due within three months) of not less than 80%, (2) maintain a ratio of foreign-currency liquid assets due within seven days (defined as foreign-currency liquid assets due within seven days less foreign-currency liabilities due within seven days, divided by total foreign-currency assets) of not less than 0% and (3) maintain a ratio of foreign-currency liquid assets due within a month (defined as foreign-currency liquid assets due within a month less foreign-currency liabilities due within a month, divided by total foreign-currency assets) of not less than negative 10%. The Financial Services Commission requires a credit card company to submit quarterly reports with respect to the maintenance of these ratios.

Restrictions on Funding

Under the Specialized Credit Financial Business Act, a credit card company may raise funds using only the following methods: (i) borrowing from financial institutions, (ii) issuing corporate debentures or notes, (iii) selling securities held by the credit card company, (iv) transferring claims held by the credit card company in connection with its businesses, or (vi) issuing securities backed by the claims held by the credit card company relating to its businesses.

Furthermore, a credit card company may borrow funds from offshore or issue foreign currency denominated securities once it is registered as a foreign exchange business institution with the Minister of the Ministry of Strategy and Finance.

With respect to the issuance of debentures and notes, a credit card company may issue debentures up to an amount equal to ten times the company s total equity capital. In addition, a credit card company may issue, on a temporary basis, debentures exceeding the maximum limit for the purpose of redeeming the outstanding debentures, but must repay such outstanding debentures within one month after the date of issuance of new debentures.

Restrictions on Loans to Affiliate Companies

Under the Specialized Credit Financial Business Act and regulations thereof, a credit card company may not provide loans exceeding 100% of its equity capital, in the aggregate, to its specially related persons (as defined under the relevant laws) including, but not limited to, its affiliates.

Restrictions on Assistance to Other Companies

Under the Specialized Credit Financial Business Act, a credit card company may not engage in any of the following acts in conjunction with other financial institutions or companies; (i) holding voting shares under cross shareholding or providing credit for the purpose of avoiding the restrictions on loans to affiliate companies; (ii) acquiring shares under cross shareholding for the purpose of avoiding the limitation on purchase of its treasury shares under the Korean Commercial Code or the Financial Investment Services and Capital Markets Act; or (iii) other acts which are likely to have a material adverse effect on the interests of transaction parties as stipulated by the Presidential Decree to the Specialized Credit Financial Business Act, which are not yet provided.

A credit card company also may not extend credit for enabling another person to purchase the shares of such credit card company or to arrange financing for the purpose of avoiding the restrictions on loans to affiliate companies.

Restrictions on Investment in Real Estate

Under the Specialized Credit Financial Business Act and the regulations thereof, a credit card company may possess real estate only to the extent that such business conduct is designated by such laws and regulations, with certain exceptions such as for the purposes of factoring or leasing or as a result of enforcing its security rights, provided that the Financial Services Commission may limit the maximum amount a credit card company may invest in real estate investments for business purposes up to a percentage equal to or in excess of 100% of its equity capital.

126

Table of Contents

Restrictions on Shareholding in Other Companies

Under the Specialized Credit Financial Business Act and the Act on the Structural Improvement of the Financial Industry, a credit card company and its affiliate financial institutions (together a group) are required to obtain prior approval of the Financial Services Commission if such credit card company, together with its affiliate financial institutions, (i) owns 20% or more of outstanding voting shares of a target company or (ii) owns 5% or more of outstanding voting shares of a target company, and shall be deemed to have control of the target company, including being the largest shareholder of such target company or otherwise.

The indirect subsidiary of the financial holding company is prohibited from controlling any other company.

Disclosure and Reports

Pursuant to the Specialized Credit Financial Business Act and the regulations thereof, the ordinary disclosure requirement for a credit card company is to disclose any material matters relating to management performance, profits and losses, corporate governance, competence of the employees or risk management within three months from the end of each fiscal year and within two months from the end of the first half of the fiscal year. In addition, a credit card company is required to disclose on an on-going basis certain matters such as the occurrence of non-performing loans, a financial incident or losses exceeding certain amounts. Prior to December 29, 2005, a credit card company or a licensed bank engaging in the credit card business was required to submit its business reports and reports on actual results of management to the Financial Services Commission within one month from the end of each quarter. However, after the amendment to the regulations issued by the Financial Services Commission on December 29, 2005, a credit card company or a licensed bank engaging in the credit card business must submit such report as required by the Governor of Financial Supervisory Service, with certain important matters being reported as frequently as each month. In addition, all companies engaged in the specialized credit financial business under the Specialized Credit Financial Business Act, including, without limitation, credit card companies, must file a report to the Financial Supervisory Service regarding the result of settlement of accounts within one month after the end of its fiscal year. Also, these companies are required to conduct a provisional settlement of accounts for each quarter and file a report to the Financial Supervisory Service within one month after the end of such quarter.

Risk of Loss due to Lost, Stolen, Forged or Altered Credit Cards

Under the Specialized Credit Financial Business Act, upon notice from the holder of a credit card or a debit card of its loss or theft, a credit card company or a licensed bank engaged in the credit card business, as the case may be, is liable for any loss arising from the unauthorized use of credit cards or debit cards thereafter as well as any loss from unauthorized transactions made within 60 days prior to such notice. However, a credit card company or a licensed bank engaged in the credit card business, as the case may be, may transfer to the cardholder all or part of the risks of loss associated with unauthorized transactions made within 60 days prior to such notice, in accordance with the standard terms and conditions agreed between the credit card company or the licensed bank engaged in the credit card business, as the case may be, and the cardholder, provided that the loss or theft must be due to the cardholder s willful misconduct or negligence. Disclosure of a cardholder s password under duress or threat to the cardholder s or his/her family s life or health will not be deemed as the cardholder s willful misconduct or negligence.

Moreover, a credit card company or a licensed bank engaged in the credit card business, as the case may be, is also responsible for any losses resulting from the use of forged or altered credit cards, debit cards and pre-paid cards. However, a credit card company or a licensed bank engaged in the credit card business, as the case may be, may transfer all or part of this risk of loss to holders of credit cards in the event of willful misconduct or gross negligence by holders of such cards if the terms and conditions of the written agreement entered between the credit card company or a licensed bank engaged in the credit card business, as the case may be, and holders of such cards specifically

provide for such transfer. For these purposes, disclosure of a customer s password that is made intentionally or through gross negligence, or the transfer of or giving as collateral of the credit card or debit card, is considered willful misconduct or gross negligence.

In addition, the Specialized Credit Financial Business Act prohibits a credit card company from transferring to merchants the risk of loss arising from lost, stolen, forged or altered credit cards, debit cards or pre-paid cards;

127

Table of Contents

provided, however, that a credit card company may enter into an agreement with a merchant under which the merchant agrees to be responsible for such loss if caused by the merchant s gross negligence or willful misconduct.

Each credit card company or a licensed bank engaged in the credit card business must institute appropriate measures such as establishing reserves, purchasing insurance or joining a cooperative association in order to fulfill its obligations related to the risk of loss arising from unauthorized use due to lost, stolen, forged or altered credit cards, debit cards or pre-paid cards.

Pursuant to the Specialized Credit Financial Business Act, the Financial Services Commission may either impose a limit or take other necessary measures against a credit card company or a licensed bank engaged in the credit card business including, without limitation, with respect to the following:

set maximum limits for cash advances on credit cards;

use restrictions on debit cards with respect to per day or per transaction usage; or

aggregate issuance limits and maximum limits on the amount per card on pre-paid cards.

Lending Ratio in Ancillary Business

Pursuant to the Presidential Decree to the Specialized Credit Financial Business Act, as amended in December 2003, a credit card company or a licensed bank engaged in the credit card business, as the case may be, must maintain an aggregate quarterly average outstanding lending balance to credit card holders (including cash advances and credit card loans, but excluding restructured loans and revolving cash advances) no greater than its aggregate quarterly average outstanding credit card balance arising from the purchase of goods and services (excluding receivables arising from the purchase of goods and services by specially-related persons using exclusive use card for business purposes, as defined in the Tax Incentives Limitation Act) plus its aggregate quarterly amount of payments made by members using their debit cards; provided that, with respect to any excess amount existing as of December 31, 2003, the credit card companies have a grace period until December 31, 2007 to eliminate such excess amount.

Issuance of New Cards and Solicitation of New Card Holders

The Presidential Decree to the Specialized Credit Financial Business Act establishes the conditions under which a credit card company or a licensed bank engaged in the credit card business may issue new cards and solicit new members. Specifically, new credit cards may be issued only to the following persons: (i) persons who are at the age of 18 years or more at the time of applying for issuance of a credit card; (ii) persons whose capability to pay bills as they come due, as determined according to standards established by the credit card company or a licensed bank engaging in the credit card business, is verified; (iii) in the case of minors, persons who submit a guardian s consent along with documents evidencing income, such as an employment certificate or a tax certificate; and (iv) persons whose identity have been verified.

In addition, a credit card company or a licensed bank engaged in the credit card business, as the case may be, may not engage in the following methods of soliciting credit card members: (i) providing economic benefits or conditioning such benefits in excess of 10% of the annual credit card fee (in the case of no-annual fee credit cards, the average annual fees will be \text{\psi}10,000) in connection with issuance of credit cards; (ii) solicitation on streets and private roads as prescribed under the Road Act and Private Road Act, public place and corridors used by the general public; (iii) solicitation through visits, except those visits made upon prior consent and visits to a business area; (iv) solicitation through pyramid sales methods; and (v) solicitation through the Internet, as further discussed below.

In addition, a credit card company or a licensed bank engaged in the credit card business is required to check whether the credit card applicant has any delinquent debt owed to any other credit card company or other financial institutions which the applicant is unable to repay, and also require, in principle, with respect to solicitations made through the Internet, the certified electronic signature of the applicant. Moreover, persons who intend to engage in solicitation of credit card applicants must register with the Financial Services Commission, unless the solicitation is made by officers or employees of a credit card company or a company in business alliance with such credit card company.

128

Table of Contents

Compliance Rules on Collection of Receivable Claims

Pursuant to the Specialized Credit Financial Business Act and its regulations, a credit card company or a licensed bank engaged in the credit card business are prohibited from collecting its claims by way of:

exerting violence or threat of violence;

informing a Related Party (a guarantor of the debtor, blood relative or fiancée of the debtor, a person living in the same household as the debtor or a person working in the same workplace as the debtor) of the debtor s liability without just cause;

providing false information relating to the debtor s obligation to the debtor or his or her Related Party;

threatening to sue or suing the debtor for fraud despite lack of affirmative evidence to establish that the debtor has submitted forged or false documentation with respect to his/her capacity to make payment;

visiting or telephoning the debtor during late hours between 9:00 p.m. and 8:00 a.m.; and

utilizing other uncustomary methods to collect the receivables thereby invading the privacy or the peacefulness in the workplace of the debtor or his or her Related Party.

Principal Regulations Applicable to Financial Investment Companies

General

The securities business is regulated and governed by the Financial Investment Services and Capital Markets Act. Financial investment companies are under the regulation and supervision of the Financial Services Commission, the Financial Supervisory Service and the Securities and Futures Commission.

Under the Financial Investment Services and Capital Markets Act, a financial investment company may engage in dealing, brokerage, collective investment, investment advice, discretionary investment management or trust businesses if it has obtained relevant licenses from the Financial Services Commission.

A financial investment company may also engage in certain businesses ancillary to the primary business or certain other additional businesses by submitting a report to the Financial Services Commission at least seven days prior to the commencement of the business without obtaining any separate license. Approval to merge with any other entity or to transfer all or substantially all of a business must also be obtained from the Financial Services Commission.

Under the Act on the Structural Improvement of the Financial Industry, if the Korean government deems a financial investment company s financial condition to be unsound or if a financial investment company fails to meet the applicable Net Operating Equity Ratio (as defined below), the government may order certain sanctions, including among others, sanctions against a financial investment company or its officers or employees, capital increase or reduction and a suspension or assignment of a part or all of business operation.

Regulations on Financial Soundness Capital Adequacy

The Financial Investment Services and Capital Markets Act sets forth various types of brokerage and/or dealing business licenses based on (i) the scope of products and services that may be provided by each type of the brokerage and/or dealing licensee and (ii) the type of customers to which such products and services may be provided. For

example, a financial investment company engaged in the brokerage, dealing and underwriting businesses with retail investors as well as professional investors in connection with all types of securities is required to have a minimum paid-in capital of \(\pi\)53 billion in order to obtain a license for such brokerage, dealing and underwriting businesses.

The financial soundness of a financial investment company is to be assessed, pursuant to the Financial Investment Services and Capital Markets Act and the regulations of the Financial Services Commission, in accordance with the Net Operating Equity Ratio of the company, which is to be calculated as follows and to be expressed as a percentage.

129

Table of Contents

Net Operating Equity Ratio = Net Operating Equity/Total Risk \times 100

The terms Net Operating Equity and Total Risk for the purpose of the above-stated formula are defined and elaborated in the regulations of the Financial Services Commission. Generally, the Net Operating Equity and the Total Risk are to be calculated according to the following formula:

Net Operating Equity = Net assets (total assets total liabilities) the total of items that may be deducted + the total of items that may be added

Total Risk = market risk + counterparty risk + management risk

The regulations of the Financial Services Commission requires, among other things, financial investment companies to maintain the net operating equity ratio at a level equal to or higher than 150% at the end of the each quarter of the fiscal year.

In addition, all Korean companies, including financial investment companies, are required to set aside, as a legal reserve, 10% of the cash portion of the annual dividend or interim dividend in each fiscal year until the reserve reaches 50% of the stated capital.

Under the Financial Investment Services and Capital Markets Act and regulations thereunder, the minimum ratio of allowances for losses on loans and suspense receivables specified under such regulations is 0.5% of normal assets, 2% of precautionary assets, 20% of substandard assets, 75% of doubtful assets and 100% of estimated loss assets.

Other Provisions on Financial Soundness

The Financial Investment Services and Capital Markets Act, the Presidential Decree of the Financial Investment Services and Capital Markets Act and the regulations of the Financial Services Commission also include certain provisions which are designed to regulate certain types of activities relating to the management of the assets of a securities company, subject to certain exceptions. Such provisions include:

restrictions on the holdings by a securities company of securities issued by another company which is the largest shareholder or the major shareholder (each as defined under the Financial Investment Services and Capital Markets Act) of such securities company; and

restrictions on providing money or credit to the largest shareholder (including specially-related persons of such shareholder), major shareholders, officers and specially-related persons of the securities company.

Principal Regulations Applicable to Insurance Companies

General

Insurance companies are regulated and governed by the Insurance Business Act, as amended (the Insurance Business Act). In addition, insurance companies in Korea are under the regulation and supervision of the Financial Services Commission and its governing entity, the Financial Supervisory Service.

Under the Insurance Business Act, approval to commence an insurance business must be obtained from the Financial Services Commission based on the type of insurance businesses, which are classified as life insurance business, non-life insurance business and third party insurance business. Life insurance business means an insurance business which deals with life insurance policies or pension insurance policies (including retirement insurance policies).

Non-life insurance business means an insurance business which deals with fire insurance policies, marine insurance policies, car insurance policies, guaranty insurance policies, reinsurance policies, liability insurance policies or other insurance policies prescribed under the Presidential Decree of the Insurance Business Act. Third party insurance business means an insurance business which deals with injury insurance policies, health insurance policies or nursing care insurance policies. Under the Insurance Business Act, insurance companies are not allowed to engage in both a life insurance business and a non-life insurance business, subject to certain exceptions.

130

Table of Contents

If the Korean government deems an insurance company s financial condition to be unsound or if an insurance company fails to properly manage the business as set forth under relevant Korean law, the government may order certain sanctions including, among others, sanctions against an insurance company or its officers or employees, capital increase or reduction and a suspension or assignment of a part or all of business operation.

Capital Adequacy

The Insurance Business Act requires a minimum paid-in capital of \(\mathbb{W}\)30 billion for an insurance company; provided, that, the insurance company which intends to engage in only certain types of insurance policies may have a lower paid-in capital pursuant to the Presidential Decree of the Insurance Business Act.

In addition to the minimum capital requirement, an insurance company is required to maintain a Solvency Margin Ratio of 100% or more. Solvency Margin Ratio is the ratio of the Solvency Margin to the Standard Amount of the Solvency Margin. Solvency Margin is the aggregate amount of paid-in capital, reserve for dividends to policyholders, allowance for bad debt and subordinated debt amount and others similar thereto as set out in the regulation of the Financial Services Commission, less non-amortized acquisition costs, goodwill and others similar thereto as appearing in the regulation of the Financial Services Commission. The Standard Amount of Solvency Margin for life insurance companies is defined under the regulation of the Financial Services Commission and is calculated as follows:

- 1. (net premium type policy reserve non-amortized acquisition cost) \times (corresponding ratio of risk factor for policy reserve) (4%); and
- 2. (risk insurance benefits) × (corresponding ratio of insurance risk factor).

The Financial Services Commission amended the Regulation on Supervision of Insurance Business on March 23, 2009 to introduce the risk based capital regime. Under the risk based capital regime, the Standard Amount of Solvency Margin for life insurance companies is calculated as follows:

* Insurance Risk, Interest Risk, Credit Risk, Market Risk and Operation Risk are defined under the Regulation on Supervision of Insurance Business.

Under the applicable provisions of the Regulation on Supervision of Insurance Business, as amended on March 23, 2009, an insurance company can opt to comply with the solvency margin requirements under the previous regulation for another two years following April 1, 2009. The stated intention of the regulators is that the change in the solvency margin regime to the risk based capital regime should not have any adverse effect on the insurance companies. Accordingly, until March 31, 2011, an insurance company may choose between solvency margin ratio calculated under the previous regulation and the risk based capital regime (whichever is more favorable to the insurance company). Since April 1, 2011, however, all insurance companies will be required to comply with the risk based capital regime.

Under the Insurance Business Act, the Presidential Decree and other regulations thereunder, for each accounting period, insurance companies are required to appropriate policy reserve that is earmarked for future payments of insurance money, refund and dividends to policyholders (hereinafter collectively referred to as Insurance Money) for each insurance contract. However, if an insurance company has reinsured a portion of its insurance contracts with a creditworthy reinsurance company in order to lower its overall risk, in principle, the insurance company is not required to appropriate policy reserve for the reinsured contracts. Instead, the reinsurance company is required to appropriate such policy reserve for the reinsured contracts. However, from April 1, 2008, if an insurance company

transfers more than 50% of its risk to a reinsurance company, the amount of risk transferred in excess of 50% will be disallowed for purposes of calculating the solvency margin ratio. In particular, if the ratio of the risks transferred to the reinsurance company to the total risks insured by an insurance company exceeds 50%, such insurance company will be required to have net assets in relation to such risks transferred in excess of the 50% threshold for purposes of the solvency margin requirement. Further, insurance companies are required to submit written calculation methods for insurance premiums and policy reserves by insurance types when applying for the

131

Table of Contents

insurance business license. If an insurance company develops a new insurance product or amends the policy reserve calculation method, it is required to report such matters to the Financial Supervisory Service and obtain approval thereof.

The policy reserve amount consists of the following; (i) premium reserves and prepaid insurance premiums which are calculated under the methods determined by the written calculation methods for insurance premiums and policy reserves by insurance types or by lapses of insurance period, with regard to the contracts for which the causes for payment of the Insurance Money have yet to occur as of the end of each accounting period, (ii) amounts for which a lawsuit is pending on the Insurance Money or amounts for which a payment has been fixed with regard to the contracts for which the causes for payment of Insurance Money have occurred as of the end of each accounting period, and amounts which have not been paid yet due to an unsettled amount for paying the Insurance Money, even if the causes for payment of the Insurance Money have already occurred; and (iii) amounts reserved by an insurance company for allocation to policyholders.

Pursuant to the regulations established by the Financial Services Commission, insurance companies are required to maintain allowances for outstanding loans, accounts receivables and other credits (including accrued income, payment on account, and bills receivables or dishonored) in an aggregate amount covering not less than 0.5% of normal credits (excluding confirmed guarantees and acceptances), 2% of precautionary credits, 20% of substandard credits, 50% of doubtful credits and 100% of estimated loss credits, provided that the minimum ratio of allowances for certain type of outstanding loans by insurance companies to individuals and households (including, retail loans, housing loans, and other forms of retail loans extended to individuals not registered for business), is increased to 0.75% of normal credits and 5% of precautionary credits.

Variable Insurance and Bancassurance Agents

Variable insurance is regulated pursuant to the Insurance Business Act and the Financial Investment Services and Capital Markets Act. In order for an insurance company to sell variable insurance to a policyholder and operate such variable insurance, the insurance company must obtain a license with respect to collective investment business from the Financial Services Commission and register as a selling company with the Financial Services Commission. In this case, according to the Financial Investment Services and Capital Markets Act, an insurance company will be regulated as an investment trust and assets acquired in connection with variable insurance must be held by a trust company that is registered with the Financial Services Commission pursuant to the Financial Investment Services and Capital Markets Act.

According to the Financial Investment Services and Capital Markets Act, insurance companies may operate variable insurance through (i) mandating all of the management and the management instruction business to another asset management company, (ii) operating by way of discretionary investment all of the assets constituting the investment advisory assets out of the investment trust assets, or (iii) operating all of the investment trust assets into other collective investment securities, thereby allowing all of the particular variable insurance assets to be outsourced.

The Insurance Business Act permits banks, securities companies, credit card companies and other financial institutions to register as insurance agents or insurance brokers and engage in the insurance business (the Bancassurance Agents). Under the Insurance Business Act and the related regulations, the range of insurance products to be sold by the Bancassurance Agents expanded in four stages: the first stage at the time of the amendments, the second stage in April 2005, the third stage in October 2006, and the fourth stage in April 2008 when all types of life and non-life insurance products were to be sold by the Bancassurance Agents. The original expansion plan contemplated that protection type insurance products, such as whole life insurance, critical illness insurance and automobile insurance, would be included in the fourth stage of expansion. However, pursuant to the amendment to the Presidential Decree of the Insurance Business Act in March 2008 following a decision by the Finance and Economy

Committee of the National Assembly in February 2008, the protection type insurance products were excluded from the fourth stage of expansion and therefore are not allowed to be sold through Bancassurance Agents.

132

Table of Contents

Restrictions on Investment of Assets

According to the Insurance Business Act, insurance companies are prohibited from making any of the following investment of assets:

subject to certain exceptions, owning precious metals, antiques, paintings and writings;

owning any real estate (excluding any real estate owned as a result of enforcing their own security interest) other than real estate for conducting its business as designated by the Presidential Decree. In any case, the total amount of real estate owned by an insurance company must not exceed 15% of its Total Assets;

loans made for the purpose of speculation in commodities or securities;

loans made directly or indirectly to enable a natural or legal person to buy their own shares;

loans made directly or indirectly to finance political campaigns and other similar activities; and

loans made to any of the insurance company s officers or employees other than loans based on insurance policy or de minimis loans of up to (1) \text{\$\psi}20\$ million in the case of a general loan, (2) \text{\$\psi}50\$ million in the case of a general loan plus a housing loan, or (3) \text{\$\psi}60\$ million in the aggregate for general loans, housing loans and loans to pay damages arising from wrongful acts of employees in financial transactions.

In addition, insurance companies are not allowed to exceed the following limits in making the following investments:

with respect to holding unlisted stock, 10% of its Total Assets;

with respect to holding foreign currency under the Foreign Exchange Transaction Act or owning offshore real estate, 30% of its Total Assets; and

with respect to the sum of margins for a futures exchange designated by the Presidential Decree or a foreign futures exchange, 3% of its Total Assets.

Life insurance companies are required to lend 35% or greater of the annual increase in their corporate loans (with the exclusion of those to banks and securities companies) to the small- and medium -sized enterprises.

Our subsidiaries own or lease various land and buildings for their branches and sales offices.

As of December 31, 2009, Shinhan Bank had a countrywide network of 925 branches. Approximately 27.1% of these facilities were housed in buildings owned by us, while the remaining branches are leased properties. As of December 31, 2009, Jeju Bank had 40 branches of which we own 18 of the buildings in which the facilities are located, representing 45.0% of its total branches. Lease terms are generally from two to three years, and seldom exceed five years.

As of December 31, 2009, Shinhan Card had 69 branches, all but three of which are leased. Lease terms are generally from two to three years, and seldom exceed five years. We also lease Shinhan Card s headquarters for a term of three years. Shinhan Bank houses its central mainframe computer system at its information technology centers in Ilsan, one of the suburban districts outside of Seoul. As of December 31, 2009, Shinhan Investment had 89 branches of which we own 10 of the buildings in which the facilities are located, representing 11.2% of its total branches. Lease terms are generally from two to three years, and seldom exceed five years. As of December 31, 2009, Shinhan Life had 160 branches which we leased for a term of generally one to two years.

The net book value of all the properties owned by us at December 31, 2009 was \$1,883 billion. We do not own any material properties outside of Korea.

ITEM 4A. UNRESOLVED STAFF COMMENTS

We do not have any unresolved comments from the staff of the U.S. Securities and Exchange Commission regarding our periodic reports under the Securities Exchange Act of 1934, as amended.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

You should read the following discussion and analysis of our financial condition and results of operations together with our consolidated financial statements and notes thereto included in this annual report. The following discussion is based on our consolidated financial statements, which have been prepared in accordance with U.S. GAAP.

ITEM 5.A. Operating Results

Overview

We are one of the leading financial institutions in Korea in terms of total assets, revenues, profitability and capital adequacy, among others. Incorporated on September 1, 2001, we are the first privately-held financial holding company to be established in Korea. Since inception, we have developed and introduced a wide range of financial products and services in Korea and aimed to deliver comprehensive financial solutions to clients through a convenient one-portal network. According to reports by the Financial Supervisory Service, we are one of the three largest financial services providers in Korea as measured by total assets as of December 31, 2009 and operate the third largest banking business (as measured by total assets as of December 31, 2009) and the largest credit card business (as measured by the total credit purchase volume as of December 31, 2009) in Korea.

Most of our assets are located in, and we generate most of our income from, Korea. Accordingly, our business and profitability are largely dependent on the general economic and social conditions in Korea, including interest rates, inflation, exports, personal expenditures and consumption, unemployment, demand for business products and services, debt service burden of households and businesses, the general availability of credit, the asset value of real estate and securities and other factors affecting the financial well-being of our corporate and retail customers. The Korean economy is closely integrated with, and is significantly affected by, developments in the global economy and financial markets. In recent years, the global economy and financial markets experienced hardship, which also had a significant adverse impact on the Korean economy and in turn on our business and profitability. See Item 3.D. Risk Factors Risks Relating to our Banking Business Difficult conditions and turbulence in the Korean and global economy and financial markets may adversely affect our business, asset quality, capital adequacy and earnings.

The recent financial crisis and economic downturn in Korea and globally presented a number of difficulties and challenges for financial institutions in Korea, including us, particularly in the form of deterioration in asset quality as an increasing number of corporate borrowers faced a liquidity crisis and were forced to undergo restructuring, sometimes at the behest of the Government which was concerned with containing the risk of systemic collapse by undertaking a preemptive and aggressive fast track restructuring program in collaboration with major creditor financial institutions with respect to troubled companies in industries that were particularly hard hit by the economic crisis, such as real estate development, construction, shipbuilding and shipping. The crisis also led to an increased need among Korean financial institutions for additional capital amid growing concerns about liquidity and capital adequacy of financial institutions, as well as an increase in funding costs.

Following the onset of the crisis, we experienced a significant deterioration in the quality of our assets, particularly with respect to corporate loans made to small- and medium-sized enterprises, which represents our traditional core customers. For example, Shinhan Bank s delinquency ratio under Korean GAAP for corporate loans increased from 0.78% as December 31, 2007 to 1.06% as of December 31, 2008. In response to the crisis, we took active steps to tighten risk management in substantially all areas of our operations, including concerted efforts to improve the quality of our assets through prudent charge-offs and provisioning. For example, in 2008 and 2009, Shinhan Bank made substantial charge-offs of corporate loans (which amounted to \\(\mathbf{W}\)252 billion in 2008 and \(\mathbf{W}\)659 billion in 2009 compared to \(\mathbf{W}\)109 billion in 2007) and set aside provisioning for corporate loans (which amounted to \(\mathbf{W}\)1,164 billion in 2008 and \(\mathbf{W}\)973 billion in 2009 compared to \(\mathbf{W}\)196 billion in 2007). In addition, in an attempt to further strengthen our capital base following the onset of the global financial crisis, we made a rights offering in March in the amount of \(\mathbf{W}\)1,310 billion. As a result of our such efforts, and also driven in part by the recovery of the Korean economy beginning in the second half of 2009, the quality of our assets and our capital adequacy have returned largely to, or exceeded, pre-crisis levels by the end of 2009, as evidenced by a decrease in Shinhan Bank s delinquency ratio under Korean GAAP for corporate loans to 0.77% as of December 31, 2009, and our BIS ratio of 12.60% as of December 31, 2009 compared to 9.85% and 10.19% as of December 31, 2007 and 2008, respectively.

Compared to their impact on the corporate sector, the recent financial crisis and economic downturn had a less severe impact on our retail businesses, particularly in our retail banking and credit card businesses. This was largely because our retail loans are mostly home mortgage loans collateralized by residential properties and individuals and households traditionally are less prone to default on home mortgage loans. As a result, Shinhan Bank s delinquency

136

Table of Contents

ratio under Korean GAAP for retail loans decreased modestly from 0.39% as December 31, 2007 to 0.35% as of December 31, 2008 and further slightly decreased to 0.34% as of December 31, 2009. As for our credit card business, partly as a result of active tightening of its risk management policy and a more disciplined credit approval policy, Shinhan Card s delinquency ratio under Korean GAAP actually showed a decrease from 3.4% as of December 31, 2007 to 3.1% as of December 31, 2008 and 2.7% as of December 31, 2009.

We derive most of our income from interest earned on our corporate and retail loans, net of funding costs (which primarily consist of interest payable on customer deposits). Net interest income is largely a function of the average volume of loans and the net interest spread thereon. During the recent crisis, the average volume of loans and deposits increased. The average volume of loans increased largely as we continued to make secured housing loans while reducing exposure to unsecured lending, and corporate customers relied on bank loans as their sources of funding due to difficulties in finding alternative sources of funding in capital markets due to the credit crisis and the volatility in financial markets. However, due to the active involvement by the Government to maintain low interest rates in order to add liquidity to the general economy, net interest spreads tightened from 2007 to 2008 and from 2008 to 2009. From 2007 to 2008, the volume effect outweighed the rate effect, and Shinhan Bank s net interest income increased from \text{W3},742 billion in 2007 to \text{W4},344 billion in 2008. From 2008 to 2009, the rate effect outweighed the volume effect, and Shinhan Bank s net interest income decreased from \text{W4},344 billion in 2008 to \text{W3},701 billion in 2009. Net interest income after provision for loan losses, which Shinhan Bank significantly increased in 2008 and 2009 due to its enhanced risk management policies, including prudent additional provisioning, amounted to \text{W3},283 billion, \text{W3},415 billion and \text{W2},494 billion in 2007, 2008 and 2009, respectively.

As for Shinhan Card, its net interest income is largely dependent on the transaction volume and less sensitive to interest rate movements than our banking business, since merchant fees (representing a fixed percentage of a credit card purchase amount) provide a stable source of income and our credit card business relies on more diversified sources of funding such as commercial paper, corporate debentures (which have maturities longer than most bank deposit products) and asset-backed securitizations. The credit card transaction volume is largely dependent on overall trends of the general economy, such as general consumer spending patterns. As a result, net interest income from Shinhan Card increased from \(\pi\)1,120 billion in 2007 to \(\pi\)1,250 billion in 2008 and decreased to \(\pi\)1,068 billion in 2009, in reflection of the relatively low impact of the recent global financial crisis on the retail sector.

Currently, there are increasing signs of recovery from the recent global financial crisis. However, uncertainties remain. On the one hand, governments worldwide are considering and/or implementing exit strategies by discontinuing or reducing fiscal stimulus designed to ensure sufficient liquidity in their respective economies and raising base interest rates amid inflationary concerns. A rise in interest rates generally results in an improvement of Interest Rates below. However, a general increase in market interest rates, Shinhan Bank s net interest margin. See especially if inappropriately timed, not properly coordinated with other macroeconomic policy, or at excessive levels, may unduly dampen economic recovery and trigger another credit crisis, which would adversely affect the liquidity and financial condition of our corporate and retail borrowers, which in turn may lead to deterioration in our credit exposure. On the regulatory front, the global financial crisis may have a legacy effect in the form of heightened regulatory scrutiny over key aspects of the financial sector and a call for more stringent capital adequacy requirements. Furthermore, within the Korean banking industry, potential consolidation following the intended privatization of government-invested banks may inject further uncertainty to the competitive environment among the major commercial banks. As for the credit card industry, as part of an effort to streamline the fee structure related to cash advances and curb excessive fees charged thereon, the Government plans to implement a regulation effective April 2010, which will have the effect of lowering the fee rate we apply to cash advances by our cardholder customers.

We believe that the following factors will also have material impacts on our principal business activities:

Banking. In recent years, commercial banks in Korea, including Shinhan Bank, have significantly expanded lending in the areas of home and mortgage loans to individuals and loans to small- to medium-enterprises. The global economic and financial crisis significantly increased the credit risk of such loans, which represents Shinhan Bank s core lending activities, as well as the market risks of its new

137

Table of Contents

product offerings such as structured derivative products. The recent global crisis also increased the funding costs of foreign-denominated as well as Won-denominated borrowings, and has significantly affected liquidity in general, notwithstanding the active liquidity support provided by the Bank of Korea. Shinhan Bank is deposit products increased in volume in the second half of 2008 due to the downturn in the Korean stock market, but the reduction in market interest rates may negatively impact the continuing popularity of our deposit products compared to other higher-yielding investment alternatives. We expect that the results of operation for our banking business will, at least in the short term, depend primarily on the strength of risk management, improvement of funding and the net interest margin and cost reduction, rather than a pricing competition among the commercial banks as was the case in the recent past, given the anticipated increases in capital and liquidity requirements by the Government in light of the recent global financial crisis.

Credit cards. In large part due to growing signs of recovery from the recent global financial crisis, Shinhan Card experienced an improvement in asset quality and lower funding costs starting in the second half of 2009. However, the credit card industry in Korea is showing signs of maturation while competition remains intense and may further intensify following the introduction and greater acceptance of mobile phone payments in substitution of credit card payments.

Securities brokerage. The securities brokerage industry in Korea has faced intensified competition due to the lowered barriers of entry among different securities and investment businesses as the result of the Financial Investment Services and Capital Markets Act enacted in February 2009. If the Korean stock market were to suffer another prolonged decline as a result of another global economic and financial crisis, we expect that the results of operation of our securities brokerage business will be negatively impacted.

Life insurance. While the life insurance industry in Korea has grown substantially in recent years due to the popularity of variable insurance products whose payout is tied to the performance of the stock market, we believe that a downturn in the stock market as well as a reduction in disposable income as a result of another onset of economic difficulties in Korea may lead to increased non-payment or delayed payments of insurance premiums or termination of existing insurance contracts. Further, if the low-interest environment continues, it may create difficulties for insurance companies, including our insurance subsidiaries, in finding alternative investment sources to operate the funds received in the form of insurance premiums.

Interest Rates

Interest rate movements, in terms of magnitude and timing as well as the divergence of such movements with respect to Shinhan Bank sassets and liabilities, have a significant impact on its net interest margins and its profitability, particularly with respect to its financial products that are sensitive to such movements. For example, if the interest rates applicable to our loans (which are recorded as our assets) decrease or increase at a slower pace or by a thinner margin compared to the interest rates applicable to its deposits (which are recorded as our liabilities), our net interest margin will shrink and its profitability will be negatively affected. In addition, the relative size and composition of our variable rate loans and deposits (as compared to our fixed rate loan and deposits) may also impact our net interest margin. Furthermore, the difference in the average term of our loans compared to our deposits may also impact our net interest margin. For example, since our deposits tend to have a longer term, on average, than that of our loans, our deposits are on average less sensitive to movements in the base interest rates on which our deposits and loans tend to be pegged, and therefore, an increase in the base interest rates tend to increase our net interest margin while a decrease in the base interest rates tend to have the opposite effect. While we continually manage our assets and liabilities to minimize our exposure to the interest rate volatilities, such efforts by us may not mitigate the impact of interest rate volatility in a timely or effective manner.

Table of Contents

The following table shows certain benchmark Won-denominated borrowing interest rates as of the dates indicated.

	Corporate Bond Rates(1)	Treasury Bond Rates(2)	Certificate of Deposit Rates(3)
June 30, 2005	4.41	4.02	3.54
December 31, 2005	5.52	5.08	4.09
June 30, 2006	5.20	4.92	4.59
December 31, 2006	5.29	4.92	4.86
June 30, 2007	5.66	5.26	5.00
December 31, 2007	6.77	5.74	5.82
June 30, 2008	6.88	5.90	5.37
December 31, 2008	7.72	3.41	3.93
June 30, 2009	5.39	4.16	2.41
December 31, 2009	5.53	4.41	2.86

Notes:

- (1) Measured by the yield on three-year AA- rated corporate bonds.
- (2) Measured by the yield on three-year treasury bonds.
- (3) Measured by the yield on certificates of deposit (with maturity of 91 days).

Acquisition of LG Card

On March 19, 2007, following a public tender offer, we acquired 98,517,316 shares, or 78.58%, of the common stock of LG Card at \(\pi\)67,770 per share, resulting in a total equity ownership of 107,477,321 shares, or 85.73%, of common stock of LG Card based on the 7.15% interest in LG Card previously held by Shinhan Bank. Through a follow-on public offer in June and July 2007, we acquired 9,624,218 shares, or 7.68%, of the common stock of LG Card at \(\pi\)46,392 per share from Shinhan Bank and others through a second tender offer on July 3, 2007 and the remaining 17,227,869 shares, or 13.74%, of the common stock of LG Card on September 21, 2007 through a share exchange, at an exchange ratio of 0.84932 common share of Shinhan Financial Group per common share of LG Card, which amounted to \(\pi\)815 billion based on the exchange terms. On October 1, 2007, we effected a business transfer in which LG Card acquired and assumed all assets, liabilities and contracts of former Shinhan Card, and LG Card changed its name to Shinhan Card. Also, the former Shinhan Card changed its name to SHC Management Co., Ltd. , and on October 1, 2009, commenced its liquidation proceedings.

On May 28, 2007, we decided to acquire LG Card s remaining issued and outstanding common stock, through a tender offer and share exchange, at the board of directors meeting.

139

Table of Contents

The acquisitions of the remaining 92.85% equity interest in LG Card were accounted for under the purchase method of accounting in accordance with SFAS 141. The purchase price was allocated to the assets acquired and the liabilities assumed based on their estimated fair values as summarized below.

	2007 (In billions of Wo					
Cash and cash equivalents	₩	315				
Deposits		256				
Call loans		512				
Trading assets		2				
Securities		44				
Loans, net of allowance for loan losses		9,902				
Premises and equipment, net		129				
Other assets		719				
Total assets	₩	11,879				
Borrowings and debentures	W	6,970				
Other liabilities		1,381				
Total liabilities	₩	8,351				
Fair value of net assets of LG Card	₩	3,528				

The allocation of the purchase consideration is as follows:

	2007 (In billions of Won)				
Cash paid Stock exchanged Direct acquisition costs	₩	6,707 815 8			
Total purchase price	₩	7,530			
Allocation of purchase price: Fair value of net assets of LG Card (excluding effect of CCI and deferred taxes) Credit card relationship intangible asset(1) Deferred tax Goodwill	₩	3,831 1,064 (303) 2,938			
Total purchase price	₩	7,530			

Note:

(1) Credit card relationship intangible reflects the estimated fair value of the credit card relationships acquired from LG Card from which we expect to derive future benefits over the estimated life of such relationships. The customer relationship intangible is amortized over its estimated useful life on a sum-of-the years -digits basis. The estimated weighted average life of the customer relationship intangible is approximately six years. The fair value of this asset was based principally upon the estimates of (i) the profitability of the acquired accounts and (ii) the projected run-off of the acquired accounts.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with U.S. GAAP, including prevailing practices within the financial services industry. The preparation of consolidated financial statements requires management to make judgments, involving significant estimates and assumptions, in the application of certain

140

Table of Contents

accounting policies about the effects of matters that are inherently uncertain. These estimates and assumptions, which may materially affect the reported amounts of certain assets, liabilities, revenues and expenses, are based on information available to us as of the date of the financial statements, and changes in this information over time could materially impact amounts reported in the financial statements as a result of the use of different estimates and assumptions. Certain accounting policies, by their nature, have a greater reliance on the use of estimates and assumptions, and could produce results materially different from those originally reported.

Based on the sensitivity of financial statement amounts to the methods, estimates and assumptions underlying reported amounts, we have identified the following significant accounting policies that involve critical accounting estimates. These policies require subjective or complex judgments, and as such could be subject to revision as new information becomes available. Our significant accounting policies are described in more detail in Note 1 in the notes to our consolidated financial statements included in this annual report.

Allowance for Credit Losses

The allowance for credit losses includes allowance for loan losses and allowance for off-balance sheet credit instruments. The allowance for loan losses is reported as a reduction of loans and the allowance for off-balance sheet credit instruments is reported in other liabilities. The allowance for credit losses represents the amount available for estimated probable credit losses existing in our lending portfolio. The methodology used to provide the appropriate level of reserve is inherently subjective and involves many complex estimates and assumptions. We perform periodic systematic reviews of our credit portfolios to identify inherent losses and assess the overall probability of collection. Each loan portfolio is evaluated based on its respective characteristics.

We evaluate large impaired corporate loans individually as part of our normal corporate review practice due to the unique characteristics of such borrowers. As described in more detail in the footnotes to our consolidated financial statements, we consider a loan to be impaired when, after consideration of risk characteristics and current information and events, we believe it is probable that we will be unable to collect all amounts owed under the contractual terms of the agreement, including principal and interest, according to the contractual terms of the loan.

We generally consider the following corporate loans to be impaired:

loans classified as substandard or below according to the asset classification guidelines of the Financial Services Commission:

loans that are more than 90 days past due; and

loans which are troubled debt restructuring as defined under U.S. GAAP.

Once we have identified a loan as impaired, we value that loan either based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. Each of these variables involves judgment and the use of estimates. For instance, discounted cash flows are based on estimates of the amount and timing of expected future cash flows. Forecasts of expected future cash flows are based on various data including restructuring plans, due diligence reports, as well as industry forecasts among other quantitative tools. The fair value of collateral is determined by using third party valuation reports. Additional consideration is given to recent auction results and court valuations. If the resulting value is less than the carrying amount of the loan, we establish a specific allowance for the difference.

We generally evaluate retail loans and certain smaller balance corporate loans, including leases, mortgage and home equity loans, and credit card balances, as individual pools for credit loss allowance purposes due to their homogeneous nature based on historical loss experience. Such allowances have been established using several modeling tools, including a risk rating migration model, when considering retail loans and corporate loans, and a delinquency roll-rate model when considering credit cards.

The allowance for off-balance sheet credit instruments represents the amounts available for estimated probable credit loss existing in our unfunded credit facilities such as commitments to extend credit, guarantees, acceptances, standby and commercial letters of credit and other financial instruments. As stated above, we perform

141

Table of Contents

periodic systematic reviews of our credit portfolio including off-balance sheet credit instruments to identify inherent losses and assess the overall probability of collection.

When we evaluate large impaired corporate loans individually for specific allowance, the related guarantees and acceptances made to the same borrowers are also evaluated for inherent loss. We generally evaluate the remaining guarantees and acceptances, which are generally smaller balances, on a pool basis. Allowance for the remaining guarantees and acceptances is generally established using estimated payout ratios and loss severity which are based on historical loss experience and various factors such as macroeconomic factors.

The determination of the allowance for credit losses requires a great deal of judgment and the use of estimates as discussed above. As such, we have also considered changes in underwriting, credit monitoring, the Korean and global economic environment, industry concentrations, and delinquencies among other factors when concluding on the level of the allowance for credit losses.

Fair Value Measurements

We invest in debt and marketable equity securities, equity securities that do not have readily determinable fair values and derivatives. Financial instruments are measured at fair value based on various inputs that are observable or unobservable, depending on the type of securities, utilizing assumptions of the marketplace and our management is required to make estimate and judgment in valuing them.

We adopted ASC 820-10 (formerly SFAS No. 157, *Fair Value Measurements*) effective January 1, 2008. ASC 820-10 defines fair value, expands disclosure requirements around fair value and specifies a three-level fair value hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. We determine the fair value of the financial instruments that are recognized or disclosed at fair value in the financial statements, whether on a recurring or non-recurring basis, in accordance with ASC 820-10. We adopted certain provisions of ASC 820-10 related to nonfinancial assets and nonfinancial liabilities that are not measured at fair value on a recurring basis since January 1, 2009.

ASC 820-10 requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value is an, exit price, defined as a price received in exchange of assets disposed or paid in transferring liabilities between market participants, at the measurement date. As such, the Group s own assumptions reflect those market participants used in pricing the asset or liability at the measurement date. The following is the description of fair value hierarchy based on pricing inputs.

- Level 1 Quoted prices for identical instruments in active markets. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as certain securities that are highly liquid and are actively traded in over-the-counter markets.
- Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value measurements. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques based on significant unobservable inputs, as well as management judgments or estimates that are significant to valuation.

Fair value is best determined based on quoted market prices, if available, and are classified as Level 1. If quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, market-based or independently sourced market parameters, including, but not limited to, yield curves, interest rates, volatilities, equity or debt prices, foreign exchange rates and credit curves as well as other relevant factors. Our management applies judgments in assessing the variables used in the fair valuation process and also if certain external market variables are less readily available and such significant assumptions or judgments employed in fair valuation could render subject securities to Level 3. Changes in model assumptions, market conditions and unexpected circumstances can affect the fair values of the securities and trading assets and liabilities.

142

Table of Contents

Debt securities and equity securities with readily determinable fair values classified as available-for-sale are carried at fair value with corresponding changes recognized in other comprehensive income within stockholders equity, net of taxes. Debt securities classified as held-to-maturity securities are recorded at amortized cost. Equity securities that do not have readily determinable fair values are carried at cost except in the cases specific industry accounting practice is applied, e.g., Shinhan PEF 1st and 2nd, the Group s wholly owned subsidiaries, are subject to accounting for investment companies and accordingly underlying assets are fair valued. Additionally, certain alternative investments classified as other investments under other assets which meet both of the criteria under ASC 820-10-15-4 are measured at fair value determined by net asset value per share and the resulting valuation gain or loss is recognized through profit or loss. Whether the equity securities have readily determinable fair values or not, when it is determined that other-than-temporary-impairment has occurred, the entire difference between market value and cost is recognized in earnings as realized loss. For debt securities, if an investor has the intent to sell the securities, or if it is more likely than not that it will be required to sell the securities before recovery of amortized cost basis, other-than-temporary-impairment must be recognized by the entire difference between market value and cost. However, when an investor does not have the intent to sell, or if it is more likely than not that it will not be required to sell the debt securities, only the credit related loss is recognized in current-period earnings, while non-credit related loss is recognized in other comprehensive income (OCI). In determining the credit loss amount, we measure the difference between the amortized cost basis and the net present value of the security, where we use our best estimate of the present value of cash flows expected to be collected from the debt security. The net present value is calculated by discounting the expected cash flows at the effective interest rate implicit in the security at the date of acquisition. Additionally, we perform regular assessment of various quantitative and qualitative factors to determine whether impairment is other-than-temporary. Such factors include the duration and extent of the decline in the fair values of securities, the current operating and future expected performance, market values of comparable companies, and changes in industry and market prospects. These factors can be adversely affected by changing economic conditions that are global or regional in nature or are issuer or industry specific. For certain securities without readily determinable fair values, we may periodically utilize external valuations performed by qualified independent valuation firms.

Trading assets and liabilities are carried at fair value with the corresponding changes recognized in earnings. The majority of our trading assets and liabilities that are actively traded are valued based on quoted market prices except for derivatives. Since few derivatives are actively traded, the majority of our derivatives are valued using internally developed models based on external market variables that can be independently validated by third party sources. However, certain derivatives are valued based on external market variables that are less readily available and are subject to management s judgment. Also, in connection with ASC 820-10 adoption, we made some amendments to the valuation techniques used in measuring the fair value of derivatives and other positions. These amendments change the way that the probability of default of a counterparty is factored into the valuation of derivative positions and include the impact of our own credit risk on derivatives and other liabilities measured at fair value. We make adjustments to reflect such changes in credit risk of the counterparties and our own based on market-based measures of credit risk to the extent available, such as CDS spread, and also take into account collateral factors designed to reduce our credit exposure. For certain derivatives not valued by our internally developed models, we periodically utilize external valuations performed by qualified independent valuation firms.

For collateral dependent loans, impairment is measured based on the fair value of the collateral underlying the subject loan. When the carrying amount of the subject loan is higher than the fair value of the collateral, the carrying amount is written down to the fair value of the collateral and the fair value disclosure requirements of ASC 820-10 apply to the subject loan. The fair value of the collateral is determined as the present value of the estimated realizable value of the collateral at the expected time of the sale of such collateral. Once the valuation report of the court-appointed appraiser becomes publicly available as part of a foreclosure proceeding, we use the appraisal value for the collateral indicated in such report as the estimated realizable value of the collateral. However, until such publication, we use the valuation amount for the collateral as determined by outside independent appraisers at the time that the subject loan

was initially approved, with adjustments made for the change in value from the effect of time passage and current market circumstances that may impact the value of the collateral.

Since there is no secondary market where collateral dependent loans are actively traded, they are measured for impairment based on the fair value of the underlying collateral. While outside appraisers (whether court-appointed

143

Table of Contents

or in connection with the initial approval of the subject loan) consider observable inputs such as the sale prices of assets similar to such collateral, additional adjustments based on unobservable inputs are warranted in the valuation of collateral subject to a court-supervised foreclosure proceeding since the auction from such proceeding tends to result in a sale price less than that obtainable from a sale transaction conducted in the ordinary course of business. This use of unobservable inputs makes it necessary to classify collateral dependent loans as Level 3.

Goodwill and Intangible Assets

Effective January 1, 2002, we adopted ASC 350 (formerly SFAS No. 142, *Goodwill and Other Intangible Assets*), as required by the accounting principles generally accepted in the United States.

ASC 350 classified intangible assets into three categories: (1) intangible assets with definite lives subject to amortization; (2) intangible assets with indefinite lives not subject to amortization; and (3) goodwill. For intangible assets with definite lives, tests for impairment must be performed if conditions exist that indicate the carrying amount may not be recoverable. For intangible assets with indefinite lives and goodwill, tests for impairment must be performed at least annually.

We recognized a significant amount of goodwill in connection with our acquisition of LG Card in 2007. In addition, we acquired the credit card relationship intangible asset, in connection with the acquisition of LG Card. For discussions on the nature and accounting for goodwill and intangible assets see Notes 1, 3 and 10 in Index to Financial Statements Notes to the consolidated financial statements of Shinhan Financial Group.

Our core deposit, credit card relationship, brokerage customer relationship, deposit held at Korean Securities Finance Corporation, value of business acquisition, or VOBA, intangibles determined to have finite lives are amortized over their useful lives. If conditions exist that indicate the carrying amount may not be recoverable, we review these intangible assets with definite lives for impairment to ensure they are appropriately valued. Such conditions may include adverse changes in business or political climate, actions by regulators and customer account run-off rates.

We do not amortize goodwill or indefinite-lived intangibles consisting of court deposits and borrowings from Korea Securities Finance Corporation. Instead, we perform tests for impairment of goodwill annually or more frequently if events or circumstances indicate it might be impaired. Such tests include comparing the fair value of a reporting unit with its carrying amount, including goodwill. If the fair value is less than the carrying value, a second test is required to measure the amount of goodwill impairment. The second step of the goodwill impairment test compares the implied fair value of reporting unit goodwill with the carrying value of that goodwill. If the carrying value of reporting unit goodwill exceeds the implied fair value of that goodwill, we recognize an impairment loss in an amount equal to that excess. Tests for indefinite-lived intangible assets, including borrowings from Korea Securities Finance Corporation and court deposits at Shinhan Bank, are also carried out on an annual basis on an asset-by-asset basis, or more frequently if events or circumstances indicate they might be impaired. Impairment assessments are performed using a variety of valuation methodologies, including discounted cash flow estimates. Management estimates the future cash flows expected to be derived from the use and, if applicable, the terminal value of the assets. The key variables that management must estimate include, among other factors, market trading volume, market share, fee income, growth rate and profitability margin. Although the assumptions used are consistent with our internal planning, significant management judgment is involved in estimating these variables, which include inherent uncertainties. A discount rate is applied to the cash flow estimates considering cost of capital rate and specific country and industry risk factors. The cash flows of Shinhan Bank s reporting units were discounted using discount rates ranging from 12.53% to 13.18% during 2009.

The assumptions and conditions for goodwill and intangible assets reflect management s best assumptions and estimates. However, these items involve inherent uncertainties, as described above, that may or may not be

controllable by management. Economic and political conditions, such as movements in interest rates, delinquencies in Korea and tension with North Korea, represent uncertainties that are not controllable by management. As a result, if other assumptions and conditions had been used in the current period, the carrying amount of goodwill and other intangible assets could have been materially different. Furthermore, if management uses different assumptions, including the discount rates used to determine the implied fair value of reporting units, or if different conditions occur in future periods, future operating results could be materially impacted.

144

Table of Contents

See Notes 3 and 10 in the notes to our consolidated financial statements included in this annual report for additional information related to goodwill and intangible assets.

Consolidation

ASC 810-10, Consolidation (formerly FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities (revised December 2003) (FIN 46(R)), a variable interest entity (VIE) is consolidated by the company holding the variable interest that will absorb a majority of the VIE s expected losses, or receive a majority of the expected residual returns, or both. All other entities are evaluated for consolidation under other subtopics of ASC 810-10 (formerly Accounting Research Bulletin (ARB) No. 51, Consolidated Financial Statements, and SFAS No. 94, Consolidation of All Majority-Owned Subsidiaries). The company that consolidates a VIE is referred to as the primary beneficiary. A variety of complex estimation processes involving both qualitative and quantitative factors are used to determine whether an entity is a variable interest entity, to analyze and calculate expected losses and expected residual returns, which involves estimating the future cash flows of the VIE and analyzing the variability in those cash flows, and allocating the losses and returns among the parties holding variable interests. Also, there is a significant amount of judgment required in interpreting the provisions of ASC 810-10 and applying them to specific transactions.

In our case, ASC 810-10 apply to certain asset securitization transactions involving our corporate loans, credit card receivables, mortgage and student loans, financing activities conducted for corporate clients, including conduits that we administer and/or provide liquidity facilities, as well as for our own funding needs, and investing activities conducted for our own account, such as beneficial certificates in investment trusts and for our customers, such as guaranteed trusts.

See Note 36 of the notes to our consolidated financial statements included in this annual report for additional information related to VIEs.

In connection with certain asset securitization transactions, we do not sell assets to an entity referred to as a qualifying special-purpose entity (QSPE) as defined pursuant to ASC 810-10.

Contingent Liabilities

We are subject to contingent liabilities, including judicial, tax, regulatory and arbitration proceedings, commitments provided to our customers and other claims arising from the conduct of our business activities. We establish allowances against these contingencies in our financial statements based on our assessment of the probability of occurrence and our estimate of the obligation. We involve internal and external advisors, such as attorneys, consultants and other professionals, in assessing probability and in estimating any amounts involved. Throughout the life of a contingency, we or our advisors may learn of additional information that can affect our assessments about probability or about the estimates of amounts involved. Changes in these assessments can lead to changes in allowances recorded on our financial statements. In addition, the actual costs of resolving these claims may be substantially higher or lower than the amounts provided in our financial statements for those claims. See Note 31 of the notes to our consolidated financial statements included in this annual report for additional information related to commitments and contingencies.

Future Policy Benefits

Our liability for future policy benefits is primarily comprised of the present value of estimated future payments to or on behalf of policyholders, where the timing and amount of payment depends on policyholder mortality or morbidity, less the present value of future net premiums. Major assumptions used for future policy benefits are mortality and interest rate and such assumptions could be affected from the change in circumstances and market situations. If

changes are significant, we may be required to provide for expected future losses on a product by establishing premium deficiency reserves. Premium deficiency reserves, if required, are determined based on assumptions at the time the premium deficiency reserve is established and do not include a provision for the risk of adverse deviation. Also included in our liability for future policy benefits is a liability for unpaid claims and claim adjustment expenses.

145

Table of Contents

Deferred Policy Acquisition Costs (DAC)

Deferred policy acquisition costs, which are included in other assets, represent the costs of acquiring new business, principally commissions, certain underwriting and agency expenses, and the cost of issuing policies. Deferred policy acquisition costs are reviewed to determine if they are recoverable from future income, including investment income, and, if not recoverable, are charged to expense. All other acquisition expenses are charged to operations as incurred.

Valuation Allowance for Deferred Income Tax Assets

We recognize deferred tax assets and liabilities for the future tax consequences attributes to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, net operating loss carryforwards and tax credits. A valuation allowance is maintained for deferred tax assets that we estimate are more likely than not to be unrealizable based on available evidence at the time the estimate is made. Determining the valuation allowance requires significant management judgments and assumptions. In determining the valuation allowance, we use historical and forecasted future operating results, based upon approved business plans, including a review of the eligible carryforward periods, tax planning opportunities and other relevant considerations.

We believe that the accounting estimate related to the valuation allowance is a critical accounting estimate because the underlying assumptions can change from period to period. For example, tax law changes or variance in future projected operating performance could result in a change in the valuation allowance. If we were not able to realize all or part of our net deferred tax assets in the future, an adjustment to our deferred tax assets valuation allowance would be charged to income tax expense in the period such determination was made.

In 2009, we decided that it is more likely than not that we will not be able to utilize in the future certain net deferred tax assets of net operating loss carryforwards of Shinhan Financial Group. Thus we recorded valuation allowance of ₩104.9 billion on such deferred tax assets.

See Note 24 of the notes to our consolidated financial statements included in this annual report for additional information related to deferred tax assets and valuation allowance.

Notes:

(1) Average balances are based on (a) daily balances for Shinhan Bank and Jeju Bank and (b) quarterly balances for other subsidiaries.

147

Table of Contents

- (2) Represents the average balance and yield on securities are based on amortized cost. The yield on the available-for-sale portfolio is based on average historical cost balances, therefore, the yield information does not give effect to changes in fair value that are reflected as a component of stockholders equity.
- (3) Non-accruing loans are included in the respective average loan balances. Income on such non-accruing loans is no longer recognized from the date the loan is placed on nonaccrual status. We reclassify loans as accruing when interest (including default interest) and principal payments are current.
- (4) Represents the difference between the average rate of interest earned on interest-earning assets and the average rate of interest paid on interest-bearing liabilities.
- (5) Represents the ratio of net interest income to average interest-earning assets.
- (6) Represents the ratio of average interest-earning assets to average interest-bearing liabilities.

148

Analysis of Changes in Net Interest Income Volume and Rate Analysis

The following tables provide an analysis of changes in interest income, interest expense and net interest income between changes in volume and changes in rates for (i) 2008 compared to 2007 and (ii) 2009 compared to 2008. Volume and rate variances have been calculated on the movement in average balances and the change in the interest rates on average interest-earning assets and average interest-bearing liabilities in proportion to absolute volume and rate change. The variance caused by the change in both volume and rate has been allocated in proportion to the absolute volume and rate change.

Total interest expense		8,955		7,376	(17.6)	
Net interest income	₩	5,779	₩	5,221	(9.7)%	
Net interest margin(1)		2.74%		2.31%		

N/M = not meaningful

Note:

Interest and dividend income. The 14.5% decrease in interest and dividend income is due primarily to a 15.6% decrease in interest and fees on loans was due primarily to a decrease in the average lending rate, which was partially offset by an increase in the volume of loans made. The average lending rate decreased from 7.51% in 2008 to 6.12% in 2009, as a result of a decrease in the average lending rate for corporate loans from 6.99% in 2008 to 5.69% in 2009 and a decrease in the average lending rate for retail loans from 8.13% in 2008 to 6.65% in 2009. The decrease in lending rates for both corporate and retail loans was principally due to the lowering of the base rate set by the Bank of Korea in an effort by the Government to increase the supply of liquidity in

⁽¹⁾ Represents the ratio of net interest income to average interest-earning assets. See Average Balance Sheet and Volume and Rate Analysis Average Balance Sheet and Related Interest.

the Korean financial markets in light of the recent global credit crisis, which remained low throughout the rest of 2008 and 2009. In the meanwhile, the average balance of our loans increased by 3.6% from \text{\$\psi\$}161,258 billion in 2008 to \text{\$\psi\$}167,046 billion in 2009. The average balance of our corporate loans increased by 4.8% from \text{\$\psi\$}87,418 billion in 2008 to \text{\$\psi\$}91,601 billion in 2009, primarily due to an increase in other commercial loans, which was largely due to the significant purchase of commercial papers in the second half of 2008 in response to lowered market interest rates as part of our asset management strategy, most of which commercial papers we largely continue to hold throughout 2009. The average balance of our consumer loans increased by 2.2% from \text{\$\psi\$}73,840 billion in 2008 to \text{\$\psi\$}75,445 billion in 2009, primarily due to an increase in mortgage and home equity lending, which more than offset a decrease in unsecured lending, resulting mainly from our enhanced risk management policy to reduce such loans to improve asset quality.

151

Table of Contents

More specifically, the decrease in interest and dividend income was due to the following:

a 16.4% decrease in interest and fees on consumer loans from \(\pi\)6,001 billion in 2008 to \(\pi\)5,016 billion in 2009 and a 14.7% decrease in interest and fees on corporate loans from \(\pi\)6,108 billion in 2008 to \(\psi\)5,209 billion in 2009, which was largely due to a decrease in lending rates charged for variable rate retail and corporate loans as a result of the decrease in the base rate, which more than offset an increase in the average balances of retail and corporate loans;

a 14.0% decrease in interest and fees on other commercial loans from \(\foat{\psi}\)2,236 billion in 2008 to \(\foat{\psi}\)1,923 billion in 2009, which was primarily due to a general decrease in market interest rates, the effect of which was partially offset by an increase in the amount of discounted notes held by us as part of our asset management strategy;

a 23.3% decrease in interest and fees on mortgage and home equity loans from \(\pi\)2,314 billion in 2008 to \(\pi\)1,775 billion in 2009, which was primarily due to a decrease from 6.89% to 4.67% in the average lending rate on mortgage and home equity loans, which more than offset the steady increase in the average balance of the mortgage and home equity loans from \(\pi\)33,579 billion in 2008 to \(\pi\)37,991 billion in 2009 due to the improved housing market in the second half of 2009; and

a 13.0% decrease in interest and fees on other consumer loans from \text{\text{\text{\$\text{\$W1,673}\$}} billion in 2008 to \text{\text{\$\}\exitit{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\t

The 4.3% increase in interest and dividends on securities from \\ \Psi 1,775 \text{ billion in 2008 to \} \\ \Psi 1,852 \text{ billion in 2009 was due primarily to a 17.0% increase in the average balance of securities from \\ \Psi 32,837 \text{ billion in 2008 to } \\ \Psi 38,433 \text{ billion in 2009, which was more than offset by a decrease by 59 basis points in the average yield on securities from 5.41% in 2008 to 4.82% in 2009. The average balance of securities increased as a result of an increase in the appraisal value of our securities. The decrease in the average yield of securities was largely due to the general decrease in market interest rates in Korea in 2009.

Interest expense. Interest expense decreased by 17.6% from \(\pi_8,955\) billion in 2008 to \(\pi_7,376\) billion in 2009, due primarily to a 11.2% decrease in interest expense on interest-bearing deposits from \(\pi_4,714\) billion in 2008 to \(\pi_4,188\) billion in 2009 and a 24.8% decrease in interest expense on borrowings from \(\pi_4,241\) billion in 2008 to \(\pi_3,188\) billion in 2009.

The decrease in interest expense on interest-bearing deposits was due to a decrease in the average interest rate payable by us on interest-bearing deposits by 103 basis points from 4.15% in 2008 to 3.12% in 2009, which more than offset a 18.2% increase in the average balance of interest-bearing deposits (particularly time and savings deposits) from \\ \Psi 113,543 \text{ billion in 2008 to } \\ \Psi 134,227 \text{ billion in 2009.} The decrease in the average interest rate payable on interest-bearing deposits resulted mainly from the overall decrease in market interests as governments worldwide, including Korean government, actively lowered base rates in order to increase the supply of liquidity in response to the global credit crisis. As a result, the average interest rates payable on demand deposits, savings deposits, certificates

of deposits and other time deposits decreased from 0.78%, 2.32%, 5.94% and 4.94%, respectively, in 2008 to 0.45%,1.22%, 5.48% and 3.91%, respectively, in 2009. The increase in the average balance of interest-bearing deposits was primarily due to a 25.8% increase in the average balance of time and savings deposits from \$\forall 91,314\$ billion in 2008 to \$\forall 114,837\$ billion in 2009, which mainly resulted from the increasing preference among consumers for depositary products which are relatively safer and more stable compared to alternative investment products with higher risk-return profiles, such as stocks, in light of the volatile equity markets following the recent global financial crisis, as well as a change in our groupwide funding strategy in the aftermath of such crisis to rely more on quality long-term deposits rather borrowings or corporate debentures as the

152

Table of Contents

primary source of our funding. The average balance of demand deposits increased by 27.9% from \(\pm\)5,786 billion in 2008 to \(\pm\)7,399 billion in 2009 for similar reasons. However, the average balance of certificates of deposit decreased by 26.9% from \(\pm\)16,152 billion in 2008 to \(\pm\)11,802 billion in 2009 largely due to our active policy of increasing other time deposits instead of certificates of deposit in order to secure a more stable source of funding.

The decrease in interest expense on borrowings was due to a 36.7% decrease in the average balance of short-term borrowings from \text{\$\text{\$\text{\$\text{\$\text{47}}}} billion in 2008 to \text{\$\te

Net interest margin. Net interest margin represents the ratio of net interest income to the average volume of interest-earning assets. Our overall net interest margin decreased by 43 basis points from 2.74% in 2008 to 2.31% in 2009, primarily due to a decrease by 39 basis points in net interest spread from 2.38% in 2008 to 1.99% in 2009, which more than offset the 7.1% increase in the average volume of interest-earning assets from \text{\text{W}}211,141 billion in 2008 to \text{\text{\text{W}}226,228 billion in 2009}. Net interest spread, which represents the difference between the average rate of interest earned on interest-earning assets and the average rate of interest paid on interest-bearing liabilities, decreased primarily due to the relatively longer time lag for interest-bearing liabilities compared to interest-earning assets in reflecting the reduction in base interest rates set by the Bank of Korea. For example, the interest rates for time and savings deposits, which comprise the substantial majority of our interest-bearing deposits, are typically reset on an annual basis, and corporate debentures issued by us typically carry a fixed rate for a term of one year or more, while the interest rates for variable-rate corporate and retail loans, which represented most of our interest-earning assets, are typically reset on a quarterly basis.

Provision for loan losses

For a discussion of our loan loss provisioning policy, see Item 4.B. Business Overview Description of Assets and Liabilities Loans Provisioning Policy.

Our provision for loan losses increased by 32.8% from \times 1,319 billion in 2008 to \times 1,751 billion in 2009, primarily due to prudent charge-off of low-quality assets as part of our enhanced risk management policy to improve the overall quality of assets held by us in the aftermath of the recent global financial crisis. Loan loss allowance against our loans increased by 13.7% from \times 3,201 billion as of December 31, 2008 to \times 3,638 billion as of December 31, 2009, primarily as a result of an increase in our consumer loan assets and a deterioration in asset quality of corporate loans, particularly in the shipping, shipbuilding and real estate development sectors.

153

Table of Contents

The following table sets forth for the periods indicated the components of provision for loan and other credit losses by product type.

	As of December 31, 2008 2009 % Change (In billions of Won, except percentages)						
Total (reversal of) provision for loan losses (A):							
Corporate	₩	1,288	₩	1,477	14.7%		
Mortgages and home equity		8		1	(87.5)		
Other consumer		(3)		189	N/M		
Credit cards		26		84	N/M		
		1,319		1,751	32.8%		
Total (reversal of) provision for off-balance sheet credit instruments (B):							
Guarantees and acceptances	₩	170	₩	93	(45.3)%		
Unused portions of credit line	•	(52)	••	357	N/M		
		118		450	N/M		
Total provision for credit losses (A+B)	₩	1,437	₩	2,201	53.2%		

N/M = not meaningful

Provision for loan losses for corporate loans increased by 14.7% from \(\psi\)1,288 billion in 2008 to \(\psi\)1,477 billion in 2009, primarily due to prudent charge-off of low-quality corporate loan assets as part of our enhanced risk management policy to improve the overall quality of assets held by us in the aftermath of the recent global financial crisis. Loan loss allowance against our corporate loans increased by 21.8% from \text{\text{\$\psi}}2,449 billion as of December 31, 2008 to \(\foatgap 2,982\) billion as of December 31, 2009, primarily as a result of a deterioration in asset quality of corporate loans, particularly in the shipping, shipbuilding and real estate development sectors. Specifically, in December 2008, the Government announced a program to promote a fast-track restructuring of such borrowers by their Korean creditor financial institutions, under the supervision of major commercial banks. In accordance with such program, 29 construction companies and eight shipbuilding companies became subject to workout in February and March 2009, following review by their creditor financial institutions (including Shinhan Bank) and the Korean government. Currently, ten construction companies and two shipbuilding companies remain under our supervision in connection with such program. Our total exposure to such companies amounted to \(\precent{\psi}\)503 billion as of December 31, 2009, we have established an allowance for the loans and off-balance sheet credit instruments for such companies amounting to ₩119 billion and ₩18 billion, respectively, as of December 31, 2009. In addition, we continued to be involved in fast-track restructuring of other companies, particularly, small- to medium-sized enterprises in the shipping, shipbuilding and real estate development sectors. Net charge-offs of our corporate loans increased significantly from ₩249 billion in 2008 to ₩944 billion in 2009, primarily as a result of prudent charge-off undertaken by us in 2009 in the aftermath of the recent global financial crisis. The non-performing loan ratio of our corporate loans increased from 1.15% as of December 31, 2008 to 1.28% as of December 31, 2009, primarily as a result of deterioration in asset

quality of corporate loans, particularly in the shipping, shipbuilding and real estate development sectors.

Provision for loan losses for mortgage and home equity loans and other consumer loans significantly increased from \$\fowardam{\colored}{\text{5}}\$ billion in 2008 to \$\fowardam{\colored}{\text{190}}\$ billion in 2009, primarily as a result of prudent charge-off undertaken by us in 2009 in the aftermath of the recent global financial crisis. We recorded reversal of net charge-off of our mortgage and home equity loans and other consumer loans in the amount of \$\fowardam{\text{\text{45}}}\$ billion in 2008 compared to net charge-off of \$\fowardam{\text{\text{4166}}\$ billion in 2009. Total allowance for losses for our mortgage and home equity loans and other consumer loans increased by 15.3% from \$\fowardam{\text{\text{4157}}\$ billion in 2008 to \$\fowardam{\text{\text{4181}}\$ billion in 2009 primarily as a result of an increase in the volume of retail lending.

We recorded provision for loan losses against credit card loans of \text{\text{\$\text{\$\text{\$\text{\$W}}}\$4 billion in 2009 compared to provision for loan losses of \text{\text{\$\exitt{\$\exitt{\$\text{\$\exitt{\$\exitt{\$\text{\$\ext{\$\text{\$\exitit{\$\text{\$\text{\$\text{\$\text{\$\exitt{\$\text{\$\text{\$\text{\$

154

Table of Contents

of our credit card loans decreased from 1.17% in 2008 to 1.13% in 2009, and total allowances for credit card loans decreased by 20.2% from \text{\$\text{\$\psi}\$}595 billion in 2008 to \text{\$\text{\$\psi}\$}475 billions in 2009, in each case, primarily due to the decrease of non-delinquent loans and general improvement in asset quality of our loans as a result of increased charge-offs.

Provision for off-balance sheet credit instruments significantly increased from \text{\text{\$\text{\$W}}}118 billion in 2008 to \text{\text{\$\text{\$\text{\$\text{\$\text{\$W}}}}450 billion} in 2009, primarily as a result of a change in accounting policy related to such provision, increased credit card usage for cash advances and prudent provisioning for off-balance sheet credit instruments in respect of credit card usage in anticipation of lower interest rates applicable to cash advances, which became effective in April 2010.

Non-interest Income

The following table sets forth for the periods indicated the components of our noninterest income.

	As of December 31,						
	2008	2009 llions of Won, e percentages)	% Change				
Non interest income							
Commissions and fees from non-trust management:							
Brokerage fees and commissions(1)	₩ 626	₩ 569	(9.1)%				
Other fees and commissions(2)	1,969	2,132	8.3				
Net trust management fees(3)	69	69					
Net trading profits	584	(517)	N/M				
Net gains (losses) on securities	(135)	308	N/M				
Gain on other investment	317	268	(15.5)				
Net gain (loss) on foreign exchange	(566)	956	N/M				
Insurance income	1,329	1,229	(7.5)				
Other	379	671	77.0				
Total noninterest income	₩ 4,572	₩ 5,685	24.3%				

N/M = not meaningful

Notes:

- (1) Consists of commissions, fees and markup on securities brokerage activities.
- (2) Includes commissions received on remittance, commissions received on imports and export letters of credit and commissions received from foreign exchange transactions.
- (3) Consists principally of fees from management of trust accounts in our banking operations.

The 24.3% increase in non-interest income was largely due to the net gain on foreign exchange translation related to the appreciation of the Won compared to the U.S. dollar, net gain from increased volume of foreign exchange transactions and net gain on securities which resulted from the sale of available-for-sale securities which appreciated

in value. Such gains more than offset the loss from net trading profits related to foreign currency derivative transactions resulting from decreased transaction and translation gains.

155

Table of Contents

Non-interest Expenses

The following table shows, for the periods indicated, the components of our noninterest expense.

	Year Ended December 31,						
	2008 (In bi						
		percentages)					
Employee compensation and other benefits	₩ 1,817	₩ 2,000	10.1%				
Depreciation and amortization	871	714	(18.0)				
General and administrative expenses	882	868	(1.6)				
Credit card fees	700	742	6.0				
Provision (reversal) for other losses	(18)	166	N/M				
Insurance fees on deposits	133	162	21.8				
Other fees and commission expenses	422	454	7.6				
Taxes (except income taxes)	179	143	(20.1)				
Insurance operating expense	1,038	1,456	40.3				
Other	703	432	(38.5)				
Total noninterest expenses	₩ 6,727	₩ 7,137	6.1%				

N/M = not meaningful

The 6.1% increase in non-interest expense was principally due to an increase in employee compensation and other benefits and an in insurance operating expense, which more than offset a decrease in other expense related to the depreciation and amortization of intangible assets, depreciated on an accelerated basis. Employee compensation and other benefits increased by 10.1%, mainly due to increased severance payments related to voluntary retirements, offsetting aggressive cost-cutting campaigns for wage and fringe benefits. Insurance operating expense increased mainly due to an increase in insurance payouts as well as increased policy reserve to renew the current policies.

Income Tax Expense

Income tax expense decreased by 39.0% from \(\foat\)695 billion in 2008 to \(\foat\)424 billion in 2009 as a result of a decrease in our taxable income as well as a decline in the statutory tax rate from 27.5% in 2008 to 24.2% in 2009. Our effective rate of income tax decreased to 27.1% in 2009 from 31.8% in 2008.

Net Income Before Extraordinary Items

As a result of the foregoing, our net income before extraordinary items decreased by 23.4% from Ψ 1,481 billion in 2008 to Ψ 1,134 billion in 2009.

156

Table of Contents

2008 Compared to 2007

Net Interest Income

The following table shows, for the periods indicated, the principal components of our net interest income.

	Year Ended December 31,						
		2007	2008		% Change		
	(I	n billions	of Wo	n, except pe	ercentages)		
Interest and dividend income:							
Interest and fees on loans	W	10,185	₩	12,109	18.9%		
Interest and dividends on securities		1,403		1,775	26.5

Total interest expense		6,979		8,955	28.3		
Net interest income	₩	5,170	₩	5,779	11.8%		
Net interest margin(1)		2.82%		2.74%			

N/M = not meaningful

Note:

Interest and dividend income. The 21.3% increase in interest and dividend income was due primarily to a 18.9% increase in interest and fees on loans.

The 18.9% increase in interest and fees on loans was due primarily to the following;

a 23.0% increase in interest and fees on commercial and industrial loans from \(\pi\)3,071 billion in 2007 to \(\pi\)3,778 billion in 2008, which was due primarily to a 17.9% increase in the average balance of commercial and industrial loans from \(\prec{\pma}\)47,492 billion in 2007 to \(\pma\)56,002 billion in 2008, and to a lesser extent, an

⁽¹⁾ Represents the ratio of net interest income to average interest-earning assets. See Average Balance Sheet and Volume and Rate Analysis Average Balance Sheet and Related Interest.

increase by 28 basis points in the average yield on such loans from 6.47% in 2007 to 6.75% in 2008;

a 17.1% increase in interest and fees on other commercial loans from \text{\text{\$\exititt{\$\text{\$\text{\$\text{\$\text{\$\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\}\$}\text{\$\text{\$\text{\$\te

a 19.4% increase in interest and fees on mortgage and home equity loans from \text{\$\psi\$1,938 billion in 2007 to \$\frac{\psi}{2},314\$ billion in 2008, which was due primarily to a 9.7% increase in the average balance of mortgage and home equity loans from \$\frac{\psi}{3}0,605\$ billion in 2007 to \$\frac{\psi}{3}3,579\$ billion in 2008 and an increase by 56 basis points in the average yield on such loans from 6.33% in 2007 to 6.89% in 2008; and

a 14.3% increase in interest and fees on other retail loans from \text{\psi}1,681 billion in 2007 to \text{\psi}1,922 billion in 2008, which was due primarily to a 14.0% increase in the average balance of other retail loans from \text{\psi}22,625 billion in 2007 to \text{\psi}25,803 billion in 2008.

157

Table of Contents

The increase in the average volume of commercial and industrial loans was primarily due to the continued increase in lending to small- and medium-sized enterprises in the first half of 2008 and increased lending to large corporations compared to small- to medium-sized enterprises in the second half of 2008, which resulted from our efforts to improve the asset quality of our corporate loans in light of the downturn in the Korean economy in the second half of 2008. The increase in the average volume of mortgage and home equity loans was primarily due to the steady increase in such lending in the first half of 2008. The increase in the average volume of other retail loans was primarily due to increased lending to professionals and other high income-earning individuals as part of a targeted marketing campaign in 2008.

Overall, the average volume of our loans increased by 13.6% from \text{\psi}141,914 billion in 2007 to \text{\psi}161,258 billion in 2008.

The increases in the yields of commercial and industrial loans, other commercial loans and mortgage and home equity loans were largely due to the general increase in market interest rates in Korea in the second half of 2008 as a result of the global liquidity crisis.

The 26.5% increase in interest and dividends on securities was due primarily to a 15.7% increase in the average balance of securities from \(\mathbb{W}\)28,388 billion in 2007 to \(\mathbb{W}\)32,837 billion in 2008 and an increase by 47 basis points in the average yield on securities from 4.94% in 2007 to 5.41% in 2008. The average balance of securities increased as a result of an increased purchase of securities in proportion to the increase in total assets. The increase in the average yield of securities was largely due to the general increase in market interest rates in Korea in the second half of 2008.

Interest expense. Interest expense increased by 28.3% from \\ \psi_6,979\ \text{ billion in 2007 to \\ \psi_8,955\ \text{ billion in 2008, due primarily to a 34.3% increase in interest on deposits from \\ \psi_3,511\ \text{ billion in 2007 to \\ \psi_4,714\ \text{ billion in 2008 and a 22.4% increase in interest on long-term debt from \\ \psi_2,256\ \text{ billion in 2007 to \\ \psi_2,762\ \text{ billion in 2008.}}

The increase in interest expense on deposits in 2008 was primarily the result of a 14.1% increase in the average volume of interest-bearing deposits from \(\pi\)99,477 billion in 2007 to \(\pi\)113,543 billion in 2008 and an increase by 62 basis points in the cost of interest-bearing deposits from 3.53% in 2007 to 4.15% in 2008.

The principal reason for the increase in interest rates payable on our interest-bearing deposits was the increase in interest rates payable on our interest-bearing deposits and other time deposits. Our other time deposits on average have maturities of more than one year, generally pay higher interest rates than demand deposits and savings deposits but lower than certificates of deposit, and accounted for 53.2% of our average interest-bearing deposits in 2008. The average interest rate paid on other time deposits increased by 39 basis points from 4.55% in 2007 to 4.94% in 2008, while the average interest rate paid on our certificates of deposit, which accounted for 14.2% of our average interest-bearing deposits in 2008, increased by 72 basis points from 5.22% in 2007 to 5.94% in 2008. The average interest rate paid on our savings deposits, which accounted for 27.2% of our average interest-bearing deposits in 2008, increased by 27 basis points from 2.05% in 2007 to 2.32% in 2008.

The increase in the average volume of interest-bearing deposits was due primarily to a 36.1% increase in the average volume of other time deposits from \(\foware 44,397\) billion in 2007 to \(\foware 60,437\) billion in 2008 and a 4.4% increase in the average volume of our certificates of deposit from \(\foware 15,475\) billion in 2007 to \(\foware 16,152\) billion in 2008, which was partially offset by a 48.7% decrease in the average volume of mutual installment deposits from \(\foware 567\) billion in 2007 to \(\foware 291\) billion in 2008. The increase in the average volume of other time deposits was largely due to the aggressive marketing of other time deposits based on higher interests in the second half of 2008 as part of our funding strategy to meet increased demand for corporate loans in light of the global liquidity crisis in the second half of 2008.

The 22.4% increase in interest expense on long-term debt was primarily due to an increase by 21 basis points in the average interest rates paid on our long-term debt from 5.33% in 2007 to 5.54% in 2008, primarily as a result of the general increase in the market interest rates in the second half of 2008, and a 17.9% increase in the average volume of long-term debt from \text{\$\text{\$\text{\$W}}\$42,316 billion in 2007 to \text{\$\text{\$\text{\$\text{\$\text{\$W}}\$49,876 billion in 2008, which mainly resulted from:}}

the increase in issuance of Won-denominated corporate debentures by Shinhan Financial Group to support the operations of Shinhan Bank and Shinhan Card; and

158

Table of Contents

the increase in the use of corporate debentures (which generally bear higher interests but provide longer-term funding relative to deposit products) as Shinhan Bank s funding source due to the faster growth in the volume of loans compared to deposits.

The 31.2% increase in interest expense on short-term borrowings was due primarily to a 29.2% increase in the average volume of short-term borrowings from \text{\$\psi\$}16,810 billion in 2007 to \text{\$\psi\$}21,713 billion in 2008 as a result of the increased use of short-term borrowings in light of the relative difficulties of sourcing long-term borrowings due to the global liquidity crisis in the second half of 2008.

Net interest margin. Net interest margin represents the ratio of net interest income to average interest earning assets. Our overall net interest margin decreased by 8 basis points from 2.82% in 2007 to 2.74% in 2008, primarily due to a decrease in net interest spread by 11 basis points from 2.49% in 2007 to 2.38% in 2008, which more than offset a 21.3% increase in net interest income from \(\pi\)12,149 billion in 2007 to \(\pi\)14,734 billion in 2008 and a 15.0% increase in the average volume of our interest earning assets from \(\pi\)183,652 billion in 2007 to \(\pi\)211,141 billion in 2008. The decrease in net interest spread was largely due to a decrease in the interest rates for our interest-bearing assets whose interest rates are pegged to the base certificates of deposit rate, which base rate has decreased from 5.82% as of December 31, 2007 to 3.93% as of December 31, 2008, and the increase in the interest rates for our interest-bearing liabilities as a result of the general rise in the market interest rates due to the global liquidity crisis in the second half of 2008.

Provision for loan losses

For a discussion of our loan loss provisioning policy, see Item 4.B. Business Overview Description of Assets and Liabilities Loans Provisioning Policy.

Our provision for loan losses significantly increased to \(\mathbb{W}\)1,319 billion in 2008 from \(\mathbb{W}\)40 billion in 2007, primarily reflecting the deterioration in the overall asset quality of our corporate loans due to the economic downturn in Korea in 2008, and particularly as a result of allowances made for construction and shipbuilding companies that are being restructured under the supervision of creditor commercial banks and the Korean government.

The following table sets forth for the periods indicated the components of provision for loan and other credit losses by product type.

	As of December 31, 2007 2008 % Change (In billions of Won, except percentages)						
Total (reversal of) provision for loan losses (A):							
Corporate	\mathbf{W}	182	₩	1,288	N/M		
Mortgages and home equity		(4)		8	N/M		
Other consumer		14		(3)	N/M		
Credit cards		(152)		26	N/M		
		40		1,319	N/M		

Total (reversal of) provision for off-balance sheet credit instruments (B):

Table of Contents

Specifically, in December 2008, the Korean government announced that it would promote swift restructuring of troubled companies in certain industries that have been disproportionately affected by the ongoing economic difficulties, such as construction and shipbuilding industries. These restructurings will be supervised primarily by the major commercial banks that are creditor financial institutions of such companies, with the Korean government having an oversight role. In February 2009, 12 construction companies and four shipbuilding companies became subject to workout following review by their creditor financial institutions and the Korean government, and Shinhan Bank was one of the creditor financial institutions for 11 construction companies and four shipbuilding companies. We established allowance for the loans and off-balance sheet credit instruments amounting to \(\frac{\text{W}}{90}\) billion and \(\frac{\text{W}}{121}\) billion, respectively, for such companies as of December 31, 2008.

We recorded provision for loan losses against mortgage and home equity loans in the amount of \text{\$\psi}8\$ billion in 2008 compared to a reversal of provision for loan losses against mortgage and home equity loans in the amount of \text{\$\psi}4\$ billion in 2007, and total allowance for losses for our mortgage and home equity loans increased by 100.0% from \text{\$\psi}4\$ billion in 2007 to \text{\$\psi}8\$ billion in 2008, primarily as a result of the increase in the total volume of mortgage and home equity loans. The non-performing loan ratio for our mortgage and home equity loans decreased from 0.14% in 2007 to 0.11% in 2008, primarily as a result of improved asset quality in the home and mortgage loans, which comprise the substantial majority of our total retail loans, due to stricter lending policies involving more stringent loan-to-value and debt-to-income ratios applied in making such loans.

We recorded a reversal of provision for loan losses against other retail loans in the amount of \(\pi\)3 billion in 2008 compared to provision for loan losses against other retail loans in the amount of \(\pi\)14 billion in 2007, and total allowance for losses for our other retail loans decreased from \(\pi\)150 billion in 2007 to \(\pi\)149 billion in 2008, primarily as a result of the decrease in the total volume of other retail loans. The non-performing loan ratio for our other retail loans decreased from 0.33% in 2007 to 0.26% in 2008, due to a relatively larger amount of charge-off made in 2008 compared to 2007.

We recorded provision for loan losses against credit card loans of \text{\text{\text{\text{W}}26}} billion in 2008 compared to reversal of provision for loan losses of \text{\text{\text{\text{\text{\text{V}}152}}} billion in 2007, primarily as a result of a deterioration of asset quality of our credit card receivables. The non-performing loan ratio of our credit card loans increased from 1.12% in 2007 to 1.17% in 2008, and total allowances for credit card loans increased by 10.4% from \text{\text{\text{\text{5}}39}} billion in 2007 to \text{\text{\text{\text{\text{\text{\text{\text{\text{\text{2}}008}}}, in each case, primarily due to a decreased recovery rate for written-off credit card receivables in 2008 due to the difficult economic environment in Korea in 2008.

Provision for off-balance sheet credit instruments increased substantially from 2007 to 2008 due to an increase in provision for refund guarantees provided to shipbuilding companies in light of the financial difficulties these companies faced in 2008.

Provision for unused portions of credit line significantly decreased from 2007 to 2008 primarily due to a decrease in the amount of credit lines provided in 2008 mainly as a result of our banking subsidiaries overall efforts to reduce credit exposure in light of the difficult economic environment in Korea.

160

Table of Contents

Noninterest Income

The following table sets forth for the periods indicated the components of our noninterest income.

	As of December 31, 2007 2008 % Change (In billions of Won, except percentages)							
Commissions and fees from non-trust management:								
Brokerage fees and commissions(1)	₩	858	₩	626	(27.0)%			
Other fees and commissions(2)	1	,754		1,969	12.3			
Net trust management fees(3)		73		69	(5.5)			
Net trading profits		(210)		584	N/M			
Net gains (losses) on securities		169		(135)	N/M			
Gain on other investment		181		317	75.1			
Net gain (loss) on foreign exchange		146		(566)	N/M			
Insurance income	1	,119		1,329	18.8			
Other		648		379	(41.5)			
Total noninterest income	₩ 4	,738	₩	4,572	(3.5)%			

N/M = Not material

Notes:

- (1) Consists of commissions, fees and markup on securities brokerage activities.
- (2) Includes commissions received on remittance, commissions received on imports and export letters of credit and commissions received from foreign exchange transactions.
- (3) Consists principally of fees from management of trust accounts in our banking operations.

The 3.5% decrease in non-interest income was largely due to the net loss on foreign exchange related to the devaluation of the Won compared to the U.S. dollar and net losses on securities related to the downturn in the Korea stock market, which more than offset the net trading profits related to an increase in the volume of foreign currency derivative transactions.

Noninterest Expenses

The following table shows, for the periods indicated, the components of our noninterest expense.

Year Ended December 31, 2007 2008 % Change

Edgar Filing: SHINHAN FINANCIAL GROUP CO LTD - Form 20-F

(In billions of Won, except percentages)

Employee compensation and other benefits	₩ 2,056	₩ 1,817	(11.6)%

Insurance fees on deposits	131	133	1.5
Other fees and commission expenses	446	422	(5.4)
Taxes (except income taxes)	128	179	39.8
Insurance operating expense	1,351	1,038	(23.2)
Other	206	703	N/M
Total noninterest expenses	₩ 6,745	₩ 6,727	(0.3)%

N/M = not meaningful

161

Table of Contents

The 0.3% decrease in non-interest expense was principally due to a decrease in employee compensation and other benefits and a decrease in insurance operating expense, which more than offset an increase in other expense related to the amortization of goodwill from the LG Card acquisition. Employee compensation and other benefits decreased by 11.6% mainly due to aggressive cost-cutting campaigns for wage and fringe benefits. Insurance operating expense decreased mainly due to an increase in policy reserve.

Income Tax Expense

Income tax expense decreased by 34.3% from \(\pi\)1,058 billion in 2007 to \(\pi\)695 billion in 2008 as a result of a decrease in our taxable income. The statutory tax rate was 27.5% in both 2007 and 2008. Our effective rate of income tax decreased to 31.8% in 2008 from 34.3% in 2007.

Net Income Before Extraordinary Items

As a result of the foregoing, our net income before extraordinary items decreased by 23.3% from \$1,930 billion in 2007 to \$1,481 billion in 2008.

Results by Principal Business Segment Under Korean GAAP

As of December 31, 2009, we were organized into eight major business segments as follows:

the following banking services, which are principally provided by Shinhan Bank:

retail banking;

corporate banking;

treasury and international banking; and

other banking services;

securities brokerage services, which are provided by Shinhan Investment;

credit card services, which are provided by Shinhan Card;

life insurance services, which are provided by Shinhan Life Insurance; and

other.

The following discussion of our results of operations by principal business segment is provided on a Korean GAAP basis since this is the basis of accounting that we currently use to manage our business. Our senior management regularly makes decisions about resources to be allocated to these activities and assesses performance of the activities using this information, and consequently this forms the basis of our segment reporting included in Note 34 in the notes to our consolidated financial statements included in this annual report.

Information for 2008 represents that of Shinhan Card.
- (4) Presented on a reported basis before elimination or adjustments.

Retail Banking

The retail banking segment primarily consists of banking and other services provided by Shinhan Bank s retail banking branches to the branch customers, which principally consist of individuals and households and, to a lesser extent, small businesses and non-corporate institutions such as government entities and hospitals. The retail banking products principally consist of mortgage and home equity loans and other retail loans, deposits and other savings products and fees earned from the sale of investment and bancassurance products. The table below provides the income statement data for the retail banking segment for the periods indicated.

		Year	Ended	l Decem	% Change

Segment results(1)	₩	1,681	₩	1,124	₩	527	(33.1)%	(53.1)%

Note:

(1) Net income per segment before income taxes.

Comparison of 2009 to 2008

The overall segment results for retail banking decreased by 53.1% from \text{\text{\text{\text{W}}}1,124 billion in 2008 to \text{\text{\text{\text{\text{\text{W}}}527 billion in 2009.}}

Net interest income decreased by 2.9% due primarily to a decrease in net interest spread, which more than offset an increase in the volume of lending to individuals and households and an increase in the volume of customer deposits. The decrease in net interest spread in 2009 was due primarily to the relatively longer time lag on average taken by the rates payable on interest-bearing deposits compared to the rates payable on interest-earning loans in reflecting the reduction in base rates set by the Government in 2009 in response to the global financial crisis. The increase in the volume of lending to individuals and households was primarily due to an increase in mortgage and home equity loans as a result of lower lending rates. The increase in customer deposits was primarily due to the increasing customer preference for safer depositary products compared to other investment products, such as stocks, in light of the volatility in stock markets during the recent global financial crisis, notwithstanding the lower interest rates paid on deposit products compared to those in prior periods.

Non-interest income decreased by 66.5% due primarily to a decrease in fees earned from the sale of investment fund and bancassurance products resulting from the volatility in stock markets and a decrease in fees earned from

163

Table of Contents

the sale of foreign currency-related derivative products due to the relatively stability of the foreign exchange rates in 2009 following the initial shock of the global financial crisis.

Provision for loan losses on retail loans increased by 54.1% due primarily to the increase in the average volume of retail loans and Shinhan Bank s more prudent provisioning policy during the recent global financial crisis.

Non-interest expense including depreciation and amortization decreased by 35.2% due primarily to a decrease in expenses associated with foreign currency-related derivative products resulting from a decrease in the volume of related transactions. Such transaction volume decreased due to the relatively stability of the foreign exchange rates in 2009 following the initial shock of the global financial crisis.

Comparison of 2008 to 2007

The overall segment results for retail banking decreased by 33.1% from \$1,681 billion in 2007 to \$1,124 billion in 2008.

Net interest income decreased by 0.7% due primarily to a decrease in net interest margin, while the average volume of lending to individuals and households remained relatively stable. The decrease in net interest margin in 2008 was due primarily to the relatively higher rise in the borrowing rates as a result of the global liquidity crisis in the second half of 2008 compared to the lending rates which are pegged to a base rate determined by the Korean government, which declined in the second half of 2008 as part of the government effort to increase liquidity in the market.

Non-interest income increased significantly due primarily to an increase in fees from an increased volume of derivatives transactions related to interest rate hedging undertaken for funding for retail loans, which more than offset an decrease in fees and commissions from the sales of investment fund products arising from the downturn in the Korean stock market in the second half of 2008.

Provision for loan losses increased by 63.1% due primarily to the increase in corporate loans provided by our retail banking branches to small businesses, the asset quality of which deteriorated.

Non-interest expense including depreciation and amortization increased by 102.7% due primarily to the return of deposits held in accounts which have been dormant for more than five years pursuant to recent regulatory requirements and mandatory contributions made to the court deposit management commission, as well as an increase in expenses related to the increased volume of derivatives transactions.

Corporate Banking

The corporate banking segment primarily consists of banking and other services provided by Shinhan Bank's corporate banking branches to their corporate customers, most of which are small- and medium-sized enterprises and large corporations, including members of the *chaebol* groups. The corporate banking services primarily consist of general lending and providing overdrafts and other credit facilities. The table below provides the income statement data for the corporate banking segment for the periods indicated.

164

Table of Contents

N/M = not meaningful

Note:

(1) Net income per segment before income taxes.

Comparison of 2009 to 2008

The overall segment results for corporate banking decreased by 92.4% from \(\forall \)2,058 billion in 2008 to \(\forall \)157 billion in 2009.

Net interest income decreased by 64.6% due primarily to a decrease in net interest spread, which more than offset an increase in the volume of lending to corporations. The decrease in net interest spread in 2009 was due primarily to the reduction in base rates set by the Government in 2009 in response to the global financial crisis and the relatively higher funding rates for the interest-bearing liabilities in the corporate banking segment, which include a greater portion of borrowings and a lower portion of low-cost deposits compared to the retail banking segment. The increase in the volume of lending was primarily due to increased purchases by Shinhan Bank of call loans and loans bought under resale program as part of Shinhan Bank s investment strategy. The volume of lending by Shinhan Bank s corporate customers remained largely stable.

Non-interest income decreased by 81.9% due primarily to a decrease in fees earned from the sale of foreign currency-related derivative products due to the relatively stability of the foreign exchange rates following the initial shock of the global financial crisis.

Provision for loan losses on corporate loans increased by 42.6% due primarily to the increase in the average volume of corporate loans and Shinhan Bank s more prudent provisioning policy during the recent global financial crisis, particularly in anticipation of the corporate restructuring programs during the first half of 2009.

Non-interest expense including depreciation and amortization decreased by 77.5% due primarily to a decrease in expenses associated with foreign currency-related derivative products resulting from a decrease in the volume of related transactions. Such transaction volumes decreased due to the relative stability of the foreign exchange rates in 2009 following the initial shock of the global financial crisis.

Comparison of 2008 to 2007

The overall segment results for corporate banking improved significantly from \$525 billion in 2007 to \$2,058 billion in 2008.

Net interest income increased significantly due primarily to an increase in the volume of corporate lending due principally to increased reliance by large corporations on loans from banks for funding in light of the tightened liquidity in the credit markets in the second half of 2008 and our marketing campaigns to attract high-quality corporate borrowers.

Non-interest income increased significantly, due primarily to an increase in the sales volume of foreign currency-related derivatives as a result of an increase in volatility in exchange rates and an enlarged exposure to naked currency positions among our customers.

Provision for loan losses on corporate loans increased significantly, mainly as a result of additional allowance made for troubled construction and shipbuilding companies and the deterioration in asset quality for corporate loans.

Non-interest expense including depreciation and amortization increased significantly, due primarily to an increase in the sales volume of foreign currency-related derivatives.

Treasury and International Banking

The treasury and international banking segment primarily consists of Shinhan Bank s non-deposit funding activities, including trading of, and investment in, debt securities and, to a lesser extent, in equity securities for its own accounts, handling its treasury activities, such as inter-segment lending and borrowing, and entering into

165

Table of Contents

derivatives transactions. This segment also includes the results of operations of its overseas branches. The table below provides the income statement data for the treasury and international banking segment for the periods indicated.

		Year	Ende	% Change

Note:

(1) Net income (or loss) per segment before income taxes.

Comparison of 2009 to 2008

The overall segment results for treasury and international banking changed from net loss before income taxes of \$\forall 556\$ billion in 2008 to net income before income taxes of \$\forall 141\$ billion in 2009.

The treasury and international banking segment recorded net interest income of \(\mathbb{W}\)337 billion in 2009 compared to net interest expense of \(\mathbb{W}\)578 billion in 2008 primarily due to a decrease in the average volume of, and interest rate payable on, corporate debentures and borrowings in 2009. The average volume of corporate debentures and borrowings decreased in 2009 as part of Shinhan Bank s enhanced risk management policy to reduce the proportion of corporate debentures and borrowings relative to low-cost deposits in its overall funding portfolio in response to the global financial crisis. The decrease in interest rates payable on corporate debentures and borrowings was due to the general decline in market borrowing rates as a result of greater market liquidity following the initial shock of the global financial crisis.

Non-interest income and non-interest expense including depreciation and amortization remained largely stable.

Comparison of 2008 to 2007

The overall segment results for treasury and international banking increased by 20.1% from net loss of \\ \psi 696\) billion in 2007 to net loss of \\ \psi 556\) billion in 2008.

Net interest expense increased by 118.1% due primarily to an increase in deposits (including special high-interest deposit products) and the increased funding costs for corporate debentures issued by us as a result of the tightened credit market in the second half of 2008.

Non-interest income and non-interest expense including depreciation and amortization increased significantly, in each case, due primarily to an increase in the sales volume of foreign currency-related derivatives as a result of an increase in volatility in exchange rates and an enlarged exposure to naked currency positions among our customers.

166

Table of Contents

Other Banking Services

This segment primarily consists of Shinhan Bank s trust account management services, cash management account (CMA) services, merchant banking services and non-performing loan collection services. The table below provides the income statement data for the other banking services segment for the periods indicated.

N/M = not meaningful

Note:

(1) Net income (or loss) per segment before income taxes.

Shinhan Bank frequently issues subordinated debt securities, which carry interest rates that are higher than market interest rates. As subordinated debt securities have the overall effect of improving Shinhan Bank s capital adequacy and benefit Shinhan Bank in its entirety, the management believes it is inappropriate to allocate the higher costs associated with issuing subordinated debt to a particular business segment. Accordingly, Shinhan Bank allocates and reflects the difference between the higher costs associated with subordinated debt and market interest rates in this segment as interest expenses.

Comparison of 2009 to 2008

The overall segment results for other banking changed from net loss before income taxes of W723 billion in 2008 to net income taxes of W242 billion in 2009.

Net interest income increased by 80.0% due primarily to a net inter-segment transfer of interest income to the other banking segment from other business segments.

Non-interest income decreased by 11.1% due primarily to a decrease in fees earned from the sale of foreign currency-related derivative products due to the relatively stability of the foreign exchange rates following the initial shock of the global financial crisis.

Provision for loan losses decreased by 45.7% due primarily to a decrease in discounted bills and bills bought.

Non-interest expense including depreciation and amortization decreased by 31.1% due primarily to a reduction in the volume of foreign currency-related derivative transactions due to reduced volatility of foreign exchange rates in 2009.

Comparison of 2008 to 2007

The overall segment results for other banking decreased significantly from net income of \(\pi\)1,345 billion in 2007 to net loss of \(\pi\)723 billion in 2008.

167

Table of Contents

We recorded net interest expense in 2008 compared to net interest income in 2007 due primarily to an aggressive marketing campaign by our merchant banking subsidiary to sell high interest-bearing deposit products to its corporate customers, which more than offset the increase in interest income from increased lending by large corporate borrowers.

Non-interest income increased by 57.0% due primarily to an increase in gains from foreign currency derivative transactions by our merchant banking subsidiary, which largely resulted from the increased volume of such transactions due to the wide fluctuations in the exchange rates between Korean Won and the U.S. dollar.

Non-interest expense including depreciation and amortization increased significantly due primarily to an increase in losses from foreign currency derivative transactions by our merchant banking subsidiary, which largely resulted from the increased volume of such transactions due to the wide fluctuations in the exchange rates between Korean Won and the U.S. dollar.

Credit Card Services

The credit card services segment consists of the credit card business of Shinhan Card, including its installment finance and automobile leasing businesses.

Notes:

- (1) The information of Shinhan Card for 2007 includes that of LG Card (renamed as Shinhan Card on October 1, 2007) for the period from March 1, 2007 through December 31, 2007 (including that for the assets and liabilities of former Shinhan Card assumed by LG Card on October 1, 2007) and that of former Shinhan Card for the period from January 1, 2007 through September 30, 2007, presented on an aggregated basis.
- (2) Net income per segment before income taxes.

Comparison of 2009 to 2008

The overall segment results for the credit card business decreased by 16.8% from \$41,324 billion in 2008 to \$41,101 billion in 2009.

Net interest income decreased by 3.5% due primarily to a decrease in interest income from credit card services which resulted from a decrease in the transaction volume largely as a result of dampened consumer spending in the face of the recent global financial crisis and heightened concerns about an impending economic downturn, which was partially offset by a decrease in funding costs due to a decrease in the average balance of borrowings.

Non-interest income decreased significantly by 55.7% due primarily to a decrease in gains from interest rate swap-related derivative transactions as a result of the decrease in market interest rates in 2009.

Provision for loan losses increased by 144.2% due primarily to a significant increase in the average balance of loans as well as increased credit risks.

168

Table of Contents

Non-interest expense including depreciation and amortization decreased by 13.3% due primarily to a decrease in severance benefits paid following the substantial completion of a voluntary early retirement program undertaken in 2008 and foreign currency translation gains in 2009 compared to foreign currency translation losses in 2008 as a result of the appreciation of the Korean Won against the U.S. dollar in the second half of 2009.

Comparison of 2008 to 2007

The overall segment results for the credit card business increased by 22.4% from \$1,082 billion in 2007 to \$1,324 billion in 2008.

Net interest income increased by 5.5% due primarily to an increase in interest income from credit card services as a result of an increase in the credit card balances, which more than offset an increase in funding costs due to the general rise in market borrowing rates.

Non-interest income increased significantly due primarily to an increase in gains from foreign currency derivative transactions related to the wide fluctuations in exchange rates between Korean Won and the U.S. dollar in the second half of 2008.

Provision for loan losses decreased by 85.7% due primarily to a significant increase of provision for loan losses made in 2007 as a result of reserve for unused credit limits set aside in 2008 pursuant to guidelines set by the Financial Supervisory Service, which reduced the need to make additional provision for credit losses in 2008. Shinhan Card adopted the change in provisioning policy for unused credit limits in 2008, which became effective at the end of 2008.

Non-interest expense including depreciation and amortization increased by 37.4% due primarily to an increase in losses from foreign currency derivative transactions related to the wide fluctuations in exchange rates between Korean Won and the U.S. dollar in the second half of 2008, and to a lesser extent, an increase in severance benefits paid in connection with a voluntary departure program.

Securities Brokerage Services

Securities brokerage services segment primarily reflects securities brokerage and dealing services on behalf of customers, which is conducted by Shinhan Investment, our principal securities brokerage subsidiary.

N/M = not meaningful

Note:

(1) Net income per segment before income taxes.

Comparison of 2009 to 2008

The overall segment results for securities brokerage services decreased by 72.7% from \$209 billion in 2008 to \$57 billion in 2009.

169

Table of Contents

Net interest income decreased by 20.1% due primarily to a decrease in interest income from loans and interest expense paid on deposits due to the general decrease in market interest rates in 2009, which was partially offset by a decrease in interest expenses on borrowings, including repurchase transactions and call moneys.

Non-interest income decreased by 13.6% due primarily to a decrease in income from derivative products which resulted from decreased volatility in stock markets.

Provision for loan losses increased by 365.5% due primarily to deterioration of asset quality of loans and receivables related to real estate project financing.

Non-interest expense including depreciation and amortization decreased by 13.5% due primarily to a decrease in income related to derivatives products which resulted from decreased volatility in stock markets.

Comparison of 2008 to 2007

The overall segment results for securities brokerage services decreased by 17.1% from \$252 billion in 2007 to \$209 billion in 2008.

Net interest income increased by 34.3% due primarily to an increase in interest income from government bonds which were purchased in large quantity in 2008 to take advantage of arbitrage opportunities vis-à-vis repurchase contracts used for the funding of cash management accounts.

Non-interest income decreased by 15.0% due primarily to a decrease in fees and commission earned from brokerage transactions as a result of the downturn in the Korean stock market in the second half of 2008.

Non-interest expense including depreciation and amortization decreased by 12.1% due primarily to a decrease in payment made upon the exercise of put options sold to customers as a result of the decrease in the amount of put options that are in the money due to the downturn in the Korean stock market in the second half of 2008.

Life Insurance Services

Life insurance services segment consists of life insurance services provided by Shinhan Life Insurance.

N/M = not meaningful

Note:

(1) Net income per segment before income taxes.

Comparison of 2009 to 2008

The overall segment results for life insurance services increased by 20.4% from \$4186 billion in 2008 to \$4224 billion in 2009.

170

Table of Contents

Net interest income increased by 17.4% due primarily to an increase in the volume of interest earned on debt securities purchased as part of the asset management policy of Shinhan Life Insurance in relation to the increased sales of insurance contracts, which more than offset a decrease in the average interest rate on loans.

Non-interest income increased by 19.7% due primarily to an increase in insurance premium and income from special accounts, which was largely due to an increased sale of new general insurance contracts.

Non-interest expense including depreciation and amortization increased by 19.2% due primarily to an increase in policy reserves and other expenses related to the increased sales of new insurance contracts.

Comparison of 2008 to 2007

The overall segment results for life insurance services increased by 1.1% from \text{\psi}184 billion in 2007 to \text{\psi}186 billion in 2008.

Net interest income increased by 21.8% due primarily to an increase in interest earned on long-term debt securities which comprised a greater proportion of the asset portfolio for this segment in 2008.

Non-interest income increased by 4.3% due primarily to an increase in insurance premium, which was largely due to an increase in the number and volume of insurance contracts with customers.

Non-interest expense including depreciation and amortization increased by 6.3% due primarily to an increase in insurance premium repaid due to an increase in early termination.

Other

Other segment primarily reflects all other activities of Shinhan Financial Group, as the holding company, and our other subsidiaries, including the results of operations of Jeju Bank, Shinhan Capital, Cardif Life Insurance Company, Shinhan Credit Information, Shinhan BNP Paribas Asset Management, Shinhan Macquarie Financial Advisory, Shinhan Private Equity and back-office functions maintained at the holding company.

Note:

(1) Net income (or loss) per segment before income taxes.

Comparison of 2009 to 2008

The other segment results significantly increased from net loss of \(\pi\)3 billion in 2008 to net loss of \(\pi\)91 billion in 2009.

Net interest loss increased by 83.3% due primarily to a decrease in Shinhan Capital s interest income, which resulted from a decrease in the lending rates in general.

171

Table of Contents

Non-interest income decreased by 31.5% due primarily to a decrease in foreign currency translation gains related to Shinhan Capital s foreign-currency denominated assets, mainly as a result of appreciation of the Korean Won against the U.S. dollar.

Provision for loan losses increased by 111.5% due primarily to increased provisioning for leases made by Shinhan Capital to shipping companies, which suffered particular hardship from the recent economic downturn.

Non-interest expense including depreciation and amortization decreased by 32.0% due primarily to a decrease in Shinhan Capital s foreign currency-denominated liabilities and a decrease in its foreign currency translation losses, which resulted from the appreciation of the Korean Won against the U.S. dollar.

Comparison of 2008 to 2007

The other segment results decreased by 97.4% from net loss of \times115 billion in 2007 to \times3 billion in 2008.

Net interest loss increased by 108.7% due primarily to an increase in interest expense related to the additional Won-denominated corporate debentures issued by Shinhan Financial Group.

Non-interest income increased significantly due primarily to an increase in the transaction gains from foreign currency trading by Shinhan Capital.

Non-interest expense including depreciation and amortization increased by 88.1% due primarily to an increase in the transaction losses from foreign currency trading by Shinhan Capital.

Total assets	₩	221,622	₩	260,973	₩	254,910	17.8%	(2.3)%

2009 Compared to 2008

Our assets decreased by 2.3% from \(\pi\)260,973 billion as of December 31, 2008 to \(\pi\)254,910 billion as of December 31, 2009, principally due to decreases in derivative assets, corporate loans and available-for-sale securities, which were partially offset by increases in held-to-maturity securities and consumer loans.

Our derivative assets decreased by 61.5%, from \times 11,977 billion as of December 31, 2008 to \times 4,617 billion as of December 31, 2009, largely due to a decrease in the transaction volume of foreign currency-related derivatives.

Our corporate loans decreased by 4.1% from \,\text{\$\psi\$94,695 billion} as of December 31, 2008 to \,\text{\$\psi\$90,809 billion} as of December 31, 2009, primarily due to increased repayment of loans by large corporate borrowers as a result of increased liquidity in the market.

Our available-for-sale securities decreased by 4.8% from \(\pi\)29,016 billion as of December 31, 2008 to \(\pi\)27,612 billion as of December 31, 2009, primarily due to increased sale of financial debentures due to limits on

173

Table of Contents

the holdings of debt securities issued by other banks as a part of our enhanced risk management efforts, which was partially offset by an increase in the market value of stocks held by us due to improved stock market conditions in the second half of 2009.

Our held-to-maturity securities increased by 47.1% from \(\pi \)8,696 billion as of December 31, 2008 to \(\pi \)12,794 billion as of December 31, 2009, primarily due to an increase in investments by us in relatively stable assets such as government bonds as a result of enhanced risk management policy in the face of the recent global financial crisis.

Our consumer loans increased by 3.4% from \(\pi\)75,846 billion as of December 31, 2008 to \(\pi\)78,446 billion as of December 31, 2009, primarily due to an increase in the average balance of mortgage and home equity loans, which more than offset a decrease in unsecured consumer loans.

2008 Compared to 2007

Our assets increased by 17.8% from \(\forall 221,622\) billion as of December 31, 2007 to \(\forall 260,973\) billion as of December 31, 2008 principally due to an increase in the amount of loans and derivative assets. The amount of loans increased by 11.7%, on a net basis, from \(\forall 149,723\) billion as of December 31, 2007 to \(\forall 167,308\) billion as of December 31, 2008, principally due to an increase in corporate loans. Our corporate loans increased by 32.2% from \(\forall 71,651\) billion as of December 31, 2007 to \(\forall 94,695\) billion as of December 31, 2008, mainly due to an increase in lending to large corporations. Loans to large corporations increased largely as a result of increased demand from large corporations for bank loans due to the relative scarcity of alternative financing arising from the global liquidity crisis in the second half of 2008. Derivative assets increased significantly from \(\forall 1,962\) billion as of December 31, 2007 to \(\forall 11,977\) billion as of December 31, 2008, largely due to an increase in foreign currency related derivatives for hedging against the wide fluctuations in foreign exchange rates in 2008, particularly the Won against the U.S. dollar.

Liabilities and Equity

The following table sets forth, as of the dates indicated, the principal components of our liabilities.

		A	s of D	ecember 3	31,		% Change

 $N/M = not \ meaningful$

174

Table of Contents

2009 Compared to 2008

Our total liabilities decreased by 3.6% from \u243,009 billion as of December 31, 2008 to \u234,361 billion as of December 31, 2009, primarily due to a decrease in short-term borrowings and trading liabilities, which was partially offset by an increase in interest-bearing liabilities.

The decrease in short-term borrowings was primarily due to a greater groupwide emphasis on long term borrowings as opposed to short-term borrowings as part of an enhanced risk management policy to increase the proportion of customer deposits relative to short-term borrowings as our preferred source of funding, as customer deposits tend to be more stable source of funding as customers typically rollover their deposits upon maturity.

The decrease in trading liabilities was largely due to a decrease in the transaction volume of foreign currency related derivatives.

The increase in interest-bearing liabilities was primarily due to an increase in customer deposits which reflected an increase in preference for relatively safe investment products among customers in light of the increase volatility in the stock markets as a result of the recent global financial crisis and our active policy to increase the proportion of customer deposits as our preferred source of funding.

Our stockholders equity increased by 14.5% from W17,652 billion as of December 31, 2008 to W20,218 billion as of December 31, 2009, largely due to an increase in our equity and capital surplus as a result of the rights offering as well as retained earnings from net income in 2009.

2008 Compared to 2007

Our total liabilities increased by 18.8% from \textbf{\psi}204,500 billion as of December 31, 2007 to \textbf{\psi}243,009 billion as of December 31, 2008, primarily due to an increase in deposits at Shinhan Bank largely as a result of an aggressive campaign to find funding for the increased volume of loans made by Shinhan Bank.

The increase in deposits was largely due to an increase in high-interest savings and other time deposits, which were marketed heavily to attract deposit in light of the global liquidity crisis in the second half of 2008.

To a lesser extent, our total liabilities increased also as a result of liabilities related to the foreign currency-related derivative products, largely due to the increased use of such derivatives for hedging against the wide fluctuations in foreign exchange rates in 2008, particularly the Won against the U.S. dollar.

Our stockholders equity increased by 4.4% from W16,910 billion as of December 31, 2007 to W17,652 billion as of December 31, 2008, largely due to the increase in retained earnings, which was partially offset by accumulated other comprehensive income related to the valuation losses of available-for-sale securities.

ITEM 5.B. Liquidity and Capital Resources

We are exposed to liquidity risk arising from the funding of our lending, trading and investment activities and in the management of trading positions. The goal of liquidity management is for us to be able, even under adverse conditions, to meet all of our liability repayments on time and fund all investment opportunities. For an explanation of how we manage our liquidity risk, see Item 4.B. Business Overview Risk Management Market Risk Management Market Risk Management In our opinion, the working capital is sufficient for our present requirements.

Table of Contents

The following table sets forth our capital resources as of December 31, 2009.

As of December 31, 2009	9
(In billions of Won)	

Deposits	₩	143,699
Long-term debt		44,795
Call money		2,398
Borrowings from the Bank of Korea		1,434
Other short-term borrowings		5,883
Asset securitizations		7,944
Stockholders equity(1)		2,590
Total	₩	208,743

Note:

(1) Includes redeemable preferred stock and redeemable convertible preferred stock. See Note 21 in the notes to our consolidated financial statements included in this annual report.

We obtain funding from a variety of sources, both domestic and foreign. Our principal source of funding is customer deposits obtained from our banking operations, and we from time to time issue equity and debt securities, including preferred shares to fund large-scale acquisitions such as Chohung Bank and LG Card and a recent rights offering in anticipation of greater liquidity and capital requirements during the recent global financial crisis. In addition, our subsidiaries acquire funding through call money, borrowings from the Bank of Korea, other short-term borrowings, corporate debentures, other long-term debt and asset-backed securitizations.

Our primary funding strategy has been to achieve low-cost funding by increasing the average balances of low-cost retail customer deposits. Customer deposits accounted for 59.1% of our total funding as of December 31, 2007, 59.6% of our total funding as of December 31, 2008 and 68.8% of our total funding as of December 31, 2009. In the past, largely due to the lack of alternative investment opportunities for individuals and households in Korea, especially in light of a low interest rate environment and volatile stock market conditions, a substantial portion of such customer deposits were rolled over upon maturity and accordingly provided a stable source of funding for our banking subsidiaries. However, during times of bullish stock markets, for instance in 2007, customers transferred an increasing portion of bank deposits to alternative investment vehicles, including money market funds and other brokerage accounts maintained at securities companies. Largely as a result of their recent experience with the recent global financial crisis, customers, to a substantial degree, have come to place a priority in maintaining the bulk of their liquid assets in bank deposits and have not demonstrated a large-scale exodus in search of alternative investment opportunities notwithstanding intermittent bullishness in stock markets, and such customer preference has enabled us to continue to rely on low-cost and stable customer deposits as the primary source of our funding.

While our banking subsidiaries currently are not facing liquidity difficulties in any material respect, if we or our banking subsidiaries are unable to obtain the funding we need on terms commercially acceptable to us for an extended period of time for reasons of Won devaluation or otherwise, we may not be able to ensure our financial viability, meet regulatory requirements, implement our strategies or compete effectively. See Item 3.D. Risk Factors Risks Related to Our Overall Business Changes in interest rates, foreign exchange rates, bond and equity prices, and other market

factors have affected and will continue to affect our business.

As of December 31, 2007, 2008 and 2009, \(\pi_5,167\) billion, \(\pi_5,100\) billion and \(\pi_5,706\) billion, or 5.20%, 4.54% and 4.38%, respectively, of Shinhan Bank s total deposits in Korean Won were deposits made by litigants in connection with legal proceedings in Korean courts. Court deposits carry interest rates, which are generally lower than market rates.

In addition, we obtain funding through borrowings and the issuances of debt and equity securities, primarily through Shinhan Bank. Our borrowings consist mainly of borrowings from financial institutions, the Korean government and Korean government-affiliated funds. Call money, which is available in both Won and foreign currencies, is obtained from the domestic call loan market, a short-term loan market for loans with maturities of less

176

Table of Contents

than one month. As for our long-term debt, it is principally in the form of corporate debt securities issued by Shinhan Bank. Since 1999, Shinhan Bank has actively issued and continues to issue long-term debt securities with maturities of over one year in the Korean fixed-income market. Shinhan Bank and we have maintained one of the highest credit ratings in the domestic fixed-income market since their inception in 1999 and 2001, respectively. As Shinhan Bank maintains one of the highest debt ratings in the fixed-income market in Korea, we believe that Shinhan Bank will be able to obtain replacement funding through the issuance of long-term debt securities. Shinhan Bank s interest rates on long-term debt securities are in general 20 to 30 basis points higher than the interest rates offered on their deposits. However, since long-term debt is not subject to premiums paid for deposit insurance and the Bank of Korea reserves, we estimate that our funding costs on long-term debt securities are generally on par with our funding costs on deposits. In addition, we and Shinhan Bank may also issue long-term debt securities denominated in foreign currency in the overseas market. As of December 31, 2007, 2008 and 2009, our long-term debt amounted to \text{\text{\$\text{\$W}46,496\$ billion,}}

Furthermore, we have also issued preferred shares, such as redeemable preferred shares and redeemable convertible preferred shares, as part of funding for major acquisitions, such as those for Chohung Bank and LG Card. See

Item 10.B. Memorandum and Articles of Incorporation Description of Preferred Stock Redeemable Preferred Stock (Series 10) and Description of Capital Stock Redeemable Convertible Preferred Stock (Series 11).

We also have funding requirements for our credit card activities. We obtain funding for our credit card activities from a variety of sources, primarily in Korea. The principal sources of funding for Shinhan Card are debentures, asset-backed securitization, commercial papers (including call money), borrowings from the holding company and third-parties, which amounted, on a managed basis under Korean GAAP, to \(\forall 8,492\) billion, \(\forall 1,904\) billion, \(\forall 570\) billion, \(\forall 570\) billion, \(\forall 500\) billion, or 71.9%, 16.1%, 4.8%, 6.8% and 0.4%, respectively, of the funding for our credit card activities, as of December 31, 2009. Unlike other credit card companies, Shinhan Card has the benefit of obtaining funding at favorable rates through loans from Shinhan Financial Group, which currently maintains a credit rating of AAA, the highest credit rating assigned by local rating agencies. Shinhan Card aims to further diversify its funding sources and more actively tap the domestic and international capital markets to ensure access to liquidity as needed.

Credit ratings affect the cost and other terms upon which we and our subsidiaries are able to obtain funding. Domestic and international rating agencies regularly evaluate us and our subsidiaries and their ratings of our and our subsidiaries long-term debt are based on a number of factors, including our financial strength as well as conditions affecting the financial services industry generally. In light of the risk that the global economy and financial markets may experience another onset of difficulties, there can be no assurance that the rating agencies will maintain the current ratings or outlooks for us or our subsidiaries. Our failure to maintain current credit ratings and outlooks could increase the cost of our funding, limit our access to capital markets and other borrowings, and require us to post additional collateral in financial transactions, any of which could adversely affect our liquidity, net interest margins and profitability.

As of June 11, 2010, the credit ratings by S&P, Moody s and Fitch assigned to Shinhan Bank and Shinhan Card were as follows:

	As of	f June 11, 2010)
	S&P	Moody s	Fitch
Shinhan Bank	A-	A1	A
Shinhan Card	BBB+		A-

Our holding company has not received ratings by any of these credit rating agencies since it has not engaged in debt financing from overseas sources to date.

Secondary funding sources also include call money, borrowings from The Bank of Korea and other short-term borrowings which amounted to \text{\text{\$\text{W}\$15,801 billion, \$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$W}\$}}}\$3,225 billion and \text{\text{\$

We may also from time to time obtain funding through issuance of equity securities.

177

Table of Contents

On February 2, 2009, our board of directors decided to issue 78,000,000 new common shares, or approximately 19.7% of our then outstanding common shares, to our existing shareholders in order to, among others, enhance our capital position to prepare for potential contingencies that might result from the prevailing economic environment, notwithstanding that we and our subsidiaries had fully satisfied (as also is the case now) the capital adequacy ratios required under applicable laws and regulations and were not (as also is the case now) facing any significant liquidity constraints or financial distress. The subscription price per share was determined as \mathbb{\pi}16,800 based on a pricing formula prescribed by the rules of the Financial Services Commission. On March 19, 2009, the offering was completed with substantially all of the rights shares subscribed by our existing shareholders, and following settlement on March 24, 2009, the newly issued shares were listed on the Korea Exchange on March 30, 2009. The aggregate proceeds from the rights offering was approximately \mathbb{\mathbb{W}1,310,400,000,000} (prior to adjustments for underwriting commissions and other offering expenses). The rights offering resulted in a capital increase of approximately 16.4%. The proceeds from the rights offering was used to support our existing business operations and other general corporate purposes.

In limited situations, we may also issue redeemable preferred shares and redeemable convertible preferred shares which are convertible into our common shares. For example, in August 2003, in order to partly fund our acquisition of Chohung Bank, we issued to Korea Deposit Insurance Corporation (i) 46,583,961 redeemable preferred shares for \text{\text{\text{W}}843 billion} and (ii) 44,720,603 redeemable convertible preferred shares for \text{\text{\text{W}}809} billion, and issued to other domestic financial institutions 6,000,000 redeemable preferred shares for \text{\text{\text{W}}900 billion}. In addition, in January 2007, partly to fund the acquisition of LG Card, we raised \text{\text{\text{W}}3,750 billion through private placements of 28,990,000 redeemable preferred shares and 14,721,000 redeemable convertible preferred shares to institutional investors and governmental entities in Korea. For further details on the terms of these preferred shares, including scheduled redemption dates, dividend rates and conversion ratios, see Item 10.B. Memorandum and Articles of Incorporation Description of Preferred Stock Redeemable Preferred Stock (Series 10).

These preferred shares have a term of 20 years and may be redeemed at our option from the fifth anniversary of the date of issuance to the maturity date. The redeemable convertible preferred shares may be converted into our common shares at a conversion ratio of one-to-one from the first anniversary of the issue date to the fifth anniversary of the issue date. The dividend ratio on the redeemable preferred shares is 7% for the first five years and increases according to a preset formula. The dividend ratio on the redeemable convertible preferred shares is 3.25% for the first five years and increases according to a preset formula. These preferred shares have terms that are different from the preferred shares issued previously. See Item 10.B. Memorandum and Articles of Incorporation Description of Preferred Stock Redeemable Preferred Stock (Series 10) and Redeemable Convertible Preferred Stock (Series 11). Pursuant to laws and regulations in Korea, we may redeem our preferred stock to the extent of our retained earnings of the previous fiscal year, net of certain reserves as determined under Korean GAAP. At this time, we expect that cash from our future operations should be adequate to provide us with sufficient capital resources to enable us to redeem our preferred stock on or prior to their scheduled maturities. In the event there is a short-term shortage of liquidity to make the required cash payments for redemption as a result of, among other things, failure to receive dividend payments from our operating subsidiaries on time or as a result of significant expenditures resulting from future acquisitions, we plan to raise cash liquidity through the issuance of long-term debt in the Korean fixed-income market in advance of the scheduled maturity on our preferred stock. To the extent we need to obtain additional liquidity, we plan to do so through the issuance of long-term debt and the use of our other secondary funding sources.

Our policy is to encourage our subsidiaries to secure their own funding and liquidity sources. With respect to Shinhan Capital and Shinhan Card, we have, in certain cases, provided funding through our holding company to take advantage of our lower cost of funding within regulatory limitations. For example, in 2008 and 2009, we provided funding in the amount of \times 850 billion and \times 800 billion, respectively, to Shinhan Card and \times 350 billion and \times 600 billion, respectively, to Shinhan Capital, in each case, in the form of capital contribution through our holding company. However, under the Monopoly Regulation and Fair Trade Act of Korea, a financial holding company is

prohibited from borrowing funds in excess of 200% of its total stockholders equity. In addition, pursuant to our liquidity risk management policies designed to ensure compliance with required capital adequacy and liquidity ratios, we have set limits to the amount of liquidity support by our holding company to our subsidiaries

178

Table of Contents

to 70% of our total stockholders equity and the amount of liquidity support to a single subsidiary to 35% of our total stockholders equity.

We generally may not acquire our own shares except in certain limited circumstances including, without limitation, a reduction in capital. However, pursuant to the Financial Investment Services and Capital Markets Act and regulations under the Financial Holding Companies Act, we may purchase our own shares on the KRX KOSPI Market of the Korea Exchange or through a tender offer, or retrieve our own shares from a trust company upon termination of a trust agreement subject to the restrictions that (1) the aggregate purchase price of such shares may not exceed the total amount available for distribution of dividends at the end of the preceding fiscal year less the amounts of dividends and reserves for such fiscal year, subtracted by the sum of (a) the purchase price of treasury stock acquired if any treasury stock has been purchased after the end of the preceding fiscal year pursuant to the Commercial Act or the Financial Investment Services and Capital Markets Act, (b) the amount subject to a trust contract, and (c) the amount of dividends approved at the ordinary general shareholders meeting after the end of the preceding fiscal year and the amount of retained earnings reserve required under the Commercial Act; plus if any treasury stock has been disposed of after the end of the preceding fiscal year, the acquisition cost of such treasury stock, and (2) the purchase of such shares shall meet the requisite ratio under the Financial Holding Companies Act and regulations thereunder. We may purchase our own shares for the purpose of cancellation with profits through the KRX KOSPI Market of the Korea Exchange, or through a tender offer acquire interests in our own shares through agreements with trust companies, subject to the same restrictions on the purchase price as described in this paragraph. In addition, pursuant to the Financial Investment Services and Capital Markets Act, in certain limited circumstances, dissenting holders of shares have the right to require us to purchase their shares.

Contractual Obligations, Commitments and Guarantees

In the ordinary course of our business, we have certain contractual cash obligations and commitments which extend for several years. As we are able to obtain liquidity and funding through various sources as described in Liquidity and Capital Resources above, we do not believe that these contractual cash obligations and commitments will have a material effect on our liquidity or capital resources.

As of December 31, 2009

Contractual Cash Obligations

The following table sets forth our contractual cash obligations as of December 31, 2009.

	Payments Due by Period											
		s Than Year	1-3	3 Years	More Than 3-5 Years 5 Years n billions of Won)				Total			
Long-term debt(1)(2) Secured borrowings(1)(3) Provisions for accrued severance	₩	13,336 4,851	₩	18,373 2,284	₩	7,007 62	₩	8,315 1,076	₩	47,031 8,273		
indemnities(4)(6) Deposits(1)(5)		2 87,794		3 6,362		11 1,131		95 490		111 95,777		
Total	W	105,983	₩	27,022	₩	8,211	₩	9,976	₩	151,192		

Notes:

- (1) Includes estimated future interest payments. The future interest payment have been estimated using the weighted average interest rates paid for 2009 for each category and their scheduled contractual maturities.
- (2) Long-term debt includes senior debt, subordinated debt and Redeemable Preferred Stock, as contained in Note 15 to our consolidated financial statements.
- (3) See Note 14 to our consolidated financial statements included in this annual report.
- (4) This amount represents the amount of severance payment we are obligated to pay to the employees who are scheduled to retire during the indicated periods, as determined based on the employees current salary rates and the number of service years that will be accumulated upon their retirement date. In accordance with our policy

179

Table of Contents

and the Korean Labor Standard Law, employees with one year or more of service are entitled, upon termination of employment, to receive a lump sum severance payment based upon the length of their service and the average of the last three months wages.

- (5) Deposits include certificate of deposits, other time deposits and mutual installment deposits, as contained in Note 12 to our consolidated financial statements.
- (6) This amount represents provisions for accrued severance indemnities for a period of 10 years or less.

The above table does not include uncertain tax benefits of \w 53 billion associated with ASC 740-10 (formerly FIN 48) and tax-related interest and penalties of \w 11 billion.

Commitments and Guarantees

In the normal course of business, our subsidiaries make various commitments and guarantees to meet the financing needs of our customers. Commitments and guarantees are usually in the form of, among others, commitments to extend credit, commercial letters of credit, standby letter of credit and performance guarantees. The contractual amount of these financial instruments represents the maximum possible loss amount if the counter-party draws down the commitment or we should fulfill our obligation under the guarantee and the counter party fails to perform under the contract. See Item 4.B. Business Overview Description of Assets and Liabilities Credit-Related Commitments and Guarantees.

The following table sets forth our commitments and guarantees as of December 31, 2009. These commitments, apart from certain guarantees and acceptances, are not included within our consolidated balance sheet.

	As of December 31, 2009 Commitment Expiration by Period												
	Le	ss Than			Mor	e Than							
	1	Year	1-5	Years	5	Years	,	Total					
	(In billions of Won)												
Commitments to extend credit(1):													
Corporate	₩	44,474	₩	3,808	₩	1,308	₩	49,590					
Credit card lines(2)		3,413		61,491				64,904					
Consumer(3)		8,575		219		1		8,795					
Commercial letters of credit(4)		3,126		193				3,319					
Financial standby letters of credit(5)		431		44				475					
Other financial guarantees(6)		880		15		22		917					
Performance letters of credit and guarantees(7)		6,434		3,855		42		10,331					
Liquidity facilities to SPEs(8)		260		1,203		206		1,669					
Acceptances(9)		2,750		30				2,780					
Guarantee on trust accounts(10)		437		3,043		16		3,496					
Total	₩	70,780	₩	73,901	W	1,595	₩	146,276					

Notes:

- (1) Commitments to extend credit represent unfunded portions of authorizations to extend credit in the form of loans. The commitments expire on fixed dates and a customer is required to comply with predetermined conditions to draw funds under the commitments.
- (2) Credit card commitments relate to unused portion of credit card limits that may be cancelled by us, after notice to the customer, if we determine that the customer s repayment ability is significantly impaired. Prior to April 2008, we were able to change credit card limits of all customers whose accounts are inactive for more than 12 months without their approval. However, following a change in the Korea Fair Trade Commission s policy related to credit card limits effective April 2008, we now require the customer s agreement before changing the credit card limits for customers whose repayment ability is not significantly impaired.
- (3) Excludes credit cards.

180

Table of Contents

- (4) Commercial letters of credit are undertakings on behalf of customers authorizing third parties to draw drafts on us up to a stipulated amount under specific terms and conditions. These are generally short-term and collateralized by the underlying shipments of goods to which they relate. Commitments to extend credit, including credit lines, are in general subject to provisions that allow us to withdraw such commitments in the event there are material adverse changes affecting an obligor.
- (5) Financial standby letters of credit are irrevocable obligations to pay third party beneficiaries when our customers fail to repay loans or debt instruments, which are generally in foreign currencies. A substantial portion of these standby letters of credit are secured by underlying assets, including trade-related documents.
- (6) Other financial guarantees are used in various transactions to enhance the credit standing of our customers. They provide irrevocable assurance, subject to satisfaction of certain conditions, that we will make payment in the event that our customers fail to fulfill their obligations to third parties. These financial obligations include a return of security deposits and the payment of service fees.
- (7) Performance letters of credit and guarantees are issued to guarantee customers—tender bids on construction or similar projects or to guarantee completion of such projects in accordance with contractual terms. They are also issued to support a customer—s obligation to supply products, commodities, maintenance or other services to third parties
- (8) Liquidity facilities to SPEs represent irrevocable commitments to provide contingent credit lines including commercial paper purchase agreements to special purpose entities for which we serve as the administrator.
- (9) Acceptances represent guarantees by us to pay a bill of exchange drawn on a customer. We expect most acceptances to be presented, but reimbursement by the customer is normally immediate.
- (10) Guarantees on trust accounts represent guarantee of principal issued to trust fund investors.

Our holding company entered into certain guarantee contracts that meet the characteristics of a derivative under SFAS No. 133. Such derivatives effectively guarantee the return on the counterparty s referenced portfolio of assets.

Details of our credit commitments and obligations under guarantees are provided in Note 31 in the notes to our consolidated financial statements included in this annual report.

Selected Financial Information under Korean GAAP

The selected consolidated financial and other data shown below have been derived from our consolidated financial statements, prepared in accordance with Korean GAAP not presented herein.

Under Korean GAAP, consolidated financial statements include the accounts of fully or majority owned subsidiaries and substantially controlled affiliates that have assets in the amount equal to or more than \text{\text{\$\text{\$W}\$}}10 billion as of the end of the previous fiscal year. Substantial control is deemed to exist when the investor is the largest shareholder and owns more than 30% of the investee s voting shares. Korean GAAP does not require the consolidation of subsidiaries, or substantially controlled affiliates, where activities are dissimilar from ours.

Under Korean GAAP effective since 1994, financial statements of our trust accounts, on which we guarantee a fixed rate of return and/or the repayment of principal, are consolidated, whereby assets and liabilities of third parties held by such trusts are reflected as assets and liabilities, and revenues and expenses generated from such third party assets are

reflected in the statement of operations. Activities between trust accounts and us are eliminated.

Beginning January 1, 1999, the Korean GAAP financial statements are prepared in accordance with financial accounting standards generally accepted for banking institutions issued by the Korean Securities and Futures Commission.

Capital adequacy ratios have been calculated from the financial statements prepared in accordance with Korean GAAP and using the guidelines issued by the Financial Services Commission.

181

Table of Contents

We have included narrative disclosure in the footnotes to the Korean GAAP financial statements more clearly identify where significant accounting policy changes have taken place, which line items would be affected and how the balances would be affected. The areas where such significant changes have occurred are as follows:

Allowance for loan losses;

Allowance for unused loan commitments;

Allowance for guarantees and acceptances; and

Deferred taxation.

N/A = Not available

Notes:

(1) We were restructured as a financial holding company on September 1, 2001, and until 2006, under the guidelines issued by the Financial Services Commission applicable to financial holding companies, were required to maintain minimum capital as measured by the requisite capital ratio. For 2005 and 2006, the minimum requisite capital ratio applicable to us as a holding company was 100%. Starting 2007, under the revised guidelines, the minimum requisite capital ratio applicable to us changed to the BIS ratio of 8%. Requisite capital ratio is computed as the ratio of net aggregate amount of our equity capital to aggregate amounts of requisite capital. This computation is based on our consolidated financial statement in accordance

184

Table of Contents

with Korean GAAP. See Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Capital Adequacy.

- (2) For 2005, represents information of former Shinhan Bank prior to its merger into Chohung Bank in 2006. For 2005, the total capital adequacy ratio, Tier I capital adequacy ratio and Tier II capital adequacy ratio of Chohung Bank was 10.94%, 6.52% and 4.42%, respectively. The information for 2006 and thereafter represents the information of the surviving entity following the merger.
- (3) Adjusted equity capital ratio is the ratio of total adjusted stockholders equity to total adjusted assets and is computed in accordance with the guidelines issued by the Financial Services Commission for credit card companies. Under these regulations, a credit card company is required to maintain a minimum adjusted equity capital ratio of 8%. This computation is based on the non-consolidated financial statements of the credit card company prepared in accordance with Korean GAAP. See Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Capital Adequacy.

The information as of December 31, 2005, includes the information of former Shinhan Card and does not include the information of the credit card division of Chohung Bank. The information as of December 31, 2006, represents the information of former Shinhan Card (including that of the credit card division of Chohung Bank, which was split-merged into former Shinhan Card on April 3, 2006). The information as of December 31, 2007, represents the information for LG Card, renamed Shinhan Card on October 1, 2007 (including that of the assets and liabilities of former Shinhan Card, which were transferred to LG Card on October 1, 2007). The information as of December 31, 2008, represents the information for Shinhan Card.

For comparison, the adjusted equity capital ratio of LG Card as of December 31, 2005 and 2006 was 25.55% and 34.25%, respectively.

(4) Solvency ratio is the ratio of the solvency margin to the standard amount of solvency margin as defined and computed in accordance with the regulations issued by the Financial Services Commission for life insurance companies. Under these regulations Shinhan Life Insurance is required to maintain a minimum solvency ratio of 100%. See Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Capital Adequacy.

Notes:

- (1) Substandard and below loans (other than loans provided from our trust accounts and confirmed guarantees and acceptances) are defined in accordance with the regulatory guidance in Korea. See Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Banks.
- (2) As defined by the Financial Services Commission.
- (3) Credits include loans provided from our trust accounts (including bills purchased and privately placed debentures) and confirmed guarantees and acceptances, as well as the total loan portfolio of the banking accounts.
- (4) Loans in Korean Won do not include bills bought in Won, advances for customers, credit card accounts, bonds purchased under resale agreements, call loans, private placement corporate bonds and loans in restructurings that have been swapped for equity in the restructured borrower.

Recently Adopted Accounting Pronouncements and New Accounting Pronouncements (U.S. GAAP)

Please refer to Note 2 in the footnotes to our financial statements.

Reconciliation with Korean Generally Accepted Accounting Principles

Our consolidated financial statements and related footnotes appearing in Item 18. Financial Statements, and other financial data appearing in Items 3, 4 and 5 are prepared in accordance with U.S. GAAP, unless otherwise specifically mentioned. Our consolidated financial statements prepared in accordance with U.S. GAAP, differ in significant respects from Korean GAAP, the basis of the consolidated financial data appearing in Selected Financial Information under Korean GAAP are presented. The following are reconciliations of net income attributable to the Group and stockholders equity from our consolidated financial statements under U.S. GAAP to Korean GAAP.

2009

Total of adjustments	723,634
Tax effect of adjustments	181,193

The following is a summary of the significant adjustments made to consolidated net income attributable to the Group and stockholders equity to reconcile the U.S. GAAP results with those under Korean GAAP. The numbered paragraphs below refer to the corresponding item numbers set forth above.

₩ 21,123,026

1. Under U.S. GAAP, the allowance for loan losses for specifically identified impaired loans is based on (i) the present value of expected future cash flows discounted at the loan s effective interest rate or as a practical expedient, (ii) the loan s observable market price or (iii) the fair value of the collateral if the loan is collateral dependent.

For homogeneous pools of corporate and retail loans, allowances are based on historical losses using a risk rating migration model adjusted for qualitative factors, while a delinquency roll-rate model adjusted for qualitative factors is used for homogeneous pools of credit cards.

Under Korean GAAP, the allowance for loan losses is recorded at the higher of (i) the amount determined using the expected loss method, which estimates the potential exposure at default, or EAD, based on the probability of default, or PD, and loss given default, or LGD, and (ii) the amount determined using the guidelines promulgated by the Financial Services Commission, which estimates the allowance by multiplying a certain percentage as determined by the Financial Services Commission to loan balances in each classification.

The following percentages represent guidelines required by the Financial Services Commission as of December 31, 2009:

	Corporate Loans	Retail Loans	Credit Card Balances
Normal(1)(2)	0.85% or more	1.00% or more	1.50% or more
Precautionary(2)	7.00% or more	10.00% or more	15.00% or more
Substandard	20.00% or more	20.00% or more	20.00% or more
Doubtful	50.00% or more	55.00% or more	60.00% or more
Estimated loss	100.00%	100.00%	100.00%
	187		

Table of Contents

Notes:

- (1) In the case of normal credits comprising loans to borrowers in the construction, wholesale and retail, accommodation and restaurant or real estate and housing industries (as classified under the Korean Industry Classification Standard), the applicable figure is 0.90% or more.
- (2) In the case of credit card assets classified as normal and precautionary, the amount of provisions set aside is based on the revised provisioning rates under the Regulation on Specialized Credit Financial Business Act, which, effective as of February 11, 2008, increased the minimum provisioning requirements from 1.00% to 1.50% in respect of credit card assets classified as normal and from 12.00% to 15.00% in respect of credit card assets classified as precautionary.

This adjustment reflects the differences in the methodologies used to determine the allowance for loan losses under U.S. GAAP and Korean GAAP. It also includes the offsetting effects of (i) the consolidation of our trust accounts, which include loans and related reserves under Korean GAAP and (ii) the deconsolidation of certain securitized loans and related reserves, which it recorded as sales under Korean GAAP.

- 2. We sold a number of non-performing loans to the Korea Asset Management Corporation. For those loans sold to the Korea Asset Management Corporation prior to fiscal year 2001, based on the sales agreement, there was a recourse liability for the obligation to repurchase such loans. The Korea Asset Management Corporation can return certain loans to us when the performance requirements of such loans are not met. We recognize a recourse liability for the obligation to repurchase such loans. The adjustment reflects the differences in classification of loans and methodologies used to determine the loan losses as discussed above.
- 3. Under U.S. GAAP loan origination fees and the related costs are deferred and amortized over the life of the loan as an adjustment to the yield of the loan. Under Korean GAAP, origination costs related to wages and salaries were recognized as expense when paid and did not provide for the deferred costs.
- 4a. Under U.S. GAAP, other-than-temporary-impairment (OTTI) must be recognized if an investor has the intent to sell the debt security or if it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. In addition, the guidance changes the amount of impairment to be recognized in current-period earnings when an investor does not have the intent to sell, or if it is more likely than not that it will not be required to sell the debt security, as in these cases only the amount of the impairment associated with credit losses is recognized in income, while the rest of the fair value loss is recognized in other comprehensive income. But declines in the fair value of available-for-sale (AFS) equity securities below their cost that are deemed to be other-than-temporary are recorded in earnings. When we do not intend to sell AFS equity or debt securities in an unrealized loss position, potential OTTI is considered using a variety of factors, including the length of time and extent to which the market value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes to the rating of the security by a rating agency; the volatility of the fair value changes; and changes in fair value of the security after the balance sheet date. For equity securities, we consider the above factors, as well as our intent and ability to retain our investment for a period of time sufficient to allow for any anticipated recovery in market value, and whether evidence exists to support a realizable value equal to or greater than the carrying value. Under Korean GAAP, declines in the fair value that are deemed to be permanent are recorded in earnings. The determination of whether a decline in the fair value of a security is permanent is generally based on whether investees are in bankruptcy or liquidation. This item reflects the recognition of additional losses, adjustment of the proper cost basis for the disposal gains or losses and reclassification of securities that are not within the scope of ASC 320-10 (formerly SFAS No. 115) into proper categories under U.S. GAAP.

4b. Under U.S. GAAP, for a derivative to qualify for hedge accounting, it must be highly effective at reducing the risk associated with the exposure being hedged. The hedging relationship must be designated and formally documented at inception along with the particular risk management objective and strategy for the hedge, identification of the derivative used as the hedging instrument, the hedged item and the risk exposure being hedged, and the method of assessing hedge effectiveness. As the criteria for documenting the designation of hedging relationships and hedge effectiveness are more rigorous under U.S. GAAP, the majority of the derivatives

188

Table of Contents

accounted for as hedges under Korean GAAP do not qualify for hedge accounting under U.S. GAAP. This item reflects the reversal of the hedge accounting treatment applied under Korean GAAP.

- 4c. Under U.S. GAAP, effects of changes in foreign exchange rates of foreign available-for-sale securities are reflected as a component of other comprehensive income. Under Korean GAAP, effects of such changes in foreign exchange rates are reflected in earnings. This item reflects the adjustment of such effects from earnings to other comprehensive income.
- 4d. Under U.S. GAAP, valuation of derivative assets takes into consideration counterparty credit risk and valuation of the derivative liabilities reflects the impact of the Group's credit quality as required by ASC 820-10 (formerly SFAS No. 157). Under Korean GAAP, there is no specific guidance as such. This item represents the valuation adjustment recognized for counterparty credit risk and the Group's own credit quality.
- 5. Under Korean GAAP, we recognize the compensation costs using intrinsic value remeasured each reporting period. Under U.S. GAAP, we recognize the compensation costs using fair value remeasured each reporting period by option pricing model according to ASC 718 (formerly SFAS No. 123R). The income statement adjustment represents the difference in valuation method of share options.
- 6. Under Korean GAAP, goodwill is amortized over its useful life during which future economic benefits are expected to flow to the enterprise, not exceeding twenty years. Under U.S. GAAP, goodwill is not amortized, but rather it is tested for impairment at least annually. The income statement adjustment reflects goodwill impairment charge recorded under U.S. GAAP, net of the goodwill amortization that was recorded under Korean GAAP. Under Korean GAAP, acquisition of the remaining interest in its consolidated subsidiary is accounted for under the book basis with no goodwill recognized, rather, any excess amount paid results in a reduction of capital surplus. Furthermore, consolidation is required when the investor owns more than 30% of the investee s voting shares and is also the largest shareholder. Under U.S. GAAP, acquisition of the remaining interest in its equity investee is accounted for under the purchase method with the excess cost over the fair value of the net assets acquired recognized as goodwill. The stockholders equity adjustment reflects the additional amount of goodwill recognized under U.S. GAAP. Furthermore, under U.S. GAAP, finite-lived intangible assets which meet certain criteria are recognized in a business combination transaction and amortized over their useful lives. Under Korean GAAP, because the criteria that must be met in order to recognize intangible assets is not clearly specified, in practice, they are included as part of goodwill. We did not recognize any intangible assets in connection with the acquisitions of LG Card, Chohung Bank and Shinhan Investment under Korean GAAP. However, finite-lived and indefinite-lived intangible assets were recognized under U.S. GAAP in connection with the above transactions. The income statement adjustment includes the amortization of the finite-lived intangible assets under U.S. GAAP.
- 7. The operating results of each of our subsidiaries have been affected by the conversion to U.S. GAAP from Korean GAAP. Consequently, the noncontrolling interest holders—share of the difference in the results of the respective subsidiaries—operations under U.S. GAAP and Korean GAAP affect our consolidated stockholders—equity while net income is not affected, as under both Korean GAAP and U.S. GAAP, net income shall be attributed to the parent and the noncontrolling interest.
- 8. Under Korean GAAP, certain fixed assets were revalued upward in 1998. As a result, the revaluation gain is included in stockholders—equity, and depreciation expense related to revalued fixed assets is determined based on the new cost basis. Under U.S. GAAP, upward revaluation of fixed assets is not permitted, and depreciation expense is based on the historical cost basis adjusted for any impairment loss. This adjustment is to reverse the revaluation effects on the fixed assets under Korean GAAP, and to adjust the gain or loss relating to subsequent disposals of those fixed assets under the different cost basis.

9. Under Korean GAAP, the Redeemable Preferred Stocks were recorded in stockholders equity. Under U.S. GAAP, certain redeemable preferred stocks are classified as liabilities on the balance sheet pursuant to ASC 480 (formerly SFAS No. 150). Accordingly, some of redeemable preferred stocks are classified as equity and others are classified as liabilities. In case that redeemable preferred stocks are classified as liabilities, dividends paid to holders of Redeemable Preferred Stocks are recognized as interest expense rather than reduction from the retained earnings.

189

Table of Contents

- 10. Under Korean GAAP, a special purpose company and a company undergoing liquidation are not within the scope of consolidation. Under U.S. GAAP, such companies could be within the scope of consolidation in accordance with either ASC 810 (formerly FIN No. 46(R)) or SFAS No. 94.
- 11. Under Korean GAAP, the value of consideration paid for Chohung Bank, LG Card, Shinhan Investment and Shinhan Life Insurance was measured based on our stock price on the consummation date of the merger, whereas under U.S. GAAP, the value of consideration was measured based on our average closing stock price on the KRX KOSPI Market of the Korea Exchange two days before and after the date the merger was agreed to and announced.
- 12. Under Korean GAAP, additional tax assessments or tax refunds are recorded as expenses when tax assessment or tax refund actually occurs except when contingent liabilities are recorded for tax contingencies. The adoption of ASC 740-10 (formerly FIN No. 48) results in the change of retained earnings and income tax expenses since under FIN No. 48, tax positions are required to be evaluated and tax benefits can be recognized only when the technical merits of uncertain tax positions meet the more-likely-than-not recognition threshold and to be measured as the largest amount of tax benefit that is more than 50% likely of being recognized.
- 13. Under Korean GAAP, when the control over an entity is acquired through a series of transactions, such acquisition is accounted under the lump-sum method. Under U.S. GAAP, for business combinations for which the acquisition date is before January 1, 2009, SFAS No. 141 is applied and such serial acquisition transactions are accounted under the step-acquisition method, and the noncontrolling interest in the entity prior to the acquisition of control is accounted retroactively under the equity method.
- 14. Under Korean GAAP, acquisition costs are those costs that are related to insurance contracts and agent operation. Such costs are amortized on the straight-line basis over the estimated life of the insurance contracts, not to exceed seven years. Under U.S. GAAP, costs directly attributable to new and renewal insurance contracts are deferred and amortized over the estimated life of the underlying insurance contract in proportion to estimated gross margins. This adjustment is to reverse the GAAP difference relating to acquisition cost range and to adjust the amortized deferred acquisition cost charged in the period under the different cost and useful life basis.

ITEM 5.C. Research and Development, Patents and Licenses

Not applicable.

ITEM 5.D. Trend Information

These matters are discussed under Items 4.B, 5.A and 5.B above where relevant.

ITEM 5.E. Off-Balance Sheet Arrangements

We have several types of off-balance sheet arrangements, including guarantees for loans, debentures, trade financing arrangements, guarantees for other financings, credit lines, letters of credit and credit commitments. In the normal course of our banking activities, we make various commitments and guarantees to meet the financing needs of our customers. Commitments and guarantees are usually in the form of, among others, commitments to extend credit, commercial letters of credit, standby letter of credit and performance guarantees. The contractual amount of these financial instruments represents the maximum possible loss amount if the account party draws down the commitment or we should fulfill our obligation under the guarantee and the account party fails to perform under the contract. See Item 4.B. Business Overview Description of Assets and Liabilities Credit-Related Commitments and Guarantees.

Details of our off-balance sheet arrangements are provided in Note 31 in the notes to our consolidated financial statements included in this annual report.

ITEM 5.F. Tabular Disclosure of Contractual Obligations

See Item 5.B. Liquidity and Capital Resources Contractual Obligations, Commitments and Guarantees.

190

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

ITEM 6.A. Directors and Senior Management

Executive Directors

Our executive directors are as follows:

Name	Age	Position	Director Since	Date Term Ends(1)
Eung Chan Ra	71	Chairman; Head of Board Steering Committee	September 1, 2001	March 2013
Sang Hoon Shin	61	President and Chief Executive Officer; member of the Board Steering Committee	March 17, 2009	March 2011

Note:

(1) The date on which each term will end will be the date of the general stockholders meeting in the relevant year.

Eung Chan Ra is the Chairman of Shinhan Financial Group. Prior to being elected to his current position in 2001, he was the Vice-Chairman of Shinhan Bank and also served as President and Chief Executive Officer of Shinhan Bank. Mr. Ra also currently serves as Vice-Chairman of Korea-Japan Economy Association and the chief of committee in the Economy and Science Division of the Advisory Council on Democratic and Peaceful Unification. Mr. Ra was a director of Cheil Investment Finance from 1977 until 1982, when he first joined us as an executive vice president of Shinhan Bank. Mr. Ra graduated from Seonrin Commercial High School.

Sang Hoon Shin is our President and Chief Executive Officer. Prior to being elected to his current position on March 17, 2009, he was formerly the President and CEO of Shinhan Bank. Mr. Shin also served as the Managing Director of Shinhan Financial Group in 2001 and as the Managing Director of Shinhan Bank in 1999. Mr. Shin received a B.A. in business administration from Sungkyunkwan University and a M.B.A. from Yonsei University.

Non-Executive Directors

Non-executive directors are directors who are not our employees and do not hold executive officer positions with us. Outside directors are non-executive directors who also satisfy the requirements set forth under the Financial Investment Services and Capital Markets Act to be independent of our major shareholders, affiliates and the management. Our non-executive directors are selected based on the candidates—talents and skills in diverse areas, such as law, finance, economy, management and accounting. Currently, 10 non-executive directors are in office, all of whom were nominated by our board of directors.

Our non-executive directors are as follows:

Name	Age	Position	Director Since	Date Term Ends(1)
Baek Soon Lee	57	Non-Executive Director	March 17, 2009	March 2012

Edgar Filing: SHINHAN FINANCIAL GROUP CO LTD - Form 20-F

Shee Yul Ryoo	71	Non-Executive Director	March 30, 2005	March 2011
Sung Bin Chun	57	Chairman of the board	March 20, 2007	March 2011
Haeng Nam Chung	69	Outside Director	March 21, 2006	March 2011
Ke Sup Yun	65	Outside Director	March 17, 2009	March 2011
Yo Koo Kim	60	Outside Director	March 17, 2009	March 2011
Byung-Il Kim	64	Outside Director	March 24, 2010	March 2011
Hui Mook Kim	52	Outside Director	March 24, 2010	March 2011
Yoji Hirakawa	57	Outside Director	March 24, 2009	March 2011
Philippe Aguignier	52	Outside Director	March 24, 2010	March 2011

Note:

(1) The date on which each term will end will be the date of the general stockholders meeting in the relevant year.

191

Table of Contents

Baek Soon Lee has been our non-executive director since March 17, 2009. Mr. Lee currently also serves as the President and Chief Executive Director of Shinhan Bank. Prior to his current position, Mr. Lee served as the Deputy President of Shinhan Financial Group and as the Senior Executive Vice President of Shinhan Bank. Mr. Lee is a graduate of Duksu Commercial High School.

Shee Yul Ryoo had been our outside director since March 30, 2005 and was appointed as non-executive director on March 24, 2010. Mr. Ryoo currently serves as an advisor to Shin & Kim, a Korean law firm. Mr. Ryoo previously served as President of Korea First Bank and as chairman of the Korea Federation of Banks. Mr. Ryoo received an LL.B degree from Seoul National University.

Sung Bin Chun has been an outside director since March 20, 2007 and was appointed as the chairman of board of directors on March 24, 2010. Ms. Chun is currently a professor of business administration at Sogang University. Ms. Chun received a B.A. in English literature from Sogang University and a Ph.D. in accounting from University of California at Berkeley. Ms. Chun was formerly the director and vice president of the Korean Accounting Association.

Haeng Nam Chung has been our outside director since March 21, 2006. Mr. Chung served as a director of Asuka Credit Union and as an advisor of the Korean Chamber of Commerce and Industry in Japan.

Ke Sup Yun has been our outside director since March 17, 2009. Mr. Yun is currently a professor of business administration at Seoul National University and also serves as the Chairman of the Seoul Economist Club. Mr. Yun received a Ph. D. from the graduate school of Seoul National University.

Yo Koo Kim has been our outside director since March 17, 2009. Mr. Kim currently serves as the director of Korea Chamber of Commerce and Industry in Aichi Province. Mr. Kim received a B.A. in Industrial and Systems Engineering from Aoyama Gakuin University.

Byung-Il Kim has been our outside director since March 24, 2010. Mr. Kim is currently serves as the head of Korean Studies Advisement Center. Mr. Kim received a MA in Government Affairs from Seoul National University.

Hui Mook Kim has been our outside director since March 24, 2010. Mr. Kim is currently the managing director of Sankei Transportation Co., Ltd. Mr. Kim received a B.A. in Economics from Seikei University.

Yoji Hirakawa has been our outside director since March 24, 2010. Mr. Hirakawa currently serves as the President and CEO of Sun East Place Corporation. Mr. Hirakwa received B.A. in Business Administration from Ritsumeikan University.

Philippe Aguinier has been our outside director since March 24, 2010. Mr. Aguignier was nominated by BNP Paribas and elected to our board of directors pursuant to the alliance agreement dated December 2001 between us and BNP Paribas. See Item 7.B. Related Party Transactions. Mr. Aguignier is currently the Head of BNP Paribas Asia Retail Banking. Mr. Aguignier received a Ph. D in Far Eastern Studies from Universite Paris III (Inalco).

Any director wishing to enter into a transaction with Shinhan Financial Group including the subsidiaries in his or her personal capacity is required to obtain the prior approval of our Board of Directors. The director having an interest in the transaction may not vote at the meeting of our Board of Directors at which the relevant transaction is subject to vote for approval.

192

Executive Officers

In addition to the executive directors who are also our executive officers, we currently have the following executive officers.

Name	Age	Position	In charge of
Buhmsoo Choi	53	Deputy President and Chief Financial Officer	Finance Management Team Investor Relations Team Strategic Planning Team Global Business Strategy Team Shinhan FSB Research Institute
Sung Ho Wi	52	Deputy President	General Affairs Team Business Management Team Public Relations Team CSR & Culture Management Team
Chan Hee Jin	55	Deputy President	Synergy Management Team Information and Technology Planning Team Audit Team

None of the executive officers have any significant activities outside Shinhan Financial Group.

Buhmsoo Choi has been our Deputy President and Chief Financial Officer since May 28, 2007. Mr. Choi previously served as vice president of Korea Credit Bureau. Mr. Choi received a B.A. in economics from Seoul National University and a Ph.D. in economics from Yale University. Mr. Choi also serves as a non-executive director of Shinhan Macquarie Financial Advisors and as an outside director of Shinhan Life Insurance and Shinhan BNPP AM.

Sung Ho Wi has been our Deputy President since August 28, 2008. Mr. Wi currently also serves as a non-executive director of Shinhan PE and as an outside director of Shinhan Bank and Shinhan Investment Mr. Wi received a B.A. in economics from Korea University.

Chan Hee Jin has been appointed as our Deputy President on February 12, 2009. Mr. Jin formerly served as the Executive Vice President in charge of the Treasury & Global Banking Group of Shinhan Bank. Mr. Jin also serves as a non-executive director of Shinhan PE and as an outside director of Shinhan Card. Mr. Jin received a B.A. in Statistics from Korea University.

There are no family relationships among our directors and/or executive officers.

ITEM 6.B. Compensation

The aggregate remuneration paid and benefits-in-kind paid by us to our chairman, our president and chief executive officer, our other executive directors, our non-executive directors and our executive officers for the year ended

December 31, 2009 was \(\precenture{\psi}\)5.1 billion, consisting of \(\precenture{\psi}\)2.3 billion in salaries and wages and \(\precenture{\psi}\)2.8 billion in bonus payments.

We do not have service contracts with any of our directors or officers providing for benefits upon termination of their employment with us.

We have granted stock options to our chairman, our president and chief executive officer and other directors and executive officers as described below in Share Ownership Stock Options. For our options granted prior to March 20, 2007, we are required to pay in cash the difference between the exercise and the market price at the date of exercise. For those options issued on or after March 20, 2007, we may either issue common stock or pay in cash the difference between the exercise and the market price at the date of exercise. These options are subject to a

193

Table of Contents

vesting period of two years from the grant date and require continued employment for a specified period. Upon vesting, options may be exercised during a period of two to seven years from the grant date. In 2009, we recognized W52 billion as compensation expense for the stock options granted under our incentive stock option plan.

Beginning on March 20, 2007, we began granting performance units to certain high-ranking officers of select group companies. Currently, performance-based compensation for these officers takes the form of both performance units and stock options, in roughly equal proportions. Performance units have a vesting period of three years, and the amount of compensation payable under each performance unit is tied to the performance of the relevant group company over the three-year period from the issue date to the vesting date. In 2009, we recognized \(\frac{\psi}{1.7}\) billion as compensation expense in respect of performance units. We have granted additional performance units in April, 2010. In December 2008 and March 2009, in light of growing concerns relating to the global financial crisis, directors and officers of us and our subsidiaries voluntarily returned stock options exercisable into a total of 85,840 shares and 614,735 shares, respectively, which were subsequently rescinded.

ITEM 6.C. Board Practices

Board of Directors

Our board of directors, which currently consists of two executive directors, two non-executive directors and 8 outside directors, has the ultimate responsibility for the management of our affairs.

Our Articles of Incorporation provide for no less than three but no more than 15 directors and the number of executive directors must be less than 50% of the total number of directors. At least half of our directors must be outside directors, and we must maintain at least three outside directors. All directors are elected for a term not exceeding three years as determined by the board of directors, except that outside directors who have been elected as outside experts at a general meeting of shareholders will serve for a term of one year.

Terms are renewable and are subject to the Korean Commercial Code, the Financial Holding Companies Act and related regulations. See Item 6.A. Directors and Senior Management above for information concerning the terms of office of our directors and executive officers.

Our board of directors meets on a regular basis to discuss and resolve material corporate matters. Additional extraordinary meetings may also be convened at the request of the president and chief executive officer or a director designated by the board.

Currently, there are no outstanding service contracts between any of our directors or executive officers and us or any of our subsidiaries providing for benefits upon termination of employment by such director or executive officer.

Committees of the Board of Directors

We currently have six management committees that serve under the board:

the Board Steering Committee;

the Risk Management Committee;

the Audit Committee

the Outside Director Recommendation Committee;

the Compensation Committee; and

the Audit Committee Member Recommendation Committee.

Each committee member is appointed by the board of directors, except for members of the Audit Committee, who are elected at the general meeting of shareholders.

Board Steering Committee

The Board Steering Committee currently consists of five directors, namely Shee Yul Ryoo, Sung Bin Chun, Haeng Nam Chung, Byung-Il Kim, together with the chairman of our group. The committee is responsible for ensuring the efficient operations of the board and the facilitation of the board s functions. The committee s responsibilities also include reviewing and assessing the board s structure and the effectiveness of that structure in fulfilling the board s fiduciary responsibilities. The committee holds regular meetings every quarter.

194

Table of Contents

Risk Management Committee

The Risk Management Committee currently consists of three directors, namely Shee Yul Ryoo, Ke Sup Yun and Philippe Aguignier. The committee oversees and makes determinations on all issues relating to our comprehensive risk management function. In order to ensure our stable financial condition and to maximize our profits, the committee monitors our overall risk exposure and reviews our compliance with risk policies and risk limits. In addition, the committee reviews risk and control strategies and policies, evaluates whether each risk is at an adequate level, establishes or abolishes risk management divisions, reviews risk-based capital allocations, and reviews the plans and evaluation of internal control. The committee holds regular meetings every quarter.

Audit Committee

The Audit Committee currently consists of three outside directors, namely Ke Sup Yun, Sung Bin Chun and Yo Koo Kim. The committee oversees our financial reporting and approves the appointment of and interaction with our independent auditors and our internal audit-related officers. The committee also reviews our financial information, audit examinations, key financial statement issues and the administration of our financial affairs by the board of directors. In connection with the general meetings of stockholders, the committee examines the agenda for, and financial statements and other reports to be submitted by, the board of directors for each general meeting of stockholders. The committee holds regular meetings every quarter.

Outside Director Recommendation Committee

Members of this committee will be appointed by our board of directors if and only to the extent necessary to recommend and nominate candidates for our outside director positions and related matters. The committee meetings are called by the chairman of this committee, who must be an outside director.

Compensation Committee

The Compensation Committee currently consists of three directors, namely Byung-Il Kim, Shee Yul Ryoo and Ke Sup Yun. At least one-half of the members of this committee must be outside directors. This committee is responsible for reviewing and approving the management sevaluation and compensation programs. The committee meetings are called by the chairman of this committee, who must be an outside director.

Audit Committee Member Recommendation Committee

Members of this committee will be appointed by our board of directors if and only to the extent necessary to recommend and nominate candidates for our audit committee member positions and related matters. This committee recommends candidates for the members of the Audit Committee and is required to act on the basis of a two-thirds vote of the members present.

ITEM 6.D. Employees

At the holding company level, we had 85, 97 and 129 regular employees as of December 31, 2007, 2008 and 2009, respectively, almost all of whom are employed within Korea. Our subsidiaries had 16,349, 17,110 and 16,628 regular employees as of December 31, 2007, 2008 and 2009, respectively, almost all of whom are employed within Korea. In addition, we had 3, 1 and 6 non-regular employee at the holding company level as of December 31, 2007, 2008 and 2009, respectively, and 4,696, 3,501 and 3,369 non-regular employees at the subsidiary level as of December 31, 2007, 2008 and 2009, respectively. Of the total number of regular and non-regular employees at both the holding company and subsidiaries, approximately 49.3% were managerial or executive employees.

7,610 employees of Shinhan Bank, 271 employees of Jeju Bank and 2,683 employees of Shinhan Investment were members of Korea Securities Trade Union as of December 31, 2009. 2,683 employees of Shinhan Card were members of the Korean Federation of Clerical and Financial Labor Union as of December 31, 2009.

Since our acquisition of Chohung Bank in 2003, we have not experienced any general employee work stoppages and consider our employee relations to be good.

Under the Korean National Pension Law, we annually contribute an amount equal to 4.5% of employee wages and contribute 4.5% of employees wages which are deducted from such wages to the National Pension Management Corporation. In accordance with our policy and the Korean Labor Standard Law, employees with one year or more of service are entitled, upon termination of employment, to receive a lump sum severance payment

195

based upon the length of their service and the average of the last three months wages. We make provisions for accrued severance indemnities based upon the assumption that all employees terminate their employment with us at the same time. As of December 31, 2009, the provisions for accrued severance benefits were \text{\$\psi 404\$ billion, which represents 100.5% of the amount required under the Korean Labor Standard Law. Under Korean law, we may not terminate full time employees except under certain circumstances.

ITEM 6.E. Share Ownership

As of December 31, 2009, the persons who are currently our directors or executive officers, as a group, beneficially held an aggregate of 1,027,399 shares of our common stock representing approximately 0.22% of our outstanding common stock as of such date. None of these persons individually held more than 1% of our outstanding common stock as of such date.

Stock Options

We have granted stock options to certain of the directors and officers of the holding company and its subsidiaries. For options granted prior to March 30, 2005, we are required to pay in cash the difference between the exercise and the market price at the date of exercise. For options issued on or after March 30, 2005, we may either issue common stock or pay in cash the difference between the exercise and the market price at the date of exercise. The following table is the breakdown of outstanding stock options with respect to our common stock that we have granted to our directors and officers, describing the grant dates, positions held by such directors and officers, exercise period, price and the number of options as of June 11, 2010.

In addition, members of the employee stock ownership association have certain pre-emptive rights in relation to our shares that are publicly offered under the Financial Investment Services and Capital Markets Act. As of December 31, 2009, the employee stock ownership association owned 22,875,759 shares of our common stock.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

ITEM 7.A. Major Shareholders

The following table sets forth certain information relating to the beneficial ownership of our common shares as of December 31, 2009.

Name of Shareholder	Number of Common Shares Beneficially Owned	Beneficial Ownership %
BNP Paribas	30,106,276	6.35%
Shinhan Financial Group Employee Stock Ownership Association	22,875,759	4.82%
Korea National Pension Fund	21,105,762	4.45%
Citibank, N.A. (ADR Department)	14,590,644	3.08%
Saudi Arabian Monetary Agency	12,683,185	2.67%
Mirae Asset Management	11,650,166	2.46%
Lazard Asset Management	7,315,720	1.54%
Mizuho Corporate Bank	5,955,000	1.26%
Samsung Life Insurance	5,821,621	1.23%
Government of Singapore Investment Corporation	5,578,128	1.18%
Abu Dhabi Investment Authority	5,244,283	1.11%
DaeGyoo	4,993,907	1.05%
Others	326,279,136	68.80%

Total 474,199,587 100.00%

Other than those listed above, no other person or entity known by us, jointly or severally, directly or indirectly own more than 1% of our issued and outstanding voting securities or otherwise exercise control or could exercise control over us. None of our shareholders have different voting rights.

A total of 14,721,000 Series 11 non-voting redeemable convertible preferred shares, all of which were issued on January 25, 2007 in registered form and subscribed by institutional investors and government agencies in Korea. The holders of these shares may, at their option, convert all or part of any outstanding such shares into our common shares at any time from the date after the first anniversary of the issuance date until the fifth anniversary of the issuance date, at a conversion rate of one-to-one with the conversion strike price of \(\formalfont{W}57,806\).

As of the date hereof, our total authorized share capital is 1,000,000,000 shares, par value \(\precent{\psi}\)5,000 per share. As of December 31, 2008, 396,199,587 common shares and 62,411,251 preferred shares were issued and 201

Table of Contents

outstanding, and as of June 10, 2009 and following the rights offering of 78,000,000 common shares in March 2009, 474,199,587 common shares and 53,094,459 preferred shares were issued and outstanding.

As of December 31, 2009, the latest date on which we closed our shareholders registry, 454 shareholders of record were chartered as U.S. persons, holding in the aggregate 17.6% of our then total outstanding shares (including Citibank, N.A., as the depositary for our American depositary shares, each representing two shares of our common stock).

ITEM 7.B. Related Party Transactions

Since the beginning of the preceding three financial years, none of our directors or officers has or had any transactions with us that are or were unusual in their nature or conditions or significant to our business, other than as set forth below and also described in note 33 to our consolidated financial statements included in this annual report.

In December 2001, BNP Paribas acquired 4.00% of our common stock in return for an investment of approximately \text{\text{\$\psi}}155 billion in cash pursuant to an alliance agreement. Under the terms of the alliance agreement, for so long as BNP Paribas does not sell or otherwise transfer (except to any of its wholly-owned subsidiaries) any portion of its ownership interest in our common stock and maintains, after any issuances of new shares by us from time to time, its shareholding percentage of not less than 3.5% of our issued common stock, we are required to call a meeting of our shareholders to recommend that one nominee of BNP Paribas be elected to our board of directors. In addition, under the alliance agreement, BNP Paribas has the right to subscribe for new issuances of our common shares in the event that such new issuances would result in the dilution of the shareholding percentage of BNP Paribas below 3.5%. As of September 2, 2009, BNP Paribas Group held 30,106,276 shares, or 6.35%, of our total common stock.

As of December 31, 2009, the outstanding balance of beneficiary certificates invested into Shinhan BNP Paribas Asset Management was \text{\text{\$\text{W}46\$}} billion.

In 2002, we entered into a joint venture agreement with BNP Paribas Asset Management, the asset management affiliate of BNP Paribas, under which we sold to BNP Paribas Asset Management 50% interest minus one share of our wholly-owned subsidiary, Shinhan Investment Trust Management, after which Shinhan Investment Trust Management was renamed Shinhan BNP Paribas Investment Trust Management Co., Ltd. In January 2009, we and BNP Paribas agreed to merge Shinhan BNP Paribas Investment Trust Management and SH Asset Management, our wholly-owned subsidiary, to form Shinhan BNP Paribas Asset Management, of which we and BNP Paribas Investment Partners hold 65:35 equity interest, respectively.

On June 26, 2009, we sold 4,700,001 common shares, or approximately 35%, of Cardif Life Insurance Company, a 50:50 joint venture with BNP Paribas Assurance (formerly known as Cardif S.A.), to BNP Paribas Assurance for \text{\text{\text{\text{W}}23}} billion. Following this transaction, BNP Paribas Assurance owns approximately 85% of Cardif Life Insurance Company. Since we as a financial holding company are not allowed to maintain an equity interest of less than 50% in an entity, we transferred our remaining shares in Cardif Life Insurance Company to Shinhan Bank for \text{\text{\text{\text{\text{V}}7.26}} billion.

As of December 31, 2007, 2008 and 2009 and May 31, 2010, we had principal loans outstanding to our directors, executive officers and their affiliates in the principal amount of \text{\text{\text{W}}110} billion, \text{\text{\text{\text{W}}254} billion and \text{\text{\text{\text{W}}7.7} billion and \text{\text{\text{\text{W}}4.8} billion,, which were made in the ordinary course of business on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectability or present other unfavorable features.

ITEM 7.C. Interests of Experts and Counsel

Not applicable.

ITEM 8. FINANCIAL INFORMATION

ITEM 8.A. Consolidated Statements and Other Financial Information

See Item 18. Financial Statements and our consolidated financial statements included in this annual report.

Legal Proceedings

As of December 31, 2009, we and our subsidiaries were defendants in pending lawsuits (including any government proceedings) in the aggregate claim amount of \(\formall412.5\) billion, for which we recorded a provision of \(\formall4103.5\) billion. Our management believes that these lawsuits will not have a material adverse effect on our financial condition, equity or results of operation.

ITEM 9.A. Offer and Listing Details

Market Prices of Common Stock and American Depositary Shares

The principal trading market for our common shares is the KRX KOSPI Market Division of the Korea Exchange, where our common shares were listed on September 10, 2001. Our American depositary shares have been listed on the New York Stock Exchange since September 16, 2003 and are identified by the symbol SHG.

The table below sets forth, for the periods indicated, the high and low closing prices and the average daily volume of trading activity on the Korea Exchange for our common stock since 2005, and their high and low closing prices and the average daily volume of trading activity on the New York Stock Exchange for our American depositary shares since 2005.

	Korea Exchange Closing Price per			New York Stock Exchange Closing Price			
	Common Stock		Average Daily per ADS Trading			Average Daily Trading	
	High	Low	Volume (Shares)	High	Low	Volume (ADSs)

ITEM 9.B. Plan of Distribution

Not applicable.

ITEM 9.C. Markets

The Korea Exchange

Pursuant to the Korea Stock and Futures Exchange Act, as of January 27, 2005, the Korea Stock Exchange, which began its operations in 1956, the KRX KOSDAQ, which began its operation in July 1, 1996, and the Korea Futures Exchange (as an exchange operating futures market and options market), which began its operation in February 1, 1999, were unified to form the Korea Exchange.

The Korea Exchange was established in a form of a limited liability stock company in accordance with the Korean Commercial Code with the minimum paid-in capital of \\ \Psi 100\) billion in accordance with the Financial Investment Services and Capital Markets Act. The Korea Exchange is presently the only exchange in Korea that serves as a spot market and a futures market. It operates and supervises three market divisions, the KRX KOSPI Market Division, the KRX KOSDAQ Market Division, and the KRX Futures Market Division. It has its principal office in Pusan.

Even though the Financial Investment Services and Capital Markets Act prescribed that the Korea Exchange be established in a form of a limited liability stock company, the Korea Exchange is expected to play a public role as a public organization. In order to safeguard against a possible conflict, the Financial Investment Services and Capital Markets Act has placed restrictions on the ownership and operation of the Korea Exchange as follows:

Any person s ownership of shares in the Korea Exchange is limited to 5% or less except for an investment trust company or investment company established under the Financial Investment Services and Capital Markets Act, or the Korean government. However, upon prior approval from the Financial Services Commission, more than 5% ownership in Korea Exchange is permitted if necessary for forming strategic alliance with a foreign stock or futures exchange;

The number of outside directors on the board of directors of the Korea Exchange shall be more than half of the total number of directors:

Any amendment to the Articles of Incorporation, transfer or consolidation of business, spin off, stock swap in its entirety or transfer of shares in its entirety of the Korea Exchange will receive prior approval from the Financial Services Commission; and

In the event the Financial Services Commission determines that the chief executive officer of the Korea Exchange is not appropriate for the position, the Financial Services Commission can request the Korea Exchange upon reasonable cause, within one month from the chief executive officer s election, to dismiss the chief executive officer. Subsequently, the chief executive officer will be suspended from performing his duties and the Korea Exchange will elect a new chief executive officer within two months from the request.

The Korea Exchange has the power in some circumstances to suspend trading in the shares of a given company or to de-list a security. The Korea Exchange also restricts share price movements. All listed companies are required to file accounting reports annually, semiannually and quarterly and to release immediately all information that may affect trading in a security.

The Government has in the past exerted, and continues to exert, substantial influence over many aspects of the private sector of the Korean economy and its actions may depress or boost the stock market. In the past, the Government has informally both encouraged and restricted the declaration and payment of dividends, induced mergers to reduce what it considers excess capacity in a particular industry and induced private companies to offer publicly their securities.

204

Table of Contents

The Korea Exchange publishes the Korea Composite Stock Price Index (KOSPI) every ten seconds, which is an index of all equity securities listed on the Korea Exchange. Historical movements in KOSPI are set out in the following.

	Opening(1)	High	Low	Closing
2000	1,028.33	1,066.18	483.58	504.62
2001	503.31	715.93	463.54	693.70
2002	698.00	943.54	576.49	627.55
2003	633.03	824.26	512.30	810.71
2004	821.26	939.52	713.99	895.92
2005	893.71	1383.14	866.17	1,379.37
2006	1,389.27	1,464.70	1,192.09	1,434.46
2007	1,435.26	2,085.45	1,345.08	1,897.13
2008	1,853.45	1,901.13	892.16	1,124.47
2009	1,157.40	1,723.17	992.69	1,682.77
2010 (through June 11)	1,696.14	1,757.76	1,532.68	1,675.34

Source: Korea Exchange

Note:

(1) The figures represent the daily closing price of the first trading day of the respective year.

Shares are quoted ex-dividend on the first trading day of the relevant company s accounting period. Ex-dividend refers to a share no longer carrying the right to receive the following dividend payment because the settlement date occurs after the record date for determining which shareholders are entitled to receive dividends. Ex-rights refers to shares no longer carrying the right to participate in the following rights offering or bonus issuance because the settlement date occurs after the record date for determining which shareholders are entitled to new shares. The calendar year is the accounting period for the majority of listed companies, this may account for the drop in KOSPI between its closing level at the end of one calendar year and its opening level at the beginning of the following calendar year.

With certain exceptions, principally to take account of a share being quoted ex-dividend and ex-rights, permitted upward and downward movements in share prices of any category of shares on any day are limited under the rules of the Korea Exchange to 15% of the previous day s closing price of the shares, rounded down as set out below:

Previous Day s Closing Price	Rounded Down to Won		
Less than 5,000	5		
5,000 to less than 10,000	10		
10,000 to less than 50,000	50		
50,000 to less than 100,000	100		
100,000 to less than 500,000	500		
500,000 or more	1,000		

As a consequence, if a particular closing price is the same as the price set by the fluctuation limit, the closing price may not reflect the price at which persons would have been prepared, or would be prepared to continue, if so

permitted, to buy and sell shares. Orders are executed on an auction system with priority rules to deal with competing bids and offers.

Due to deregulation of restrictions on brokerage commission rates, the brokerage commission rate on equity securities transactions may be determined by the parties, subject to commission schedules being filed with the Korea Exchange by the financial investment companies with brokerage licenses. In addition, a securities transaction tax of 0.15% of the sales price will generally be imposed on the transfer of shares or certain securities representing rights to subscribe for shares on the Korea Exchange. A special agricultural and fishery tax of 0.15% of

205

Table of Contents

the sales prices will also be imposed on transfer of these shares and securities on the Korea Exchange. See Item 10.E. Taxation Korean Taxation.

The number of companies listed on the KRX KOSPI Market, the corresponding total market capitalization at the end of the periods indicated and the average daily trading volume for those periods are set forth in the following table.

	Number

Note:

(1) Converted at the Noon Buying Rate at the end of the periods indicated.

The Korean securities markets are principally regulated by the Financial Services Commission and the Financial Investment Services and Capital Markets Act. The law imposes restrictions on insider trading and price manipulation, requires specified information to be made available by listed companies to investors and establishes rules regarding margin trading, proxy solicitation, takeover bids, acquisition of treasury shares and reporting requirements for shareholders holding substantial interests.

Protection of Customer s Interest in Case of Insolvency of Financial Investment Companies

Under Korean law, the relationship between a customer and a financial investment company in connection with a securities sell or buy order is deemed to be consignment and the securities acquired by a consignment agent (i.e., the securities company) through such sell or buy order are regarded as belonging to the customer in so far as the customer and the consignment agent s creditors are concerned. Therefore, in the event of a bankruptcy or reorganization procedure involving a financial investment company, the customer of the financial investment company is entitled to the proceeds of the securities sold by the financial investment company. In addition, the Financial Investment Services and Capital Markets Act recognizes the ownership of a customer in securities held by a financial investment company

in such customer s account.

When a customer places a sell order with a financial investment company which is not a member of the Korea Exchange and this financial investment company places a sell order with another financial investment company which is a member of the Korea Exchange, the customer is still entitled to the proceeds of the securities sold received by the non-member company from the member company regardless of the bankruptcy or reorganization of the non-member company. Likewise, when a customer places a buy order with a non-member company and the non-member company places a buy order with a member company, the customer has the legal right to the securities received by the non-member company from the member company because the purchased securities are regarded as belonging to the customer in so far as the customer and the non-member company s creditors are concerned.

In addition, under the Financial Investment Services and Capital Markets Act, the Korea Exchange is obliged to indemnify any loss or damage incurred by a counterparty as a result of a breach by its members. If a financial

206

Table of Contents

investment company which is a member of the Korea Exchange breaches its obligation in connection with a buy order, the Korea Exchange is obliged to pay the purchase price on behalf of the breaching member. Therefore, the customer can acquire the securities that have been ordered to be purchased by the breaching member.

As the cash deposited with a financial investment company is regarded as belonging to the financial investment company, which is liable to return the same at the request of its customer, the customer cannot take back deposited cash from the financial investment company if a bankruptcy or reorganization procedure is instituted against the financial investment company and, therefore, can suffer from loss or damage as a result. However, the Depositor Protection Act provides that the Korea Deposit Insurance Corporation will, upon the request of the investors, pay each investor up to \$\pi\$50 million per financial institution in case of the financial investment company is bankruptcy, liquidation, cancellation of securities business license or other insolvency events. The premiums related to this insurance are paid by financial investment companies. Pursuant to the Financial Investment Services and Capital Markets Act, a financial investment company with a dealing or brokerage license is required to deposit the cash received from its customers with the Korea Securities Finance Corporation, a special entity established pursuant to the Financial Investment Services and Capital Markets Act. Set-off or attachment of cash deposits by securities companies with the Korea Securities Finance Corporation is prohibited. In addition, in the event of bankruptcy or dissolution of the financial investment company, the cash so deposited shall be withdrawn and paid to the customer prior to payment to other creditors of the financial investment company.

Restrictions Applicable to ADSs

No Korean governmental approval is necessary for the sale and purchase of our ADSs in the secondary market outside Korea or for the withdrawal of shares of our common stock underlying the ADSs and the delivery inside Korea of shares in connection with the withdrawal, provided that a foreigner who intends to acquire the shares must obtain an investment registration card from the Financial Supervisory Service as described below. The acquisition of the shares by a foreigner must be immediately reported to the governor of the Financial Services Commission, either by the foreigner or by his standing proxy in Korea.

Persons who have acquired shares of our common stock as a result of the withdrawal of shares underlying our ADSs may exercise their preemptive rights for new shares, participate in free distributions and receive dividends on shares without any further Korean governmental approval.

Under current Korean laws and regulations, the depositary is required to obtain our prior consent for the number of shares of our common stock to be deposited in any given proposed deposit that exceeds the difference between:

- (1) the aggregate number of shares of our common stock deposited by us for the issuance of our ADSs (including deposits in connection with the initial issuance and all subsequent offerings of our ADSs and stock dividends or other distributions related to these ADSs); and
- (2) the number of shares of our common stock on deposit with the depositary at the time of such proposed deposit. We have agreed to grant such consent to the extent that the total number of shares on deposit with the depositary would not exceed 20,216,314 at any time.

Reporting Requirements for Holders of Substantial Interests

Under the Financial Investment Services and Capital Markets Act, any person whose direct or beneficial ownership of our common stock with voting rights, whether in the form of shares of common stock or ADSs, certificates representing the rights to subscribe for shares and equity-related debt securities including convertible bonds and bonds with warrants (which we refer to collectively as Equity Securities), together with the Equity Securities beneficially

owned by certain related persons or by any person acting in concert with the person, accounts for 5% or more of the total outstanding shares (including Equity Securities of us held by such persons) is required to report the status of the holdings and the purpose of the holdings (for example, whether intend to seek management control) to the Financial Services Commission and the Korea Exchange within five business days after reaching the 5% ownership level. In addition, any change in the ownership interest subsequent to the report that

207

Table of Contents

equals or exceeds 1% of the total outstanding Equity Securities or change in the purpose of the holdings is required to be reported to the Financial Services Commission and the Korea Exchange within five business days from the date of the change (within ten days of the end of the month in which the change occurred, in the case of a person with no intent to seek management control and within ten days of the end of the quarter in which the change occurred, in the case of an institutional investor prescribed by the Financial Services Commission).

Violation of these reporting requirements may subject a person to criminal sanctions such as fines or imprisonment and/or a loss of voting rights with respect to the portion of ownership of Equity Securities exceeding 5% of the total outstanding shares. In addition, the Financial Services Commission may order the disposal of the unreported Equity Securities. Any persons who reports management control as the purpose for its holdings is prohibited from acquiring additional shares or from exercising voting rights during the following five days following the reporting date.

In addition to the reporting requirements described above, any person whose direct or beneficial ownership of our stock accounts for 10% or more of the total issued and outstanding shares (which we refer to as a major stockholder) must report the status of his/her shareholding to the Korea Securities Futures Commission and the Korea Exchange within five days after he/she becomes a major stockholder. In addition, any change in the ownership interest subsequent to the report must be reported to the Korea Securities Futures Commission and the Korea Exchange within five days after the change occurred. Violation of these reporting requirements may subject a person to criminal sanctions such as fines or imprisonment. Any single stockholder or persons who have a special relationship with such stockholder that jointly acquire more than 10% (4% in case of non-financial business group companies) of the voting stock of a Korean financial holding company who controls national banks will be subject to reporting or approval requirements pursuant to the Financial Holding Company Act. See Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Restrictions on Financial Holding Company Ownership.

Restrictions Applicable to Shares

As a result of amendments to the Foreign Exchange Transaction Laws and Financial Services Commission regulations (which we refer to collectively as the Investment Rules) adopted in connection with the stock market opening from January 1992 and after that date, foreigners may invest, with limited exceptions and subject to procedural requirements, in all shares of Korean companies, whether listed on the Stock Market Division of the Korea Exchange or on the KOSDAQ Market Division of the Korea Exchange, unless prohibited by specific laws. Foreign investors may trade shares listed on the Stock Market Division of the Korea Exchange or on the KOSDAQ Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange, except in limited circumstances, including:

odd-lot trading of shares;

acquisition of shares (which we refer to as Converted Shares) by exercise of warrants, conversion rights or exchange rights under bonds with warrants, convertible bonds or exchangeable bonds or withdrawal rights under depositary receipts issued outside of Korea by a Korean company;

acquisition of shares as a result of inheritance, donation, bequest or exercise of stockholders rights, including preemptive rights or rights to participate in free distributions and receive dividends;

over-the-counter transactions between foreigners of a class of shares for which the ceiling on aggregate acquisition by foreigners, as explained below, has been reached or exceeded subject to certain exceptions; and

sale and purchase of shares at fair value between foreigners who are part of an investor group comprised of foreign companies investing under the control of a common investment manager pursuant to applicable laws or contract.

For over-the-counter transactions of shares between foreigners outside the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange for shares with respect to which the limit on aggregate foreign ownership has been reached or exceeded, a securities company licensed in Korea must act as an

208

Table of Contents

intermediary. Odd-lot trading of shares outside the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange must involve a licensed securities company in Korea as the other party. Foreign investors are prohibited from engaging in margin transactions with respect to shares that are subject to a foreign ownership limit.

The Investment Rules require a foreign investor who wishes to invest in shares on the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange (including Converted Shares and shares being issued for initial listing on the Stock Market Division of the Korea Exchange or on KOSDAQ Market Division of the Korea Exchange) to register its identity with the Financial Supervisory Service prior to making any such investment. The registration requirement does not, however, apply to foreign investors who acquire Converted Shares with the intention of selling such Converted Shares within three months from the date of acquisition. Upon registration, the Financial Supervisory Service will issue to the foreign investor an investment registration card, which must be presented each time the foreign investor opens a brokerage account with a securities company. Foreigners eligible to obtain an investment registration card include foreign nationals who have not been residing in Korea for a consecutive period of six months or more, foreign governments, foreign municipal authorities, foreign public institutions, international financial institutions or similar international organizations, corporations incorporated under foreign laws and any person in any additional category designated by decree of the Ministry of Strategy and Finance under the Korean Securities and Exchange Act. All Korean offices of a foreign corporation as a group are treated as a separate foreigner from the offices of the corporation outside Korea for the purpose of investment registration. However, a foreign corporation or depositary issuing depositary receipts may obtain one or more investment registration cards in its name in certain circumstances as described in the relevant regulations.

Upon a foreign investor s purchase of shares through the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange, no separate report by the investor is required because the investment registration card system is designed to control and oversee foreign investment through a computer system. However, a foreign investor s acquisition or sale of shares outside the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange (as discussed above) must be reported by the foreign investor or his standing proxy to the governor of the Financial Supervisory Service at the time of each such acquisition or sale. A foreign investor must ensure that any acquisition or sale by it of shares outside the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange in the case of trades in connection with a tender offer, odd-lot trading of shares, trades of a class of shares for which the aggregate foreign ownership limit has been reached or exceeded, is reported to the governor of the Financial Supervisory Service by himself or his standing proxy, or, in the case of sale and purchase of shares at fair value between foreigners, who are part of an investor group comprised of foreign companies investing under the control of a common investment manager pursuant to applicable laws or contract. A foreign investor may appoint a standing proxy from among the Korea Securities Depository, foreign exchange banks (including domestic branches of foreign banks), securities companies (including domestic branches of foreign securities companies), asset management companies, futures trading companies and internationally recognized custodians which will act as a standing proxy to exercise stockholders rights or perform any matters related to the foregoing activities if the foreign investor does not perform these activities himself. Generally, a foreign investor may not permit any person, other than its standing proxy, to exercise rights relating to his shares or perform any tasks related thereto on his behalf. However, a foreign investor may be exempted from complying with these standing proxy rules with the approval of the governor of the Financial Supervisory Service in cases deemed inevitable by reason of conflict between laws of Korea and the home country of the foreign investor.

Certificates evidencing shares of Korean companies must be kept in custody with an eligible custodian in Korea. Only foreign exchange banks (including domestic branches of foreign banks), securities companies (including domestic branches of foreign securities companies), the Korea Securities Depository, asset management companies, futures trading companies and internationally recognized custodians are eligible to act as a custodian of shares for a non-resident or foreign investor. A foreign investor must ensure that his custodian deposits his shares with the Korea

Securities Depository. However, a foreign investor may be exempted from complying with this deposit requirement with the approval of the governor of the Financial Supervisory Service in circumstances where compliance with that requirement is made impracticable, including cases where compliance would contravene the laws of the home country of such foreign investor.

209

Table of Contents

Under the Investment Rules, with certain exceptions, foreign investors may acquire shares of a Korean company without being subject to any foreign investment ceiling. As one such exception, designated public corporations are subject to a 40% ceiling on the acquisition of shares by foreigners in the aggregate. Designated public corporations may set a ceiling on the acquisition of shares by a single person in their articles of incorporation. Currently, Korea Electric Power Corporation is the only designated public corporation that has set such a ceiling. Furthermore, an investment by a foreign investor in 10% or more of the issued and outstanding shares with voting rights of a Korean company is defined as a foreign direct investment under the Foreign Investment Promotion Act of Korea. Generally, a foreign direct investment must be reported to the Ministry of Commerce, Industry and Energy of Korea. The acquisition of shares of a Korean company by a foreign investor may also be subject to certain foreign or other shareholding restrictions in the event that the restrictions are prescribed in a specific law that regulates the business of the Korean company. For a description of such restrictions applicable to Korean banks, see Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Banks Restrictions on Bank Ownership.

ITEM 10.B. Memorandum and Articles of Incorporation

We are a financial holding company established under the Financial Holding Company Act. As set forth in our Articles of Incorporation, our objects and purposes as a financial holding company are, among others, to operate and manage financial companies or companies engaged in similar lines of business, to provide financial support to, or investments in, our subsidiaries and to develop and jointly sell products with our subsidiaries. We are registered with the commercial registry office of Seoul Central District Court.

Description of Share Capital

This section provides information relating to our capital stock, including brief summaries of material provisions of our Articles of Incorporation, the Korean Commercial Code, the Financial Investment Services and Capital Markets Act, the Financial Holding Companies Act and certain related laws of Korea, all as currently in effect. The following summaries are intended to provide only summaries and are subject to the full text of the Articles of Incorporation and the applicable provisions of the Financial Investment Services and Capital Markets Act, the Korean Commercial Code, and certain other related laws of Korea.

General

As of December 31, 2009 and as of the date hereof, our authorized share capital is 1,000,000,000 shares. Our Articles of Incorporation provide that we are authorized to issue shares of preferred stock up to one-half of all of the issued and outstanding shares. Furthermore, through an amendment of the Articles of Incorporation, we have created new classes of shares in addition to the common shares and the preferred shares. See Description of Preferred Stock Redeemable Preferred Stock (Series 10) and Description of Preferred Stock

210

Table of Contents

Redeemable Convertible Preferred Stock (Series 11). As of December 31, 2009 and June 11, 2010, the number of our issued and outstanding common shares was 474,199,587 and 474,199,587, respectively.

As of December 31, 2009, the number of issued and outstanding redeemable preferred shares issued in August 2003 as part of our funding for the acquisition of Chohung Bank was 9,383,459. On January 25, 2007, we issued 28,990,000 redeemable preferred shares and 14,721,000 redeemable convertible preferred shares as part of our funding for the acquisition of LG Card, all of which were outstanding as of December 31, 2009 following scheduled redemptions. The terms of the preferred shares issued in connection with the acquisition of Chohung Bank are different from those of the preferred shares issued in connection with the acquisition of LG Card. See Description of Preferred Stock Redeemable Preferred Stock (Series 10) and Description of Preferred Stock Redeemable Convertible Preferred Stock (Series 11). Other than these preferred shares, there are no other preferred shares authorized, issued or outstanding as of the date hereof.

All of the issued and outstanding shares are fully-paid and non-assessable, and are in registered form. As of the date hereof, our authorized but unissued share capital consists of 384,784,849 shares. We may issue the unissued shares without further shareholder approval but subject to a board resolution as provided in the Articles of Incorporation. See Distribution of Free Shares. Share certificates are issued in denominations of one, five, ten, 50, 100, 500, 1,000 and 10,000 shares. The par value of our common shares per share is Won 5,000.

Dividends

Dividends are distributed to shareholders in proportion to the number of shares of the relevant class of capital stock owned by each shareholder following approval by the shareholders at an annual general meeting of shareholders. We pay full annual dividends on newly issued shares (such as the common shares representing the American depositary shares (ADSs)) for the year in which the new shares are issued. We declare our dividend annually at the annual general meeting of shareholders which is held within three months after the end of the fiscal year. The annual dividend must be paid to the shareholders of record as of the end of the preceding fiscal year within one month after the annual general meeting. Annual dividends may be distributed either in cash or in shares provided that shares must be distributed at par value and, if the market price of the shares is less than their par value, dividends in shares may not exceed one-half of the annual dividends. Under the Korean Commercial Code we do not have an obligation to pay any annual dividend unclaimed for five years from the scheduled payment date.

In addition, under the Korean Commercial Code and our Articles of Incorporation, we may pay interim dividends once during each fiscal year (in addition to the annual dividends). Unlike annual dividends, interim dividends may be paid upon the resolution of the board of directors and are not subject to shareholder approval. The interim dividends, if any, will be paid to the shareholders of record at 12:00 a.m. midnight, July 1 of the relevant fiscal year in cash. Under the Korean Commercial Code, an interim dividend may not be more than the net assets on the balance sheet of the immediately preceding fiscal period, after deducting (i) the capital of the immediately preceding fiscal period, (ii) the sum of the capital reserve and legal reserve accumulated up to the immediately preceding fiscal period, (iii) the amount of earnings for dividend payment approved at the general shareholders meeting of the immediately preceding fiscal period, either pursuant to the provisions of our Articles of Incorporation or to the resolution of the general meeting of shareholders, and (v) amount of legal reserve that should be set aside for the current fiscal period following the interim dividend payment.

Under the Financial Holding Companies Act and the regulations thereunder, a financial holding company may not pay an annual dividend unless it has set aside as its legal reserve an amount equal to at least one-tenth of its net income after tax and shall set aside such amount as its legal reserve until its legal reserve reaches at least the aggregate amount of its stated capital.

Other than as set forth above and the dividend rights granted to preferred shareholders as further described in Description of Preferred Shares, our articles of incorporation do not provide special rights to our common or preferred shareholders to share in our profits. For information regarding Korean taxes on dividends, see Taxation Korean Taxation.

211

Table of Contents

Distribution of Free Shares

In addition to permitting dividends in the form of shares to be paid out of retained or current earnings, the Korean Commercial Code permits a company to distribute to its shareholders, in the form of free shares, an amount transferred from the capital surplus or legal reserve to stated capital. These free shares must be distributed to all of the shareholders pro rata. Our Articles of Incorporation require the same types of preferred shares to be distributed to the holders of preferred shares in case of distribution of free shares. For information regarding the treatment under Korean tax laws of free share distributions, see Item 10.F. Taxation Korean Taxation Taxation of Dividends on Shares of Common Stock or American Depositary Shares.

Preemptive Rights and Issuance of Additional Shares

Unless otherwise provided in the Korean Commercial Code, a company may issue authorized but unissued shares at such times and upon such terms as the board of directors of the company may determine. The company must offer the new shares on uniform terms to all shareholders who have preemptive rights and who are listed on the shareholders register as of the record date. Our shareholders are entitled to subscribe for any newly issued shares in proportion to their existing shareholdings. However, as provided in the Articles of Incorporation, we may issue new shares by resolution of board of directors to persons other than existing shareholders if those shares are (1) publicly offered (where the number of such shares so offered may not exceed 50% of our total number of issued and outstanding shares); (2) preferentially allocated to the members of the ESOA pursuant to relevant provisions of the Financial Investment Services and Capital Markets Act; (3) issued for the purpose of issuing depositary receipts pursuant to relevant provisions of the Financial Investment Services and Capital Markets Act (where the number of such shares so issued may not exceed 50% of our total number of issued and outstanding shares); (4) issued to directors or employees as a result of exercise of stock options we granted to them pursuant to the Korean Commercial Code; (5) issued to a financial investment company, a private equity fund or a special purpose company under the Financial Investment Services and Capital Markets Act; or (6) issued to any specified foreign investors, foreign or domestic financial institutions or alliance companies for operational needs such as introduction of advanced financial technology, improvement of its or subsidiaries financial structure and funding or strategic alliance (where such number of shares so issued may not exceed 50% of our total number of issued and outstanding shares). Under the Korean Commercial Code, a company may vary, without stockholders approval, the terms of such preemptive rights for different classes of shares. Public notice of the preemptive rights to new shares and the transferability thereof must be given not less than two weeks (excluding the period during which the shareholders register is closed) prior to the record date. We will notify the shareholders who are entitled to subscribe for newly issued shares of the deadline for subscription at least two weeks prior to the deadline. If a shareholder fails to subscribe on or before such deadline, the shareholder s preemptive rights will lapse. Our board of directors may determine how to distribute shares in respect of which preemptive rights have not been exercised or where fractions of shares occur.

Under the Financial Investment Services and Capital Markets Act, members of a company s employee stock ownership association, whether or not they are shareholders, have a preemptive right, subject to certain exceptions, to subscribe for up to 20% of the shares publicly offered pursuant to the Financial Investment Services and Capital Markets Act. However, this right is exercisable only to the extent that the total number of shares so acquired and held by such members does not exceed 20% of the total number of shares to be newly issued and shares then outstanding. As of December 31, 2009, the ESOA owned 22,875,759 shares of our common stock.

General Meeting of Shareholders

There are two types of general meetings of shareholders: annual general meetings and extraordinary general meetings. We are required to convene our annual general meeting within three months after the end of each fiscal year. Subject to a board resolution or court approval, an extraordinary general meeting of shareholders may be held when necessary

or at the request of our audit committee. In addition, under the Korean Commercial Code, an extraordinary general meeting of shareholders may be held at the request of the shareholders holding shares for at least 6 months of an aggregate of 1.5% or more of the outstanding shares with voting rights of the listed company, subject to a board resolution or court approval. Furthermore, under the Financial Holding Companies Act of Korea, an extraordinary general meeting of shareholders may be held at the request of the shareholders holding shares for

212

Table of Contents

at least 6 months of an aggregate of 1.5% (0.75% in the case of a financial holding company (i) whose total assets at the end of the latest fiscal year is \(\forall 5\) trillion or more and (ii) who is in control of two or more subsidiaries, each with total assets of \(\foat{\psi}\)2 trillion or more) or more of the outstanding shares of the company, subject to a board resolution or court approval. Holders of non-voting shares may be entitled to request a general meeting of shareholders only to the extent the non-voting shares have become enfranchised as described under Voting Rights below (hereinafter referred to as enfranchised non-voting shares). Meeting agendas are determined by the board of directors or proposed by holders of an aggregate of 3% or more of the outstanding shares with voting rights by way of a written proposal to the board of directors at least six weeks prior to the meeting. In addition, under the Korean Commercial Code, the meeting agenda may be proposed by the shareholders holding shares for at least 6 months of an aggregate of 1% (0.5% in the case of a listed company whose capital at the end of the latest operating year is \text{\text{\$\psi}}100 billion or more) or more of the outstanding shares of the listed company. Furthermore, under the Financial Holding Companies Act, the meeting agenda may be proposed by the shareholders holding shares for at least 6 months of an aggregate of 0.5% (0.25% in the case of a financial holding company (i) whose total assets at the end of the latest fiscal year is \text{\psi}5 trillion or more and (ii) who is in control of two or more subsidiaries, each with total assets of \(\forall 2\) trillion or more) or more of the outstanding shares of the company. Written notices stating the date, place and agenda of the meeting must be given to the shareholders at least two weeks prior to the date of the general meeting of shareholders; provided, that, notice may be given to holders of 1% or less of the total number of issued and outstanding shares which are entitled to vote, by placing at least two public notices at least two weeks in advance of the meeting in at least two daily newspapers or by using an electronic method defined under the Korean Commercial Code and related regulations at least two weeks in advance of the meeting. Currently, we use The Korea Economic Daily and Maeil Business Newspaper for the publication of such notices. Shareholders who are not on the shareholders register as of the record date are not entitled to receive notice of the general meeting of shareholders, and they are not entitled to attend or vote at such meeting. Holders of enfranchised non-voting shares who are on the shareholders register as of the record date are entitled to receive notice of the general meeting of shareholders and they are entitled to attend and vote at such meeting. Otherwise, holders of non-voting shares are not entitled to receive notice of or vote at general meetings of shareholders.

The general meeting of shareholders is held at our executive office (which is our registered executive office) or, if necessary, may be held anywhere in the vicinity of our executive office.

Voting Rights

Holders of common shares are entitled to one vote for each share. However, voting rights with respect to common shares that we hold and common shares that are held by a corporate shareholder, more than one-tenth of the outstanding capital stock of which is directly or indirectly owned by us, may not be exercised. Unless stated otherwise in a company s Articles of Incorporation, the Korean Commercial Code permits holders of an aggregate of 3% (1%, in case of a company whose total assets as at the end of the latest fiscal year is \(\frac{\psi}{2}\)2 trillion or more) or more of the outstanding shares with voting rights to request cumulative voting when electing two or more directors. Our Articles of Incorporation currently do not prohibit cumulative voting. In addition, under the Korean Commercial Code, in case of appointment of an audit committee member who is an outside director, any shareholder holding more than 3% of the outstanding shares with voting rights shall not exercise its voting rights with respect to any portion of its shares exceeding the 3% limit; and in case of appointment of an audit committee member who is a non-outside director, the largest shareholder (together with certain related persons) holding more than 3% of the outstanding shares with voting rights shall not exercise its voting rights with respect to any portion of its shares exceeding the 3% limit.

The Korean Commercial Code and our Articles of Incorporation provide that an ordinary resolution may be adopted if approval is obtained from the holders of at least a majority of those common shares present or represented at such meeting and such majority also represents at least one-fourth of the total of our issued and outstanding common shares. Holders of non-voting shares (other than enfranchised non-voting shares) are not entitled to vote on any

resolution or to receive notice of any general meeting of shareholders unless the agenda of the meeting includes consideration of a resolution on which such holders are entitled to vote. If our general shareholders meeting resolves not to pay to holders of preferred shares the annual dividend as determined by the board of directors at the time of issuance of such shares, the holders of preferred shares will be entitled to exercise

213

Table of Contents

voting rights from the general shareholders meeting immediately following the meeting adopting such resolution until the end of the meeting to declare to pay such dividend with respect to the preferred shares. Holders of such enfranchised preferred shares have the same rights as holders of common shares to request, receive notice of, attend and vote at a general meeting of shareholders.

The Korean Commercial Code provides that to amend the Articles of Incorporation (which is also required for any change to the authorized share capital of the company) and in certain other instances, including removal of a director of a company, dissolution, merger or consolidation of a company, transfer of the whole or a significant part of the business of a company, acquisition of all of the business of any other company or issuance of new shares at a price lower than their par value, a special resolution must be adopted by the approval of the holders of at least two-thirds of those shares present or represented at such meeting and such special majority must also represent at least one-third of the total issued and outstanding shares with voting rights of the company.

In addition, in the case of amendments to the Articles of Incorporation or any merger or consolidation of a company or in certain other cases which affect the rights or interest of the shareholders of the preferred shares, a resolution must be adopted by a separate meeting of shareholders of the preferred shares. Such a resolution may be adopted if the approval is obtained from shareholders of at least two-thirds of the preferred shares present or represented at such meeting and such preferred shares also represent at least one-third of the total issued and outstanding preferred shares of the company.

A shareholder may exercise his voting rights by proxy given to another shareholder. If a particular shareholder intends to obtain proxy from another shareholder, a reference document specified by the Financial Supervisory Service must be sent to the shareholder giving proxy, with a copy furnished to the company s executive office or the branch office, transfer agent and the Financial Services Commission. The proxy must present the power of attorney prior to the start of the general meeting of shareholders.

Rights of Dissenting Shareholders

Pursuant to the Financial Investment Services and Capital Markets Act, in certain limited circumstances (including, without limitation, if we transfer all or any significant part of our business or if we merge or consolidate with another company), dissenting holders of shares have the right to require us to purchase their shares. Pursuant to the Financial Holding Companies Act, the Financial Investment Services and Capital Markets Act and the Korean Commercial Code, if a financial holding company acquires a new direct or indirect subsidiary through the exchange or transfer of shares except in limited circumstances, the dissenting holders of such shares have the right to require us to purchase their shares. To exercise such a right, shareholders must submit to us a written notice of their intention to dissent prior to the general meeting of shareholders. Within 20 days (or 10 days under certain circumstances according to the Financial Holding Companies Act) after the date on which the relevant resolution is passed at such meeting, such dissenting shareholders must request in writing that we purchase their shares. We are obligated to purchase the shares of dissenting shareholders within one month after the end of such request period at a price to be determined by negotiation between the shareholder and us. If we cannot agree on a price with the shareholder through such negotiations, the purchase price will be the arithmetic mean of (1) the weighted average of the daily closing share prices on the KRX KOSPI Market of the Korea Exchange for two months prior to the date of the adoption of the relevant board of directors resolution, (2) the weighted average of the daily closing share prices on the KRX KOSPI Market of the Korea Exchange for one month prior to the date of the adoption of the relevant board of directors resolution and (3) the weighted average of the daily closing share prices on the KRX KOSPI Market of the Korea Exchange for one week prior to the date of the adoption of the relevant board of directors resolution. If we or the dissenting shareholder who requested purchase of their shares do not accept such purchase price, we or the shareholder may request to the court to adjust such purchase price.

Register of Shareholders and Record Dates

We maintain the register of our shareholders at our transfer agent s in Seoul, Korea. The Korea Securities Depository as our transfer agent, registers transfers of shares on the register of shareholders upon presentation of the share certificates.

214

Table of Contents

The record date for annual dividends is December 31. For the purpose of determining the holders of shares entitled to annual dividends, the register of shareholders may be closed for the period from January 1 of each year up to January 15 of such year. Further, the Korean Commercial Code and the Articles of Incorporation permit us upon at least two weeks—public notice to set a record date and/or close the register of shareholders for not more than three months for the purpose of determining the shareholders entitled to certain rights pertaining to the shares. The trading of shares and the delivery of certificates in respect thereof may continue while the register of shareholders is closed.

Other Shareholder Rights

Our articles of incorporation do not have sinking fund provisions or provisions creating liability to further capital calls. Other than to amend our articles of incorporation in accordance with the Korean Commercial Code, no particular action is necessary to change the rights of holders of our capital stock. In addition, our articles of incorporation do not have specific provisions for governing changes in capital or which would have an effect of delaying, deferring or preventing a change in control of us and that would operate only with respect to a merger, acquisition or corporate restructuring involving us or any of our subsidiaries.

Directors

Under the Korean Commercial Code and our articles of incorporation, any director wishing to enter into a transaction with us or our subsidiaries in his or her personal capacity is required to obtain the prior approval of the Board of Directors, and any director having an interest in the transaction may not vote at the meeting of the Board of Directors to approve the transaction.

Neither our articles of incorporation nor applicable Korean laws have provisions relating to (i) the directors power, in the absence of an independent quorum, to vote compensation to themselves or any members of their body (ii) borrowing powers exercisable by the directors and how such borrowing powers can be varied; (iii) retirement or non-retirement of directors under an age limit requirement; or (iv) the number of shares required for a director s qualification.

Description of Preferred Stock

Redeemable Preferred Stock (Series 1 through 8)

In 2003, as part of funding our acquisition of Chohung Bank, we issued non-voting redeemable preferred stock, designated Series 1 through 8, in an aggregate of 52,583,961 shares. Of these shares, 43,200,502 shares have been redeemed in accordance with the redemption schedule (including 9,316,792 shares redeemed in 2009 and 0 shares redeemed in 2010 to-date), and 9,383,459 shares remain currently outstanding. The outstanding shares are scheduled to be redeemed by August 21, 2010 at an aggregate redemption price of \textbf{W}182.8 billion.

Redeemable Convertible Preferred Stock (Series 9)

In 2003, as part of funding our acquisition of Chohung Bank, we also issued Series 9 redeemable convertible preferred shares all of which were converted into our common shares in 2005 and 2006 in accordance with the terms of such shares.

Redeemable Preferred Stock (Series 10)

On January 25, 2007, as part of funding our acquisition of LG Card, we issued 28,990,000 Series 10 non-voting redeemable preferred shares. These shares are currently entitled to dividends at the following rate: (i) for each year

until and including 2011, 7.00% of the subscription price per share; (ii) for 2012, 7.00% of the subscription price per share multiplied by the number of days elapsed from January 1, 2012 to January 25, 2012 and divided by 365, plus R % of the subscription price, multiplied by the number of days from January 26, 2012 through December 31, 2012 and divided by 365, where R% means the sum of (A) the five-year treasury rate effective on January 25, 2011, (B) 100 basis points and (C) a spread equal to 7.00% less the five-year treasury rate effective on January 25, 2007; and (iv) for 2013 and each year thereafter, R% of the subscription price. The dividend

215

Table of Contents

right held by holders of these shares rank senior to the dividend right held by holders of our common shares. If in any fiscal year we do not pay any dividend as provided above, the holders of these shares are entitled to receive such accumulated unpaid dividend prior to the holders of our common shares from the dividends payable in respect of the next fiscal year. If dividends are not paid to the holders of these shares, voting rights attach to such shares. See Voting Rights. We may redeem these shares at any time during the period commencing on the fifth anniversary of the issuance date until the 20th anniversary of the issuance date to the extent that distributable profits are available for such redemption. None of these shares may be redeemed except during the redemption period. There is no maturity date for these shares.

Redeemable Convertible Preferred Stock (Series 11)

On January 25, 2007, as part of funding our acquisition of LG Card, we issued 14,721,000 Series 11 non-voting redeemable convertible preferred shares. These shares are currently entitled to dividends at the following rate: (i) for each year until and including 2011, 3.25% of the subscription price per share; (iii) for 2012, 3.25% of the subscription price per share multiplied by the number of days elapsed from January 1, 2012 to January 25, 2012 and divided by 365, plus R % of the subscription price, multiplied by the number of days from January 26, 2012 through December 31, 2012 and divided by 365, where R% means the sum of (A) the five-year treasury rate effective on January 25, 2011, (B) 100 basis points and (C) a spread equal to 7.00% less the five-year treasury rate effective on January 25, 2007; and (iv) for 2013 and each year thereafter, R% of the subscription price. If in any fiscal year we do not pay any dividend as provided above, the holders of these shares are entitled to receive such accumulated unpaid dividend prior to the holders of our common shares from the dividends payable in respect of the next fiscal year. If dividends are not paid to the holders of these shares, voting rights attach to such shares. See Voting Rights. We may redeem these shares at any time during the period commencing on the fifth anniversary of the issuance date until the 20th anniversary of the issuance date to the extent that distributable profits are available for such redemption. None of these shares may be redeemed except during the redemption period. There is no maturity date for these shares.

The holders of these shares may, at their option, convert all or part of any outstanding such shares into our common shares at any time from the day after the first anniversary of the issuance date until the fifth anniversary of the issuance date, at a conversion rate of one-to-one. None of these shares may be converted except during the conversion period.

Annual Report

At least one week before the annual general meeting of shareholders, we must make our annual report written in the Korean language and audited nonconsolidated financial statements prepared under Korean GAAP available for inspection at our principal office and at all of our branch offices. Copies of annual reports, the audited nonconsolidated financial statements and any resolutions adopted at the general meeting of shareholders will be made available to our shareholders.

Under the Financial Investment Services and Capital Markets Act, we must file with the Financial Services Commission and the Korea Exchange an annual report within 90 days after the end of our fiscal year, a semiannual report within 45 days (or 60 days if the report is prepared based on consolidated financial statements for filing) after the end of the first six months of our fiscal year and quarterly reports within 45 days (or 60 days if the report is prepared based on consolidated financial statements for filing) after the end of the first three months and nine months of our fiscal year, respectively. Copies of such reports are available for public inspection at the Financial Services Commission and the Korea Exchange.

Transfer of Shares

Under the Korean Commercial Code, the transfer of shares is effected by the delivery of share certificates. In order to exercise shareholders—rights, the transferee must have his name and address registered on the register of shareholders. For this purpose, shareholders are required to file with us their name, address and seal. Nonresident shareholders must notify us of the name of their proxy in Korea to which our notice can be sent. Under the Financial Services Commission regulations, nonresident shareholders may appoint a standing proxy and may not allow any

216

Table of Contents

person other than the standing proxy to exercise rights regarding the acquired share or perform any task related thereto on his behalf, subject to certain exceptions. Under current Korean regulations, the Korea Securities Depository, foreign exchange banks (including domestic branches of foreign banks), financial investment companies with a dealing, brokerage or collective investment license and internationally recognized custodians are authorized to act as standing proxy and provide related services. Certain foreign exchange controls and securities regulations apply to the transfer of shares by nonresidents or non-Koreans. See Korean Foreign Exchange and Securities Regulations. As to the ceiling on the aggregate shareholdings of a single shareholder and persons who have a special relationship with such shareholder, please see Item 4.B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Restrictions on Financial Holding Company Ownership.

Acquisition of Treasury Shares

We generally may not acquire our own shares except in limited circumstances, including, without limitation, a reduction in capital. Notwithstanding the foregoing restrictions, pursuant to the Financial Investment Services and Capital Markets Act and regulations under the Financial Holding Companies Act, we may purchase our own shares on the KRX KOSPI Market of the Korea Exchange, through a tender offer, or through a trust agreement with a trust company, or retrieve our own shares from a trust company upon termination of a trust agreement, subject to the restrictions that (1) the aggregate purchase price of such shares may not exceed the total amount available for distribution of dividends at the end of the preceding fiscal year less the amounts of dividends and reserves for such fiscal year, subtracted by the sum of (a) the purchase price of treasury stock acquired if any treasury stock has been purchased after the end of the preceding fiscal year pursuant to the Commercial Act or the Financial Investment Services and Capital Markets Act, (b) the amount subject to trust agreements, and (c) the amount of dividends approved at the ordinary general shareholders meeting after the end of the preceding fiscal year and the amount of retained earnings reserve required under the Commercial Act; plus if any treasury stock has been disposed of after the end of the preceding fiscal year, the acquisition cost of such treasury stock and (2) the purchase of such shares shall meet the requisite capital ratio under the Financial Holding Companies Act and the guidelines issued by the Financial Services Commission. In general, under the Financial Holding Companies Act, our subsidiaries are not permitted to acquire our shares.

Liquidation Rights

In the event we are liquidated, the assets remaining after the payment of all debts, liquidation expenses and taxes will be distributed to shareholders in proportion to the number of shares held by such shareholders. Holders of preferred shares may have preferences over holders of common shares in liquidation.

ITEM 10.C. Material Contracts

None.

ITEM 10.D. Exchange Controls

General

The Foreign Exchange Transaction Act of Korea the related Presidential Decree and the regulations under such Act and Decree (collectively the Foreign Exchange Transaction Laws) herein, regulate investment in Korean securities by nonresidents and issuance of securities by Korean companies outside Korea. Under the Foreign Exchange Transaction Laws, nonresidents may invest in Korean securities only to the extent specifically allowed by these laws or otherwise permitted by the Ministry of Strategy and Finance of Korea. The Financial Services Commission has also adopted, pursuant to its authority under the Financial Investment Services and Capital Markets Act, regulations that restrict

investment by foreigners in Korean securities and regulate issuance of securities by Korean companies outside Korea.

Under the Foreign Exchange Transaction Laws, (1) if the Korean government determines that it is inevitable due to the outbreak of natural calamities, wars, conflict of arms or grave and sudden changes in domestic or foreign economic circumstances or other situations equivalent thereto, the Ministry of Strategy and Finance may

217

Table of Contents

temporarily suspend payment, receipt or the whole or part of transactions to which the Foreign Exchange Transaction Laws apply, or impose an obligation to safe keep, deposit or sell means of payment in or to certain Korean governmental agencies or financial institutions; and (2) if the Korean government determines that international balance of payments and international finance face or are likely to face serious difficulty or the movement of capital between Korea and abroad will cause or is likely to cause serious obstacles in carrying out its currency policies, exchange rate policies and other macroeconomic policies, the Ministry of Strategy and Finance may take measures to require any person who intends to perform capital transactions to obtain permission or to require any person who performs capital transactions to deposit part of the payments received in such transactions at certain Korean governmental agencies or financial institutions, in each case subject to certain limitations.

Restrictions Applicable to Shares

Under the Foreign Exchange Transaction Laws, a foreign investor who intends to acquire shares must designate a foreign exchange bank at which he must open a foreign currency account and a Won account exclusively for stock investments. No approval is required for remittance into Korea and deposit of foreign currency funds in the foreign currency account. Foreign currency funds may be transferred from the foreign currency account at the time required to make a deposit for, or settle the purchase price of, a stock purchase transaction to a Won account opened at a financial investment company with a securities dealing or brokerage license. Funds in the foreign currency account may be remitted abroad without any Korean governmental approval.

Dividends on shares of Korean companies are paid in Won. No Korean governmental approval is required for foreign investors to receive dividends on, or the Won proceeds of the sale of, any shares to be paid, received and retained in Korea. Dividends paid on, and the Won proceeds of the sale of, any shares held by a nonresident of Korea must be deposited either in a Won account with the investor s financial investment company with a securities dealing or brokerage license or in his Won account. Funds in the investor s Won account may be transferred to his foreign currency account or withdrawn for local living expenses, provided that any withdrawal of local living expenses by any one person exceeding US\$10,000 per day needs to be reported to the governor of the Financial Supervisory Service by the foreign exchange bank at which the Won account is maintained. Funds in the Won account may also be used for future investment in shares or for payment of the subscription price of new shares obtained through the exercise of preemptive rights.

Financial investment companies with a securities dealing, brokerage or collective investment license are allowed to open foreign currency accounts with foreign exchange banks exclusively for accommodating foreign investors—stock investments in Korea. Through these accounts, financial companies with a securities dealing, brokerage or collective investment license may enter into foreign exchange transactions on a limited basis, such as conversion of foreign currency funds and Won funds, either as a counterparty to or on behalf of foreign investors, without the investors having to open their own accounts with foreign exchange banks.

ITEM 10.E. Taxation

The following summary is based upon tax laws, regulations, rulings, decrees, income tax conventions (treaties), administrative practice and judicial decisions of Korea and the United States as of the date of this annual report, and is subject to any change in Korean or United States law that may come into effect after such date. Investors in shares of common stock or American depositary shares are advised to consult their own tax advisers as to the Korean, United States or other tax consequences of the purchase, ownership and disposition of such securities, including the effect of any national, state or local tax laws.

Korean Taxation

The following summary of Korean tax considerations applies to you so long as you are not:

a resident of Korea;

a corporation having its head office, principal place of business, or place of effective management in Korea (a Korean corporation); or

218

Table of Contents

engaged in a trade or business in Korea through a permanent establishment or a fixed base to which the relevant income is attributable or with which the relevant income is effectively connected.

Taxation of Dividends on Shares of Common Stock or American Depositary Shares

We will deduct Korean withholding tax from dividends (whether in cash or in shares) paid to you at a rate of 22% (including resident surtax). If you are a qualified resident in a country that has entered into a tax treaty with Korea, you may qualify for a reduced rate of Korean withholding tax. See Tax Treaties below for a discussion of treaty benefits. If we distribute to you free shares representing a transfer of certain capital reserves or asset revaluation reserves into paid-in capital, such distribution may be subject to a Korean withholding tax.

In order to obtain a reduced rate of withholding tax pursuant to an applicable tax treaty, you must submit to us, prior to the dividend payment date, such evidence of tax residence as the Korean tax authorities may require in order to establish your entitlement to the benefits of the applicable tax treaty. A holder of American depositary shares (ADSs) may submit evidence of tax residence to us through the depositary.

Taxation of Capital Gains from Transfer of Common Shares or American Depositary Shares

As a general rule, capital gains earned by non-residents upon transfer of our common shares or ADSs are subject to a Korean withholding tax at the lower of (1) 11% (including resident surtax) of the gross proceeds realized or (2) 22% (including resident surtax) of the net realized gain, subject to the production of satisfactory evidence of acquisition costs and certain direct transaction costs associated with common shares or ADSs, unless exempt from Korean income taxation under an applicable tax treaty between Korea and the country of your tax residence. See Tax Treaties below for a discussion on treaty benefits. Even if you do not qualify for the exemption under a tax treaty, you will not be subject to the foregoing withholding tax on capital gains if you meet certain requirements for the exemption under Korean domestic tax laws discussed in the following paragraphs.

You will not be subject to the Korean income taxation on capital gains realized upon a transfer of our common shares through the Korea Exchange if you (1) have no permanent establishment in Korea and (2) do not own and have never owned (together with any shares owned by any entity with which you have a special relationship and possibly including the shares represented by the ADSs) 25% or more of our total issued and outstanding shares at any time during the calendar year in which the sale occurs and during the five consecutive calendar years prior to the calendar year in which the sale occurs.

If you are subject to tax on capital gains with respect to a sale of common shares or ADSs, the purchaser or, in the case of a sale of common shares on the Korea Exchange or through a financial investment company with a brokerage license in Korea, the financial investment company is required to withhold Korean tax from the sales proceeds in an amount equal to 11% (including resident surtax) of the gross realization proceeds and to remit the withheld tax to the Korean tax authority, unless you establish your entitlement to an exemption under an applicable tax treaty or domestic tax law or produce satisfactory evidence of your acquisition costs and certain direct transaction costs associated with common shares or ADSs. To obtain the benefit of a tax exemption pursuant to a tax treaty, you must submit to the purchaser, the financial investment company or the ADR depositary, as the case may be, prior to or at the time of payment, such evidence of your tax residence as the Korean tax authorities may require in support of your claim for treaty benefits. See the discussion under Tax Treaties below for an additional explanation of claiming treaty benefits.

Tax Treaties

Korea has entered into a number of income tax treaties with other countries, including the United States, which reduce or exempt Korean withholding tax on the income derived by residents of such treaty countries. For example, under the Korea-U.S. income tax treaty, reduced rates of Korean withholding tax on dividends of 16.5% or 11.0%, respectively (including resident surtax), depending on your shareholding ratio, and an exemption from Korean withholding tax on capital gains are generally available to residents of the United States that are beneficial owners of the relevant dividend income or capital gains. However, under Article 17 (Investment or Holding Companies) of the Korea-U.S. income tax treaty, such reduced rates and exemption do not apply if (1) you are a United States corporation, (2) by reason of any special measures the tax imposed on you by the United States with respect to such

219

Table of Contents

dividends or capital gains is substantially less than the tax generally imposed by the United States on corporate profits, and (3) 25% or more of your capital is held of record or is otherwise determined, after consultation between competent authorities of the United States and Korea, to be owned directly or indirectly by one or more persons who are not individual residents of the United States. Also, under Article 16 (Capital Gains) of the Korea-U.S. income tax treaty, the exemption on capital gains does not apply if you are an individual, and (a) you maintain a fixed base in Korea for a period or periods aggregating 183 days or more during the taxable year and your common shares, or ADSs giving rise to capital gains are effectively connected with such fixed base or (b) you are present in Korea for a period or periods of 183 days or more during the taxable year.

You should inquire for yourself whether you are entitled to the benefit of an income tax treaty with Korea. It is the responsibility of the party claiming the benefits of an income tax treaty in respect of dividend payments or capital gains to submit to us, the purchaser, the financial investment company, or other withholding agent, as the case may be, a certificate as to his tax residence. In the absence of sufficient proof, we, the purchaser, the financial investment company, or other withholding agent, as the case may be, must withhold tax at the normal rates. Furthermore, in order for you to obtain the benefit of a tax exemption on certain Korean source income (e.g., dividends or capital gains) under an applicable tax treaty, Korean tax law requires you (or your agent) to submit an application for tax exemption along with a certificate of your tax residency issued by the competent authority of your country of tax residence, subject to certain exceptions. For example, a U.S. resident would be required provide Form 6166 as a certificate of tax residency with the application for tax exemption. Such application should be submitted to an appropriate district tax office by the ninth day of the month following the date of the first payment of such income.

Inheritance Tax and Gift Tax

If you die while holding an ADS or donate an ADS, it is unclear whether, for Korean inheritance and gift tax purposes, you would be treated as the owner of the shares of common stock underlying the ADSs. If the tax authority interprets depositary receipts as the underlying share certificates, you may be treated as the owner of the shares of common stock and your heir or the donee (or in certain circumstances, you as the donor) will be subject to Korean inheritance or gift tax, which ranges from 10% to 50% recently, assessable based on the value of the ADSs or shares of common stock and the identity of the individual against whom the tax is assessed.

If you die while holding a common share or donate a subscription right or a common share, your heir or donee (or in certain circumstances, you as the donor) will be subject to Korean inheritance or gift tax at the same rate as indicated above.

At present, Korea has not entered into any tax treaty relating to inheritance or gift taxes.

Securities Transaction Tax

If you transfer common shares through the Korea Exchange, you will be subject to a securities transaction tax at the rate of 0.15% and an agriculture and fishery special surtax at the rate of 0.15% of the sales price of common shares. If your transfer of common shares is not made through the Korea Exchange, subject to certain exceptions, you will be subject to a securities transaction tax at the rate of 0.5% but will not be subject to an agriculture and fishery special surtax.

With respect to transfers of ADSs, a tax ruling issued in 2004 by the Korean tax authority appears to hold that depositary receipts, which the ADSs fall under, constitute share certificates subject to the securities transaction tax. In May 2007, the Seoul Administrative Court held that depositary receipts do not constitute share certificates subject to the securities transaction tax. The case was upheld by the Seoul High Court, and the Supreme Court in 2008 dismissed the tax authorities appeal against the High Court decision, making the High Court decision final for the case.

However, having dismissed the tax authorities appeal without ruling on the substantive law, it is not clear if the Supreme Court s decision for this case will serve as the Supreme Court s precedent on the issue. Even if depositary receipts, which the ADSs fall under, constitute share certificates subject to the securities transaction tax under the Securities Transaction Tax Law, a transfer of depositary receipts listed on the New York Stock Exchange, NASDAQ National Market or other qualified foreign exchanges is exempt from the securities transaction tax.

220

Table of Contents

In principle, the securities transaction tax, if applicable, must be paid by a transferor of common shares. When a transfer is effected through a securities settlement company, such settlement company is generally required to withhold and remit the tax to the tax authorities. When such transfer is made through a financial investment company only, such financial investment company is required to withhold and remit the tax. Where a transfer is effected by a non-resident who has no permanent establishment in Korea by a method other than through a securities settlement company or a financial investment company, the transferee is required to withhold the securities transaction tax.

Non-reporting or underreporting of securities transaction tax will generally result in the imposition of penalties equal to 20% to 40% of the non-reported or 10% to 40% of underreported tax amount and a failure to timely pay securities transaction tax due will result in penalties of 10.95% per annum of the due but unpaid tax. The penalty is imposed on the party responsible for paying the securities transaction tax or, if the securities transaction tax is to be withheld, on the party that has the withholding obligation.

Certain United States Federal Income Tax Consequences

The following summary describes certain U.S. federal income tax considerations for beneficial owners of our common shares or ADSs that hold the common shares or ADSs as capital assets and are U.S. holders. You are a U.S. holder if you are for U.S. federal income tax purposes:

- (i) a citizen or individual resident of the United States;
- (ii) a corporation, or other entity treated as a corporation, created or organized in or under the laws of the United States, any state thereof or District of Columbia;
- (iii) an estate the income of which is subject to U.S. federal income taxation regardless of its source;
- (iv) a trust that is subject to the primary supervision of a court within the United States and has one or more U.S. persons with authority to control all substantial decisions of the trust; or
- (v) a trust that has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person.

In addition, this summary only applies to you if you are a U.S. holder that is a resident of the United States for purposes of the current income tax treaty between the United States and Korea (the Treaty), your common shares or ADSs are not, for purposes of the Treaty, effectively connected with a permanent establishment in Korea and you otherwise qualify for the full benefits of the Treaty.

This summary is based upon the provisions of the Internal Revenue Code of 1986, as amended (the Code) and regulations (including proposed regulations), rulings and judicial decisions thereunder as of the date hereof, as well as the Treaty, all of which are subject to change, perhaps retroactively. It is for general purposes only and you should not consider it to be tax advice. In addition, it is based in part on representations by the ADS depositary and assumes that each obligation under the deposit agreement will be performed in accordance with its terms. This summary does not represent a detailed description of all the U.S. federal income tax consequences to you in light of your particular circumstances, and does not address the effects of any state, local or non-U.S. tax laws. In addition, it does not represent a detailed description of the U.S. federal income tax consequences applicable to you if you are subject to special treatment under the U.S. federal income tax laws, including if you are:

a bank;

a dealer in securities or currencies;

an insurance company or one of certain financial institutions;

a regulated investment company;

a real estate investment trust;

a tax-exempt entity;

221

Table of Contents

- a trader in securities that has elected to use a mark-to-market method of accounting for your securities holdings;
- a person holding common shares or ADSs as part of a hedging, conversion, constructive sale or integrated transaction or a straddle;
- a person liable for the alternative minimum tax;
- a partnership or other pass-through entity for U.S. federal income tax purposes;
- a person who owns or is deemed to own 10% or more of our voting stock; or
- a person whose functional currency is not the U.S. dollar.

If a partnership holds our common shares or ADSs, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding our common shares or ADSs, you are urged to consult your tax advisor.

You should consult your own tax advisor concerning the particular U.S. federal tax consequences to you of the ownership and disposition of common shares or ADSs as well as any consequences arising under the laws of any other taxing jurisdiction.

American Depositary Shares

If you hold ADSs, for U.S. federal income tax purposes, you generally will be treated as the owner of the underlying common shares that are represented by such ADSs. Accordingly, deposits or withdrawals of common shares for ADSs will not be subject to U.S. federal income tax.

The U.S. Treasury Department has expressed concerns that intermediaries in the chain of ownership between holders of ADSs and the issuer of the securities underlying the ADSs may be taking actions that are inconsistent with the claiming of foreign tax credits for U.S. holders of ADSs. Such actions would also be inconsistent with the claiming of the reduced rate of tax, described below, applicable to dividends received by certain non-corporate U.S. holders. Accordingly, the analysis of the creditability of Korean taxes and the availability of the reduced rate of tax for dividends received by certain non-corporate U.S. holders, each as described below, could be affected by actions taken by intermediaries in the chain of ownership between the holder of an ADS and our company.

Distributions on Common Shares or American Depositary Shares

Subject to the discussion below under Passive Foreign Investment Company Rules, the gross amount of distributions on our common shares or ADSs (including amounts withheld to reflect Korean withholding tax) will be taxable as dividends to the extent paid out of our current or accumulated earnings and profits (as determined under U.S. federal income tax principles). Such income (including withheld taxes) will be includable in your gross income as ordinary income on the day you actually or constructively receive it, in the case of our common shares, or the day actually or constructively received by the ADS depositary, in the case of ADSs. Such dividends will not be eligible for the dividends-received deduction allowed to corporations under the Code.

With respect to non-corporate U.S. holders, certain dividends received in taxable years beginning before January 1, 2011 from a qualified foreign corporation may be subject to reduced rates of taxation. A qualified foreign corporation

includes a foreign corporation that is eligible for the benefits of a comprehensive income tax treaty with the United States which the U.S. Treasury Department determines to be satisfactory for these purposes and which includes an exchange of information provision. The U.S. Treasury Department has determined that the Treaty meets these requirements, and we believe we are eligible for the benefits of the Treaty. A foreign corporation is also treated as a qualified foreign corporation with respect to dividends paid by that corporation on shares (or ADSs backed by such shares) that are readily tradable on an established securities market in the United States. Our common shares will generally not be considered readily tradable for these purposes. U.S. Treasury Department guidance indicates that securities such as our ADSs, which are listed on the New York Stock Exchange, are treated as readily tradable on an established securities market in the United States for these purposes. There can be no assurance that our ADSs will be considered readily tradable on an established securities market in later years. Non-

222

Table of Contents

corporate U.S. holders that do not meet a minimum holding period requirement during which they are not protected from a risk of loss or that elect to treat the dividend income as investment income pursuant to Section 163(d)(4) of the Code will not be eligible for the reduced rates of taxation regardless of our status as a qualified foreign corporation. In addition, the rate reduction will not apply to dividends if the recipient of a dividend is obligated to make related payments with respect to positions in substantially similar or related property. This disallowance applies even if the minimum holding period has been met. Furthermore, non-corporate U.S. holders will not be eligible for the rate reduction if we are a passive foreign investment company (as discussed below under Passive Foreign Investment Company Rules) in the taxable year in which such dividends are paid or were a passive foreign investment company in the preceding taxable year. If you are a non-corporate U.S. holder, you should consult your own tax advisor regarding the application of these rules given your particular circumstances.

The amount of any dividend paid in Korean Won will equal the U.S. dollar value of the Korean Won received calculated by reference to the exchange rate in effect on the date you receive the dividend, in the case of our common shares, or the date received by the ADS depositary, in the case of ADSs, regardless of whether the Korean Won are converted into U.S. dollars. If the Korean Won received are not converted into U.S. dollars on the day of receipt, you will have a basis in the Korean Won equal to their U.S. dollar value on the date of receipt. Any gain or loss realized on a subsequent conversion or other disposition of the Korean Won will be treated as United States source ordinary income or loss.

Subject to certain significant conditions and limitations, Korean taxes withheld from dividends (at a rate not exceeding the rate provided in the Treaty) will be treated as foreign income taxes eligible for credit against your U.S. federal income tax liability. See Korean Taxation Taxation of Dividends on Shares of Common Stock or American Depositary Shares for a discussion of the Treaty rate. Korean taxes withheld in excess of the rate provided in the Treaty will not be eligible for credit against your U.S. federal income tax until you exhaust all effective and practical remedies to recover such excess withholding, including the seeking of competent authority assistance from the Internal Revenue Service. For purposes of the foreign tax credit, dividends paid on our common shares or ADSs will be treated as income from sources outside the United States and will generally constitute passive category income. If you do not elect to claim a credit for any foreign taxes paid during a taxable year, you may instead elect, subject to certain limitations, to claim a deduction in respect of such foreign taxes, provided that you apply this election to all foreign taxes paid or accrued in the taxable year.

Further, in certain circumstances, if you have held our common shares or ADSs for less than a specified minimum period during which you are not protected from risk of loss, or are obligated to make payments related to the dividends, you will not be allowed a foreign tax credit for foreign taxes imposed on dividends paid on our common shares or ADSs. The rules governing the foreign tax credit are complex. You are urged to consult your tax advisors regarding the availability of the foreign tax credit under your particular circumstances.

To the extent that the amount of any distribution exceeds our current and accumulated earnings and profits for a taxable year, as determined under U.S. federal income tax principles, the distribution will first be treated as a tax-free return of capital, causing a reduction of your adjusted basis in our common shares or ADSs (thereby increasing the amount of gain, or decreasing the amount of loss, to be recognized by you on a subsequent disposition of our common shares or ADSs), and the balance in excess of adjusted basis will be taxed as capital gain recognized on a sale or exchange. Consequently, such distributions in excess of our current and accumulated earnings and profits would generally not give rise to foreign source income and you would generally not be able to use the foreign tax credit arising from any Korean withholding tax imposed on such distributions unless such credit can be applied (subject to applicable limitations) against U.S. federal income tax due on other foreign source income in the appropriate category for foreign tax credit purposes. However, we do not expect to determine earnings and profits in accordance with U.S. federal income tax principles. Therefore, you should expect that a distribution will be reported and generally be treated as a dividend (as discussed above).

Distributions of our common shares (including ADSs) or rights to subscribe for our common shares that are received as part of a pro rata distribution to all of our shareholders (including holders of ADSs) generally will not be subject to U.S. federal income tax to recipient common shareholders (including holders of ADSs). Consequently, such distributions will not give rise to foreign source income and you will not be able to use the foreign tax credit

223

Table of Contents

arising from any Korean withholding tax unless such credit can be applied (subject to applicable limitations) against U.S. tax due on other income derived from foreign sources.

Disposition of Common Shares or American Depositary Shares

Subject to the discussion under Passive Foreign Investment Company Rules, upon the sale, exchange or other disposition of our common shares or ADSs, you generally will recognize capital gain or loss equal to the difference between the amount realized upon the sale, exchange or other disposition and your adjusted tax basis in our common shares or ADSs, as the case may be. The capital gain or loss will be long-term capital gain or loss if at the time of sale, exchange or other disposition, our common shares or ADSs have been held for more than one year. Capital gains of individuals derived with respect to capital assets held for more than one year are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations. Any gain or loss you recognize on the sale, exchange or other disposition of our common shares or ADSs will generally be treated as United States source gain or loss. Consequently, you may not be able to use the foreign tax credit arising from any Korean tax imposed on the disposition of our common shares or ADSs unless such credit can be applied (subject to applicable limitations) against tax due on other income treated as derived from foreign sources.

You should note that any Korean securities transaction tax generally will not be treated as a creditable foreign tax for U.S. federal income tax purposes, although you may be entitled to deduct such taxes, subject to applicable limitations under the Code.

Passive Foreign Investment Company Rules

Based upon the past and projected composition of our income and valuation of our assets, we do not believe that we were a passive foreign investment company (a PFIC) for 2009, and we do not expect to be a PFIC in 2010 or to become one in the foreseeable future, although there can be no assurance in this regard. However, PFIC status is a factual determination that is made annually. Accordingly, it is possible that we may become a PFIC in the current or any future taxable year due to changes in valuation or composition of our income or assets.

In general, we will be considered a PFIC for any taxable year if either:

at least 75% of our gross income is passive income; or

at least 50% of the value of our assets is attributable to assets that produce or are held for the production of passive income.

The 50% of value test is based on the average of the value of our assets for each quarter during the taxable year. For this purpose, passive income generally includes dividends, interest, royalties and rents (other than royalties and rents derived in the active conduct of a trade or business and not derived from a related person). Certain proposed U.S. Treasury regulations and other administrative pronouncements from the Internal Revenue Service provide special rules for determining the character of income and assets derived in the active conduct of a banking business for purposes of the PFIC rules. Specifically, these rules treat certain income earned by a non-U.S. corporation engaged in the active conduct of a banking business as non-passive income. Although we believe we have adopted a reasonable interpretation of the proposed U.S. Treasury regulations and administrative pronouncements, there can be no assurance that the Internal Revenue Service will follow the same interpretation. You should consult your own tax advisor regarding the application of these rules.

If we own at least 25% by value of another company s stock, we will be treated, for purposes of the PFIC rules, as owning our proportionate share of the assets and receiving our proportionate share of the income of that company.

If we are a PFIC for any taxable year during which you hold our common shares or ADSs, you will be subject to special tax rules with respect to any excess distribution that you receive and any gain you realize from the sale or other disposition (including a pledge) of our common shares or ADSs. These special tax rules generally will apply even if we cease to be a PFIC in future years. Distributions you receive in a taxable year that are greater than 125% of the average annual distributions you received during the shorter of the three preceding taxable years or

224

Table of Contents

your holding period for our common shares or ADSs will be treated as excess distributions. Under these special tax rules:

the excess distribution or gain will be allocated ratably over your holding period for our common shares or ADSs;

the amount allocated to the current taxable year, and any taxable year prior to the first taxable year in which we are a PFIC, will be treated as ordinary income; and

the amount allocated to each other year will be subject to tax at the highest tax rate in effect for that year, and the interest charge generally applicable to underpayments of tax will be imposed on the resulting tax attributable to each such year.

In certain circumstances, you could make a mark-to-market election, under which in lieu of being subject to the special rules discussed above, you will include gain on our common shares or ADSs on a mark-to-market basis as ordinary income, provided that our common shares or ADSs are regularly traded on a qualified exchange or other market. Our common shares are listed on the Korea Exchange, which must meet certain trading, listing, financial disclosure and other requirements to be treated as a qualified exchange under applicable U.S. Treasury regulations for purposes of the mark-to-market election, and no assurance can be given that the common shares are or will continue to be regularly traded for purposes of the mark-to-market election. Our ADSs are currently listed on the New York Stock Exchange, which constitutes a qualified exchange, although there can be no assurance that the ADSs are or will be regularly traded. If you make a valid mark-to-market election, you will include in each year as ordinary income the excess of the fair market value of your common shares or ADSs at the end of the year over your adjusted tax basis in the common shares or ADSs. You will be entitled to deduct as an ordinary loss each year the excess of your adjusted tax basis in the common shares or ADSs over their fair market value at the end of the year, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. If you make an effective mark-to-market election, any gain you recognize upon the sale or other disposition of your common shares or ADSs will be treated as ordinary income, and any loss will be treated as ordinary loss, but only to the extent of the net amount previously included in income as a result of the mark-to-market election.

A U.S. holder s adjusted tax basis in common shares or ADSs will be increased by the amount of any income inclusion and decreased by the amount of any deductions under the mark-to-market rules. If a U.S. holder makes a mark-to-market election, it will be effective for the taxable year for which the election is made and all subsequent taxable years unless the common shares or ADSs are no longer regularly traded on a qualified exchange or the Internal Revenue Service consents to the revocation of the election. You should consult your tax advisor about the availability of the mark-to-market election, and whether making the election would be advisable with respect to your particular circumstances.

In addition, a holder of common shares or ADSs in a PFIC can sometimes avoid the rules described above by electing to treat the company as a qualified electing fund under Section 1295 of the Code. This option is not available to you because we do not intend to comply with the requirements necessary to permit holders to make this election.

If you hold our common shares or ADSs in any year in which we are classified as a PFIC, you would be required to file Internal Revenue Service Form 8621.

Non-corporate U.S. holders will not be eligible for reduced rates of taxation on any dividends received from us in taxable years beginning prior to January 1, 2011, if we are a PFIC in the taxable year in which such dividends are paid or were a PFIC in the preceding taxable year. You should consult your tax advisor concerning the determination of our PFIC status and the U.S. federal income tax consequences of holding our common shares or ADSs if we are

considered a PFIC in any taxable year.

Information Reporting and Backup Withholding

In general, information reporting will apply to dividends in respect of our common shares or ADSs and the proceeds from the sale, exchange or redemption of our common shares or ADSs that are paid to you within the United States (and in certain cases, outside the United States), unless you are an exempt recipient. A backup

225

Table of Contents

withholding tax may apply to such payments if you fail to provide a taxpayer identification number or certification of other exempt status or fail to report in full dividend and interest income.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against your U.S. federal income tax liability provided the required information is timely furnished to the Internal Revenue Service.

ITEM 12.D. Depositary Fees and Charges

Depositary Fees and Charges

Under the terms of the Deposit Agreement in respect of our American depositary shares (ADSs), the holder of ADSs may be required to pay the following fees and charges to Citibank, N.A., acting as depositary for our ADSs:

Item	Services	Fees	Paid by
1	Issuance of ADSs upon deposit of common shares (excluding issuances contemplated by items 3(b) and 5 below	Up to US\$5.00 per 100 ADSs (or fraction thereof) issued	Person depositing common shares or person receiving ADSs
2	Delivery of deposited securities against surrender of ADSs	Up to US\$5.00 per 100 ADSs (or fraction thereof) surrendered	Person surrendering ADSs for purpose of withdrawal of deposited securities or person to whom deposited securities are delivered
3	Distribution of (a) cash dividends or (b) ADSs pursuant to stock dividends	No fee, to the extent prohibited by the exchange on which the ADSs are listed. If the charging of such fee is not prohibited, the fees specified in item 4 below shall be payable	Person to whom distribution is made
4	Distribution of (a) cash proceeds (i.e., upon sale of rights and other entitlements) or (b) free shares in the form of ADSs (not constituting a stock dividend)	Up to US\$2.00 per 100 ADSs (or fraction thereof) held	Person to whom distribution is made
5	Distribution of securities other than ADSs or rights to purchase additional ADSs (i.e., spinoff shares)	Up to US\$5.00 per 100 ADSs (or fraction thereof) distributed	Person to whom distribution is made
6	Depositary Services	Unless prohibited by the exchange on which the ADSs are listed, up to US\$2.00 per 100 ADSs (or fraction thereof) held as of the last day of each calendar year, except to the extent of any cash dividend fee(s) charged under paragraph (3)(a) above during the applicable calendar year	Person holding ADSs on last day of calendar year
7	Distribution of ADSs pursuant to exercise of rights to purchase additional ADSs	Up to US\$2.00 per 100 ADSs (or fraction thereof) held	Person who exercises such rights

Holders and beneficial owners of ADSs, persons depositing common shares for deposit and persons surrendering ADSs for cancellation and for the purpose of withdrawing deposited securities shall be responsible for the following charges:

- (i) taxes (including applicable interest and penalties) and other governmental charges;
- (ii) such registration fees as may from time to time be in effect for the registration of common shares or other deposited securities on the share register and applicable to transfers of common shares or other deposited securities to or from the name of the custodian, the depositary or any nominees upon the making of deposits and withdrawals, respectively;

227

Table of Contents

- (iii) such cable, telex and facsimile transmission and delivery expenses as are expressly provided in the Deposit Agreement to be at the expense of the person depositing or withdrawing common shares or holders and beneficial owners of ADSs;
- (iv) the expenses and charges incurred by the depositary in the conversion of foreign currency;
- (v) such fees and expenses as are incurred by the depositary in connection with compliance with exchange control regulations and other regulatory requirements applicable to common shares, deposited securities, ADSs and ADRs; and
- (vi) the fees and expenses incurred by the depositary, the custodian or any nominee in connection with the servicing or delivery of deposited securities.

Depositary fees payable upon the issuance and cancellation of ADSs are typically paid to the depositary by the brokers (on behalf of their clients) receiving the newly-issued ADSs from the depositary and by the brokers (on behalf of their clients) delivering the ADSs to the depositary for cancellation. The brokers in turn charge these transaction fees to their clients.

Depositary fees payable in connection with distributions of cash or securities to ADS holders and the depositary services fee are charged by the depositary to the holders of record of ADSs as of the applicable ADS record date. The depositary fees payable for cash distributions are generally deducted from the cash being distributed. In the case of distributions other than cash (*i.e.*, stock dividends, rights offerings), the depositary charges the applicable fee to the ADS record date holders concurrent with the distribution. In the case of ADSs registered in the name of the investor (whether certificated or un-certificated in direct registration), the depositary sends invoices to the applicable record date ADS holders. In the case of ADSs held in brokerage and custodian accounts via the central clearing and settlement system, The Depository Trust Company (DTC), the depositary generally collects its fees through the systems provided by DTC (whose nominee is the registered holder of the ADSs held in DTC) from the brokers and custodians holding ADSs in their DTC accounts. The brokers and custodians who hold their clients ADSs in DTC accounts in turn charge their clients accounts the amount of the fees paid to the depositary.

In the event of refusal to pay the depositary fees, the depositary may, under the terms of the Deposit Agreement, refuse the requested service until payment is received or may set- off the amount of the depositary fees from any distribution to be made to the ADS holder.

The fees and charges the ADS holders may be required to pay may vary over time and may be changed by us and by the depositary. The ADS holders will receive prior notice of such changes.

Depositary Payments for the Fiscal Year 2009

In 2009, we received the following payments from Citibank, N.A., acting as depositary for our ADSs:

Reimbursement of settlement infrastructure fees (including DTC fees)	US\$ 27,531.50
Reimbursement of proxy process expenses (printing, postage and distribution)	US\$ 32,656.46

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Control

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act) as of December 31, 2009. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can provide only reasonable assurance of achieving their control objectives. Based upon our evaluation, our chief executive officer and chief financial officer concluded that the design and operation of our disclosure controls and procedures as of December 31, 2009 were effective to provide reasonable assurance that information required to be disclosed by us in the reports we file and submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decision regarding required disclosure.

Management s Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, for our company. Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we have evaluated the effectiveness of our internal control over financial reporting as of December 31, 2009 based on the framework established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements in accordance with generally accepted accounting principles and includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of a company s assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that a company s receipts and expenditures are being made only in accordance with authorizations of a company s management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of a company s assets that could have a material effect on the consolidated financial statements. Because of its inherent limitations, a system of internal control over financial reporting can provide only reasonable assurance with respect to consolidated financial statement preparation and presentation and may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Based on this evaluation, our management concluded that the our internal control over financial reporting was effective as of December 31, 2009. The effectiveness of our internal control over financial reporting has been audited by KPMG Samjong, an independent registered public accounting firm, who has also audited our consolidated financial statements for the year ended December 31, 2009. KPMG Samjong has issued an attestation report on the effectiveness of our internal control over financial reporting under Auditing Standard No. 5 of the Public Company Accounting Oversight Board, which is included herein.

Attestation Report of the Independent Registered Public Accounting Firm

KPMG Samjong s attestation report on the effectiveness of internal control over financial reporting can be found on page F-3 of this annual report.

Changes in Internal Controls

There were no changes in our internal control over financial reporting during 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

229

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Our board of directors has determined that Ms. Sung Bin Chun, our outside director, and Mr. Yun Ke Sup, our outside director and the chairman of our Audit Committee, are audit committee financial experts, as such term is defined by the regulations of the Securities and Exchange Commission issued pursuant to Section 407 of the Sarbanes-Oxley Act of 2002. Ms. Chun and Mr. Yun are independent as such term is defined in Section 303A.02 of the NYSE Listed Company Manual, Rule 10A-3 under the Exchange Act and the Korea Stock Exchange listing standards.

ITEM 16B. CODE OF ETHICS

We have adopted a code of ethics for our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions as required under Section 406 of the Sarbanes-Oxley Act of 2002, together with an insider reporting system in compliance with Section 301 of the Sarbanes-Oxley Act. The code of ethics is available on our website www.shinhangroup.com. We have not granted any waiver, including an implicit waiver, from a provision of the code of ethics to any of the above-mentioned officers during our most recently completed fiscal year.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The following table sets forth the aggregate fees billed for professional services rendered by KPMG Samjong Accounting Corp. for the years ended December 31, 2007, 2008 and 2009, our principal accountants for the respective period, depending on the various types of services and a brief description of the nature of such services.

	Billed the Yea	ate Fees During r Ended ber 31,	
Type of Services	2008 (In million	2009 ns of Won)	Nature of Services
Audit fees	₩ 6,381	₩ 7,214	Audit service for Shinhan Financial Group and its subsidiaries.
Tax fees	259	287	Tax return and consulting advisory service.
All other fees	443	15	All other services which do not meet the three categories above.
Total	₩ 7,083	₩ 7,516	

Our audit committee generally pre-approves all engagements of our principal accountants pursuant to policies and procedures adopted by it. Our audit committee has adopted the following policies and procedures for consideration and approval of requests to engage our principal accountants to perform audit and non-audit services. Engagement requests must in the first instance be submitted as follows: (i) in the case of audit and non-audit services for our holding company, to our Planning & Financial Management subject to reporting to our Chief Financial Officer; and (ii) in the case of audit and non-audit services for our subsidiaries, to our Audit and Compliance Team subject to reporting to the Senior Executive Vice President of Audit & Compliance Team. If the request relates to services that would impair the independence of our principal accountants, the request must be rejected. If the engagement request relates to audit and permitted non-audit services, it must be forwarded to the Audit Committee for consideration. To

facilitate the consideration of engagement requests between its meetings, the Audit Committee has delegated approval authority of the following: (i) permitted non-audit services to our holding company, (ii) audit services to our subsidiaries and (iii) permitted non-audit services to our subsidiaries, to one of its members who is independent as defined by the Securities and Exchange Commission and the New York Stock Exchange. Such member in our case is Mr. Ke Sup Yun, the chairman of our Audit Committee, and he is required to report any approvals made by them to the Audit Committee at its next meeting. Our Audit Committee meets regularly once every quarter.

Any other audit or permitted non-audit service must be pre-approved by the audit committee on a case-by-case basis. Our audit committee did not pre-approve any non-audit services under the de minimis exception of Rule 2.01(c)(7)(i)(C) of Regulation S-X as promulgated by the Securities and Exchange Commission.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

ITEM 16E. PURCHASE OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

Neither we nor any affiliated purchaser, as defined in Rule 10b-18(a)(3) of the Exchange Act, purchased any of our equity securities during the period covered by this annual report.

ITEM 16F. CHANGE IN REGISTRANT S CERTIFYING ACCOUNTANT

Not applicable.

ITEM 16G. CORPORATE GOVERNANCE

We are committed to high standards of corporate governance. We are in compliance with the corporate governance provisions of the Korean Commercial Code, the Financial Holding Companies Act of Korea, the Financial Investment Services and Capital Markets Act and the Listing Rules of the Korea Exchange. We, like all other companies in Korea, must comply with the corporate governance provisions of the Korean Commercial Code. In addition, as a financial holding company, we are also subject to the Financial Holding Companies Act. Also, our subsidiaries that are financial institutions must comply with the respective corporate governance provisions under the relevant laws under which they were established.

We are a foreign private issuer (as such term is defined in Rule 3b-4 under the Exchange Act), and our ADSs are listed on the New York Stock Exchange, or NYSE. Under Section 303A of the NYSE Listed Company Manual, NYSE-listed companies that are foreign private issuers are permitted to follow home country practice in lieu of the corporate governance provisions specified by the NYSE with limited exceptions. Under the NYSE Listed Company Manual, we as foreign private issuers are required to disclose significant differences between NYSE s corporate governance standards and those we follow under Korean law. The following summarizes some significant ways in which our corporate governance practices differ from those followed by U.S. companies listed on the NYSE under the listing rules of the NYSE:

Majority of Independent Directors on the Board

Under the NYSE listing rules, U.S. companies listed on the NYSE must have a board the majority of which is comprised of independent director satisfying the requirements of independence as set forth in Rule 10A-3 under the Exchange Act. While as a foreign private issuer, we are exempt from this requirement, but our board of directors is in compliance with this requirement as it currently consists of 12 directors, of which eight directors satisfy the requirements of independence as set forth in Rule 10A-3 under the Exchange Act. Eight of our directors are also outside directors as defined in the Financial Holding Companies Act of Korea. An outside director for purposes of the Financial Holding Companies Act and the Korean Commercial Code means a director who does not engage in the regular affairs of the financial holding company, and who is elected at a shareholders meeting, after having been nominated by the outside director nominating committee, and none of the largest shareholder, those persons specially related to the largest shareholder of such company, persons who during the past two years have served as an officer or employee of such company, the spouses and immediate family members of an officer of such company, and certain other persons specified by law may qualify as an outside director of such company. Under the Korea Exchange listing rules and the Korean Commercial Code, at least one-fourth of a listed company s directors must be outside directors provided that there must be at least three outside directors. In the case of large listed companies as defined under the Korean Commercial Code, like us, a majority of the directors must be outside directors.

Executive Session

Under the NYSE listing rules, non-management directors of U.S. companies listed on the NYSE are required to meet on a regular basis without management present and independent directors must meet separately at least once per year. While no such requirement currently exists under applicable Korean law or listing standards, pursuant to

231

Table of Contents

the bylaws governing our board of directors, outside directors are required to hold two exclusive sessions each year in order to promote the exchange of diverse opinions by outside directors.

Audit Committee

Under the NYSE listing rules, listed companies must have an audit committee that has a minimum of three members, and all audit committee members must satisfy the requirements of independence set forth in Section 303A.02 of the NYSE Listed Company Manual and Rule 10A-3 under the Exchange Act. We are in compliance with this requirement as our audit committee comprises of three outside directors meeting the requirements of independence set forth in Section 303A.02 of the NYSE Listed Company Manual and Rule 10A-3 under the Exchange Act. Under the Korea Exchange listing rules and the Korean Commercial Code, a large listed company must also establish an audit committee of which at least two-thirds of its members must be outside directors and whose chairman must be an outside director. In addition, at least one member of the audit committee who is an outside director must also be an accounting or financial expert. We are also in compliance with the foregoing requirements.

Nomination/Corporate Governance Committee

Under the NYSE listing rules, U.S. companies listed on the NYSE must have a nomination/corporate governance committee composed entirely independent directors. In addition to identifying individuals qualified to become board members, this committee must develop and recommend to the board a set of corporate governance principles. Under the Korean Commercial Code and other applicable laws, large listed companies, financial holding companies, commercial banks, and certain other financial institutions are required to have an outside director nominating committee of which at least one-half of its members are required to be outside directors. However, there is no requirement to establish a corporate governance committee under applicable Korean law. We currently have an outside director recommendation committee and a board steering committee which manage corporate governance practices applicable to us. The outside director recommendation committee currently consists of five directors, including four outside directors. The chairman of the committee must be an outside director pursuant to our outside director recommendation committee regulations. The board steering committee consists of five directors, including four outside directors.

Compensation Committee

Under the NYSE listing rules, U.S. companies listed on the NYSE are required to have a compensation committee which is composed entirely of independent directors. While no such requirement currently exists under applicable Korean law or listing standards, we currently have a compensation committee composed of three outside directors. Two member of the compensation committee satisfies the independent director requirements as set forth in Rule 10A-3 under the Exchange Act.

Corporate Governance Guidelines and Code of Business Conduct and Ethics

Under the NYSE listing rules, U.S. companies listed on the NYSE are required to establish corporate governance guidelines and to adopt a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers. As a foreign private issuer, we are exempt from this requirement. While we have not adopted official corporate governance guidelines, our board of directors, outside director recommendation committee and the board steering committee review and determine corporate policies as needed to ensure efficient and transparent corporate governance practices. Pursuant to the requirements of the Sarbanes-Oxley Act, we have adopted a code of ethics applicable to our Chairman & Chief Executive Officer and all other directors and executive officers including the Chief Financial Officer and the Chief Accounting Officer, as well as all financial, accounting and other officers of Shinhan Financial Group and its subsidiaries that are involved in the

preparation and disclosure of Shinhan Financial Group s consolidated financial statements and internal control of financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act. We have also adopted an insider reporting system in compliance with Section 301 of the Sarbanes-Oxley Act. The code of ethics applicable to our executive officers as well as the financial officers of the holding company and its subsidiaries are available on our website www.shinhangroup.com. Several of our subsidiaries, including Shinhan

232

Table of Contents

Bank, Shinhan Investment and Shinhan Life Insurance, currently also have their own codes of business conduct and ethics.

Shareholder Approval of Equity Compensation Plans

Under the NYSE listing rules, shareholders of U.S. companies listed on the NYSE are required to approve all equity compensation plans. We currently have two equity compensation plans, consisting of a stock option plan for directors and key employees and an employee stock ownership plan for all employees. Stock options may be granted up to 20% of the total number of outstanding shares in accordance with the relevant rules set forth in our articles of incorporation. Under applicable Korean laws and our articles of incorporation, granting of stock options requires a special resolution at a shareholders meeting, which requires the approval of the holders of the shares representing at least two-thirds of those shares present or represented at such meeting and also representing at least one-third of the total issued and outstanding shares. Under applicable Korean laws and our articles of incorporation, stock options may be granted up to 1% of the total number of outstanding shares by a board of director, subject to the approval at the next shareholders meeting. Under the Framework Act on Workers Welfare and the Enforcement Decree thereunder, a Korean company may issue stock options up to 20% of its issued and outstanding shares by a resolution at the shareholders meeting with an individual limit of W6 million for any given year per each member of the employee stock ownership association, if permitted by the articles of incorporation. In addition, if a company is issuing stock options by a 10% of its issued and outstanding shares, only a board of director resolution is required for such issuance if permitted by the Articles of Incorporation. However, we have not adopted such provision in our articles of incorporation.

Annual Certification of Compliance

Under the NYSE listing rules, a chief executive officer of a U.S. company listed on the NYSE must annually certify that he or she is not aware of any violation by the company of NYSE corporate governance standards. As a foreign private issuer, we are not subject to this requirement. However, in accordance with rules applicable to both U.S. companies and foreign private issuers, we are required to promptly notify the NYSE in writing if any executive officer becomes aware of any material noncompliance with the NYSE corporate governance standards applicable to us. In addition, foreign private issuers, including us, are required to submit to the NYSE an annual written affirmation relating to compliance with Sections 303A.06 and 303A.11 of the NYSE listed company manual, which are the NYSE corporate governance standards applicable to foreign private issuers. All written affirmations must be executed in the form provided by the NYSE, without modification. An annual written affirmation is required to be submitted to the NYSE within 30 days of filing with the SEC our annual report on Form 20-F. We have been in compliance with this requirement in all material respects and plan to submit such affirmation within the prescribed time line.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM CONSOLIDATED FINANCIAL STATEMENTS

The Board of Directors and Stockholders Shinhan Financial Group Co., Ltd.:

We have audited the accompanying consolidated balance sheets of Shinhan Financial Group Co., Ltd. and its subsidiaries (the Group) as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in equity, and cash flows for each of the years in the three-year period ended December 31, 2009. These consolidated financial statements are the responsibility of the Group s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Shinhan Financial Group Co., Ltd. and its subsidiaries as of December 31, 2009 and 2008, the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 and 2 to the consolidated financial statements, in 2009, the Group changed its method of accounting for other-than temporary impairments on debt securities, business combinations and noncontrolling interests in subsidiaries. The Group also changed its method of accounting for fair value measurements in 2008 and uncertainty in income taxes and certain hybrid financial instruments in 2007.

The accompanying consolidated financial statements as of and for the year ended December 31, 2009 have been translated into United States dollars solely for the convenience of the reader. We have audited the translation and, in our opinion, the consolidated financial statements expressed in Korean Won have been translated into dollars on the basis set forth in Note 1 to the consolidated financial statements.

We also have audited, in accordance with the standards of Public Company Accounting Oversight Board (United States), the Group s internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated June 28, 2010 expressed an unqualified opinion on the effectiveness of the Group s internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM INTERNAL CONTROL OVER FINANCIAL REPORTING

The Board of Directors and Stockholders Shinhan Financial Group Co., Ltd.:

We have audited Shinhan Financial Group Co., Ltd. and its subsidiaries (the Group) internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Group s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying management s annual report on internal control over financial reporting. Our responsibility is to express an opinion on the Group s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Group maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Shinhan Financial Group, Co., Ltd. and its subsidiaries as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in equity and cash flows for each of the years in the three-year period ended December 31, 2009, and our report dated June 28, 2010 expressed an unqualified opinion on those consolidated financial statements.

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements December 31, 2007, 2008 and 2009

1. General Information and Summary of Significant Accounting Policies

Business

Shinhan Financial Group Co., Ltd. is a financial holding company incorporated in the Republic of Korea (Korea) under the Financial Holding Company Act of Korea. Shinhan Financial Group Co., Ltd. and its subsidiaries (collectively, the Group) engage in banking and a variety of related businesses to provide a wide range of financial services to corporations, governments, institutions and individuals.

The principal subsidiaries of the Group at December 31 are as follows:

	Country of	Percenta	ge of Owners	Ownership(1)	
	Incorporation	2007	2008	2009	
Shinhan Bank	Korea	100%	100%	100%	
Shinhan Investment Corp. (Formerly Good Morning	Korea				
Shinhan Securities Co., Ltd.)(2)		100%	100%	100%	
Shinhan Card Co., Ltd. (Formerly LG Card Co., Ltd.)(3)	Korea	100%	100%	100%	
Shinhan Capital Co., Ltd.	Korea	100%	100%	100%	
Jeju Bank	Korea	62.42%	62.42%	68.88%	
Shinhan Credit Information Co., Ltd.	Korea	100%	100%	100%	
Shinhan Private Equity Inc.	Korea	100%	100%	100%	
Shinhan Life Insurance Co., Ltd.	Korea	100%	100%	100%	
SHC Management Co., Ltd. (Formerly Shinhan Card Co.,	Korea				
Ltd.)(4)		100%	100%	100%	

Note:

- (1) Direct and indirect ownership are combined. All holdings are in common stock of the respective subsidiaries.
- (2) The former Good Morning Shinhan Securities Co., Ltd. changed its name to Shinhan Investment Corp. .
- (3) On March 23, 2007, the Group acquired 78.58% of the issued and outstanding common stock of LG Card Co., Ltd. (LG Card) where the Group had owned 7.15% interest through a tender offer. On September 21, 2007, the Group completed the acquisition of the remaining LG Card shares through a tender offer and share exchange, and the Group s ownership increased to 100%.
- (4) On October 1, 2007, LG Card acquired and assumed all assets, liabilities and contracts of the former Shinhan Card and changed its name to Shinhan Card . Also, the former Shinhan Card changed its name to SHC Management Co., Ltd. .

The Group is subject to the provisions of the Financial Holding Company Act of Korea. Shinhan Bank and Jeju Bank conduct operations in accordance with the provisions of the Bank Act of Korea, including their activities in the commercial banking business. Shinhan Bank and Jeju Bank also engage in the trust business subject to the Financial Investment Services and Capital Market Act (FSCMA) and other relevant laws.

Principles of Consolidation

The consolidated financial statements, presented in accordance with U.S. generally accepted accounting principles (US GAAP), include the accounts of Shinhan Financial Group Co., Ltd. and its majority-owned subsidiaries. The Group consolidates subsidiaries in which it holds, directly or indirectly, more than 50% of the voting rights or where it exercises control. All significant intercompany transactions and balances have been eliminated in consolidation. Operating results of companies purchased are included from the dates of the acquisition. Assets held in an agency or trust management capacities are not included in the consolidated financial

F-13

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

statements. The Group accounts for investments in companies in which it owns voting or economic interest of 20% to 50% and for which it has significant influence over operating and financing decisions using the equity method of accounting and the pro rata share of their income (loss) is included in other noninterest income (expense). Investments in joint ventures, where the Group does not have unilateral control, are also accounted for using the equity method of accounting. Investments in companies where the Group owns less than 20% and does not have the ability to exercise significant influence over operating and financing decisions are accounted for using the cost method of accounting. Income from these investments is recognized when dividends are received. As discussed below, the Group consolidates entities deemed to be variable interest entities (VIEs) when the Group is determined to be the primary beneficiary of the VIEs.

Variable Interest Entities

An entity is referred to as a variable interest entity (VIE) if it meets the criteria outlined in ASC 810, *Consolidation* (formerly FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities* (revised December 2003) (FIN 46(R)), which are: (1) the entity has equity that is insufficient to permit the entity to finance its activities without additional subordinated financial support from other parties, or (2) the entity has equity investors that cannot make significant decisions about the entity s operations or that do not absorb the expected losses or receive the expected residual returns of the entity.

In addition, a VIE must be consolidated by the Group if it is deemed to be the primary beneficiary of the VIE, which is the party involved with the VIE that has a majority of the expected losses or a majority of the expected residual returns or both.

Along with the VIEs that are consolidated in accordance with these guidelines, the Group has significant variable interests in other VIEs that are not consolidated because the Group is not the primary beneficiary. These include Special Purpose Entities (SPEs) where the Group provides credit enhancement or liquidity guarantees, and various investment trust funds. All other entities not deemed to be VIEs, with which the Group has involvement, are evaluated for consolidation under other subtopics of ASC 810 (formerly Accounting Research Bulletin (ARB) No. 51, Consolidated Financial Statements, SFAS No. 94, Consolidation of All Majority-Owned Subsidiaries and EITF Issue No. 04-5, Determining whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity when the Limited Partners Have Certain Rights).

Foreign Currency Translation

Assets, liabilities and operations of foreign branches and subsidiaries are recorded based on the functional currency of each entity. For certain foreign operations, the functional currency is the local currency or the US dollar, in which case assets and liabilities are translated, for consolidation purposes, at the current exchange rates from the local currency to the reporting currency, the Korean Won. Income and expenses are translated at the weighted-average exchange rate for the reporting period. The resulting translation adjustments are reported as a component of accumulated other comprehensive income within equity on an after-tax basis.

Foreign currency transactions executed by domestic Korean entities are accounted for at the exchange rates prevailing on the related transaction dates. Assets and liabilities denominated in foreign currencies are translated to the Korean Won using period-end exchange rates. Gains and losses resulting from the settlement of foreign currency transactions and from the translation of assets and liabilities denominated in foreign currencies are recognized in the consolidated

statements of income except for gains and losses arising from the translation of available-for-sale securities which are recorded as a component of accumulated other comprehensive income within equity on an after-tax basis.

F-14

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Use of Estimates

The preparation of the consolidated financial statements requires management of the Group to make certain estimates and assumptions relating to the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Significant items subject to such estimates and assumptions include allowances for loan losses and off-balance sheet credit instruments, impairment of goodwill and intangible assets, fair value measurements, consolidation decision for special purpose entities, contingent liabilities, future policy benefits, deferred policy acquisition costs, , valuation allowance for deferred tax assets, valuation of businesses acquired, useful lives of property and equipment and definite lived intangible assets, share-based compensation, valuation of derivative instruments and other than temporary impairment for securities. Actual results could differ from those estimates.

Cash and Cash Equivalents

For the purpose of the consolidated statements of cash flows, cash and cash equivalents include cash on hand, cash items in the process of collection, amounts due from banks and other financial institutions, all of which have original maturities within 90 days.

Securities Purchased under Resale Agreements and Securities Sold under Repurchase Agreements

Securities purchased under resale agreements and securities sold under repurchase agreements are treated as collateralized financing transactions and are carried on the consolidated balance sheets at the amount at which the securities will be subsequently resold or repurchased, including accrued interest, as specified in the respective agreements. Interest earned on resale agreements and interests incurred on repurchase agreements are reported as interest income and interest expense, respectively. The Group s policy is to take possession of securities purchased under agreements to resell. The market value of securities to be repurchased and resold is monitored, and additional collateral is obtained where appropriate to protect the Group against credit exposure.

Trading Assets and Liabilities, including Derivatives

Trading assets include securities that are bought and held principally for the purpose of selling them in the near term. Trading positions are carried at fair value and recorded on a trade date basis. The Group recognizes changes in the fair value of trading positions in net trading profits (losses). Interest and dividends are recognized when earned and included in interest and dividends on trading assets.

Fair value of trading positions is generally based on quoted market prices or quoted market prices for similar assets and liabilities. If these market prices are not available, fair values are estimated based on dealer quotes, pricing models, discounted cash flow methodologies, or similar techniques for which the determination of fair value may require significant management judgment or estimation.

Trading assets and liabilities also include derivatives used for trading purposes and for non-trading purposes that do not qualify for hedge accounting which are recognized on the consolidated financial statements at fair value. Trading and non-trading derivatives include interest rate and foreign currency swaps, equity conversion options, credit indexed contracts, puts and calls, caps and floors, warrants, futures and forwards. The Group recognizes changes in the fair value of trading and non-trading derivatives that do not qualify for hedge accounting in net trading profits (losses).

For exchange-traded contracts, fair value is based on quoted market prices. For non-exchange traded contracts, fair value is based on dealer quotes, pricing models, discounted cash flow methodologies, or similar techniques for which the determination of fair value may require significant management judgment or estimation. Valuations of derivative assets and liabilities reflect the value of the instruments including adjustments associated with counterparty credit risk and the Group s nonperformance risk, respectively.

F-15

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Derivatives and Hedging Activities

As part of its asset and liability management process, the Group uses various derivative instruments including interest rate and foreign currency swaps to manage various interest rate and foreign exchange exposures or modify interest rate characteristics of various balance sheet accounts. Certain derivative contracts such as interest rate swaps and cross currency swaps are entered into for non-trading purposes and intended to serve as economic hedges of risk but do not qualify for hedge accounting.

The Group accounts for derivative and hedging activities in accordance with ASC 815-10 (formerly SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended (SFAS 133)), which requires that all derivative instruments be recorded on the balance sheet at their respective fair values. On the date a non-trading derivative contract is entered into, the Group designates the derivative as either a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge), a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge), a foreign-currency fair-value or cash-flow hedge (foreign currency hedge), or a hedge of a net investment in a foreign operation. For all hedging relationships the Group formally documents the hedging relationship and its risk-management objective and strategy for undertaking the hedge, the hedging instrument, the hedged item, the nature of the risk being hedged, how the hedging instrument s effectiveness in offsetting the hedged risk will be assessed prospectively and retrospectively, and a description of the method of measuring ineffectiveness. This process includes linking all derivatives that are designated as fair-value, cash-flow, or foreign-currency hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. The Group also formally assesses, both at the hedge s inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

Changes in the fair value of a derivative that is highly effective and that is designated and qualifies as a fair-value hedge, along with the loss or gain on the hedged asset or liability or unrecognized firm commitment of the hedged item that is attributable to the hedged risk, are recorded in earnings. Changes in the fair value of a derivative that is highly effective and that is designated and qualifies as a cash-flow hedge are recorded in other comprehensive income to the extent that the derivative is effective as a hedge, until earnings are affected by the variability in cash flows of the designated hedged item. Changes in the fair value of derivatives that are highly effective as hedges and that are designated and qualify as foreign-currency hedges are recorded in either earnings or other comprehensive income, depending on whether the hedge transaction is a fair-value hedge or a cash-flow hedge. However, if a derivative is used as a hedge of a net investment in a foreign operation, its changes in fair value, to the extent effective as a hedge, are recorded in the cumulative translation adjustments account within other comprehensive income. The ineffective portion of the change in fair value of a derivative instrument that qualifies as a cash-flow hedge is reported in earnings. Changes in the fair value of derivative trading instruments are reported in current period earnings.

The Group discontinues hedge accounting prospectively when it is determined that the derivative is no longer effective in offsetting changes in the fair value or cash flows of the hedged item, the derivative expires or is sold, terminated, or exercised, the derivative is no longer designated as a hedging instrument because it is unlikely that a forecasted transaction will occur, a hedged firm commitment no longer meets the definition of a firm commitment, or management determines that designation of the derivative as a hedging instrument is no longer appropriate.

In all situations in which hedge accounting is discontinued and the derivative is retained, the Group continues to carry the derivative at its fair value on the balance sheet and recognizes any subsequent changes in its fair value in earnings.

When hedge accounting is discontinued because it is determined that the derivative no longer qualifies as an effective fair-value hedge, the Group no longer adjusts the hedged asset or liability for changes in fair value. The adjustment of the carrying amount of the hedged asset or liability is accounted for in the same manner as other components of the carrying amount of that asset or liability. When hedge accounting is discontinued because the hedged item no longer meets the definition of a firm commitment, the Group removes any asset or liability that was recorded pursuant to recognition of the firm commitment from the balance sheet, and recognizes any gain or loss in

F-16

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

earnings. When it is probable that a forecasted transaction will not occur, the Group discontinues hedge accounting if not already done and recognizes immediately in earnings gains and losses that were accumulated in other comprehensive income.

The short-cut method of hedge accounting assumes no ineffectiveness in a hedging relationship involving an interest rate swap and an interest-bearing asset or liability. The changes in the fair value or cash flows that are attributable to the risk being hedged will be completely offset at the hedge s inception and on an on-going basis. Under the short-cut method, among other requirements, the critical terms of the derivative instrument and the hedged item should be initially the same and subsequently stay the same throughout the hedge s life to support the ongoing application of hedge accounting.

Certain Hybrid Financial Instruments

In accordance with ASC 851-15 (formerly SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments* (SFAS 155)), hybrid financial instruments—such as structured notes containing embedded derivatives that otherwise would require bifurcation, as well as certain interest-only instruments—may be accounted for at fair value if the Group makes an irrevocable election to do so on an instrument-by-instrument basis. The changes in fair value are recorded in current earnings. On January 1, 2007, the Group adopted fair value election on certain hybrid financial instruments and as a result, the opening balance of retained earnings as of January 1, 2007 has been decreased by \textstyle{\textstyle{W}}274 million.

Securities

Securities primarily consist of asset-backed securities and debt securities issued by Korean Treasury, financial institutions and corporations as well as marketable equity securities. The Group classifies its debt securities in one of three categories: trading, available-for-sale, or held-to-maturity and its equity securities into trading or available-for-sale. Trading securities are bought and held principally for the purpose of selling them in the near term. Held-to-maturity debt securities are those securities in which the Group has the positive intent and ability to hold the security until maturity. All securities not included in trading or held-to-maturity are classified as available-for-sale.

Available-for-sale securities are recorded at fair value. Held-to-maturity debt securities are recorded at amortized cost, adjusted for the amortization or accretion of premiums or discounts. Unrealized holding gains and losses, net of the related tax effect, on available-for-sale securities are excluded from earnings and are reported as a separate component of other comprehensive income until realized. Realized gains and losses from the sale of available-for-sale securities are determined using the moving average method for equity securities or specific identification method for debt securities.

As of January 1, 2009, the Group adopted FSP FAS 115-2 and FAS 124-2 (now ASC 320-10, *Investments-Debt and Equity Securities: Recognition of an Other-than-temporary impairment*, OTTI) (formerly FSP FAS 115-2 and FAS 124-2). OTTI must be recognized if an investor has the intent to sell the debt security or if it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. In addition, the guidance changes the amount of impairment to be recognized in current-period earnings when an investor does not have the intent to sell, or if it is more likely than not that it will not be required to sell the debt security, as in these cases only the amount of the impairment associated with credit losses is recognized in income, while the rest of the fair value loss is recognized in other comprehensive income. But declines in the fair value of available-for-sale equity securities below their cost that are deemed to be other-than-temporary are recorded in earnings. When the Group does

not intend to sell available-for-sale equity or debt securities in an unrealized loss position, potential OTTI is considered using a variety of factors, including the length of time and extent to which the market value has been less than cost; adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; payment structure of the security; changes to the rating of the security s issuer; the volatility of the fair value changes; and changes in fair value of the security after the balance

F-17

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

sheet date. For equity securities, the Group considers the above factors, as well as the Group s intent and ability to retain its investment for a period of time sufficient to allow for any anticipated recovery in market value, and whether evidence exists to support a realizable value equal to or greater than the carrying value.

Premiums and discounts are amortized or accreted over the life of the related held-to-maturity or available-for-sale security as an adjustment to yield using the effective interest method. Dividend and interest income are recognized when earned.

Certain equity securities that do not have readily determinable fair values or have sales restrictions exceeding one year are classified as other investments under other assets. For investments in which the Group has significant influence over the investees, the equity method is applied. Certain alternative investments which meet both of the criteria under ASC 820-10-15-4 are measured at fair value determined by net asset value per share and the resulting valuation gain or loss is recognized through profit or loss which is recorded in non-interest income. All the other equity securities included in the category of other investments are recorded using the cost method under which there is no change to the cost basis unless there is other-than-temporary decline in value. If the decline is determined to be other-than-temporary, the Group writes down the cost basis of the investment to its fair value. The amount of write-down is included in earnings under non-interest expense and dividend income earned on these securities is recorded in non-interest income.

Shinhan National Pension Service PEF 1st and Shinhan PEF 2nd, the Group s subsidiaries, engage exclusively in venture capital activities. Venture capital investments are not within the scope of ASC 320-10 (formerly SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (SFAS 115)), and are subject to specialized industry accounting for investment companies. Venture capital investments are recorded as trading assets and are carried at fair value with net changes in fair value recognized in net trading profits (losses). The fair values of publicly-traded securities held by these subsidiaries are generally based on quoted market prices. Securities that are held by these subsidiaries that are not publicly traded are initially recorded at cost, which is deemed to approximate the fair value as of the acquisition date. Subsequent to acquisition, management estimates the fair value based on investee transactions with unaffiliated parties, management s review of the investee s financial results and condition or the latest obtainable net asset value of the investees.

Loans

Loans are reported at their outstanding principal balances net of any unearned income, charge-offs, unamortized deferred fees and costs on originated loans, and premiums or discounts on purchased loans. Loan origination fees and certain direct origination costs are deferred and recognized as adjustments to income over the lives of the related loans. Unearned income, discounts and premiums are amortized using methods that approximate the effective interest method.

The Group generally ceases the accrual of interest when principal or interest payments become past due. Any unpaid interest previously accrued on such loans is reversed from income, and thereafter interest is recognized only to the extent payments are received. In applying payments on delinquent loans, payments are applied first to delinquent interest and normal interest, and then to principal until it is paid in full. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current. Interest accruals are continued for past-due loans collateralized by customer deposits.

Securities received by the Group involving loans that are restructured or settled are recorded at fair value of the security at the date of restructuring or settlement. Any difference between the security s fair value and the net carrying amount of the loan is recorded as a charge-off or recovery, as appropriate.

Transfers of loans to third parties are accounted for as sales when control is surrendered to the transferee. The Group derecognizes such loans from the balance sheet including any related allowance and deferred loan origination costs, and recognizes all assets obtained, and liabilities incurred, including any recourse obligations to the transferee, at fair value. Any resulting gain or loss on the sales is recognized in earnings. Conversely, the

F-18

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Group recognizes loans transferred from third parties on the balance sheet when the Group obtains control of the loans or participates in a loan originated by another financial institution.

The Group provides equipment financing to its customers through a variety of lease arrangements. Direct financing leases are carried at the sum of the aggregate of minimum lease payments receivable, estimated unguaranteed residual value of the lease property and unamortized initial direct costs, less unearned income. Unearned income and initial direct costs are amortized to income using the effective interest method.

The Group purchases loans with and without evidence of credit quality deterioration since origination. Those loans with evidence of credit quality deterioration for which it is probable, at the time of acquisition, that all amounts due according to the contractual terms of the loan agreement will not be collected are accounted for under ASC 310-30 (formerly AICPA Statement of Position (SOP) 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (SOP 03-3)). The Group analyzes for differences between contractual cash flows and cash flows expected to be collected from an investor s initial investment in loans acquired in a transfer and if those differences are attributable, at least in part, to credit quality, such loans are recorded at fair value and carrying over or the creation of valuation allowances in the initial accounting of loans acquired in a transfer is prohibited. The prohibition of the valuation allowance carryover applies to the purchase of an individual loan, a pool of loans, a group of loans, and loans acquired in a purchase business combination. The excess of cash flows expected at purchase over the purchase price is recorded as interest income over the life of the loan. For those loans not within the scope of ASC 310-30, any difference between the purchase price and the par value of the loan is reflected in interest income over the life of the loan.

Allowance for Loan Losses

The Group s allowance for loan losses is based upon management s continuing review and evaluation of the loan portfolio and is management s best estimate of probable losses that have been incurred as of the balance sheet date. The determination of the allowance for loan losses hinges upon various judgments and assumptions, including but not limited to, management s assessment of probable losses on individual loans, domestic and international economic conditions, loan portfolio composition, transfer risks and prior loan loss experience. The allowance for loan losses is increased by the provision for loan losses, which is charged against current period operating results and decreased by the amount of charge-offs, net of recoveries.

The Group s allowance for loan losses consists of (a) specific allowances for specifically identified impaired borrowers, and (b) general allowances for homogeneous pools of commercial and consumer loans, and other loans which are not specifically identified as impaired.

A commercial loan is considered impaired when, after consideration of current information and events, it is probable that the Group will be unable to collect all amounts due, including principal and interest, according to the contractual terms of the loan agreement. The Group considers the following types of loans to be impaired:

Loans classified as substandard or below according to asset classification guidelines of the Financial Services Commission (FSC) of the Republic of Korea.

Loans that are more than 90 days past due; and

Loans which are troubled debt restructurings under US GAAP

Once a loan has been identified as individually impaired, impairment is measured in accordance with ASC 310-10 (formerly SFAS No. 114, *Accounting by Creditors for Impairment of a Loan*, as amended by SFAS 118 (SFAS 114)). The Group s measurement of the impairment of a loan, with the exception of large groups of smaller-balance homogeneous loans that are collectively evaluated for impairment, is based on the present value of expected future cash flows discounted at the loan s effective interest rate or, as a practical expedient, on the loan s observable market price or on the fair value of the collateral if the loan is collateral dependent. If the resulting value is less than the book value of the loan, a specific allowance is established for an amount equal to the difference. Any

F-19

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

amounts deemed uncollectible are charged against the allowance for loan losses. Recoveries of previously charged-off amounts are credited to the allowance for loan losses. Impairment criteria are applied to the entire loan portfolio, exclusive of leases and smaller-balance homogeneous loans such as residential mortgage, consumer loans and credit cards, which are evaluated collectively for impairment. Smaller-balance commercial loans, managed on a portfolio basis, are also evaluated collectively for impairment.

The allowance for non-impaired corporate loans, consumer loans and credit card loans is determined using several modeling tools, including a delinquency roll-rate model for credit cards, as well as a risk rating migration model for homogeneous pools of consumer and commercial loans. The loss factors developed through the use of such models are based on the Group s historical loss experiences and may be adjusted for significant factors that, in management s judgment, affect the collectibility of the portfolio as of the evaluation date.

The Group charges off unsecured consumer and credit card loan amounts past due greater than 180 days and the amount deemed uncollectible on financing leases is charged off when past due greater than one year.

Allowance for Off-Balance Sheet Credit Instruments

The Group maintains an allowance for credit losses on off-balance sheet credit instruments, such as commitments to extend credit, guarantees, acceptances, standby and commercial letters of credit and other financial instruments to absorb estimated probable losses related to these unfunded credit facilities. The allowance is estimated based on the assessment of the probability of commitment usage and credit risk factors for loans outstanding to these same customers. The allowance for credit losses for off-balance sheet credit instruments is included in other liabilities.

Following the implementation of a policy by the Korea Fair Trade Commission effective April 2008 that prohibited a unilateral lowering by the credit card company of the credit card limit of a cardholder except in the case of an impairment in the cardholder s ability to repay, the Group established additional allowance for unfunded credit card commitments with respect to the unused credit card limit as the Group no longer control the unfunded credit card commitments.

The Group also began to apply, with respect to the off-balance sheet unused credit card limits, the same methodology used in calculating probabilities of default (PDs) with respect to credit card receivables, considering the current unstable financial market conditions as well as increased gross charge offs in the fiscal year 2009 compared to the fiscal year 2008. Previously, the Group applied a lower set of PDs to off-balance sheet unsued credit limits than to credit card receivables.

Foreclosed Assets

Assets acquired through, or in lieu of, loan foreclosures are held for sale and are initially recorded at fair value at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, the assets are carried at the lower of their carrying amounts or fair values, less cost to sell, based on periodic valuation reviews performed by management. Revenues and expenses from operations and changes in the valuation allowance are included in other non-interest expense.

Securitizations

The Group primarily securitizes corporate loans, credit card receivables, mortgages and student loans.

There are two key accounting determinations that must be made relating to securitizations. First, in the case where the Group originated or owned the financial assets transferred to the securitization entity, a decision must be made as to whether that transfer is considered a sale under generally accepted accounting principles. If it is a sale, the transferred assets are removed from the Group s consolidated balance sheets with a gain or loss recognized.

F-20

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Alternatively, when the transfer is not considered as a sale but rather a financing, the assets will remain on the Group s consolidated balance sheets with an offsetting liability recognized in the amount of proceeds received.

Second, determination must be made as to whether the securitization entity is sufficiently independent. If so, the entity would not be included in the Group s consolidated financial statements. For each securitization entity with which it is involved, the Group makes a determination of whether the entity should be considered a subsidiary of the Group and be included in its consolidated financial statements or whether the entity is sufficiently independent that it does not require consolidation. If the securitization entity s activities are sufficiently restricted to meet accounting requirements to be a Qualifying Special Purpose Entities (QSPE), the securitization entity is not consolidated by the seller of transferred assets. If the securitization entity is determined to be a VIE, the Group consolidates the VIE, if it is the primary beneficiary.

Interest in the securitized and sold loans may be retained in the form of subordinated debts. Retained interests are primarily recorded as available-for-sale investments. Gains or losses on securitization and sale depend in part on the previous carrying amount of the loans involved in the transfer and proceeds are allocated between the loans sold and the retained interests based on their relative fair values at the date of sale. Gains are recognized at the time of securitization and are reported in non-interest income or expense.

The Group values its securitized retained interest at fair value using either financial models, quoted market prices, or sales of similar assets. Where quoted market prices are not available, the Group estimates the fair value of these retained interests by determining the present value of expected future cash flows using modeling techniques that incorporate management s best estimates of key assumptions, including prepayment speeds, credit losses, and discount rates.

Transfers of Financial Assets

For a transfer of financial assets to be considered a sale, the assets must have been isolated from the Group, even in bankruptcy or other receivership; the purchaser must have the right to sell or pledge the assets transferred, or the purchaser must be a qualifying special purpose entity (QSPE) and the Group does not maintain effective control. If these sale requirements are met, the assets are removed from the Group's consolidated balance sheet. If the conditions for sale are not met, the transfer is considered to be a secured borrowing, and the assets remain on the consolidated balance sheet. The sale proceeds are recognized as the Group's liability. A legal opinion on a sale is generally obtained for complex transactions or where the Group has continuing involvement with assets transferred or with the securitization entity. Those opinions must state that the asset transfer is considered a sale and that the assets transferred would not be consolidated with other assets in the event of the Group's insolvency.

Premises and Equipment

Buildings, equipment and furniture, leasehold improvements and operating lease assets are stated at cost less accumulated depreciation and amortization. Equipment under capital leases are stated at the present value of minimum lease payments less unguaranteed residual value. Depreciation of buildings and operating lease assets is calculated on the straight-line method over the estimated useful lives of the assets. Depreciation of equipment and furniture is calculated on a declining balance method over the estimated useful lives of the assets. Equipment under capital leases and leasehold improvements are amortized using the straight-line method over the shorter of the lease term or estimated useful lives of the assets. Gains or losses on sale of premises and equipment are determined by reference to

their carrying amounts. Maintenance and repairs are charged to expense as incurred.

The Group capitalizes certain direct costs related to developing software for internal use, and amortizes such costs on a straight-line basis once the software is available for use in accordance with the ASC 350-40 (formerly SOP 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*).

F-21

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The estimated useful lives of premises and equipment are as follows:

Buildings40 yearsEquipment and furniture4~5 yearsLeasehold improvements5 yearsOperating lease assets3~5 yearsCapitalized software costs4~5 years

Goodwill and Intangible Assets

Goodwill represents the cost of an acquired business in excess of the fair value of the net assets acquired. Other intangible assets represent purchased assets that also lack physical substance but can be distinguished from goodwill because of contractual or other legal rights, or because the asset is capable of being sold or exchanged either on its own or in connection with a related contract, asset, or liability. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually in accordance with the provisions of ASC 350-10 (formerly SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS 142)). Intangible assets with estimable useful lives are amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with ASC 360-10 (formerly SFAS No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets* (SFAS 144)).

The Group s finite-lived intangible assets are comprised of core deposit, credit card relationship, brokerage customer relationship and Korea Securities Finance Corporation (KSFC) deposit and valuation of business acquired (VOBA) intangibles. Core deposit intangibles represent the value of the funding provided by a base of acquired demand and savings accounts, which the Group can expect to maintain for an extended period of time because of generally stable customer relationships. Credit card relationship and brokerage customer relationship intangibles reflect the value of revenues to be derived from a base of acquired customer credit card and brokerage accounts—activities, which the Group can expect to maintain for an extended period of time. KSFC deposit intangibles represent the positive spread realized on the differences between the interest rate paid to the customers and the interest rate paid on the deposit with KSFC, which the Group can expect to maintain for an extended period of time. VOBA intangible represents the present value of future profits embedded in the acquired business, which is determined by estimating the net present value of future cash flows from the contracts in force at the date of acquisition. The Group has established VOBA primarily for its acquired traditional, interest-sensitive and variable businesses. Each of the traditional and interest-sensitive businesses is composed of life insurance and annuity contacts.

The finite-lived intangibles except VOBA are amortized using sum-of-the-years—digit method over their estimated useful lives, which range from 1 to 18 years. The estimated weighted-average life of brokerage customer relationship intangibles, KSFC deposit intangibles and Shinhan Bank—s core deposit intangibles and credit card relationship intangibles are approximately 3, 3, 9 and 6 years, respectively, reflecting the run-off of economic value. VOBA is amortized over the effective lives of the acquired contracts. For acquired traditional business, VOBA is amortized in proportion to gross premiums of insurance in force, as applicable. For acquired interest-sensitive and variable businesses, VOBA is amortized in proportion to gross profits arising from the contracts and anticipated future experience, which is evaluated regularly.

The Group s indefinite-lived intangible assets are composed of court deposits of Shinhan Bank and KSFC borrowings. Court deposit intangible asset represents the value of the funding provided by a base of court deposit accounts acquired in a business combination which the Group can expect to maintain for an indefinite period because that court deposit will be maintained indefinitely once appointed by courts. KSFC borrowing represents the value of the low cost funding from KSFC compared to the next available funding source in the market, and the

F-22

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Group expects to benefit from the borrowing agreement indefinitely because that borrowing agreement lasts indefinitely in accordance with the Securities and Exchange Act of Korea.

Deferred Policy Acquisition Costs (DAC)

Deferred Policy Acquisition Costs (DAC), included in other assets, represent the costs of acquiring new business, principally commissions, certain underwriting and agency expenses directly attributable to the policies written, and the cost of issuing policies.

For traditional business, DAC is amortized over the premium-paying periods of the related policies, in proportion to the ratio of the annual premium revenue to the total anticipated premium revenue in accordance with ASC 944-20 (formerly SFAS No. 60, *Accounting and Reporting by Insurance Enterprises* (SFAS 60)). Assumptions as to the anticipated premiums are made at the date of policy issuance or acquisition and are consistently applied over the life of the policy.

For interest-sensitive and variable businesses, DAC is amortized at a constant rate based upon the present value of estimated gross profits expected to be realized in accordance with ASC 944-20 (formerly SFAS No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from Sale of Investments* (SFAS 97)). The effect of changes in estimated gross profits on unamortized deferred acquisition costs is reflected in the period such estimated gross profits are revised.

Deferred policy acquisition costs are reviewed to determine if they are recoverable from future income, including investment income, and, if not recoverable, are charged to expense. All other acquisition expenses are charged to operations as incurred.

Future Policy Benefits

The Group s liability for future policy benefits is primarily comprised of the present value of estimated future payments to or on behalf of policyholders, where the timing and amount of payment depends on policyholder mortality or morbidity, less the present value of future net premiums. Major assumptions used for future policy benefits are mortality and interest rate. Expected mortality is generally based on the Group s historical experience and the standard industry table including a provision for the risk of adverse deviation. Interest rate assumptions are based on factors such as market conditions and expected investment returns. Although mortality and interest rate assumptions are locked-in upon the issuance of new insurance or annuity business with fixed and guaranteed terms, significant changes in experience or assumptions may require the Group to provide for expected future losses on a product by establishing premium deficiency reserves. Premium deficiency reserves, if required, are determined based on assumptions at the time the premium deficiency reserve is established and do not include a provision for the risk of adverse deviation.

The Group s liability for future policy benefits also includes a liability for unpaid claims and claim adjustment expenses. The Group does not establish loss reserves until a loss has occurred. However, unpaid claims and claim adjustment expenses include estimates of claims that the Group believes have been incurred but have not yet been reported as of the balance sheet date. The Group s liability for future policy benefits also includes liabilities for guarantee benefits related to certain nontraditional long-duration life and annuity contracts and unearned revenue.

Separate Account Assets and Liabilities

Separate account assets and liabilities are reported at fair value and represent segregated funds that are invested for certain policyholders. The assets consist of equity securities, policy loans and cash equivalents. The assets of each account are legally segregated and are generally not subject to claims that arise out of any other business of the Group. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Group with respect to certain accounts. The investment income and gains or losses for separate accounts generally accrue to the policyholders and are not included in the consolidated

F-23

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

statements of income. Separate account assets and liabilities are included in other assets and accrued expenses and other liabilities, respectively, and amounted to \wideta716,737 million and \wideta1,090,887 million as of December 31, 2008 and 2009, respectively.

Insurance Premium

Insurance Premiums from long-duration contracts, other than interest-sensitive life contracts, are earned when due as determined by the respective contract and estimates for premiums due but not yet collected are accrued. Premium collected for interest-sensitive contracts are not reported as revenue in the consolidated statements of income. Premiums from short-duration insurance contracts, principally accident and health policies, are earned over the related contract period.

Impairment

In accordance with ASC 360-10 (formerly SFAS 144), long-lived assets, such as premises, and equipment, and purchased intangible assets subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Recoverability of assets to be held and used is measured by comparing the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows or quoted market prices in active markets if available, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of would be separately presented in the consolidated balance sheet and reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated. The assets and liabilities of a disposal group classified as held for sale would be presented separately in the appropriate asset and liability sections of the consolidated balance sheet.

Goodwill and intangible assets that have indefinite useful lives are tested annually for impairment, and are tested for impairment more frequently if events and circumstances indicate that the asset might be impaired. An impairment loss is recognized to the extent that the carrying amount exceeds the asset s fair value. For goodwill, the impairment determination is made at the reporting unit level and consists of two steps. First, the Group determines the fair value of a reporting unit and compares it to its carrying amount. Second, if the carrying amount of a reporting unit exceeds its fair value, an impairment loss is recognized for any excess of the carrying amount of the reporting unit s goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to purchase price allocation, in accordance with ASC 805-10 (formerly SFAS No. 141, *Business Combinations* (SFAS 141)). The residual fair value after this allocation is the implied fair value of the reporting unit s goodwill.

Share-Based Compensation

The Group uses a fair value method of accounting for share-based compensation provided to its employees and key executives. The Group values stock options issued based upon an option-pricing model and recognizes this value as an expense, adjusted for forfeitures, over the period in which the options are vested.

Commissions and Fees

Commissions and fees primarily consist of brokerage fees and commissions, credit card fees, fees on guarantees and import/export letters of credit, and commissions received on remittance, cash dispenser service, cash management services and others. These fees are recognized over the period during which the related services are rendered.

F-24

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Net Trust Management Fees

The Group manages funds on behalf of its customers through operations of various trust accounts. The Group recognized such management fees when earned. The Group is also entitled to receive performance-based fees for certain trust accounts. These fees, if earned, are recognized at the end of the performance period. In addition, the Group is liable to compensate trust account holders for losses incurred in certain trust accounts, subject to minimum return and principal guarantees. Such losses arising from the trusts underperforming the guaranteed level are accrued at the end of each applicable year when they are considered probable and reasonably estimable, and are included in net trust management fees.

Co-Branding Credit Card Arrangements

The Group has co-brand arrangements with certain vendors that entitle a cardholder to receive benefits, such as airline frequent-flyer points, based on purchases made with the credit card. These arrangements have remaining terms not exceeding five years. The Group makes monthly payments to certain co-brand partners based on the volume of cardholders purchases and on the number of points awarded to cardholders, and to the other co-brand partners, based on the numbers of points redeemed by the cardholders. The payments to the co-brand partners is estimated based on historical payment experience and is recorded in accrued expenses and other liabilities.

Dormant Accounts

Customers deposits with a positive balance but no earnings for an extended period of time are considered dormant accounts. Prior to 2007, with respect to the dormant accounts after the legal discharge, and pursuant to the Korean Commercial Code, the Group estimated a redemption ratio based on past experience and recognized gain on dormant accounts excluding expected redemption amounts as other non-interest income. However, regulations on dormant accounts that were newly enacted in 2007 recommend balances on dormant accounts to be transferred to dormant account foundation and the Group elected to transfer only the dormant accounts of consumer deposits. Consequently, the Group has accounted for such amounts as other liabilities since 2007 and continuously recognized gain on dormant accounts of corporate deposits excluding expected redemption amounts as other non-interest income.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Deferred tax assets, including the tax effect on the tax loss carryforwards, are recognized to the extent it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets depends upon the generation of future taxable income during the periods in which those temporary differences become deductible. To the extent the deferred tax assets are not more likely than not realizable, a valuation allowance is recognized.

In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109* (FIN 48), currently coded as ASC 740-10. ASC 740-10 addresses the accounting for uncertainty in income tax positions by prescribing a consistent recognition threshold and measurement attribute for income tax positions taken or expected to be taken in an income tax return. ASC 740-10 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

F-25

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

ASC 740-10 requires a two-step process in evaluating income tax positions. In the first step, an enterprise determines whether it is more likely than not that an income tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Income tax positions meeting the more-likely-than-not recognition threshold are then measured to determine the amount of benefit eligible for recognition in the financial statements. Each income tax position is measured at the largest amount of benefit that is more likely than not to be realized upon settlement.

The Group adopted the provisions of ASC 740-10 on January 1, 2007, resulting in a cumulative effect of \$\fowardar{W}\$3,815 million increase to beginning retained earnings. Additionally, the Group elected to classify interest and penalties related to unrecognized tax benefits as a component of income tax expense. See Note 24 in the consolidated financial statements for further details regarding additional disclosures on ASC 740-10.

Earnings Per Share

Earnings per share is computed after recognition of preferred stock dividend requirements. Basic earnings per share is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised. It is computed after giving consideration to the weighted average dilutive effect of the Group s stock option, bonds with stock purchase warrants and redeemable convertible preferred stock. Dilutive potential common shares are calculated using the treasury stock method and if-converted method.

Comprehensive Income

The Group records unrealized gains and losses on available-for-sale securities and foreign currency translation adjustments in accumulated other comprehensive income (AOCI), net of taxes. Unrealized gains and losses on available-for-sale securities are reclassified to net income as the gains or losses are realized upon sale of the securities. Other-than-temporary impairment charges are reclassified to net income at the time of the recognition. Translation gains or losses on foreign currency translation adjustments are reclassified to net income upon sale or liquidation of investments in foreign operations.

Convenience Translation

The Group operates primarily in Korea and its official accounting records are maintained in Korean Won. The US dollar amounts are provided herein as supplementary information solely for the convenience of the reader. Korean Won amounts are expressed in US dollars at the rate of \(\pi\)1,163.65: US\$1, the United States Federal Reserve Bank of New York noon buying exchange rate in effect on December 31, 2009. Such convenience translation into US dollar should not be construed as representations that the Korean Won amounts have been, could have been, or could in the future be converted into US dollars at this or any other rate of exchange.

Reclassification

Certain reclassifications have been made in the prior years consolidated financial statements to conform to the current year presentation for comparative purposes.

2. Accounting Changes and Future Application of Accounting Standards

The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles (ASC 105)

In June 2009, the FASB approved the FASB Accounting Standards Codification (the Codification or ASC) to be the single source of authoritative non-governmental US GAAP and issued SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, a replacement of FASB

F-26

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Statement No. 162 (SFAS No. 168). The Codification is not meant to change US GAAP, but is intended to improve the ease of researching US GAAP issues. The Codification reorganizes existing US GAAP pronouncements, relevant portions of authoritative content issued by the US Securities and Exchange Commission (SEC), and SEC staff interpretations and administrative guidance, into approximately 90 accounting topics. Once the Codification was launched on July 1, 2009, it became the single source of authoritative US GAAP. On the effective date of SFAS No. 168, the Codification supersedes all then-existing non- SEC accounting and reporting standards to become the single source of authoritative non-governmental US GAAP. All other nongrandfathered non-SEC accounting literature not included in the Codification will become nonauthoritative. SFAS No. 168 represents the final standard that the FASB will issue in the form of Statements, FASB Staff Positions, or Emerging Issues Task Force Abstracts. All subsequent standards will be issued as Accounting Standard Updates (ASU), which will serve only to update the Codification. The Codification and SFAS No. 168 are effective for financial statements issued for interim and annual periods ending after September 15, 2009.

Fair Value Measurements (ASC 820)

Effective January 1, 2008, the Group adopted SFAS No. 157, *Fair Value Measurements* (SFAS 157) (now ASC 820-10, *Fair Value Measurements and Disclosures*). ASC 820-10 establishes a three-level fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets the lowest priority to unobservable inputs to fair value measurements. The three levels of the fair value hierarchy under ASC 820-10 are described below:

- Level 1 Quoted prices for identical instruments in active markets. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as certain securities that are highly liquid and are actively traded in over-the-counter markets.
- Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value measurements. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques based on significant unobservable inputs, as well as management judgements or estimates that are significant to valuation.

This hierarchy requires the Group to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value. For some products or in certain market conditions, observable inputs may not always be available.

Under ASC 820-10, the Group is required to take into account its own credit risk when measuring the fair value of derivative liabilities as well as the other liabilities for which fair value accounting has been elected under ASC 815-15 (formerly SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments*). The Group adopted certain provisions of ASC 820-10 related to nonfinancial assets and nonfinancial liabilities that are not measured at fair value on a recurring basis since January 1, 2009. The application of these provisions did not have a material impact on the Group s consolidated financial statements.

Determining Fair Value Financial Assets when the Market for that Asset is Not Active

In October 2008, the FASB issued FASB Staff Position FAS 157-3, Determining Fair Value of Financial Assets when the Market for that Asset is not Active (FSP FAS 157-3) (now ASC 820-1-035-55A, Fair Value Measurements and Disclosures: Financial Assets in a market That is not Active), which clarifies the application of SFAS 157 (now ASC 820-10-35-55A, Fair Value Measurements and disclosures: Financial Assets in a Market That is Not Active), in a market that is not active and provides an example to illustrate key considerations in determining the fair value of

F-27

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

a financial instrument when the market for that financial asset is not active. This FSP is effective upon issuance, including prior periods for which financial statements have not been issued. The application of this FSP did not have a material impact on the Group s consolidated financial statements.

Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly (ASC 820)

In April 2009, the FASB issued FASB Staff Position No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP FAS 157-4) (now ASC 820-10-35-51A, *Fair Value Measurements and Disclosures: Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased*). The FSP provides additional guidance for estimating fair value in accordance with ASC 820-10, when the volume and level of activity for the asset or liability have significantly decreased. The FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. The guidance is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted. The adoption of the FSP had no impact on the Group s consolidated financial condition, results of operations or cash flows.

The Fair Value Option for Financial Assets and Financial Liabilities (ASC 820)

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159) (now ASC 825-10, *Financial Instruments: Fair Value Option*) currently coded as ASC 825-10, which provides an option under which a company may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities. This fair value option is available on a contract-by-contract basis with changes in fair value recognized in earnings as those changes occur. The Group adopted SFAS 159 effective January 1, 2008, however, there was no impact to the Group s consolidated financial statements as the Group did not elect the fair value option for any qualified assets or liabilities during the year ended December 31, 2008.

ASU No. 2009-05, FV Measurements and Disclosures Measuring Liabilities at FV (ASC 820)

In August 2009, the FASB issued accounting standard updates to clarify how the fair value measurement principles should be applied to measuring liabilities carried at fair value. The update explains how to prioritize market inputs appropriate for debt obligations that are restricted from being transferred to another obligor. The update is effective for the first reporting period (including interim period) beginning after issuance and is not expected to have a material impact.

Disclosures about Credit Derivatives and Certain Guarantees (ASC 815 and ASC 460)

In September 2008, the FASB issued FASB Staff Position No. FAS 133-1 and FIN 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45, and Clarification of the Effective Date of FASB Statement No. 161* (FSP FAS 133-1 and FIN 45-4), (now ASC 815-10-50-4K, *Derivatives and Hedging: Credit Derivatives, respectively*). FSP FAS 133-1 and FIN 45-4 requires enhanced disclosures about credit derivatives and guarantees and amends FIN 45, *Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others* (FIN 45) to exclude credit derivative instruments accounted for at fair value under SFAS 133. This FSP is effective for financial

statements issued for reporting periods ending after November 15, 2008. Since FSP FAS 133-1 and FIN 45-4 only requires additional disclosures concerning credit derivatives and guarantees, adoption of this FSP did not have an effect on the Group s consolidated financial statements.

F-28

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Determining Whether an Instrument Is Indexed to an Entity s Own Stock (ASC 810)

In June 2008, the FASB issued EITF 07-5, *Determining Whether an Instrument Is Indexed to an Entity s Own Stock* (EITF 07-5) (now ASC 815-40-15-5, *Derivatives and Hedging: Evaluating whether an Instrument is Considered Indexed to an Entity s Own Stock*), which establishes a two-step process for evaluating whether equity-linked financial instruments and embedded features are indexed to a company s own stock for purposes of determining whether the derivative scope exception in SFAS 133 should be applied. EITF 07-5 is effective for fiscal years beginning after December 15, 2008. The adoption of this EITF did not have a material impact on the Group s consolidated financial statements.

FSP FIN 39-1, which modifies FASB Interpretation (FIN) No. 39, Offsetting of Amounts Related to Certain Contracts, (ASC 210)

During April 2007, the FASB issued FSP FIN 39-1, *Amendment of FASB Interpretation No. 39* (FSP FIN 39-1) (now incorporated into ASC 815-10-45, *Derivatives and Hedging Other Presentation Matters*), modifying certain provisions of FIN 39, *Offsetting of Amounts Related to Certain Contracts*. This amendment amends FIN 39 to permit a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) against fair value amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement that have been offset. The Group has presented derivative assets and liabilities on a gross basis regardless of existence of master netting arrangements under FIN 39. According to its accounting policy, the Group did not offset fair value amounts for the rights and obligations related to cash collateral and FSP FIN 39-1 had no impact to the Group's consolidated financial statements.

Written Loan Commitments Recorded at Fair Value through Earnings

On November 5, 2007, the SEC issued Staff Accounting Bulletin No. 109, *Written Loan Commitments Recorded at Fair Value through Earnings* (SAB 109), which revises and rescinds portions of SAB 105, *Application of Accounting Principles to Loan Commitments*. SAB 109 states that the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. However, the fair value measurement of a written loan commitment still must exclude the expected net cash flows related to internally developed intangible assets (such as customer relationship intangible assets). The provisions of SAB 109 are applicable to written loan commitments issued or modified beginning on January 1, 2008. The adoption of SAB 109 did not have a material impact to the Group s consolidated financial statements.

Measurement of Impairment for Certain Securities (ASC 325)

In January 2009, the FASB issued FASB Staff Position EITF 99-20-1 (FSP EITF 99-20-1) (now incorporated into ASC 320-10-35-20, *Investments Debt and Equity Securities: Steps for Identifying and Accounting for Impairment*), which amends the impairment guidance in EITF 99-20 to make the investment security impairment model in EITF 99-20 more consistent with the securities impairment model in SFAS 115. FSP EITF 99-20-1 removes the requirement that a holder s best estimate of cash flows be based exclusively upon those that a market participant would use and allows for reasonable judgement to be applied in considering whether an adverse change in cash flows has occurred based on all available information relevant to the collectability of the security. FSP EITF 99-20-1 is effective for interim and annual periods ending after December 15, 2008, and therefore the Group adopted FSP EITF 99-20-1

from 2008. The adoption of this FSP did not have a material impact on the Group s consolidated financial statements.

F-29

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Disclosure about Transfers of Financial Assets and Interests in VIEs (ASC 860)

On December 11, 2008, the FASB issued FASB Staff Position FAS 140-4 and FIN 46(R)-8 (FSP FAS 140-4 and FIN 46(R)-8) (now ASC 860-10, *Transfers and servicing*), which requires additional disclosures relating to transfers of financial assets and interests in securitization entities and other variable interest entities. The purpose of this FSP is to require improved disclosure by public enterprises prior to the effective dates of the proposed amendments to SFAS 140 and FIN 46(R). The effective date for the FSP is for reporting periods (interim and annual) beginning with the first reporting period that ends after December 15, 2008. The disclosures required by this FSP are incorporated in this report. FSP FAS 140-4 and FIN 46(R)-8 only affected the Group s disclosure of transfers of financial assets and interests in securitization entities and other variable interest entities and not its consolidated balance sheets, consolidated statements of income or consolidated statements of cash Flows.

Business Combinations (ASC 805)

On December 4, 2007, the FASB issued SFAS No. 141 (revised), *Business Combination* (SFAS 141(R)). SFAS 141(R) (now ASC 805-10, *Business Combinations*) retains the fundamental requirements in SFAS 141 that the purchase method of accounting be used for all business combinations and for an acquirer to be identified for each business combination. This statement also retains the guidance in SFAS 141 for identifying and recognizing intangible assets separately from goodwill. The most significant changes in SFAS 141(R) are: (1) acquisition and restructuring costs are now expensed; (2) stock consideration is measured based on the quoted market price as of the acquisition date instead of the date the deal is announced; (3) contingent consideration arising from a contract and noncontractual contingencies that meet the more-likely-than-not recognition threshold are measured and recognized as an asset or liability at fair value at the acquisition date using a probability-weighted discounted cash flow model, with subsequent changes in fair value reflected in earnings. Noncontractual contingencies that do not meet the more-likely-than-not criteria continue to be recognized when they are probable and reasonably estimable; and (4) acquirer records 100% step-up to fair value for all assets and liabilities, including the noncontrolling interest portion and goodwill is recorded as if a 100 percent interest was acquired. The Group adopted the standard on January 1, 2009, and it is applied prospectively.

Loss- Contingency Disclosures (ASC 450)

In June 2008, the FASB issued an exposure draft proposing expanded disclosures regarding loss contingencies accounted for under SFAS No. 5, Accounting for Contingencies (SFAS 5), and SFAS 141(R) (now ASC 450-10 and 805-10, respectively). This proposal increases the number of loss contingencies subject to disclosure and requires substantial quantitative and qualitative information to be provided about those loss contingencies. The proposal is expected to have no impact on the Group s accounting for loss contingencies.

Noncontrolling Interests in Consolidated Financial Statements (ASC 810)

On December 4, 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements (SFAS 160) (now ASC 810-10-45-15, *Consolidation Noncontrolling Interest in a Subsidiary*), which establishes standards for the accounting and reporting of noncontrolling interests in subsidiaries (that is, minority interests) in consolidated financial statements and for the loss of control of subsidiaries. SFAS 160 requires: (1) the equity interest of noncontrolling shareholders, partners, or other equity holders in subsidiaries to be accounted for and presented in equity, separately from the parent shareholder s equity, rather than as liabilities or as mezzanine items

between liabilities and equity; (2) the amount of consolidated net income attributable to the parent and to the noncontrolling interests be clearly identified and presented on the face of the consolidated statement of income; and (3) when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary be initially measured at fair value. The gain or loss on the deconsolidation of the subsidiary is measured using the fair value of any noncontrolling equity investment rather than the carrying amount of that retained investment. The Group s adoption on January 1, 2009 did not have a material impact on the consolidated financial statements.

F-30

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Fair Value Disclosures about Pension Plan Assets (ASC 715)

In December 2008, the FASB issued FASB Staff Position SFAS 132R-1, *Employers Disclosures about Postretirement Benefit Plan Assets* (FSP SFAS 132(R)-1) (now incorporated into ASC 715-20-50, *Compensation and Benefits Disclosure*). This FSP requires that information about plan assets be disclosed, on an annual basis, based on the fair value disclosure requirements of SFAS 157. The disclosures about plan assets required by this FSP are effective for fiscal years ending after December 15, 2009 and as this FSP only relates to disclosures, the adoption has no material impact on the consolidated financial statements.

Accounting for Transfers of Financial Assets and Repurchase Financing Transactions (ASC 860)

In February 2008, the FASB issued FASB Staff Position FAS 140-3, *Accounting for Transfers of Financial Assets and Repurchase Financing Transactions* (FSP FAS 140-3 (now ASC 860-10-40-42, *Transfers and Servicing: Repurchase Financing*). FSP FAS 140-3 provides guidance for determining whether an initial transfer of a financial asset and a repurchase financing should be considered a linked transaction for the purposes of assessing whether sale accounting is appropriate under SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (SFAS 140). For transactions within its scope, FSP FAS 140-3 presumes that an initial transfer of a financial asset and a repurchase financing are considered part of the same arrangement, as a linked transaction. However, if certain criteria are met, the initial transfer and repurchase financing should not be evaluated as a linked transaction and should be evaluated separately under SFAS 140. FSP FAS 140-3 is effective for the Group s fiscal year beginning January 1, 2009, and is applied to new transactions entered into after the date of adoption. The adoption of this FSP has no material impact on the Group s consolidated financial statements.

Disclosures about Derivative Instruments and Hedging Activities

On March 19, 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities (SFAS 161) (now incorporated into ASC 815-10-50, *Derivative and Hedging Disclosure*), which amends the disclosure requirements of SFAS 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133, now ASC 815). This Statement requires enhanced disclosures about derivative instruments and hedging activities and their effects on an entity s financial position, financial performance, and cash flows. SFAS 161 is effective for fiscal years beginning after November 15, 2008, with early adoption permitted. This statement only affected the Group s disclosures of derivative instruments and related hedging activities, not its consolidated financial position, financial performance or cash flows.

Determination of the Useful Life of Intangible Assets Amendment of SFAS 142 (ASC 350)

On April 25, 2008, the FASB issued FASB Staff Position No. FAS 142-3, *Determination of the Useful Life of Intangible Assets* (FSP FAS 142-3) (now ASC 350-30, *General Intangibles Other Than Goodwill*), which amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS 142. This FSP is intended to improve the consistency between the useful life of an intangible asset determined under SFAS 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS 141(R), and other US GAAP. FSP FAS 142-3 is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited. This FSP is effective for the Group on January 1, 2009, and had no material impact.

Equity Method Investment Accounting Considerations

In November 2008, the FASB issued EITF 08-6, *Equity Method Investment Accounting Considerations* (EITF 08-6 (now ASC 323-10, *Investments Equity Method and Joint Ventures*). Under EITF 08-6, an entity shall measure its equity method investment initially at cost in accordance with SFAS 141(R). Any other-than-temporary impairment of an equity method investment should be recognized in accordance with Opinion 18. An equity method investor shall not separately test an investee s underlying assets for impairment. Share issuance by an

F-31

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

investee shall be accounted for as if the equity method investor had sold a proportionate share of its investment, with gain or loss recognized in earnings. EITF 08-6 is effective for the Group on January 1, 2009, and had no material impact.

Accounting for Defensive Intangible Assets (ASC 350)

In November 2008, the FASB issued EITF 08-7, *Accounting for Defensive Intangible Assets* (EITF 08-7) (now ASC 350-30-25-5, *Intangibles Goodwill and Other: Defensive Intangible Assets*). According to EITF 08-7, an acquired defensive asset should be accounted for as a separate unit of accounting (i.e., an asset separate from other assets of the acquirer). The useful life assigned to an acquired defensive asset shall be based on the period during which the asset would diminish in value. EITF 08-7 states that it would be rare for a defensive intangible to have an indefinite life. EITF 08-7 is effective for the Group on January 1, 2009, and had no material impact.

Accounting for Transfers of Financial Assets and Consolidation of Variable Interest Entities (ASC 860)

In June 2009, the FASB issued SFAS 166, *Accounting for Transfers of Financial Assets*, an amendment of SFAS 140 that will eliminate Qualifying Special Purpose Entities (QSPEs).

Simultaneously, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R) (now ASC 860-10, *Transfers and Servicing*) which details three key changes to the consolidation model. First, former QSPEs will now be included in the scope of SFAS 167. In addition, the FASB has changed the method of analyzing which party to a variable interest entity (VIE) should consolidate the VIE (known as the primary beneficiary) to a qualitative determination of which party to the VIE has power combined with potentially significant benefits or losses, instead of the current quantitative risks and rewards model. The entity that has power has the ability to direct the activities of the VIE that most significantly impact the VIE s economic performance. Finally, the new standard requires that the primary beneficiary analysis be re-evaluated whenever circumstances change. The current rules require reconsideration of the primary beneficiary only when specified reconsideration events occur.

These new standards are effective for fiscal years that begin after November 15, 2009 and as a result of implementing these new accounting standards, the Group will consolidate certain of the VIEs with which it currently has involvement. An ongoing evaluation of the application of these new requirements could, with the resolution of certain uncertainties, result in the identification of additional VIEs, needing to be consolidated. It is not currently anticipated, however, that any such newly identified VIEs and former QSPEs would have a significant impact on the Group s consolidated financial statements.

Recognition and Presentation of Other-Than-Temporary Impairments (ASC 320)

In April 2009, the FASB issued FASB Staff Position No. FAS 115-2 and FAS 124-2 (FSP FAS 115-2 and FAS 124-2), now ASC 320-10 and 958-320, *Investments Debt and Equity Securities: Recognition of an Other-Than-Temporary Impairment*). This FSP amends the other-than-temporary impairment guidance in GAAP for debt securities and the presentation and disclosure requirements of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than temporary impairments of equity securities. Under the guidance, an other-than-temporary-impairment must be recognized if an investor has the intent to sell the debt security or if it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. In

addition, the guidance changes the amount of impairment to be recognized in current-period earnings when an investor does not have the intent to sell, or if it is more likely than not that it will not be required to sell the debt security, as in these cases only the amount of the impairment associated with credit losses is recognized in income, while the rest of the fair value loss is recognized in other comprehensive income (OCI). The guidance also requires additional disclosures regarding the calculation of credit losses, as well as factors considered in reaching a conclusion that an investment is not other-than-temporarily impaired.

F-32

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The Group adopted the Standard on January 1, 2009. The cumulative effect of the change included an increase in the opening balance of Retained earnings at January 1, 2009 of \(\formaller{\psi}\)11,221 million on a pretax basis (\(\formaller{\psi}\) 8,752 million after-tax). See Note 7 to the Consolidated Financial Statements for disclosures related to the Company s investment securities and OTTI.

Investments in Certain Entities that Calculate Net Asset Value per Share (ASC 820)

In September 2009, the FASB issued ASU 2009-12, Fair Value Measurements and Disclosures: Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent), now ASC 820, This is an additional guidance about measuring the fair value of certain investments such as hedge funds, private equity funds, real estate funds and venture capital funds. The guidance allows companies to determine the fair value of such investments using net asset value (NAV) as a practical expedient and also requires disclosures of the nature and risks of the investments by major category of alternative investments. The Group s adoption on December 31, 2009 did not have a material impact on the consolidated financial statements.

Improving Disclosures about Fair Value Measurements

In January 2010, the FASB issued ASU 2010-06, *Improving Disclosures about Fair Value Measurements*. The ASU requires disclosing the amounts of significant transfers in and out of Level 1 and 2 fair value measurements and to describe the reasons for the transfers. The disclosures are effective for reporting periods beginning after December 15, 2009. Additionally, disclosures of the gross purchases, sales, issuances and settlements activity in Level 3 fair value measurements will be required for fiscal years beginning after December 15, 2010.

3. Business Changes and Developments

Acquisition of LG Card

On March 23, 2007, the Group acquired 98,517,316 shares or 78.58% of the issued and outstanding common stocks of LG Card where the Group had owned 7.15% interest through a tender offer to the public for approximately \text{\text{\text{\text{W}}}6,684 billion. As a result of this acquisition, the Group s ownership increased to 85.73%.

LG Card provides several services such as credit card services, factoring, installment financing and leasing, under the Specialized Credit Financial Business Act. The acquisition allows the Group to achieve greater economies of scale in the Group s card operations, as well as to enhance its position as a balanced provider of banking and non-banking services with diversified revenue sources and enhanced synergy opportunities, including cross-selling.

On May 28, 2007, the Group decided to acquire the remaining issued and outstanding common stock of LG Card, through a tender offer and share exchange, at the board of directors meeting.

On July 6, 2007, the Group acquired 664,213 shares or 0.53% of the issued and outstanding common stock of LG Card through a tender offer to the public for approximately \text{\psi}31 billion.

On September 21, 2007, the Group completed the acquisition of the remaining LG Card shares by issuing 14,631,973 the Group common shares (approximately \text{\$\psi}\$815 billion based on the exchange terms) in exchange for those of LG Card.

On October 1, 2007, LG Card acquired and assumed all assets, liabilities and contracts of former Shinhan Card and changed its name to Shinhan Card. Also, the former Shinhan Card changed its name to SHC Management Co., Ltd.

F-33

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The aforementioned acquisition was accounted for under the purchase method of accounting in accordance with ASC 805-10 (formerly SFAS 141). The purchase price was allocated to the assets acquired and the liabilities assumed based on their estimated fair values as summarized below.

	2007 (In millions of Won)					
Cash and cash equivalents	₩	315,549				
Deposits		256,207				
Call loans		511,670				
Trading assets		1,729				
Securities		43,649				
Loans, net of allowance for loan losses		9,902,214				
Premises and equipment, net		128,637				
Other assets		719,014				
Total assets	W	11,878,669				
Borrowings and debentures	₩	6,970,133				
Other liabilities		1,380,991				
Total liabilities	₩	8,351,124				
Fair value of net assets of LG Card	₩	3,527,545				

The allocation of the purchase consideration is as follows:

	2007 (In millions of Won)			
Cash paid Stock exchanged Direct acquisition costs	₩	6,707,361 814,971 7,688		
Total purchase price	W	7,530,020		
Allocation of purchase price: Fair value of net assets of LG Card (excluding effect of CCI(1) and deferred taxes) Credit card relationship intangible asset(1) Deferred tax on fair value adjustment Goodwill	W	3,831,102 1,064,046 (303,558) 2,938,430		

Note:

(1) Credit card relationship intangible reflects the estimated fair value of the credit card relationships acquired from LG Card from which the Group expects to derive future benefits over the estimated life of such relationships. The customer relationship intangible is amortized over its estimated useful life on a sum-of-the years—digits basis. The estimated weighted average life of the customer relationship intangible is approximately 6 years. The fair value of this asset was based principally upon the estimates of (i) the profitability of the acquired accounts and (ii) the projected run-off of the acquired accounts.

F-34

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The following unaudited pro forma consolidated summary of operations presents information of the Group as if the acquisition of LG Card had occurred on January 1, 2007:

2007 (Unaudited) (In millions of Won, except per share data)

Total interest and dividend income W 12,412,978
Net income 2,088,697
Basic earnings per share 4,776
Diluted earnings per share 4,744

This pro forma result is for illustrative purposes. They do not purport to be indicative of the result of operations which actually would have resulted had the acquisition occurred as of January 1, 2007, or the future results of operations of the Group.

Acquisition of noncontrolling interests in SH Asset Management Co., Ltd.

In July 2007, the Group acquired 20.23% of total outstanding shares in SH Asset Management Co., Ltd. from KGI Securities., Ltd. and others for a consideration of \(\frac{\pmathbf{W}}{47}\),055 million. As a result, the Group s ownership in SH Asset Management Co., Ltd. increased to 100%, and SH Asset Management Co., Ltd. became a wholly-owned subsidiary of the Group.

Incorporation of Shinhan Investment Corp.

In May 2007, the Group incorporated Shinhan Investment Corp (formerly Good Morning Shinhan Securities) as a wholly-owned subsidiary of the Group.

Incorporation of Shinhan Khmer Bank Ltd.

In August 2007, the Group incorporated Shinhan Khmer Bank Ltd. as a wholly-owned subsidiary of Shinhan Bank, a wholly-owned subsidiary of the Group.

Acquisition of North Atlanta National Bank

In November 2007, the Group acquired North Atlanta National Bank for a consideration of \(\pi\)27,510 million and recorded \(\pi\)15,588 million of goodwill.

Incorporation of Shinhan Bank Kazakhstan

In March 2008, the Group incorporated Shinhan Bank Kazakhstan as a wholly-owned subsidiary of Shinhan Bank, a wholly-owned subsidiary of the Group.

Incorporation of Shinhan Bank China Ltd.

In April 2008, the Group incorporated Shinhan Bank (China) Ltd. as a wholly-owned subsidiary of Shinhan Bank, a wholly-owned subsidiary of the Group.

Acquisition of AITAS

In May 2008, the Group acquired 56.63% stake in AITAS. As a result of a series of further acquisitions, the Group owns 89.58% as of December 31, 2008. Subsequently, in September 2008, Shinhan Bank sold its fund management business to AITAS for \(\pma_3\),070 million. The Group recognized goodwill of \(\pma_42\),693 million in connection with acquisition of AITAS.

F-35

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Joint Venture with KT Freetel

On June 2, 2008, the Group jointly established Shinhan KTF Mobile Card with KT Freetel. As a result, the Group owns 50% +1 share of the entity and KT Freetel owns the remainder of the interest in the entity.

Incorporation of Shinhan Private Equity Fund II

In August 2008, the Group incorporated Shinhan Private Equity Fund II.

Incorporation of Shinhan Bank Canada

In September 2008, the Group incorporated Shinhan Bank Canada.

Acquisition and Merger in 2009 of Shinhan BNP Paribas Investment Trust Management Co., Ltd and SH Asset Management Co., Ltd.

In 2008, the Group reached an agreement with BNP Paribas S.A. (BNP Paribas) to merge Shinhan BNP Paribas Investment Trust Management Co., Ltd. (Shinhan BNP Paribas Investment Trust Management) and SH Asset Management Co., Ltd. (SH Asset Management) Shinhan BNP Paribas Investment Trust Management is a joint venture between the Group and BNP Paribas, and SH Asset Management Co., Ltd. is a wholly-owned subsidiary of the Group. The merger was completed on January 1, 2009 with Shinhan BNP Paribas Investment Trust Management being the surviving entity and renamed Shinhan BNP Paribas Asset Management Co., Ltd. (Shinhan BNP Paribas Asset Management), while SH Asset Management was discharged as of the date of the merger. All of the shares of SH Asset Management have been exchanged for shares of the merged company at the agreed ratio of 0.7860830 common stock of the merged company for every one share of SH Asset Management Co., Ltd. in accordance with the terms of the Merger Agreement and the Applicable Law. As a result of deconsolidation of SH Asset Management the Group recognized \text{W31,933} million of gain on deconsolidation, which is recorded within other non-interest income for the year ended December 31, 2009. Furthermore, on January 2, 2009, the Group sold 1,276,162 shares of Shinhan BNP Paribas Asset Management (8.5% of total outstanding shares) at \text{W18,023} per share to BNP Paribas to maintain a 65% stake of Shinhan BNP Paribas Asset Management after the merger.

Incorporation of Shinhan Bank Japan

In September 2009, the Group incorporated Shinhan Bank Japan.

Incorporation of Shinhan Bank Vietnam

In November 2009, the Group incorporated Shinhan Bank Vietnam.

4. Restricted Cash

The following table summarizes the details of restricted cash at December 31:

2008 2009

(In millions of Won)

Reserve deposits with the Bank of Korea (BOK)	₩ 5,662,362	₩ 6,729,167
Cash restricted for investment activities	1,158,978	845,155
Other	227,972	399,595
	₩ 7,049,312	₩ 7,973,917

F-36

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Reserve deposits with the Bank of Korea (BOK) represent amounts required under the Republic of Korea s General Banking Act for payment of deposits. Cash restricted for investment activities represent amounts required the Financial Investment Services and Capital Market Act (FSCMA), for repayment of customers deposits.

5. Call Loans and Securities Purchased under Resale Agreements

The following table summarizes call loans and securities purchased under resale agreements, at their respective carrying values, at December 31:

		2008 (In millions	s of V	2009 Won)
Call loans Securities purchased under resale agreements	W	733,238 2,332,632	₩	902,667 443,577
	₩ :	3,065,870	₩	1,346,244

Call loans are short-term lending facilities among banks and financial institutions, with maturities of 90 days or less. Typically, call loans have maturities of one day.

Interest income from call loans and securities purchased under resale agreements, as included in other interest income, amounted to \\ \mathbb{W}111,197\text{ million}, \\ \mathbb{W}98,784\text{ million} and \\ \mathbb{W}101,691\text{ million} during the years ended December 31, 2007, 2008 and 2009, respectively.

Note:

⁽¹⁾ On January 1, 2007, the Group adopted fair value election under ASC 851-15 (formerly SFAS No. 155) on certain hybrid financial instruments. The fair values of those instruments were \(\pi42,225\) and \(\pi18,254\) million at December 31, 2008 and 2009, respectively, and related valuation losses (net) amounting to \(\pi12,249\) and \(\pi152\) million were recorded in net trading losses during 2008 and 2009, respectively.

The Group previously included certain of its beneficiary interests in funds not meeting the scope criteria of SFAS 115 within securities and correctly reclassified those investments to other investments under other assets during the current year, which amounted to \(\fowarrangle 730,093\) million as of December 31, 2008. The resulting cumulative effect in related other comprehensive income, which amounted to \(\fowarrangle 24,964\) million (pre-tax) as of December 31, 2008, was reflected in 2009. Although this adjustment relates to prior periods, the amount of change attributable to any prior year would not have been material to the Group s financial condition, equity or results of operations as reported for that year.

The Bank of Korea (BOK) is the central bank that establishes monetary policies in Korea. Korea Development Bank (KDB) is owned and controlled by the Korean government. Of the total amounts listed above in the financial institutions category at December 31, 2008 and 2009, the fair value of available-for-sale debt securities included \times 8,291,551 million and \times 5,107,873 million, respectively, that were issued by BOK and KDB. Of the total amounts listed above in the financial institutions category at December 31, 2008 and 2009, the amortized cost of

F-39

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

held-to-maturity debt securities included \(\forall 2,150,522\) million and \(\forall 2,144,968\) million, respectively, that were related to BOK and KDB.

The Group has recognized total impairment losses on available-for-sale and held-to-maturity debt securities other than unrealized portion of impairment losses on debt securities as net impairment losses on debt securities in earnings and impairment losses on available-for-sale equity securities in earnings, where decreases in value were deemed to be other-than-temporary during the years ended December 31, as follows;

		2007	(In mil	2008 lions of W	on)	2009
Available-for-sale securities Debt securities Total other-than-temporary impairment losses (unrealized and realized) Unrealized other-than-temporary impairment losses recognized in OCI	₩	43,741	₩	147,695	₩	11,486 957
Net impairment losses on debt securities Equity securities	W	43,741 33,039	W	147,695 97,371	W	10,529 94,791
Held-to-maturity securities Debt securities	₩	76,780	₩	245,066 1,199	₩	105,320 2,776
Total other-than-temporary impairment losses	₩	76,780	₩	246,265	₩	108,096

During 2008, there was a decline in the fair value of the Group s asset-backed securities portfolio, specifically asset-backed collateralized debt obligations (CDOs), as a result of deteriorating conditions in the U.S. subprime credit market. The Group s total exposure to asset backed CDOs at December 31, 2008 and 2009 was W100,364 million and W97,202 million, respectively. Accordingly, the Group recorded W61,182 million and W2,955 million, respectively, related to asset-backed CDOs losses to net losses on securities in 2008 and 2009 as the Group considered the losses to be other-than-temporary. The Group expects conditions in credit markets in the U.S. to remain uncertain for the foreseeable future. Therefore, continued deterioration in the U.S. credit markets could adversely affect the fair value of the asset-backed securities held by the Group.

The following table presents a roll-forward of the credit losses component recognized in earnings in 2009.

2009 (In millions of Won)

Balance, beginning of year	₩	80,294
Additions: Initial credit impairments		2,807
Subsequent credit impairments		4,838
Reductions:		
For increases in expected cash flows		23
Balance, end of year	₩	87,916

The Group conducts and documents periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other than temporary. Prior to January 1, 2009, these reviews were conducted pursuant to FASB Staff Position No. FAS 115-1, *The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments* (now ASC 320-10, *Investments Debt and Equity Securities Subsequent Measurement*). Any unrealized loss identified as other than temporary was recorded directly in the Consolidated Statement of Income. As of January 1, 2009, the Group adopted FSP FAS 115-2 and FAS 124-2 (now ASC 320-10, *Investments Debt and Equity Securities: Recognition of an Other-Than-Temporary Impairment*). This guidance amends the impairment model for debt securities, and the impairment model for equity securities was not affected. Under the new guidance for debt

securities, other-than-temporary impairment is recognized in earnings for debt securities which the Group has an intent to sell or it is more-likely-than-not that the Group will be required to sell prior to recovery of the amortized cost basis. For those debt securities which the Group does not intend to sell or expect to be required to sell, credit-related impairment is recognized in earnings, with the non-credit-related impairment recorded in OCI.

An unrealized loss exists when the current fair value of an individual security is less than its amortized cost basis. Unrealized losses that are determined to be temporary in nature are recorded, net of tax, in OCI for AFS securities, while such losses related to HTM securities are not recorded, as these investments are carried at their amortized cost. Regardless of the classification of the securities as AFS or HTM, the Group has assessed each position for impairment.

F-42

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Factors considered in determining whether a loss is temporary include:

the length of time and the extent to which fair value has been below cost;

the severity of the impairment;

the cause of the impairment and the financial condition and near-term prospects of the issuer;

the activity in the market of the issuer which may indicate adverse credit conditions; and

the Group s ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery.

The Group s review for impairment generally entails:

identification and evaluation of investments that have indications of possible impairment;

analysis of individual investments that have fair values less than amortized cost, including consideration of the length of time the investment has been in an unrealized loss position and the expected recovery period;

discussion of evidential matter, including an evaluation of factors or triggers that could cause individual investments to qualify as having other-than-temporary impairment and those that would not support other-than-temporary impairment; and

documentation of the results of these analyses, as required under business policies.

For equity securities, management considers the various factors described above, including its intent and ability to hold the equity security for a period of time sufficient for recovery to amortized cost. Where management lacks that intent or ability, the security security security securities deemed to be other than temporary and is recorded in earnings. AFS equity securities deemed other-than-temporarily impaired are written down to fair value, with the full difference between fair value and amortized cost recognized in earnings.

For debt securities that are not deemed to be credit impaired, management assesses whether it intends to sell or whether it is more-likely than-not that it would be required to sell the investment before the expected recovery of the amortized cost basis. In most cases, management has asserted that it has no intent to sell and that it believes it is not likely to be required to sell the investment before recovery of its amortized cost basis. Where such an assertion has not been made, the security s decline in fair value is deemed to be other than temporary and is recorded in earnings. In addition, non-credit-related impairment related to debt securities the Group does not plan to sell and is not likely to be required to sell is recognized in OCI.

For debt securities, a critical component of the evaluation for other-than-temporary impairments is the identification of credit impaired securities, where management does not expect to receive cash flows sufficient to recover the entire amortized cost basis of the security. For securities purchased and classified as AFS with the expectation of receiving full principal and interest cash flows, this analysis considers the likelihood of receiving all contractual principal and interest. The extent of the Group s analysis regarding credit quality and the stress on assumptions used in the analysis

have been refined for securities where the current fair value or other characteristics of the security warrant.

Any deterioration in Korean economic conditions or specific situations of the issuers of the securities could adversely affect the fair value of securities held by the Group.

8. Loans

The following table summarizes the details of the loan portfolio at December 31:

	2008 2009 (In millions of Won)					
Commercial:						
Commercial and industrial	W	55,466,168	₩	54,479,473		
Other commercial		37,637,026		34,770,389		
Lease financing		1,591,437		1,559,652		
Consumer:						
Mortgage and home equity		36,182,970		40,022,157		
Credit cards		14,637,084		15,116,757		
Other consumer		25,026,774		23,306,609		
Total loans, gross		170,541,459		169,255,037		
Deferred loan origination costs (fees)		(32,771)		(23,497)		
		170,508,688		169,231,540		
Less: Allowance for loan losses		(3,200,633)		(3,637,994)		
Total loans, net	W	167,308,055	₩	165,593,546		

On January 1, 2007, the Group corrected its amortization period for qualifying deferred credit card origination costs from 5 years to 12 months. The resulting cumulative effect of \(\mathbb{W}71,568\) million (pre-tax) was reflected in 2007. Although this adjustment relates to prior periods, the amount of charge attributable to any prior year would not have been material to the Group s financial condition or results of operations as reported for that year.

As discussed in Note 3 to the consolidated financial statements, the Group acquired certain loans, resulting from the acquisition of LG Card, for which there was, at the time of the acquisition, evidence of deterioration of credit quality since origination and for which it was probable that all contractually required payments would not be collected. These loans were accounted for in accordance with SOP 03-3 (currently coded as ASC 310-30) which requires that purchased impaired loans be recorded at fair value as of the acquisition date. The fair value of such loans was approximately \text{\text{\$\psi}}220,538 million at the acquisition date. The carrying amount of such loans was \text{\text{\$\psi}}74,980 million and \text{\text{\$\psi}}44,859 million at December 31, 2008 and 2009, respectively, and included in the above table.

The loans acquired during 2007 in connection with LG Card acquisition for which it was probable at acquisition that all contractually required payments would not be collected are as follows:

2007 (In millions of Won)

Contractually required payments receivable at acquisition \$\blue{\psi}\$ 619,928 Cash flows expected to be collected at acquisition 323,069 Fair value of acquired receivables at acquisition 220,538

F-45

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The changes in the accretable yield for 2008 and 2009 are as follows:

		2008 (In millions	2009 s of Won)	
Balance at beginning of year Purchases	W	113,356	₩ 71,210	
Accretion of accretable yield		(45,169)	(52,424)	
Increase to expected cash flows		3,023	27,336	
Balance at end of year	₩	71,210	₩ 46,122	

Impaired loans are those on which the Group believes it is probable that it will not be able to collect all amounts due according to the contractual terms of the loans. The following table sets forth information about the Group s impaired loans at December 31:

		2007	(In mi	2008 llions of Wo	n)	2009
Impaired loans with an allowance Impaired loans without an allowance	₩	1,256,180 231,067	₩	1,953,024 224,570	₩	2,111,904 213,763
Total impaired loans	₩	1,487,247	₩	2,177,594	₩	2,325,667
Allowance for impaired loans Average balance of impaired loans during the year Interest income recognized on impaired loans	₩	908,630 1,523,274 59,537	₩	1,181,446 1,910,041 79,251	₩	1,350,209 2,117,768 48,223

Included in the above table were smaller balance commercial loans managed on a portfolio basis which were collectively identified as impaired amounting to \\ \psi 511,568 \text{ million}, \\ \psi 780,232 \text{ million and } \\ \psi 715,412 \text{ million at December 31, 2007, 2008 and 2009, respectively.}

Commercial loans that are 14 days or less past due and consumer loans that are 30 days or less past due are regarded as nonaccrual loans in a grace period and the Group does not generally request borrowers with such past due loans to make immediate repayment of the outstanding principal balances and related accrued interest. At December 31, 2007, 2008 and 2009, nonaccrual loans, excluding the past due loans within the grace period, totaled \(\pi\)1,764,114 million, \(\pi\)2,021,452 million and \(\pi\)1,641,654 million, respectively. Nonaccrual loans including the past due loans within the grace period at December 31, 2007, 2008, and 2009, totaled \(\pi\)3,057,262 million, \(\pi\)3,308,792 million and \(\pi\)2,464,908 million, respectively.

The following table presents loans and debt securities whose terms have been modified in troubled debt restructuring at December 31:

		Von)	2009			
Loans Debt securities	₩	385,547 42,295	₩	747,183 34,710	₩	1,097,275 28,552
	W	427,842	₩	781,893	₩	1,125,827

During 2007, 2008 and 2009, the Group received equity securities with fair market value of \(\pi\)2,783 million, nil and \(\pi\)6,519 million, respectly, through the restructuring of three loans in 2007, one loan in 2008 and three loans in 2009 with aggregate book value of \(\pi\)17,210 million, \(\pi\)278 million and \(\preceq\)8,581 million, respectively. The Group recognized total charge-offs of \(\pi\)14,427 million, \(\preceq\)278 million and \(\preceq\)2,062 million related to these transactions during the years ended December 31, 2007, 2008, and 2009, respectively.

(1) The allowance for off-balance sheet credit is included in other liabilities.

The Group originates direct financing leases on certain machinery, computers and various other equipments, automobiles and ships for customers in a variety of industries. Income attributable to these leases is initially recorded as unearned income and subsequently recognized as interest income, using the effective interest method, over the terms of the leases. The terms of the leases are generally from 3 to 10 years. The following table sets forth the details of the investment in direct financing leases at December 31, as included in the respective loan balances:

	2008	2009
	(In milli	ons of Won)
Gross lease payments receivable	₩ 1,767,911	₩ 1,734,996
Estimated unguaranteed residual values	11,524	8,522
Unearned income	(187,998)	(183,866)

	1,591,437	1,559,652
Less: Deferred loan origination fee	(1,385)	(523)
Allowance for loan losses	(10,661)	(12,866)
	₩ 1,579,391	₩ 1,546,263

The following table sets forth the scheduled maturities of gross lease payments receivable at December 31, 2009:

Note:

(1) Relates to reporting units of merchant banking, foreign subsidiaries of Shinhan Bank, Shinhan AITAS, SH Asset Management and Shinhan Capital.

Goodwill impairment loss arises when the net book value of a reporting unit exceeds its estimated fair value. Goodwill impairment testing is performed at the Group s reporting unit level, which is generally consistent with the Group s business segments or one level below, on an annual basis or more frequently if it is deemed that triggering events might have occurred.

The Group measured the fair value of reporting units by both the income approach, using the present value of free cash flow to equity (FCFE) discounted at a market driven discount rate for the computation of the equity value, and the market approach, using the Price-to-Book ratios (PBR)/Price-to-Earnings (PER) as market multiple for the measure of the Group s fair value.

As of December 31, 2009, there was an indication of impairment in the other reporting unit, accordingly, the second step of testing was performed. Based on the results of the second step of testing, the Group recorded \(\pi\)59,091 million of goodwill impairment loss for the portion of goodwill allocated to other reporting unit for the year ended December 31, 2009.

Increased goodwill in the amount of \(\psi_3,303\) million is due to the earn-out payment made to The Korea Deposit Insurance Corporation(KDIC) in relation to the acquisition of Chohung Bank and assigned to reporting units as of the acquisition date. \(\psi_235\) million and \(\psi_191\) million of goodwill assigned to corporate banking reporting unit and treasury & international business reporting unit where its goodwill was impaired fully in 2008, has been recognized as impairment loss immediately in 2009.

₩30,757 million of goodwill acquired from SH Asset Management was disposed of during the year ended December 31, 2009.

Other		90,099		198,332
	W	12,395,127	₩	10,153,495

Note:

(1) Other investments include unlisted equity securities, securities with sales restriction, fund investments and investments accounted for the equity method.

In October 2007, Visa U.S.A. Inc., Visa Europe, Visa International Association (Visa International) and Visa Canada Inc. were merged into Visa Inc. (Visa). As a result of the reorganization, Visa allocated its shares to its member companies and the Group, as one of the member companies, received 6,767,836 Class AP shares. The number of allocated shares was subsequently adjusted to 8,020,348 shares and they were converted to Class C shares through a true-up process prior to Visa s initial public offering of Class A shares in March 2008.

The Visa shares received by the Group were fair valued at \(\formu279,881\) million (pre-tax) as of December 31, 2007. As the shares are unlisted and certain portion of shares (43.82% or 3,514,074 shares) were restricted for sales for three years from the acquisition date, the Group classified \(\formu279,881\) million (pre-tax) as other investments.

In March 2008, the unrestricted 4,506,274 shares (56.18% of allocated shares) were redeemed at \$42.77 per share by Visa in connection with its IPO and the remaining restricted shares, which would be restricted until March 25, 2011, in the amounts of \text{\psi}103,787 million (pre-tax) are classified as other investments and carried at initial fair value at December 31, 2009.

The following table summarizes the Group s alternative investments in funds which are classified as other investments. The Group uses the funds NAVs per share as a practical expedient to measure fair value on recurring and nonrecurring basis. The fair values presented in the table are based upon the funds NAVs or an equivalent measure.

2009 (In millions of Won)

Private equity funds(1)

₩ 523,116

Note:

(1) Include private equity funds that invest in equity and debt securities issued by private and publicly held companies. Substantially all of these investments do not allow early redemptions. Alternatively, the Group receives distributions in accordance with the fund agreement. There are no unfunded commitments.

12. Deposits

The following table summarizes the details of deposits at December 31:

		2008			2009		
			Weighted- Average Interest			Weighted- Average Interest	
		Balance	Rate		Balance	Rate	
		(In n	t percentages)				
Interest-bearing deposits							
Demand deposits	₩	6,673,839	0.78%	W	7,529,357	0.45%	
Savings deposits		31,392,168	2.32%		37,502,198	1.22%	
Certificate of deposits		13,846,645	5.94%		7,800,821	5.48%	
Other time deposits		67,614,521	4.94%		87,822,670	3.91%	
Mutual installment deposits		235,288	3.78%		153,856	3.70%	
Non-interest-bearing deposits		119,762,461	4.15%		140,808,902	3.12%	
Demand deposits		2,942,034			2,889,587		
	₩	122,704,495	4.06%	W	143,698,489	3.06%	

Other time deposits include premium accounts for loyal customers, tax savings accounts for high net worth customers, savings accounts for household financing and foreign currency deposits. Mutual installment deposits enable customers to become eligible for mortgage and other consumer loans as well as corporate loans while maintaining an account with the Group.

The aggregate balance of time deposit accounts (including certificate of deposits, other time deposits, mutual installment deposits) in denominations of \text{\psi}100 million or more at December 31, 2008 and 2009 were \text{\psi}59,825,352 million and \text{\psi}74,387,872 million, respectively.

The following table sets forth the contractual maturities of certificate of deposits, other time deposits and mutual installment deposits at December 31, 2009:

Years Ending	(In millions of Won)
2010	₩ 87,793,427
2011	4,400,542
2012	1,961,868

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Note:

- (1) Interest rates on floating rate debt were those rates in effect at December 31, 2008 and 2009, respectively.
- (2) Majority of these debentures relate to miscellaneous bank borrowings from individual lenders.
- (3) The Group adopted fair value election under ASC 851-15 (formerly SFAS No. 155) on certain hybrid financial instrument. The fair value of those instruments were \(\pi\)610,971 million and \(\pi\)1,067,457 million as of December 31, 2008 and 2009, respectively, and related valuation gains (losses) (net) amounting to \(\pi\)204,512 million and \(\pri\)(18,960) million were recorded in net trading profits (losses).
- (4) Shinhan Bank has a call option that can be exercised five years after the issuance date, or earlier with the approval of the Financial Supervisory Service. The call options mature in 30 years from the issuance date, but may be extended by Shinhan Bank at any time.
- (5) Majority of these debentures relate to miscellaneous bank borrowings from corporate lenders and Korean governmental entities.
- (6) Shinhan Bank has a call option that can be exercised ten years after the issuance date. The call options mature in 30 years from the issuance date.
- (7) See Note 21 for the terms of the redeemable preferred stock.

Long-term debt is denominated predominately in Korean Won, US dollars, or Japanese Yen with both fixed and floating interest rates. Floating rates are generally determined periodically by formulas based on certain money market rates tied to the six-month London Interbank Offered Rate (LIBOR) or the monthly Public Fund Prime Rate published by the Korean government, and are reset on a monthly, quarterly or semi-annual basis. The weighted-average interest rate for long-term debt was 5.54% and 4.88% at December 31, 2008 and 2009, respectively. Certain long-term debt agreements contain cross-default provisions and accelerating clauses for early termination in the event of default.

The following table sets forth the aggregate amount of long-term debt by contractual maturities at December 31, 2009:

Years Ending	(In millions of Won)			
2010	₩	12,718,093		
2011		10,870,475		
2012		6,650,095

Thereafter		7,930,308		
Long-term debt, gross		44,850,903		
Less: Unamortized discount		(55,922)		

Long-term debt, net Ψ 44,794,981

16. Future Policy Benefits

The following table summarizes future policy benefits at December 31:

		2008 (In millions		
Life insurance Annuity contracts Other contracts Unpaid claims and claim adjustment expenses	₩	4,013,630 1,914,616 996,061 336,026	₩ 4,523,282 1,605,018 1,770,803 411,135	
	₩	7,260,333	₩ 8,310,238	
	F-56			

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Life insurance liabilities include reserves for death and endowment policy benefits, and certain health benefits. Annuity contract liabilities include reserves for individual life contingent immediate annuities. Other contract liabilities include unearned revenue and certain other reserves for group and individual life and health products.

Future policy benefits are calculated using net level premium method based upon mortality, morbidity, persistency, and interest rate assumptions including provision for adverse deviation. Assumptions as to morality, morbidity and persistency are based on the Group s experience, or in certain instances, industry experience, when the basis of the reserve is established. For post-purchase, the best-estimated net investment rate used as the interest rate assumptions has been set equal to 5.95%, which is based on Shinhan Life Insurance s 2010 planned asset allocation and investment return. For pre-purchase, the best-estimated net investment rate is 5.5% in lock-in method.

17. Accrued Expenses and Other Liabilities

The following table summarizes accrued expenses and other liabilities at December 31:

		2008 (In million	ns of V	2009 Von)

20. Common Stock

Issuances of common stock

On September 16, 2003, the Group listed its shares on the New York Stock Exchange (NYSE) and transferred its global depository shares listed on the Luxembourg Stock Exchange to NYSE as American depository shares. As of December 31, 2009, the Group had 474,199,587 shares of common stock.

Treasury stock

In 2007, Shinhan Bank sold 7,129,967 shares of the Group s treasury stocks in the Korean Stock Market at various prices resulting in a credit to additional paid-in capital of \text{\psi}177,572 million (net of tax effect of \text{\psi}67,373 million). Shinhan Card (formerly LG Card) held 529 shares of treasury stock as of December 31, 2007 and 2008.

In 2009, Shinhan Card (formerly LG Card) sold 529 shares of the Group s treasury stocks in the Korean Stock Market at various prices resulting in a debit to additional paid-in capital of \(\psi \)2 million (net of tax effect of \(\psi \)0.6 million).

21. Redeemable Preferred Stock and Redeemable Convertible Preferred Stock

In August 2003, in connection with the acquisition of Chohung Bank, the Group issued 46,583,961 shares of redeemable preferred stock (RPS), par value of \(\pi\)5,000 per share, with an aggregate estimated fair value of \(\pi\)710,258 million and 44,720,603 shares of redeemable convertible preferred stock (RCPS), par value of \(\pi\)5,000 per share, with an aggregate estimated fair value of \(\pi\)714,780 million to KDIC, as well as 6,000,000 shares of RPS, par value of \(\pi\)5,000 per share, with an aggregate estimated fair value of \(\pi\)900,000 million to Strider ABS Specialty Co., Ltd. (Strider), a SPE established by the Group.

The RPS was issued in five series (Series 1 to 5) to KDIC and in three series (Series 6 to 8) to Strider on August 19, 2003, redeemable over seven years after the issue date. If there is any RPS outstanding on the last day of the redemption period (RPS Final Redemption Date), the Group will be obligated to redeem all outstanding RPS to the extent that distributable profits are available for such purchase. In the event that the Group does not have sufficient distributable profits to redeem all outstanding RPS on the RPS Final Redemption Date, the RPS will remain outstanding until sufficient distributable profits are available. The Group may, at its option, elect to redeem

F-59

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

all or part of the outstanding RPS at any time during the redemption period. The holder of RPS will not have any voting rights, unless dividends on the RPS are not distributed in any given year, in which case each share of RPS will be given one voting right. The Group may redeem the RPS from KDIC and Strider at \\ \Psi 18,086 \) and \\ \Psi 150,000 \) per share, respectively.

The dividends on the RPS issued to KDIC and Strider are cumulative and non-participating on dividends on the common stock of the Group, and the stated dividend rates are as follows:

RPS issued to KDIC (Series 1 to 5)	4.04%
RPS issued to Strider:	
Series 6	7.00%
Series 7	7.46%
Series 8	7.86%

The RPS was initially measured at fair value and discounts are amortized over the period from the date of issuance to the redemption date using the effective interest method. The RPS is classified as long-term debt on the Group s consolidated balance sheet as of December 31, 2009. In 2009, 9,316,792 shares amounting to \text{\text{\$\psi}}168,504 million were redeemed.

The Series 9 RCPS was issued to KDIC on August 19, 2003, redeemable at any time after the 3rd anniversary date of the issue date and from time to time until the 5th anniversary date of the issue date. As of December 31, 2009, all the Series 9 RCPS were converted to common stock.

In connection with the acquisition of Shinhan Card (formerly LG card), the Group issued to the public 28,990,000 shares of RPS (Series 10), par value of \(\mathbb{W}5,000\) per share, with an aggregate estimated fair value of \(\mathbb{W}2,899,000\) million and 14,721,000 shares of RCPS (Series 11), par value of \(\mathbb{W}5,000\) per share, with an aggregate estimated fair value of \(\mathbb{W}850,962\) million.

The Series 10 RPS was issued to the public on January 25, 2007, redeemable from the 5th anniversary of the issue date to the 20th anniversary (Redemption Period). Redemption price is the aggregate of (1) the issue price, (2) the issue price × [number of days that have elapsed from the first day of the fiscal year during which redemption is made to the redemption date / 365] × applicable interest rate as stated below (a and b), and (3) any accrued but unpaid dividends. The Group can elect to redeem, at its discretion, and is not obligated to redeem, the RPS in whole or in part. If the Group does not exercise its redemption rights during the Redemption Period, such redemption right will subsequently terminate and the RPS will remain as preferred shares without redemption rights. The holder of RPS will not have any voting rights, unless dividends on the RPS are not distributed in any given year, in which case each share of RPS will be given one voting right. The Group may redeem the RPS at \\ \text{\text{W}}100,000 per share.

The dividends on the RPS issued to the public are cumulative and non-participating on dividends on the common stock of the Group, and the stated dividend rates are as follows:

(a) From the issue date until the 5th anniversary of the issue date: 7.00% per annum.

(b) From the 5^{th} anniversary of the issue date: interest rate payable on five-year treasury bonds issued by the Korean government on the day immediately preceding the 5^{th} anniversary of the issue date + Spread + 100 bp

Spread: 7% the interest rate payable on five-year Treasury bonds issued by the Korean government on the day immediately preceding the issue date

Considering the RPS is redeemable at the option of the issuer, the Group, and is not mandatorily redeemable, the Series 10 RPS to the public is classified as equity on the Group s consolidated balance sheet as of December 31, 2009.

The Series 11 RCPS was issued to the public on January 25, 2007, convertible from the 1st anniversary of the issue date to the 5^{th} anniversary and redeemable from the 5^{th} anniversary of the issue date to the 20^{th} anniversary.

F-60

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The dividends on the RCPS issued to public are cumulative and non-participating on dividends on the common stock of the Group, and the stated dividend rates are as follows:

- (a) From the issue date until the 5th anniversary of the issue date: 3.25% per annum.
- (b) From the 5th anniversary of the issue date: interest rate payable on five-year treasury bonds issued by the Korean government on the day immediately preceding the 5th anniversary of the issue date + Spread + 100 bp

Spread: 7% the interest rate payable on five-year Treasury bonds issued by the Korean government on the day immediately preceding the issue date

By the same reason as the Series 10 RPS, the Series 11 RCPS issued to the public is classified as equity on the Group s consolidated balance sheet as of December 31, 2009.

22. Retained Earnings

The following table summarizes the details of retained earnings at December 31:

		2008 (In million	ns of V	2009 Won)
Appropriated retained earnings for legal reserves under Korean GAAP Unappropriated retained earnings under US GAAP	₩	819,838 6,890,059	₩	1,021,878 7,600,037
	W	7,709,897	₩	8,621,915

The Financial Holding Company Act requires the Group to appropriate as a legal reserve under accounting principles generally accepted in Korea (Korean GAAP), an amount equal to a minimum of 10% of annual net income of Shinhan Financial Group until such reserve equals 100% of its paid-in capital. This reserve is not available for payment of cash dividends, but may be transferred to capital stock or used to reduce an accumulated deficit, if any, by an appropriate resolution of the Group s board of directors.

23. Regulatory Requirements

The Group and its subsidiaries, including Shinhan Bank and Jeju Bank, are subject to various regulatory capital requirements administered by the Financial Services Commission (FSC), which are based on the Basel Committee on Banking Regulations and Supervisory Practices. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Group s consolidated financial statements.

From January 1, 2007, a bank holding company, which is a financial holding company controlling banks or other financial institutions conducting banking business as prescribed in the Financial Holding Company Act, is required to maintain a minimum consolidated equity capital ratio of 8%. Consolidated equity capital ratio is

F-61

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

defined as the ratio of equity capital as a percentage of risk-weighted assets on a consolidated basis, determined in accordance with the FSC requirements that have been formulated based on Bank of International Settlements standards. Equity capital, as applicable to bank holding companies, is defined as the sum of Tier I capital, Tier II capital and Tier III Capital less any deductible items, each as defined under the Regulation on the Supervision of Financial Holding Companies. Risk-weighted assets is defined as the sum of credit risk-weighted assets and market risk-weighted assets.

The FSC regulations also require that the computation be based on the Group s consolidated financial statements under Korean GAAP and regulatory guidelines, which vary in certain significant respects from US GAAP.

The following table sets forth consolidated equity capital ratio of the Group mandated by the FSC at December 31:

2008 2009 (In millions of Won, except equity capital ratio)

In conformity with the FSC regulations, Shinhan Bank and Jeju Bank apply the FSC s risk-adjusted capital ratios to evaluate their capital adequacy. Korean banking organizations engaged in international banking are required to maintain a minimum 8% total risk-based capital ratio calculated by dividing total risk-adjusted capital by total risk-weighted assets, including a Tier 1 capital ratio of at least 4%. All Korean banking organizations subject to the FSC regulations on minimum total risk-based capital ratio are also subject to periodic inspection by the Financial Supervisory Service (FSS). In the event that Shinhan Bank or Jeju Bank does not maintain a consolidated capital ratio of 8%, it is subject to corrective actions to be imposed by the FSS, as recommended by the FSC, based on the actual financial position and capital ratio of the respective banking subsidiaries.

In conformity with the FSC regulations, Shinhan Card also applies the FSC s risk-adjusted capital ratios to evaluate their capital adequacy. Credit card organizations are required to maintain a minimum 8% total risk-based capital ratio calculated by dividing total risk-adjusted capital by total risk-weighted assets.

As required by the FSC regulations, the following table sets forth the details of capital adequacy ratios of Shinhan Bank and Shinhan Card, subsidiaries considered material to the consolidated financial statements of the Group, under Korean GAAP and regulatory guidelines which vary in certain significant respects from US GAAP at December 31:

(1) Pursuant to amendments to the Corporation Income Tax Law that was enacted in December 2008, the statutory tax rates changed from 27.5% to 24.2% in 2009 and 22% in 2010 and thereafter; however, pursuant to the amendment to the Corporation Income Tax Law enacted in December 2009, the statutory tax rates changed from 22% to 24.2% in 2010 and 2011, and 22.0% will be applied from 2012 and thereafter.

F-64

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The components of net deferred income tax assets and liabilities included in other assets and accrued expenses and other liabilities, respectively, at December 31, are as follows:

		2008		2009	
		(In millions of Won)			
Deferred income tax assets					
Allowance for loan losses	₩	208,781	₩	241,942	
Other allowances		267,724		286,127	
Valuation of trading assets		25,105		22,983	
Premises and equipment		188,426		216,201	
Available-for-sale securities		749,379		757,625	
Other assets		180,739		274,047	
Future policy benefits		104,442		150,495	
Long-term debt		40,724		4,534	
Other temporary differences		80,759		18,870	
Net operating loss carryforwards		66,181		100,005	
		1,912,260		2,072,829	
Less: Valuation allowance		(67,879)		(104,914)	
Deferred income tax assets		1,844,381		1,967,915	
Deferred income tax liabilities					
Valuation of trading assets		(15,235)			
Foreign exchange contracts and derivative instruments		(40,675)		(11,647)	
Allowance for loan losses		(228,981)		(388,523)	
Accrued interest and dividend receivable		(78,458)		(13,046)	
Other assets		(1,012,208)		(868,990)	
Long-term debt				(28,463)	
Other temporary differences		(68,276)		(76,334)	
Deferred income tax liabilities		(1,443,833)		(1,387,003)	
Net deferred income tax assets	₩	400,548	₩	580,912	

Deferred income taxes at December 31, 2008 and 2009 are reflected in the consolidated balance sheets under the following captions:

2008 2009 (In millions of Won)

Other assets Accrued expenses and other liabilities	₩	568,875 (168,327)	₩	689,660 (108,748)
Net deferred income tax assets	W	400 548	W	580 912

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible,

F-65

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

management believes it is more likely than not that the Group will realize the benefits of these deductible differences, net of the existing valuation allowances at December 31, 2009. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

The valuation allowance was \\ \Psi 24,951 \text{ million} and \\ \Psi 73,626 \text{ million} as of January 1, 2007 and 2008, respectively. During the years ended December 31, 2007, 2008 and 2009, the valuation allowance increased (decreased) by \\ \Psi 48,675 \text{ million}, \Psi (5,747) \text{ million} and \\ \Psi 37,035 \text{ million}, \text{ respectively}.

The changes in the valuation allowance in 2009 are primarily due to the increase in deferred tax assets on the net operating loss carryforwards of the parent company and one of its subsidiaries. As of December 31, 2009, the Group had net operating loss carryforwards totaling \text{W422,656} million.

The following table sets forth these net operating losses expiring in periods ranging from December 31, 2010 to 2013 and thereafter:

Years ending	(In mill	ions of Won)
2010	₩	65,132
2011		55,913
2012		164,913
2013 and thereafter		136,698
	₩	422,656

As discussed in Note 1 to the consolidated financial statements, the Group adopted the provisions of ASC 740-10 (formerly FIN 48) on January 1, 2007, resulting in a \(\mathbb{W}\)3,815 million cumulative effect of increase to retained earnings.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

		2007 (In	2008 (In millions of Wor			2009
Beginning balance	₩	231,117	₩	217,636	₩	153,754
Increases for tax positions of current year		12,241		12,740		681
Increases for tax positions of prior years						719
Decreases for tax positions of prior years		(3,950)		(38,353)		(17,659)
Amounts of decreases in the unrecognized tax benefits relating to						
settlements		(21,772)		(38,269)		(3,817)
Amounts of decreases in the unrecognized tax benefits relating to a						
lapse of the statute of limitations						(80,767)

Ending balance \(\psi \) 217,636 \(\psi \) 153,754 \(\psi \) 52,911

Due to the expiration of statutes of limitation, unrecognized tax benefits will decrease by \text{\psi}30,479 million within the next twelve months, and as of December 31, 2009, the Korean income tax returns of the Group for the tax years subsequent to 2003 remain open to examination.

Interest expense and penalties related to unrecognized tax benefits recorded in income tax expense was \\ \Psi 123 \text{ million}, \\ \Psi 16,778 \text{ million} and \\ \Psi (43,559) \text{ million} for the years ended December 31, 2007, 2008 and 2009, respectively. Accrued income tax-related interest and penalties were \\ \Psi 41,679 \text{ million} and \\ \Psi 12,857 \text{ million} at December 31, 2008 and \\ \Psi 6,564 \text{ million} and \\ \Psi 4,413 \text{ million} at December 31, 2009, respectively.

Diluted net earnings per share	₩	4,172	₩	2,955	₩	1,955

26. Employee Severance Plans

Employees with one or more years of service are entitled to receive a lump-sum payment upon termination of their employment with the Group or receive benefits after legal retirement age in installments, based on their length of

service and rates of pay at the time of termination. Under the Korean National Pension Fund Law, the Group was required to pay a certain percentage of employee severance benefits to the National Pension Fund prior to April 1999. Additionally, The Group contributes a certain percentage of employee severance benefits to a severance insurance deposit account (Severance Plan Assets) maintained for the benefit of employees at insurance companies, banks and securities. Severance Plan Assets consist of time deposits and other guaranteed principal and guaranteed interest investments. The Group deducts contributions made to the National Pension Fund and the Severance Plan Assets from its accrued employee severance plan obligations. The compensation cost of employees—severance benefit is recognized based on the vested benefits to which the employees are entitled if they immediately leave the Group.

F-67

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Under limited circumstances, employees can withdraw their accumulated unpaid severance amounts before their termination of employment (interim severance payment). Such withdrawals were included in the amount of plan payments for the years ended December 31, 2008 and 2009. Total interim severance payments made by the Group in 2008 and 2009 were \\ \pm43,846 \text{ million} and \\ \pm148,228 \text{ million}, respectively. The Group paid severance benefits, excluding interim severance payments, of \\ \pm181,691 \text{ million} and \\ \pm135,270 \text{ million} and \\ \pm252,284 \text{ million} for the years ended December 31, 2007, 2008 and 2009, respectively.

The following table sets forth the movements of accrued employee severance plan obligations included in accrued expenses and other liabilities at December 31:

	2008 (In million			
Balance at beginning of year Accruals Increase from acquisition of subsidiaries	₩	480,296 224,758 2,652	₩	528,590 276,438
Decrease from sale of subsidiaries Payments		(179,116)		(94) (400,512)
Less: Contributions to National Pension Fund and		528,590		404,422
Severance Plan Assets Balance at end of year	₩	(205,364) 323,226	₩	(229,897)174,525

The Group expects to pay the following future benefits to its employees upon their normal retirement age:

Years Ending	(In millions o	of Won)
2010	₩	1,612
2011		2,319
2012		1,152
2013		3,552
2014		7,156
2015~2019		94,959
	₩	110,750

The above amounts were determined based on the employees current salary rates and the number of service years that will be accumulated upon their retirement date.

27. Employee Share-based Compensation and Other Benefits

Employee stock-based compensation plan

The Group has various share-based compensation plans to reward its employees and key executives of the Group. All the Group s compensation plans are classified as liabilities using the fair-value-based method under ASC 718 (formerly SFAS 123R).

Share-based compensation expense was \$104,042 million, \$(114,058) million and \$52,077 million in 2007, 2008 and 2009, respectively. The per share weighted fair value of the stock options granted to key employees, executives and directors of the Group was \$16,259 for 2007 and \$12,275 for 2008 and nil for 2009. These fair value amounts were calculated using the Partial Differential Equation (PDE) Solution model. Effective January 1, 2007, the Group changed its valuation model from the Black-Scholes model to the PDE Solution model for a more representative measurement of fair value of performance-based stock options.

F-68

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The following table illustrates the significant assumptions used to estimate the fair value of share options at the grant date (the group did not grant any stock options during 2009):

		Financial oup
	2007	2008
Risk-free interest rate	4.69%	5.16%
Expected lives(1)	5.00 years	5.00 years
Expected volatility(2)	32.12%	30.60%
Expected dividend rate	3.06%	2.62%

Note:

- (1) Expected lives are calculated based on a simplified method since the Group does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate the expected term.
- (2) Expected volatility is based on implied volatility derived from historical volatility of the Group s stock price.

Shinhan Financial Group Plan

Shinhan Financial Group has authorized 79,094,106 shares of options to be granted to purchase its common stock. Shinhan Financial Group granted to its key employees, managements and directors of the Group 1,004,200 options, 1,156,300 options, 1,301,600 options, 2,695,200 options, 3,296,200 options, 1,301,050 options and 808,700 options at an exercise price of \text{\text{W}18,910}, \text{\text{W}11,800}, \text{\text{W}21,595}, \text{\text{W}28,006}, \text{\text{W}38,829}, \text{\text{\text{W}54,560}} and \text{\text{\text{W}49,053}} per share with vesting period of two years from the grant date in 2002, 2003, 2004, 2005, 2006, 2007 and 2008, respectively. Upon vesting, the 1st, 2nd and 3rd options may be exercised within three to four years while the 4th, 5th, 6th and 7th options may be exercised within four years after one year from vesting. Options granted to management and directors are performance-based and market-based linked to average market price of the Group s three main domestic competitors shares. With regard to options granted on May 22, 2002, May 15, 2003, March 25, 2004, March 30, 2005 and March 21, 2006, Shinhan Financial Group decided to pay the difference between the exercise price and average market price in cash at the date of exercise. With regard to options granted on March 20, 2007 and March 19, 2008, the Group may issue shares (new shares of common stock or treasury shares) upon settlement or pay in cash the difference between the exercise and average market price at the date of exercise.

Shinhan Bank and Shinhan Investment Corp. (formerly Good Morning Shinhan Securities) Plan

Shinhan Bank and Shinhan Investment Corp. (formerly Good Morning Shinhan Securities) granted share options to certain executives with a vesting period of two years from the grant date in 1999, 2000, 2001, 2002, 2003, and 2004. During 2004 and 2005, both companies decided to settle all outstanding stock options for cash based on price calculated in reference to the market price of the common stock of Shinhan Financial Group, multiplied by an exchange ratio.

F-69

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

A summary of the status of the Group s unvested options as of December 31, 2008 and 2009 and changes during the years ended December 31, 2008 and 2009 is presented below:

	Shinhan Fina Number of Options	Group eighted- verage int Date r Value Option i Won)	
Unvested at January 1, 2008 Granted Vested Forfeited	3,955,998 808,700 (2,765,738) (138,202)	₩	8,884 12,275 5,797 11,469
Unvested at December 31, 2008	1,860,758	W	14,754
Unvested at January 1, 2009 Granted Vested	1,860,758 (1,110,427)	₩	14,754 16,259
Forfeited	(76,093)		14,760
Unvested at December 31, 2009	674,238	₩	12,275

Total fair value of shares vested during 2007, 2008 and 2009 were \\$\psi_63,821\$ million, \\$\psi_12,168\$ million and \\$\psi_9,204\$ million, respectively. As of December 31, 2009, there was \\$\psi_509\$ million of total unrecognized compensation cost related to unvested stock awards, net of the forfeiture provision. Such cost is expected to be recognized over a weighted-average period of 0.2 years.

Employee Stock Ownership Association

In 2002, Shinhan Financial Group established an employee stock ownership association (the ESOA) covering most of their employees. The Group makes cash contributions to the ESOA on a periodic basis based on the Group's actual performance relative to pre-specified net income. The Group's cash contributions are used to purchase shares of the common stock of the Group on the Korea Exchange. All shares acquired by the ESOA are unallocated, and are restricted for a period of four years pursuant to the plan agreements and regulations governing the ESOA. In addition, under the Securities and Exchange Act of Korea, employees participating in the ESOA have a right of first refusal, subject to certain exceptions, to subscribe for up to 20% of the shares publicly offered by the Group pursuant to the Securities and Exchange Act of Korea. Furthermore, this right is exercisable only to the extent that the total number of shares so acquired and held by such employees does not exceed 20% of the Group's total number of shares then outstanding. For the years ended December 31, 2007, 2008 and 2009, the Group recorded in aggregate

W34,266 million, W34,112 million and W35,060 million in expenses related to the ESOA contributions, respectively.

28. Fair Value Measurements

Effective January 1, 2008, the Group adopted ASC 820-10 (formerly SFAS 157). This guidance defines fair value, expands disclosure requirements around fair value and specifies a three-level fair value hierarchy of

F-72

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. The Group determines the fair value of its financial instruments that are recognized or disclosed at fair value in the financial statements in accordance with ASC 820-10.

ASC 820-10 requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value is an exit price, defined as a price received in exchange of assets disposed or paid in transferring liabilities between market participants, at the measurement date. As such, the Group s own assumptions reflect those market participants used in pricing the asset or liability at the measurement date. The following in the description of fair value hierarchy based on pricing inputs.

Level 1 Quoted prices for identical instruments in active markets. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as certain securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value measurements. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques based on significant unobservable inputs, as well as management judgements or estimates that are significant to valuation.

The Group establishes and documents its policy and process for determining fair values. Fair value is based upon quoted market prices, where available. If quoted prices are not available, fair value is based upon internally developed models that primarily use, as inputs, market-based or independently sourced market parameters, including but not limited to yield curves, interest rates, volatilities, equity or debt prices, foreign exchange rates and credit curves as well as other relevant factors.

The price transparency of financial instruments is a key determinant of the degree of judgment involved in measuring fair value of the Group s financial instruments. Financial instruments for which actively quoted prices or pricing parameters are available will generally have a higher degree of price transparency than those that are thinly traded or not quoted. In accordance with ASC 820-10, the criteria used to determine whether the market for a financial instrument is active or inactive is based on the particular asset or liability.

As a result of the adoption of ASC 820-10, the Group has made some amendments to the techniques used in measuring the fair value of derivatives and other positions. These amendments change the way that the probability of default of a counterparty is factored into the valuation of derivative positions and include the impact of the Group s own credit risk on derivatives and other liabilities measured at fair value.

Credit valuation adjustments (CVA) are necessary when the market price (or parameter) is not indicative of the changes in credit quality of the counterparty. As few classes of derivative contracts are listed on an exchange, the majority of derivative positions are valued using internally developed models and the Group makes an adjustment necessary to reflect the credit quality of each derivative counterparty to arrive at fair value. The adjustment also takes into account contractual factors designed to reduce the Group s credit exposure to each

counterparty, such as collateral and legal rights of offset.

Debit valuation adjustments (DVA) are necessary to reflect the credit quality of the Group in the valuation of liabilities measured at fair value. This adjustment is incorporated into the Group s valuations in accordance with ASC 820-10. The methodology to determine the adjustment is consistent with CVA and incorporates the Group s credit spread as observed through the credit default swap market.

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The followings are descriptions of valuation methodologies used by the Group to measure various financial instruments at fair value.

Trading and available-for-sale securities and securities sold short, not yet purchased: The fair values of the securities included in trading assets and available-for-sale securities included in securities and securities in short position included in short-term borrowings are recognized in the consolidated balance sheets based on quoted market prices, where available. For the securities traded in the over-the-counter market, the Group generally determines fair value utilizing internal valuation techniques or based on prices obtained from independent pricing services or brokers. Trading securities and derivatives recorded by using valuation methods and prices obtained from pricing services or brokers are generally classified as Level 2 except in the cases where such quoted prices include unobservable inputs to the models, then such financial instruments are classified as Level 3. The Group validates prices received from pricing services or brokers using a variety of methods, including, but not limited to, comparison to secondary pricing services, corroboration of pricing by reference to other independent market data such as secondary broker quotes and relevant benchmark indices, and review of pricing by the Group s personnel familiar with market liquidity and other market-related conditions. The Group has internal price verification procedures and reviews fair value methodology documentation provided by independent pricing services.

Derivatives assets and liabilities: The majority of derivatives entered into by the Group are traded in over-the-counter markets and no quoted market prices are available approximating their fair values. The valuation of those derivatives are determined using internal models that require the use of multiple market inputs such as interest rate, prices and indices to generate continuous yield or pricing curves and volatility factors. The over-the-counter derivatives are placed in either Level 2 or Level 3 depending on the observability of the significant inputs to the model.

Collateral dependent loans: For collateral dependent loans, impairment is measured based on the fair value of the collateral underlying the subject loan. When the carrying amount of the subject impaired loan is higher than the fair value of the collateral, the carrying amount is written down to the fair value of the collateral in accordance with the fair value requirements of ASC 820-10. The fair value of the collateral is determined as the present value of the estimated realizable value of the collateral at the expected time of the sale of such collateral. Once the valuation report of the court-appointed appraiser becomes publicly available as part of a foreclosure proceeding, we use the appraisal value for the collateral indicated in such report as the estimated realizable value of the collateral. However, until such publication, we use the valuation amount for the collateral as determined by outside independent appraisers at the time that the subject loan was initially approved, with adjustments made for the change in value from the effect of time passage and current market circumstances that may impact the value of the collateral. Since there is no secondary market where collateral dependent loans are actively traded, they are measured for impairment based on the fair value of the underlying collateral. While outside appraisers (whether court-appointed or in connection with the initial approval of the subject loan) consider observable inputs such as the sale prices of assets similar to such collateral, additional adjustments based on unobservable inputs are warranted in the valuation of collateral subject to a court-supervised foreclosure proceeding since the auction from such proceeding tends to result in a sale price less than that obtainable from a sale transaction conducted in the ordinary course of business. This use of unobservable inputs makes it necessary to classify collateral dependent loans as Level 3.

Assets and liabilities measured at fair value on a recurring basis

As of December 31, 2008 and 2009, instruments measured at fair value on a recurring basis comprised 18.48% and 15.47% of the Group s total assets and 5.12% and 2.42% of the Group s total liabilities, respectively. The following table presents assets and liabilities measured at fair value on a recurring basis by fair-value hierarchy levels as of December 31, 2008 and 2009.

Changes in Level 3 items measured at fair value on a recurring basis

In circumstances where observable market data are not available, significant unobservable inputs are utilized to determine fair value. In such cases, the assets and liabilities are classified as Level 3. As of December 31, 2008, assets and liabilities categorized as Level 3 represented 1.54% and 8.37% of the Group s total assets and liabilities measured at fair value on a recurring basis, respectively. As of December 31, 2009, assets and liabilities categorized as Level 3 represented 1.53% and 20.62% of the Group s total assets and liabilities measured at fair value on a recurring basis, respectively. Both observable and unobservable inputs may be used to determine the fair value of positions that the Group has classified within the Level 3 category. As a result, the realized and unrealized gains and losses for assets and liabilities within the Level 3 category presented in the tables below may include changes in fair value that were attributable to both observable and unobservable inputs.

The following table presents additional information about Level 3 assets and liabilities measured at fair value on a recurring basis for the years ended December 31, 2008 and 2009:

	Ja	nuary 1,	Ga	Tot Realized/U ains (Losse ir Trading	Jnrea es) Ro			ansfers in ind/or out		urchases, ssuances and	Dec	ember 31,		realized Gains Losses) Still

Note:

- (1) Includes the change in fair value of available-for-sale securities and other investments, change in accumulated other comprehensive income (loss), gains (losses) from sales and impairment losses.
- (2) Transfers into or out of Level 3 are made if the inputs used in the financial models measuring the fair values of the assets and liabilities became unobservable or observable, respectively. These transfers are effective as of the beginning of the year, and any gains or losses occurring on these assets and liabilities during the year are presented as Level 3.

F-77

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(3) Represents the amount of total gains or losses for the years ended December 31, 2008 and 2009, included in earnings (and accumulated other comprehensive income (loss) for changes in fair value of available-for-sale investments and other investment) attributable to the change in fair value relating to assets and liabilities classified as Level 3 that are still held at December 31, 2008 and 2009.

The significant changes in Level 3 assets and liabilities for the year ended December 31, 2008 are as follows:

A net decrease in available-for-sale securities of \,\text{\text{\$\psi}}48,202\) million was mainly driven by recognition of other-than-temporary impairment of CDOs which are included in earnings.

The changes in the Level 3 derivative assets and liabilities of \$256,012 million and \$(60,820) million were mainly due to:

- (i) The Group transferred \(\pm\)52,074 million and \(\pm\)33,310 million of derivatives assets and liabilities from the Level 2 into the Level 3 category in the fair-value hierarchy during the year ended December 31, 2008. The valuation of these derivatives is affected by the credit valuation and debt valuation adjustments, which is based on an internal valuation technique, and the extent of such adjustment was significant enough to render the fair-value hierarchy of the respective instruments into the lower level.
- (ii) The changes in the Level 3 realized/unrealized gains (losses) from trading derivatives were due to gain of \text{\text{\text{\text{W}}296,635}} million and \text{\text{\text{\text{\text{\text{\text{W}}47,642}}} million relating to derivative assets and liabilities, respectively, and these gains include both realized and unrealized gains during the year ended December 31, 2008.

The significant changes in Level 3 assets and liabilities for the year ended December 31, 2009 are as follows:

A net decrease in available-for-sale securities of \(\frac{\pi}{47}\),879 million was mainly driven by recognition of other-than-temporary impairment of CDOs which are included in earnings.

The changes in the Level 3 derivative assets and liabilities of $\Psi(169,354)$ million and $\Psi(330,783)$ million were mainly due to:

- (i) The Group transferred \(\pi\)357,219 million of derivatives assets from the Level 2 into the Level 3 category in the fair-value hierarchy during the year ended December 31, 2009. The valuation of these derivatives is affected by the credit valuation and debt valuation adjustments, which is based on an internal valuation technique, and the extent of such adjustment was significant enough to render the fair-value hierarchy of the respective instruments into the lower level. And the Group transferred \(\pi\)104,499 million of derivatives assets and \(\pi\)132,167 million of derivatives liabilities to the Level 2 from the Level 3 category in the fair-value hierarchy during the year ended December 31, 2009 as the availability of observable pricing inputs relevant to the asset or liability that is significant to the fair value measurement in its entirety has been increased as of December 31, 2009.
- (ii) The changes in the Level 3 realized/unrealized gains (losses) from trading derivatives were due to loss of \times 157,835 million and \times 554 million relating to derivative assets and liabilities, respectively, and these losses include both realized and unrealized losses during the year ended December 31, 2009.

Assets and liabilities measured at fair value on a non-recurring basis

Certain assets and liabilities are measured at fair value on a non-recurring basis and are not included in the tables above. These assets and liabilities primarily include assets measured at cost that have been written down to fair value during the period as a result of an impairment.

F-78

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The following table presents collateral dependent loans and lease receivables, goodwill and other assets of which balances at December 31, 2008 and 2009 are measured at fair value on a non-recurring basis based on the ASC 820-10 valuation hierarchy.

Level 1 Level	008 el 2 Level 3 ns of Won)
Loans and lease receivables(1) \\ \textbf{\textstyle W}	₩ 438,011
Goodwill(2)	8,788
Other assets other investments(3) 67,201	17,755
	2009
	vel 2 Level 3 lions of Won)
Loans and lease receivables(1) \\ \text{W} \text{W} \text{Goodwill(2)}	₩ 432,765
Other assets other investments(3)	9,591

Note:

- (1) Represents carrying values net of allowances and cumulative impairment charges of related impaired loans and lease receivables which are collateral dependent and are evaluated based on the fair value of the underlying collateral. The fair value of the collateral for such impaired loans and lease receivables is based on the appraisal value of external valuation experts, as adjusted for significant inputs related to the foreclosure proceeding for such collateral, which inputs are deemed to be unobservable. We accordingly classify collateral dependent loans and lease receivables as Level 3.
- (2) The Group recorded goodwill impairment charges of \(\mathbb{W}\)128,394 million and \(\mathbb{W}\)59,517 million at December 31, 2008 and 2009, respectively, as determined based on Level 3 inputs. See Note 10 for additional information on goodwill impairment
- (3) The Group recorded impairment charges of ₩33,206 million and ₩12,038 million at December 21, 2008 and 2009, respectively.

29. Fair Value of Financial Instruments

Fair value measurements and Disclosure (formerly SFAS No. 107, *Disclosures About Fair Value of Financial Instruments* (SFAS 107) (ASC 820-10)) requires the disclosure of the estimated fair value of financial instruments including those financial instruments for which the Group did not elect the fair value option. The fair values of such instruments have been derived, in part, by management s assumptions, the estimated amount and timing of future cash

flows and estimated discount rates. Different assumptions could significantly affect these estimated fair values. Accordingly, the net realizable values could be materially different from the estimates presented below. In addition, the estimates are only indicative of the value of individual financial instruments and should not be considered an indication of the fair value of the Group.

The following methods and assumptions are used by the Group in estimating fair value disclosures for its financial instruments:

Assets and liabilities for which fair value approximates carrying value: The carrying values of certain financial assets and liabilities are reported at cost, including cash and cash equivalents, restricted cash, call loans, accrued interest and dividends receivable, customers—liability on acceptances, accrued interest and dividend payable, security deposits, and acceptances outstanding. The carrying values of these financial assets and liabilities are considered to approximate their fair values due to their short-term nature and negligible losses due to credit risks.

F-79

Table of Contents

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Interest-bearing deposits in banks: The carrying amounts of short-term interest-bearing deposits approximate their fair value because they are short-term in nature or carry variable interest rates.

Held-to-maturity securities: The fair values for held-to-maturity securities are based on quoted market prices, or quoted market prices of comparable instruments if the quoted market prices are not available.

Nonmarketable equity investments: Nonmarketable equity investments, which are recorded in other assets, consist primarily of private equity investments. The fair values of these investments are based on the latest obtainable net asset value of the investees and adjusted for other-than-temporary impairment losses.

Loans: Loans and advances are net of allowance for loan losses. The fair values of loans are generally determined by discounting both principal and interest cash flows expected to be collected using an observable discount rate for similar instruments with adjustments that management believes a market participant would consider in determining fair value. The Group estimates the cash flows expected to be collected using interest rate and prepayment risk models that incorporate management s best estimate of current key assumptions, such as default rates, loss severity and prepayment speeds for the life of the loan.

Deposits: The carrying amounts of variable-rate interest and non-interest-bearing deposits approximate their fair values at the balance sheet date. Fair values for fixed rate interest-bearing deposits are estimated using discounted cash flow analysis using market interest rates currently offered for deposits with similar maturities.

Short-term borrowings: The carrying amounts of call money, securities sold under repurchase agreements and short-term borrowings approximate their fair values due to their short-term nature and negligible losses due to credit risks.

Long-term debt: The fair values of long-term borrowings are estimated based on quoted market prices, where available. For those notes where quoted market prices are not obtainable, a discounted cash flow analysis is used based on the Group s current incremental borrowing rates for similar types of borrowing arrangements.

Secured borrowings: The fair values for securities sold under agreements to repurchase are estimated using discounted cash flow analysis that applies current market interests offered for arrangements with similar maturities as no quoted market price is available. The fair values for beneficial interests issued by the VIEs are based on market quotes where available, or discounted cash flow analysis using market interest rates.

The differences between the carrying amounts and the fair values of guarantees, commercial letters of credit, standby letters of credit, and other lending commitments are immaterial to the consolidated financial statements.

30. Derivative Instruments, Hedging Activities and Credit Derivatives

Derivative Instruments

The Group enters into various types of derivative transactions in the course of its trading and non-trading activities. These derivatives include futures and forward contracts, swap contracts and option contracts. Futures and forward contracts are commitments to buy or sell at a future date a financial instrument, commodity or currency at a contracted price and may be settled in cash or through delivery. Swap contracts are commitments to settle in cash at a future date or dates which may range from a few days to a number of years, based on differentials between specified financial indices, as applied to a notional principal amount. Option contracts give the purchaser, for a fee, the right, but not the

obligation, to buy or sell within a limited time, a financial instrument or currency at a contracted price that may also be settled in cash, based on differentials between specified indices.

The Group enters into these derivative transactions relating to interest rate, foreign currency, market/credit, commodity and other risks to enable customers to transfer, modify or reduce their interest rate, foreign exchange and other market risks. As part of this process, the Group considers the customers—suitability for the risk involved, and the business purpose for the transaction. The Group also manages its derivative-risk positions through offsetting trade activities, controls focused on price verification, and daily reporting of positions to senior managers. In addition the Group trades these products for its own account. Trading limits and price verification controls are key aspects of this activity. The Group uses derivatives in connections with its risk-management activities to hedge

F-81

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

certain risks or reposition the risk profile of the Group. For example, the Group may issue fixed-rate long-term debt and then enter into a receive-fixed, pay-variable-rate interest rate swap with the same tenor to a net variable-rate basis. This strategy is the most common form of an interest rate hedge, as it minimizes interest cost in certain yield curve environments. Derivatives are also used to manage interest rate risk relating to specific groups of on-balance sheet assets and liabilities, including investments, loans, and long-term debt. In addition, foreign exchange contracts are used to hedge the foreign currency denominated debt, net capital exposures and foreign exchange transactions. The fair values of derivatives not qualifying for hedge accounting are included in trading assets(or trading liabilities) and any changes in fair values are included in net trading profits(losses). The fair values of derivatives qualifying for hedge accounting are included in other assets (or other liabilities) and the earning impact of these fair value hedges and the changes in fair values attributable to the risk being hedged for the hedged item are included in non-interest income (or non-interest expense).

Derivatives may expose the Group to market risk, credit risk or liquidity risk in excess of the amounts recorded on the consolidated statements of financial position. Market risk on a derivative or foreign exchange product is the exposure created by potential fluctuations in interest rates, foreign exchange rates and other values, and is a function of the type of product, the volume of transactions, the tenor and terms of the agreement, and the underlying volatility. Credit risk is the exposure to loss in the event of nonperformance by the other party to the transaction where the value of any collateral held is not adequate to cover such losses. The recognition in earnings of unrealized gains on these transactions is subject to management s assessment as to collectibility. Liquidity risk is the potential exposure that arises when the size of the derivative position may not be able to be rapidly adjusted in periods of high volatility and financial stress at a reasonable cost.

The total notional amounts for both long and short derivative positions, representing the volume of derivative activity, at December 31, 2009 are as follows:

	Underlying Notional Amount(1)		Estimated Fair Value Assets(2) (In millions of Won)			Estimated Fair Value Liabilities(2)

- (2) The fair values of the trading derivative assets/liabilities and nontrading that do not qualify for hedge accounting are presented in Note 6. The fair values of the hedging derivative assets/liabilities that qualify for hedge accounting are presented in Note 11 and Note 17.
- (3) While the Group engages in derivatives trading activities to hedge the interest rate risk and foreign exchange risk exposure that arise from its own assets and liabilities, as these nontrading derivative contracts do not qualify for hedge accounting under U.S. GAAP, they are accounted for as trading derivatives in the financial statements. These contracts include interest rate swaps, forward contracts and cross-currency swaps held for nontrading that do not qualify for hedge accounting treatment.

The Group present the fair value of derivative instruments on a gross basis even when the derivative instruments are subject to master netting arrangement and qualify for net presentation in the consolidated balance sheet in accordance with ASC 210-20 (formerly FIN 39). Therefore, cash collateral payables and receivables associated with the derivative instruments are not added to or netted against the fair value amounts.

F-83

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Trading profits (losses) related to derivative instruments not designated or qualifying as hedging instruments under ASC 815 (formerly SFAS 133) at December 31, 2009 are as follows:

	Nontrading tl Qualify for Accoun (In	Γrading		
Foreign exchange derivatives Interest rate derivatives Equity derivatives Credit derivatives Commodity and other derivatives	₩	(18,417) (338,409)	₩	(293,162) 73,195 20,601 17,404 25,375
	₩	(356,826)	₩	(156,587)

Hedging Activities

The Group accounts for its hedging activities in accordance with ASC 815. As a general rule, hedge accounting is permitted for those situations where the Group is exposed to a particular risk, such as interest rate or foreign exchange risk, that causes changes in the fair value of an asset or liability, or variability in the expected future cash flows of an existing asset, liability or a forecasted transaction that may affect earnings.

Derivative contracts hedging the risks associated with the changes in fair value are referred to as fair value hedges, while contracts hedging the risks affecting the expected future cash flow hedges. Hedges that utilize derivatives or debt instruments to manage the foreign exchange risk associated with equity investments in non-Korean Won functional currency foreign subsidiaries (net investment in a foreign operation) are called net investment hedges.

If certain hedging criteria specified in ASC 815 are met, in including testing for hedge effectiveness, special hedge accounting may be applied. The hedge effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships. For fair value hedges, the changes in value of the hedging derivative, as well as the changes in value due to the risk being hedged, are reflected in current earnings. The Group does not apply hedge accounting for cash flow hedge and net investment hedge.

For asset and liability management hedging, the fixed-rate long-term debt may be recorded at amortized cost under current U.S. GAAP. However, by electing to use ASC 815 hedge accounting, the carrying value of the debt is adjusted for changes in the benchmark interest rate, with any such changes in value recorded in current earnings. The related interest-rate swap is also recorded on the balance sheet at fair value, with any changes in fair value reflected in earnings. Thus, any ineffectiveness resulting from the hedging relationship is recorded in current earnings. Alternatively, an economic hedge, which does not meet the ASC 815 hedging criteria, would involve only recording the derivative at fair value on the balance sheet, with its associated changes in fair value recorded in earnings. The debt would continue to be carried at amortized cost and, therefore, current earnings would be impacted only by the

interest rate shifts and other factors that cause the change in the swap s value and the underlying yield of the debt.

Key aspects of achieving hedge accounting are documentation of hedging strategy and hedge effectiveness at the hedge inception and substantiating hedge effectiveness on an ongoing basis. A derivative must be highly effective in accomplishing the hedge objective of offsetting changes in the fair value for the risk recognized in current earnings. Any ineffectiveness in the hedge relationship is recognized in current earnings. The assessment of effectiveness excludes changes in the value of the hedged item that are not related to the risks being hedged.

F-84

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

The Group hedges exposure to changes in the fair value of outstanding fixed-rate issued debt. The fixed cash flows from those financing transactions are converted to benchmark floating-rate cash flows by entering into receive-fixed, pay-floating interest rate swaps. The Group had applied fair value hedge accounting exclusively to interest rate swap transactions with the hedged items of fixed rate debts that qualified for the short-cut method for hedge relationships commencing prior to December 31, 2005. Since the Group assumed no ineffectiveness for those transactions, no ineffective portion was recognized in the consolidated statements of income for the years presented. However, the Group has not applied hedge accounting for new hedging relationships entered into since January 1, 2006.

The gain and loss on designated and qualifying fair value hedges recognized in other non-interest income and other non-interest expense for the year ended December 31 are as follow:

	2009				
	Derivatives	Hedged Items	Total		
	(In r	nillions of Won)			
Gain (loss) on designated and qualifying fair value hedges:					
Interest rate derivatives	₩ (2,734)	₩ 2,734	\mathbf{W}		

Credit Derivatives

The Group enters into credit derivatives primarily to facilitate client transactions and to manage credit risk exposures. Credit derivatives derive value based on an underlying third party-referenced obligation or a portfolio of referenced obligations and generally require the Group as the seller of credit protection to make payments to a buyer upon the occurrence of a predefined credit event. Such credit events generally include bankruptcy of the referenced credit entity and failure to pay under the obligation, as well as acceleration of indebtedness and payment repudiation or moratorium. For credit derivatives based on a portfolio of referenced credits or credit indices, the Group may not be required to make payment until a specified amount of loss has occurred and/or may only be required to make payment up to a specified amount.

For most credit derivatives, the notional value represents the maximum amount payable by the Group. However, the Group does not exclusively monitor its exposure to credit derivatives based on notional value because this measure does not take into consideration the probability of occurrence. As such, the notional value is not a reliable indicator of the Group s exposure to these contracts. Instead, a risk framework is used to define risk tolerances and establish limits to help to ensure that certain credit risk-related losses occur within acceptable, predefined limits.

The following disclosures represent a summary of the notional amounts of credit derivatives and credit linked notes the Group sold and purchased at December 31, 2008 and 2009:

Credit Risk-Related Contingent Features

Certain derivative instruments contain provisions that require the Group to either post additional collateral or immediately settle any outstanding liability balances upon the occurrence of a specified credit risk-related event. These events, which are defined by the existing derivative contracts, are primarily downgrades in the credit ratings of the Group and its subsidiaries. The fair value of all derivative instruments with credit risk-related contingent features that are in a liability position on December 31, 2009 is \text{W1,878,791} million. The Group has posted \text{W476,903} million as collateral for this exposure in the normal course of business as of December 31, 2009. The Group s credit rating as of December 31, 2009, assigned by Moody s and S&P are A2 and A-, respectively. The Group would be required to post an additional \text{W312,162} million of collateral to its counterparties if Moody s or S&P s rating falls to Baa3 and BBB-, respectively, or below.

F-86

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

31. Commitments and Contingencies

Legal and Tax Contingencies

In the ordinary course of business, the Group is involved in tax and legal proceedings, claims and litigation. As of December 31, 2009, the Group has 302 pending lawsuits as a defendant (total amount: \(\frac{\psi}{4}\)12,575 million). In the opinion of management, based on current knowledge and after consultation with external counsel, the outcome of such matters will not have a material adverse effect on the Group s consolidated financial statements.

Lease Commitments

At December 31, 2009, the Group is obliged under a number of non-cancelable operating leases for premises and equipment used primarily for banking purposes. Total rent expense for the years ended December 31, 2007, 2008 and 2009 was \times 232,901 million, \times 220,839 million and \times 228,291 million, respectively. Pursuant to the terms of non-cancelable lease agreements pertaining to premises and equipment in effect at December 31, 2009, future minimum rental commitments under various non-cancelable operating leases are as follows:

Years Ending 2010 2011	(In mill	ions of Won)
2010	₩	79,593
2011		48,971
2012		29,585
2013		14,276
2014		4,931
Thereafter		14,581
	W	191,937

In lieu of rent, certain lease agreements require the Group to advance a non-interest-bearing refundable security deposit to the landlord for the Group s use during the lease term. The amount of the advance is determined by the prevailing market rate. The Group has recorded rent expense and interest income related to these leases of \$\forall 75,090\$ million, \$\forall 43,286\$ million and \$\forall 42,365\$ million on deposit balances of \$\forall 1,194,775\$ million, \$\forall 1,222,172\$ million and \$\forall 1,225,577\$ million for the years ended December 31, 2007, 2008 and 2009, respectively. Such amounts were calculated based on the fixed interest rate for time deposits with similar maturities.

Credit Commitments and Guarantees

The following table summarizes the contractual amounts relating to unused credit commitments at December 31:

2008 2009 (In millions of Won)

Commitments to extend credit:

Corporate	W	49,872,646	₩	49,590,230
Credit card		52,577,454		64,904,222

Commercial letters of credit		3,005,711		3,319,107
	W	113 805 955	\mathbf{w}	126 608 095

Note:

(1) Excludes credit card.

F-87

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Commitments to extend credit represent unfunded portions of authorizations to extend credit in the form of loans. The commitments expire on fixed dates and a customer has to comply with predetermined conditions to draw funds under the commitments. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments. The majority of the Group s unfunded commitments are not guarantees under ASC 460 (formerly FIN 45).

Commercial letters of credit are undertakings by the Group on behalf of customers authorizing third parties to draw drafts on the Group up to a stipulated amount under specific terms and conditions. They are generally short-term and collateralized by the underlying shipments of goods to which they relate and therefore have significantly less risk.

The Group provides a variety of guarantees to its customers to enhance their credit standing and enable them to complete a variety of business transactions. The maximum potential amount of future payments represents the notional amounts that could be lost under the guarantees if there were a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from collateral held or pledged. Certain guarantees issued or modified after December 31, 2002 that are not derivative contracts have been recorded on the Group's consolidated balance sheets at their fair value at inception. The Group has recorded this amount in other liabilities with an offsetting entry in other assets. As cash is received under such arrangements and applied to other assets, the liability recorded at inception is amortized into income as commissions and fees over the life of the contract. The majority of these guarantees expire without being drawn upon. As a result, total contractual amounts are not representative of the Group's expected future cash outlay.

The table below summarizes all of the Group s guarantees at December 31, 2009:

	•	Expire Within ne Year	-	ire After e Year	A Ou	Total lotional Amount tstanding	Ca Li Am	urrent arrying ability aount(1)	Red	nount of course or ollateral Held	P Ai	aximum otential nount of Future ayments

₩ 8,442,264 ₩ 8,445,652 ₩ 16,887,916 ₩ 338,725 ₩ 10,591,308 ₩ 16,887,916

Note:

(1) Includes allowance for guarantees and liabilities recorded under ASC 460 (formerly FIN 45).

Financial stand-by letters of credit represent irrevocable obligations to pay third party beneficiaries when its customers fail to repay loans or debt instruments, which are generally in foreign currencies.

Other financial guarantees are used in various transactions to enhance the credit standing of the Group s customers. They represent irrevocable assurance, subject to satisfaction of certain conditions, that the Group will make payment in the event that the customers fail to fulfill their obligations to third parties. Such financial obligations include a return of security deposits and the payment of service fees.

F-88

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Performance letters of credit and guarantees are issued to guarantee customers—tender bids on construction or similar projects or to guarantee completion of such projects in accordance with contractual terms. They are also issued to support a customer—s obligation to supply specified products, commodities, maintenance or other services to third parties.

Liquidity facilities to SPEs represent irrevocable commitments to provide contingent liquidity credit lines including commercial paper purchase commitments to SPEs for which the Group serves as the administrator. The SPEs are established by clients to obtain funding from the commercial paper market or the corporate debt market by transferring assets to the SPEs. The Group has commitments to provide liquidity to the SPEs in amounts up to \$\foat 1,668,582\$ million at December 31, 2009. Although the Group does not sell assets to these SPEs, it would be required to provide funding under the liquidity facilities in the event that the SPEs do not hold enough funds to make scheduled payments on their outstanding senior debt securities. Under the commercial paper purchase commitments, the Group is required to purchase commercial paper issued by the SPEs when enough funding is not available in the commercial paper market. The Group has limited credit exposure to these SPEs because the risk of first loss is borne by the clients or other third parties, or the SPEs are over-collateralized with the assets sold to them.

Guarantees on trust accounts represent guarantee on the Guaranteed Principal Money Trusts which require the Group to guarantee the return of the principal amount invested at the termination of a fixed term deposit. The Group manages and administers trust assets in the capacity as a fiduciary on behalf of its customers. Trust assets and liabilities are excluded from the consolidated financial statements of the Group, and are recorded in separate accounts from those of the Group s business. See Notes 32 and 34 for further discussion related to trust accounts.

Pledged Assets

The following table sets forth the primary components of assets pledged as collateral for borrowings and other purposes at December 31:

		ns of V	2009 as of Won)

Other assets		7,161		5,455	
	₩	23,322,024	₩	16,010,016	

32. Concentrations of Geographic and Credit Risks

Geographic Risk

Loans to borrowers based in Korea represented approximately 96% and 97% of the Group s loan portfolio at December 31, 2008 and 2009, respectively. Investments in debt and equity securities of Korean entities represented approximately 97% and 98% of the Group s investment portfolio at December 31, 2008 and 2009, respectively.

Credit Risk

Concentrations of credit risk arise when a number of customers are engaged in similar business activities, or activities in the same geographic region, or have similar economic characteristics that would cause their ability to meet their contractual obligations to be similarly affected by changes in economic conditions. Note 6 and Note 7

F-89

Shinhan Financial Group Co., Ltd. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

discuss the types of securities in which the Group invests. Note 8 discusses the type of loans in which the Group engages.

The Group regularly monitors various segments of its credit risk portfolio to assess potential concentration of risks and to obtain collateral when deemed necessary. Except for securities issued by KDIC, BOK and other governmental entities, no entity was responsible for 10% or more of the Group s total loans outstanding, trading assets and liabilities, available-for-sale securities, held-to-maturity debt securities or total interest and dividend income at December 31, 2008 and 2009 and for each of the three years ended on December 31, 2009.

The following table presents major products including both on-balance sheet (100% loans) and off-balance sheet (principally commitments to extend credit) exposures at December 31:
