UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549
FORM 10Q

þ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2010

o **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from __________ to __________

Commission File Number 1-2958
HUBBELL INCORPORATED
(Exact name of registrant as specified in its charter)

State of Connecticut	**06-0397030**
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
40 Waterview Drive, Shelton, CT	**06484**
(Address of principal executive offices)	(Zip Code)

(475) 882-4000
(Registrant s telephone number, including area code)
584 Derby Milford Road, Orange, CT 06477
(Former name, former address and former fiscal year, if changed since last report.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes þ No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer þ	Accelerated filer o	Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No þ

The number of shares outstanding of the Class A Common Stock and Class B Common Stock as of July 19, 2010 were 7,167,506 and 52,786,351, respectively.

HUBBELL INCORPORATED
Notes to Condensed Consolidated Financial Statements
(unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Hubbell Incorporated (Hubbell , the Company , registrant , we , our or us , which references shall include its divisions and subsidiaries) have been pr in accordance with generally accepted accounting principles (GAAP) for interim financial information. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America (U.S.) for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair statement of the results of the periods presented have been included. Operating results for the six months ended June 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

The balance sheet at December 31, 2009 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by accounting principles generally accepted in the U.S. for complete financial statements. Certain reclassifications have been made in the prior year financial statements and notes to conform to the current year presentation.

For further information, refer to the consolidated financial statements and footnotes thereto included in the Hubbell Incorporated Annual Report on Form 10-K for the year ended December 31, 2009.

Recent Accounting Pronouncements

In 2009, the Financial Accounting Standards Board (FASB) issued the FASB Accounting Standards Codification (the Codification) which established the Codification as the authoritative source of nongovernmental accounting principles to be applied to financial statements prepared in accordance with GAAP.

In January 2010, the FASB issued new guidance that both expanded and clarified the disclosure requirements related to fair value measurements. Entities are required to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 of the fair value valuation hierarchy and describe the reasons for the transfers. Additionally, entities are required to disclose and roll forward Level 3 activity on a gross basis rather than as one net number. The new guidance also clarified that entities are required to provide fair value measurement disclosures for each class of assets and liabilities. In addition, entities are required to provide disclosures about the valuation techniques and inputs used to measure fair value of assets and liabilities that fall within Level 2 or Level 3 of the fair value valuation hierarchy. The new disclosures were adopted by the Company on January 1, 2010, except for the Level 3 roll forward disclosures. The Level 3 roll forward disclosures are effective for fiscal years beginning after December 15, 2010 and, as a result, will be adopted by the Company on January 1, 2011. See Note 11 Fair Value Measurement.

Effective January 2010, an amendment to the Consolidation Topic of the Codification replaced the quantitative-based risks and rewards calculation for determining which reporting entity, if any, has a controlling financial interest in a variable interest entity (VIE) with a primarily qualitative analysis. The qualitative analysis is based on identifying the party that has both the power to direct the activities that most significantly impact the VIE s economic performance (the power criterion) and the obligation to absorb losses from or the right to receive benefits of the VIE that could potentially be significant to the VIE (the losses/benefit criterion). The party that meets both these criteria is deemed to have a controlling financial interest. The party with the controlling financial interest is considered to be the primary beneficiary and as a result is required to consolidate the VIE. The Company has a 50% interest in a joint venture in Hong Kong, established as Hubbell Asia Limited (HAL). The principal objective of HAL is to manage the operations of its wholly-owned manufacturing company in the People s Republic of China. Under the new accounting guidance, the Company continues to be the primary beneficiary of HAL and as a result continues to consolidate HAL. This determination is based on the fact that HAL s sole business purpose is to manufacture product exclusively for the Company (the power criterion) and the Company is financially responsible for ensuring HAL maintains a fixed operating margin (the losses/benefit criterion). The consolidation of HAL is not material to the Company s consolidated financial results.

6

Table of Contents

2. Segment Information

The Company s reporting segments consist of the Electrical segment and the Power segment. The following table sets forth financial information by business segment (in millions):

	Net Sales		Operating Income		Operating Income as a % of Net Sales	
	2010	2009	2010	2009	2010	2009
Three Months Ended June 30,						
Electrical	$ 458.4	$ 397.0	$ 61.1	$ 31.2	13.3%	7.9%
Power	188.0	187.2	32.4	35.4	17.2%	18.9%
Total	$ 646.4	$ 584.2	$ 93.5	$ 66.6	14.5%	11.4%
Six Months Ended June 30,						
Electrical	$ 867.7	$ 799.5	$ 101.2	$ 58.9	11.7%	7.4%
Power	349.2	370.3	58.0	65.0	16.6%	17.6%
Total	$ 1,216.9	$ 1,169.8	$ 159.2	$ 123.9	13.1%	10.6%

3. Business Acquisitions

The Company accounts for acquisitions in accordance with the Business Combinations Topic of the Codification. On October 2, 2009, the Company completed the purchase of Burndy Americas Inc. (Burndy) for $355.2 million in cash (net of cash acquired of $33.6 million). Burndy is a leading North American manufacturer of connectors, cable accessories and tooling. Burndy serves commercial and industrial markets and utility customers primarily in the United States (with roughly 25% of its sales in Canada, Mexico and Brazil). This acquisition was completed to complement Hubbell s existing product offerings. The Burndy acquisition was added to the electrical systems business within the Electrical Segment.

4. Inventories, net

Inventories, net are comprised of the following (in millions):

	June 30, 2010	December 31, 2009
Raw material	$ 92.9	$ 88.0
Work-in-process	64.1	62.0
Finished goods	191.2	185.2
	348.2	335.2
Excess of FIFO over LIFO cost basis	(71.7)	(71.7)
Total	$ 276.5	$ 263.5

Table of Contents

5. Goodwill and Other Intangible Assets

Changes in the carrying values of goodwill for the six months ended June 30, 2010, by segment, were as follows (in millions):

	Segment		
	Electrical	Power	Total
Balance December 31, 2009	$ 465.2	$ 278.5	$ 743.7
Translation adjustments	(2.7)	(0.4)	(3.1)
Balance June 30, 2010	$ 462.5	$ 278.1	$ 740.6

The Company performs its annual goodwill impairment testing as of April 1st of each year unless circumstances dictate the need for more frequent assessments. Goodwill impairment testing involves a two-step process. Step 1 compares the fair value of the Company s reporting units to their carrying values. If the fair value of the reporting unit exceeds its carrying value, no further analysis is necessary. If the carrying value of the reporting unit exceeds its fair value, Step 2 must be completed to quantify the amount of impairment.

Goodwill impairment testing requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units and determining the fair value of each reporting unit. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, determining appropriate discount rates and other assumptions. The Company uses internal discounted cash flow estimates to determine fair value. These cash flow estimates are derived from historical experience and future long-term business plans and the application of an appropriate discount rate. The aggregate fair value of the Company s reporting units is compared to the Company s market capitalization on the valuation date to assess its reasonableness. Changes in these estimates and assumptions could materially affect the determination of fair value and/or goodwill impairment for each reporting unit.

As of April 1, 2010, the impairment testing resulted in implied fair values for each reporting unit that exceeded the reporting unit s carrying value, including goodwill. The Company did not have any reporting units at risk of failing Step 1 of the impairment test.

The carrying value of other intangible assets included in Intangible assets and other in the Condensed Consolidated Balance Sheet is as follows (in millions):

	June 30, 2010		December 31, 2009	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Definite-lived:				
Patents, tradenames and trademarks	$ 82.7	$ (13.1)	$ 83.0	$ (11.0)
Customer/Agent relationships and other	181.0	(27.8)	181.3	(22.0)
Total	263.7	(40.9)	264.3	(33.0)
Indefinite-lived:				
Tradenames and other	56.2		56.2	
Total	$ 319.9	$ (40.9)	$ 320.5	$ (33.0)

Amortization expense associated with these definite-lived intangible assets for the six months ended June 30, 2010 was $8.2 million. Amortization expense associated with these intangible assets for the full year is expected to be $15.5 million in 2010, $15.1 million in 2011, $14.4 million in 2012, $14.1 million in 2013, $13.7 million in 2014 and $13.0 million in 2015.

Dividends to noncontrolling interest		(0.5)	(0.5)			
Cash dividends declared	(43.2)		(43.2)	(39.5)		(39.5)
Equity, end of period	$ 1,360.6	$ 4.0	$ 1,364.6	$ 1,073.6	$ 3.5	$ 1,077.1

The detailed components of total comprehensive income are presented in Note 7 Comprehensive Income.

Table of Contents

7. Comprehensive Income

Total comprehensive income and its components are as follows (in millions):

	Three Months Ended June 30		Six Months Ended June 30	
	2010	2009	2010	2009
Net income	$ 57.9	$ 39.6	$ 96.9	$ 73.7
Foreign currency translation adjustments	(3.1)	26.8	(6.4)	22.1
Amortization of net prior service costs and net actuarial losses, net of tax	0.7	1.2	1.7	2.4
Change in unrealized losses (gains) on investments, net of tax	0.2	(0.1)	0.1	0.1
Change in unrealized (gains) losses on cash flow hedges, net of tax	0.8	(1.0)	0.8	(1.5)
Total Comprehensive income	56.5	66.5	93.1	96.8
Less: Comprehensive income attributable to noncontrolling interest	0.3	0.2	0.7	0.5
Comprehensive income attributable to Hubbell	$ 56.2	$ 66.3	$ 92.4	$ 96.3

8. Earnings Per Share

The Company computes earnings per share using the two-class method, which is an earnings allocation formula that determines earnings per share for common stock and participating securities. Restricted stock granted by the Company is considered a participating security since it contains a non-forfeitable right to dividends.

The following table sets forth the computation of earnings per share for the three and six months ended June 30, 2010 and 2009 (in millions, except per share amounts):

	Three Months Ended June 30		Six Months Ended June 30	
	2010	2009	2010	2009
Numerator:				
Net income attributable to Hubbell	$ 57.6	$ 39.4	$ 96.2	$ 73.2
Less: Earnings allocated to participating securities	0.2	0.2	0.4	0.3
Net income available to common shareholders	57.4	39.2	95.8	72.9
Denominator:				
Average number of common shares outstanding	59.8	56.2	59.7	56.2
Potential dilutive shares	0.4	0.1	0.4	0.1
Average number of diluted shares outstanding	60.2	56.3	60.1	56.3
Earnings per Share:				
Basic	$ 0.96	$ 0.70	$ 1.60	$ 1.30
Diluted	$ 0.95	$ 0.70	$ 1.59	$ 1.30

Anti-dilutive securities excluded from the calculation of earnings per diluted share:				
Stock options and performance shares	0.7	2.2	0.7	2.3
Stock appreciation rights	1.6	1.9	1.6	2.0

Table of Contents

9. Pension and Other Benefits

The following table sets forth the components of pension and other benefits cost for the three and six months ended June 30, (in millions):

	Pension Benefits		Other Benefits	
	2010	2009	2010	2009
Components of net periodic benefit cost for the three months ended June 30				
Service cost	$ 3.0	$ 3.1	$ 0.1	$
Interest cost	9.3	9.1	0.5	0.4
Expected return on plan assets	(10.4)	(9.3)		
Amortization of prior service cost	0.1	0.1		
Amortization of actuarial losses	1.2	1.7	(0.1)	
Net periodic benefit cost	$ 3.2	$ 4.7	$ 0.5	$ 0.4
Components of net periodic benefit cost for the six months ended June 30				
Service cost	$ 6.0	$ 6.2	$ 0.1	$ 0.1
Interest cost	18.6	18.2	1.0	0.8
Expected return on plan assets	(20.7)	(18.6)		
Amortization of prior service cost	0.2	0.2		(0.1)
Amortization of actuarial losses	2.5	3.3	(0.1)	
Net periodic benefit cost	$ 6.6	$ 9.3	$ 1.0	$ 0.8

Employer Contributions

The Company anticipates contributing approximately $7.0 million to its foreign plans during 2010, of which $1.7 million has been contributed through June 30, 2010. Although not required under the Pension Protection Act of 2006, the Company may make a voluntary contribution to its qualified domestic benefit pension plans in 2010.

10. Guarantees

The Company accrues for costs associated with guarantees when it is probable that a liability has been incurred and the amount can be reasonably estimated. The most likely costs to be incurred are accrued based on an evaluation of currently available facts and, where no amount within a range of estimates is more likely, the minimum is accrued.

The Company records a liability equal to the fair value of guarantees in accordance with the Guarantees Topic of the Codification. As of June 30, 2010, the fair value and maximum potential payment related to the Company s guarantees were not material.

The Company offers a product warranty which covers defects on most of its products. These warranties primarily apply to products that are properly used for their intended purpose, installed correctly, and properly maintained. The Company accrues estimated warranty costs at the time of sale. Estimated warranty expenses are based upon historical information such as past experience, product failure rates, or the number of units to be repaired or replaced. Adjustments are made to the product warranty accrual as claims are incurred or as historical experience indicates. The product warranty accrual is reviewed for reasonableness on a quarterly basis and is adjusted as additional information regarding expected warranty costs becomes known.

Table of Contents

Changes in the accrual for product warranties during the six months ended June 30, 2010 are set forth below (in millions):

Balance at December 31, 2009	$	9.0
Provision		3.9
Expenditures/other		(4.8)
Balance at June 30, 2010	$	8.1

11. Fair Value Measurement

Fair value is defined as the amount that would be received for selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The FASB fair value measurement guidance established a fair value hierarchy that prioritizes the inputs used to measure fair value. The three broad levels of the fair value hierarchy are as follows:

Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 Quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly

Level 3 Unobservable inputs for which little or no market data exists, therefore requiring a company to develop its own assumptions

The following table shows, by level within the fair value hierarchy, our financial assets and liabilities that are accounted for at fair value on a recurring basis at June 30, 2010 and December 31, 2009 (in millions):

Asset (Liability)	**Quoted Prices in Active Markets for Identical Assets (Level 1)**		**Quoted Prices in Active Markets for Similar Assets (Level 2)**		**Total**	
June 30, 2010						
Available for sale investments	$	35.3	$		$	35.3
Trading securities		2.8				2.8
Deferred compensation plan liabilities		(2.3)				(2.3)
Derivatives:						
Forward exchange contracts				0.2		0.2
Interest rate swap				2.7		2.7
	$	35.8	$	2.9	$	38.7
December 31, 2009						
Available for sale investments	$	25.9	$		$	25.9
Trading securities		2.2				2.2
Deferred compensation plan liabilities		(1.6)				(1.6)
Derivatives:						
Forward exchange contracts				(1.1)		(1.1)
Interest rate swap				(0.5)		(0.5)
	$	26.5	$	(1.6)	$	24.9

The methods and assumptions used to estimate the Level 2 fair values were as follows:

Forward exchange contracts The fair value of forward exchange contracts were based on quoted forward foreign exchange prices at the reporting date.

Interest rate swap The fair value of interest rate swap agreements were estimated based on the LIBOR yield curves at the reporting date.

Table of Contents

During the three and six months ended June 30, 2010, there were no transfers of financial assets or liabilities in or out of Level 1 or Level 2 of the fair value hierarchy. At June 30, 2010 and December 31, 2009, the Company did not have any financial assets or liabilities that fell within the Level 3 hierarchy.

Investments

At June 30, 2010 and December 31, 2009, the Company had $35.3 million and $25.9 million, respectively, of municipal bonds classified as available-for-sale securities. The Company also had $2.8 million and $2.2 million of trading securities as of June 30, 2010 and December 31, 2009, respectively. These investments are carried on the balance sheet at fair value. Unrealized gains and losses associated with available-for-sale securities are reflected in Accumulated other comprehensive loss, net of tax, while unrealized gains and losses associated with trading securities are reflected in the results of operations.

Deferred compensation plan

The Company offers certain employees the opportunity to participate in a non-qualified deferred compensation plan. A participant s deferrals are invested in a variety of participant-directed debt and equity mutual funds that are classified as trading securities. The unrealized gains and losses associated with these trading securities are directly offset by the changes in the fair value of the underlying deferred compensation plan obligation.

Derivatives

To limit financial risk in the management of its assets, liabilities and debt, the Company may use derivative financial instruments such as: foreign currency hedges, commodity hedges, interest rate hedges and interest rate swaps. All derivative financial instruments are matched with an existing Company asset, liability or proposed transaction. Market value gains or losses on the derivative financial instrument are recognized in income when the effects of the related price changes of the underlying asset or liability are recognized in income.

The fair values of derivative instruments in the Condensed Consolidated Balance Sheet are as follows (in millions):

		Asset/(Liability) Derivatives	
		Fair Value	
Derivatives designated as hedges	**Balance Sheet Location**	**June 30, 2010**	**December 31, 2009**
Forward exchange contracts designated as cash flow hedges	Other accrued liabilities	$ (0.1)	$ (1.1)
Forward exchange contracts designated as cash flow hedges	Deferred taxes and other	0.3	
Interest rate swap designated as a fair value hedge	Intangible assets and other	2.7	
Interest rate swap designated as a fair value hedge	Other non-current liabilities		(0.5)
		$ 2.9	$ (1.6)

Forward exchange contracts

In 2010 and 2009, the Company entered into a series of forward exchange contracts to purchase U.S. dollars in order to hedge its exposure to fluctuating rates of exchange on anticipated inventory purchases. As of June 30, 2010, the Company has 18 individual forward exchange contracts, each ranging between $0.5 million and $1.0 million, which have various expiration dates through June 2011. These contracts have been designated as cash flow hedges in accordance with the Derivatives and Hedging Topic of the Codification.

Table of Contents

The following table summarizes the amounts recognized in Accumulated other comprehensive loss related to these forward exchange contracts (in millions):

Gain/(Loss) Recognized in Accumulated Other Comprehensive Loss	June 30, 2010	December 31, 2009
Forward exchange contracts	$ 0.2	$ (0.7)

The following table summarizes the gains/(losses) reclassified from Accumulated other comprehensive loss into income related to these forward exchange contracts (in millions):

Location of Gain/(Loss) Reclassified into Income (Effective Portion)	Three Months Ended June 30 2010	Three Months Ended June 30 2009	Six Months Ended June 30 2010	Six Months Ended June 30 2009
Cost of goods sold	$ (0.4)	$ 0.2	$ (1.1)	$ 1.4

There was no hedge ineffectiveness with respect to the forward exchange cash flow hedges during the three and six months ended June 30, 2010 and 2009.

Interest Rate Swaps

In May 2009, the Company entered into a three year interest rate swap for an aggregate notional amount of $200 million to manage its exposure to changes in the fair value of its 6.375% $200 million fixed rate debt maturing in May 2012. Under the swap, the Company receives interest based on a fixed rate of 6.375% and pays interest based on a floating one month LIBOR rate plus a spread. The interest rate swap is designated as a fair value hedge and qualifies for the short-cut method; as such, no hedge ineffectiveness is recognized. The interest rate swap is recorded at fair value, with an offsetting amount recorded against the carrying value of the fixed-rate debt. During the three and six months ended June 30, 2010, interest expense was reduced $0.5 million and $1.1 million, respectively, as a result of entering into the interest rate swap.

Interest Rate Locks

Prior to the 2002 and 2008 issuance of long-term notes, the Company entered into forward interest rate locks to hedge its exposure to fluctuations in treasury rates. The 2002 interest rate lock resulted in a $1.3 million loss while the 2008 interest rate lock resulted in a $1.2 million gain. These amounts were recorded in Accumulated other comprehensive loss, net of tax, and are being amortized over the life of the respective notes. The amortization associated with these interest rate locks is reflected in Interest expense, net in the Condensed Consolidated Statement of Income. As of June 30, 2010 and December 31, 2009, there were $0.3 million and $0.4 million, respectively, of net unamortized gains remaining related to these interest rate locks.

Long-term Debt

The total carrying value of long-term debt as of June 30, 2010 and December 31, 2009 was $500.6 million and $497.2 million, respectively, net of unamortized discount and a basis adjustment related to a fair value hedge. As of June 30, 2010 and December 31, 2009, the estimated fair value of the long-term debt was $563.0 million and $539.6 million, respectively, based on quoted market prices.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

EXECUTIVE OVERVIEW OF THE BUSINESS

Our Company is primarily engaged in the design, manufacture and sale of quality electrical and electronic products for a broad range of non-residential and residential construction, industrial and utility applications. The Company s reporting segments consist of the Electrical segment and the Power segment. Results for the three and six months ended June 30, 2010 are included under Segment Results within this Management s Discussion and Analysis.

During 2010, we are experiencing mixed demand in our served markets resulting in comparable overall organic demand. We are continuing to execute a business plan focused on:

Revenue

While organic demand in 2010 is expected to be comparable to 2009 primarily due to weakness in the U.S. non-residential construction market, the Company remains focused on expanding market share through an emphasis on new product introductions and more effective utilization of sales and marketing efforts across the organization.

Price Realization

In 2009, we experienced favorable price realization due, in part, to a less volatile commodity environment compared to 2008. In 2010, we will continue to exercise pricing discipline. However market conditions have made price realization more challenging in 2010 compared to 2009 and we expect the pricing environment to remain competitive for the remainder of the year.

Cost Containment

Global sourcing. We remain focused on expanding our global product and component sourcing and supplier cost reduction program. We continue to consolidate suppliers, utilize reverse auctions, and partner with vendors to shorten lead times, improve quality and delivery and reduce costs.

Freight and Logistics. Transporting our products from suppliers, to warehouses, and ultimately to our customers, is a major cost to our Company. In 2010, we expect to continue to reduce these costs and increase the effectiveness of our internal freight and logistics processes through capacity utilization and network optimization.

Productivity

We continue to work towards fully realizing the benefits of our enterprise-wide business system implementation, including standardizing best practices in inventory management, production planning and scheduling to improve manufacturing throughput and to reduce costs. In addition, value-engineering efforts and product transfers are also expected to contribute to our productivity improvements. This continuing emphasis on operational improvements is expected to lead to further reductions in lead times and improved service levels to our customers.

Transformation of business processes. We are continuing our long-term initiative of applying lean process improvement techniques throughout the enterprise, with particular emphasis on reducing supply chain complexity to eliminate waste and improve efficiency and reliability. We will continue to build on the shared services model that has been implemented in information technology, sourcing and logistics and expect to apply those principles in other areas.

Table of Contents

Results of Operations Second Quarter of 2010 compared to the Second Quarter of 2009
Summary of Consolidated Results (in millions, except per share data):

	Three Months Ended June 30			
	2010	% of Net sales	2009	% of Net sales
Net Sales	$ 646.4		$ 584.2	
Cost of goods sold	435.4		410.0	
Gross Profit	211.0	32.6%	174.2	29.8%
Selling & administrative expense	117.5	18.2%	107.6	18.4%
Operating income	93.5	14.5%	66.6	11.4%
Net income attributable to Hubbell	57.6	8.9%	39.4	6.7%
Earnings per share diluted	$ 0.95		$ 0.70	

Net Sales

Net sales of $646.4 million for the second quarter of 2010 increased 11% compared to the second quarter of 2009 due to the Burndy acquisition, higher organic volume and foreign currency translation. Compared to the second quarter of 2009, the Burndy acquisition added approximately nine percentage points to net sales while organic volume increased by one percentage point. Foreign currency translation increased net sales by one percentage point.

Gross Profit

The consolidated gross profit margin in the second quarter of 2010 was 32.6% compared to 29.8% in the second quarter of 2009. The increase in gross profit margin was primarily due to productivity improvements, including improved factory utilization; and lower costs associated with workforce reduction actions. Partially offsetting these improvements were higher commodity costs and unfavorable price realization.

Selling & Administrative Expenses (S&A)

S&A expenses in the second quarter of 2010 were $117.5 million compared to $107.6 million in the second quarter of 2009. Incremental Burndy S&A costs were partially offset by continued cost containment actions, including reduced employment levels and lower costs associated with workforce reduction actions. As a percentage of net sales, S&A expenses were 18.2% in the second quarter of 2010, compared to 18.4% in the comparable period of 2009.

Total Other Expense, net

In the second quarter of 2010 net interest expense decreased $0.1 million versus the second quarter of 2009. Other expense, net was favorably impacted by $0.7 million primarily due to lower net foreign currency transaction losses in the second quarter of 2010 compared to the second quarter of 2009.

Income Taxes

The effective tax rate in the second quarter of 2010 increased to 32.3% from 31.5% in the second quarter of 2009 primarily due to the expiration of the federal research and development tax credit.

Net income attributable to Hubbell and Earnings Per Diluted Share

Net income attributable to Hubbell and earnings per diluted share increased 46% and 36%, respectively, in the second quarter of 2010 compared to the second quarter of 2009. The increase in net income attributable to Hubbell is due to higher operating income partially offset by a higher tax rate. The increase in earnings per diluted share is due to higher net income attributable to Hubbell partially offset by an increase in the average shares outstanding due to shares issued in the fourth quarter of 2009.

Table of Contents

Segment Results

Electrical

(In millions)	Three Months Ended June 30 2010	2009
Net sales	$ 458.4	$ 397.0
Operating income	61.1	31.2
Operating margin	13.3%	7.9%

Net sales in the Electrical segment increased 15% in the second quarter of 2010 compared with the second quarter of 2009 due to the Burndy acquisition, higher organic volume, in spite of lower high voltage test equipment sales, and favorable foreign currency translation. Compared to the second quarter of 2009, the Burndy acquisition added approximately thirteen percentage points to net sales. In addition, organic volume and foreign currency translation each increased net sales by one percentage point.

Within the segment, electrical systems products net sales increased 33% in the second quarter of 2010 compared to the second quarter of 2009 due to the Burndy acquisition, higher organic volume and favorable foreign currency translation. Net sales of wiring products increased 16% while electrical products increased 5% in spite of lower high voltage test equipment net sales. Sales of lighting products decreased 5% in the second quarter of 2010 compared to 2009 due to lower demand from the commercial and industrial lighting market, partially offset by improving conditions in the residential market. Compared to the second quarter of 2009, sales of commercial and industrial lighting products decreased 9% while sales of residential lighting products increased 11%.

Operating income in the second quarter of 2010 increased 96% to $61.1 million compared to the second quarter of 2009 primarily due to productivity improvements, including improved factory utilization, lower costs incurred relating to workforce actions and incremental operating income associated with Burndy. Operating margin increased by 540 basis points primarily due to productivity improvements, including improved factory utilization; and lower workforce action costs. Within the segment both electrical systems products and lighting products operating income and operating margin increased compared to the second quarter of 2009.

Power

(In millions)	Three Months Ended June 30 2010	2009
Net sales	$ 188.0	$ 187.2
Operating income	32.4	35.4
Operating margin	17.2%	18.9%

Net sales in the Power segment increased less than 1% in the second quarter of 2010 compared to the second quarter of 2009. Favorable foreign currency translation of one percentage point was offset by unfavorable price realization. Market demand in the second quarter of 2010 compared to the second quarter of 2009 was comparable as higher net sales of distribution products were offset by lower net sales of transmission products.

Operating income decreased 8% to $32.4 million and operating margin decreased 170 basis points to 17.2% in the second quarter of 2010 compared to the second quarter of 2009. These declines were primarily due to higher commodity costs, unfavorable price realization and facility consolidation costs largely offset by productivity improvements.

Table of Contents

Results of Operations Six Months Ended June 30, 2010 compared to the Six Months Ended June 30, 2009
Summary of Consolidated Results (in millions, except per share data):

	Six Months Ended June 30			
	2010	% of Net sales	2009	% of Net sales
Net Sales	$ 1,216.9		$ 1,169.8	
Cost of goods sold	830.2		828.6	
Gross Profit	386.7	31.8%	341.2	29.2%
Selling & administrative expense	227.5	18.7%	217.3	18.6%
Operating income	159.2	13.1%	123.9	10.6%
Net income attributable to Hubbell	96.2	7.9%	73.2	6.3%
Earnings per share diluted	$ 1.59		$ 1.30	

Net Sales

Net sales of $1,216.9 million for the first six months of 2010 increased 4% compared to the first six months of 2009 due to the Burndy acquisition and favorable foreign currency translation. Partially offsetting these increases was weaker market demand, primarily in the non-residential construction market, lower high voltage test equipment net sales and lower storm related volume within the Power segment. Compared to the first six months of 2009, organic volume decreased 5% while Burndy added approximately eight percentage points to net sales. Lower storm shipments reduced net sales one percentage point while foreign currency translation increased net sales by two percentage points.

Gross Profit

The consolidated gross profit margin in the first six months of 2010 was 31.8% compared to 29.2% in the first six months of 2009. The increase in gross profit margin in the first six months of 2010 was primarily due to productivity improvements, including improved factory utilization; and lower costs associated with workforce reduction actions. Partially offsetting these improvements were unfavorable price realization and higher commodity costs.

Selling & Administrative Expenses

S&A expenses in the first six months of 2010 were $227.5 million compared to $217.3 million in the first six months of 2009. Incremental Burndy S&A costs were partially offset by continued cost containment actions, including reduced employment levels and lower costs associated with workforce reduction actions. As a percentage of net sales, S&A expenses were 18.7% in the first six months of 2010, compared to 18.6% in the comparable period of 2009.

Total Other Expense, net

During the first six months of 2010 net interest expense decreased $0.2 million versus the first six months of 2009. Other expense, net in the first six months of 2010 was comparable to the first six months of 2009.

Income Taxes

The effective tax rate in the first six months of 2010 increased to 32.3% from 31.5% in the first six months of 2009 primarily due to the expiration of the federal research and development tax credit.

Net income attributable to Hubbell and Earnings Per Diluted Share

Net income attributable to Hubbell and earnings per diluted share increased 31% and 22%, respectively, in the first six months of 2010 compared to the first six months of 2009. The increase in net income attributable to Hubbell is due to higher operating income partially offset by a higher tax rate. The increase in earnings per diluted share is due to higher net income attributable to Hubbell partially offset by an increase in the average shares outstanding due to shares issued in the fourth quarter of 2009.

Segment Results

Electrical

	Six Months Ended June 30	
(In millions)	**2010**	**2009**
Net sales	$ 867.7	$ 799.5
Operating income	101.2	58.9
Operating margin	11.7%	7.4%

Net sales in the Electrical segment increased 9% in the first six months of 2010 compared with the first six months of 2009 due to the Burndy acquisition and favorable foreign currency translation partially offset by lower market demand, primarily in the non-residential construction market and lower high voltage test equipment net sales. Compared to the first six months of 2009, the Burndy acquisition added approximately twelve percentage points to net sales while organic volume decreased 5%. Foreign currency translation increased net sales by two percentage points.

Within the segment, electrical systems products net sales increased 24% in the first six months of 2010 compared to the first six months of 2009 due to the Burndy acquisition and favorable foreign currency translation. Net sales of wiring products increased 11% while electrical products decreased 3% due primarily to lower high voltage test equipment net sales. Sales of lighting products decreased 10% in the first six months of 2010 compared to 2009 due to lower demand in the commercial and industrial lighting market, partially offset by improving conditions in the residential market. Compared to the first six months of 2009, sales of commercial and industrial lighting products decreased 13% while sales of residential lighting products increased 6%.

Operating income in the first six months of 2010 increased 72% compared to the first six months of 2009 primarily due to productivity improvements, including improved factory utilization; lower costs incurred relating to workforce actions and facility consolidations, and incremental operating income associated with Burndy. Operating margin increased by 430 basis points primarily due to productivity improvements, lower costs relating to workforce actions and facility consolidations. Within the segment both electrical systems products and lighting products operating income and operating margin increased compared to the first six months of 2009.

Power

	Six Months Ended June 30	
(In millions)	**2010**	**2009**
Net sales	$ 349.2	$ 370.3
Operating income	58.0	65.0
Operating margin	16.6%	17.6%

Net sales in the Power segment decreased 6% in the first six months of 2010 compared to the first six months of 2009 due to lower volume as a result of weaker demand for both distribution and transmission products, lower storm related volume and unfavorable price realization. Market demand decreased 4% during the first six months of 2010 compared to the first six months of 2009. Lower storm related volume and unfavorable price realization reduced net sales by two and one percentage points, respectively. Foreign currency translation increased net sales by one percentage point.

19

Table of Contents

Operating income decreased 11% to $58.0 million and operating margin decreased 100 basis points to 16.6% in the first six months of 2010 compared to the first six months of 2009. These declines were primarily due to higher commodity costs, unfavorable price realization, volume declines, including lower storm related volume; partially offset by productivity improvements.

OUTLOOK

Overall, 2010 net sales are expected to increase by mid-single digits compared to 2009 primarily due to the Burndy acquisition. Organic volume is expected to improve in the second half of 2010 compared to the comparable period of 2009 primarily due to increased utility demand and the timing of high voltage test equipment net sales. The Company s largest served market, non-residential construction is now expected to decline in the mid-teens range. This more modest decline in non-residential construction is expected to be driven by public sector spending and increased activity in the renovation, relight and controls market. Within the utility market, the demand for distribution products is expected to increase slightly as the macroeconomic recovery continues. However, transmission and substation project spending is likely to continue to be constrained. The industrial markets continue to improve and are expected to expand as manufacturing capacity utilization rates improve from 2009 s low levels. The residential market is forecasted to improve in the mid-single digit range compared to 2009. The Federal stimulus plan is expected to continue to generate orders in 2010, particularly for our power and lighting products, but the timing and magnitude of such benefits are still difficult to estimate.

We will continue to work on productivity initiatives, including further plant rationalization, better optimization of sourcing and management of the cost price equation to drive margin improvement in 2010. In 2010, we anticipate generating free cash flow (a non-GAAP measure defined as net cash provided by operating activities less capital expenditures) approximately equal to net income. We expect to continue to evaluate and pursue additional opportunistic acquisitions to add to our portfolio.

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Cash Flow

	Six Months Ended June 30	
(In millions)	2010	2009
Net cash provided by (used in):		
Operating activities	$ 93.1	$ 153.7
Investing activities	(30.4)	(13.5)
Financing activities	(30.2)	(39.0)
Effect of foreign currency exchange rate changes on cash and cash equivalents	(3.2)	2.7
Net change in cash and cash equivalents	$ 29.3	$ 103.9

Cash provided by operating activities for the six months ended June 30, 2010 decreased from the comparable period in 2009 primarily as a result of higher working capital partially offset by higher net income. Working capital in the first six months of 2010 used cash of $51.9 million compared to $34.1 million of cash provided during the first six months of 2009. The higher level of working capital in 2010 consists of increases in accounts receivable and inventory, partially offset by higher levels of current liabilities, specifically accounts payable.

Investing activities used cash of $30.4 million in the first six months of 2010 compared to cash used of $13.5 million during the comparable period in 2009. The change is due to higher levels of capital spending and higher net purchases of available for sale securities in the first six months of 2010 as compared to the first six months of 2009. Financing activities used cash of $30.2 million in the first six months of 2010 compared to $39.0 million of cash used during the comparable period of 2009. The change is primarily due to higher proceeds from the exercise of stock options and short-term borrowings slightly offset by an increase in dividends paid.

Investments in the Business

Investments in our business include both expenditures required to maintain the operations of our equipment and facilities as well as expenditures in support of our strategic initiatives. During the first six months of 2010, we used cash of $22.3 million for capital expenditures, an increase of $8.6 million from the comparable period of 2009.

In December 2007, the Board of Directors approved a stock repurchase program and authorized the repurchase of up to $200 million of Class A and Class B Common Stock. In February 2010, the Board of Directors extended the term of this program through February 20, 2011. We have spent $2.9 million on the repurchase of common shares during the first six months of 2010. Depending upon numerous factors, including market conditions and alternative uses of cash, we may conduct discretionary repurchases through open market and privately negotiated transactions during our normal trading windows. As of June 30, 2010, approximately $158 million remains authorized for future repurchases under this program.

Debt to Capital

Net debt, defined as total debt less cash and investments, is a non-GAAP measure that may not be comparable to definitions used by other companies. We consider net debt to be more appropriate than total debt for measuring our financial leverage as it better measures our ability to meet our funding needs.

(In millions)	June 30, 2010	December 31, 2009
Total Debt	$ 504.0	$ 497.2
Total Hubbell Shareholders Equity	1,360.6	1,298.2
Total Capital	$ 1,864.6	$ 1,795.4
Total Debt to Total Capital	27%	28%
Cash and Investments	$ 325.9	$ 286.6
Net Debt	$ 178.1	$ 210.6
Net Debt to Total Capital	10%	12%

At June 30, 2010, the Company s total debt consisted of $3.4 million of short-term debt and $500.6 million of long-term notes, net of unamortized discount and a basis adjustment related to a fair value interest rate swap. These fixed-rate notes, with amounts of $200 million and $300 million due in 2012 and 2018, respectively, are callable with a make whole provision and are only subject to accelerated payment prior to maturity if we fail to meet certain non-financial covenants, all of which were met at June 30, 2010.

In March 2010, the Company entered into a new credit agreement with HSBC Bank for a 6.0 million Brazilian Real line of credit (equivalent to $3.4 million). The Company drew down the full amount of this line to fund its Brazilian operations. This line of credit expires in September 2010 and is not subject to any annual commitment fees.

Liquidity

We measure liquidity on the basis of our ability to meet short-term and long-term operational funding needs, fund additional investments, including acquisitions, and make dividend payments to shareholders. Significant factors affecting the management of liquidity are cash flows from operating activities, capital expenditures, cash dividend payments, stock repurchases, access to bank lines of credit and our ability to attract long-term capital with satisfactory terms.

In February 2010, the Company s Board of Directors approved an increase in the common stock dividend rate from $0.35 to $0.36 per share per quarter. The increased quarterly dividend payment commenced with the April 9, 2010 dividend payment made to the shareholders of record on March 8, 2010.

As of June 30, 2010, the Company s $350 million committed bank credit facility had not been drawn against and remains a backup to our commercial paper program. Although not the principal source of liquidity, we believe our credit facility is capable of providing significant financing flexibility at reasonable rates of interest. However, in the event of a significant deterioration in the results of our operations or cash flows, leading to deterioration in financial condition, our borrowing costs could increase and/or our ability to borrow could be restricted. We have not entered into any guarantees that could give rise to material unexpected cash requirements.

We have contractual obligations for long-term debt, operating leases, purchase obligations, and certain other long-term liabilities that were summarized in a table of Contractual Obligations in our Annual Report on Form 10-K for the year ended December 31, 2009. Since December 31, 2009, there were no material changes to our contractual obligations.

Internal cash generation together with currently available cash and investments, available borrowing facilities and credit lines, if needed, are expected to be sufficient to fund operations, the current rate of cash dividends, capital expenditures, and any increase in working capital that would be required to accommodate a higher level of business activity. We actively seek to expand by acquisition as well as through the growth of our current businesses. While a significant acquisition may require additional debt and/or equity financing, we believe that we would be able to obtain additional financing based on our favorable historical earnings performance and strong financial position.

The Company maintains a conservative financial structure to provide the strength and flexibility necessary to achieve its strategic objectives. Although credit markets in the United States, including the commercial paper market, have stabilized, there remains a risk of volatility and illiquidity. However, despite the adverse market conditions, the Company has been able to readily meet all its funding needs and currently believes that sufficient funds will be available to meet the Company s needs in the foreseeable future. Management will continue to closely monitor the Company s liquidity and the credit markets. However, management can not predict with any certainty the impact to the Company of any further disruption in the credit environment.

Critical Accounting Estimates

A summary of our critical accounting estimates is included in Management s Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2009. We are required to make estimates and judgments in the preparation of our financial statements that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosures. We continually review these estimates and their underlying assumptions to ensure they are appropriate for the circumstances. Changes in the estimates and assumptions we use could have a significant impact on our financial results. During the first six months of 2010, there were no significant changes in our estimates and critical accounting policies.

Table of Contents

Forward-Looking Statements

Some of the information included in this Management s Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this Form 10-Q, contain forward-looking statements as defined by the Private Securities Litigation Reform Act of 1995. These include statements about capital resources, performance and results of operations and are based on our reasonable current expectations. In addition, all statements regarding anticipated growth or improvement in operating results, anticipated market conditions and economic recovery are forward looking. Forward-looking statements may be identified by the use of words, such as believe , expect , anticipate , inter depend , should , plan , estimated , predict , could , may , subject to , continues , growing , prospecti purport , might , if , contemplate , potential , pending, target , goals , scheduled , will likely be , a phrases. Discussions of strategies, plans or intentions often contain forward-looking statements. Factors, among others, that could cause our actual results and future actions to differ materially from those described in forward-looking statements include, but are not limited to:

- Changes in demand for our products, market conditions, product quality, or product availability adversely affecting sales levels.
- Changes in markets or competition adversely affecting realization of price increases.
- Failure to achieve projected levels of efficiencies, cost savings and cost reduction measures, including those expected as a result of our lean initiative and strategic sourcing plans.
- The expected benefits and the timing of other actions in connection with our enterprise-wide business system.
- Availability and costs of raw materials, purchased components, energy and freight.
- Changes in expected or future levels of operating cash flow, indebtedness and capital spending.
- General economic and business conditions in particular industries or markets.
- The anticipated benefits from the Federal stimulus package.
- Regulatory issues, changes in tax laws or changes in geographic profit mix affecting tax rates and availability of tax incentives.
- A major disruption in one of our manufacturing or distribution facilities or headquarters, including the impact of plant consolidations and relocations.
- Changes in our relationships with, or the financial condition or performance of, key distributors and other customers, agents or business partners which could adversely affect our results of operations.
- Impact of productivity improvements on lead times, quality and delivery of product.
- Anticipated future contributions and assumptions including changes in interest rates and plan assets with respect to pensions.
- Adjustments to product warranty accruals in response to claims incurred, historical experiences and known costs.
- Unexpected costs or charges, certain of which might be outside of our control.
- Changes in strategy, economic conditions or other conditions outside of our control affecting anticipated future global product sourcing levels.
- Ability to carry out future acquisitions and strategic investments in our core businesses as well as the acquisition related costs.

Table of Contents

- Unanticipated difficulties integrating acquisitions as well as the realization of expected synergies and benefits anticipated when we first enter into a transaction.
- Future repurchases of common stock under our common stock repurchase program.
- Changes in accounting principles, interpretations, or estimates.
- The outcome of environmental, legal and tax contingencies or costs compared to amounts provided for such contingencies.
- Adverse changes in foreign currency exchange rates and the potential use of hedging instruments to hedge the exposure to fluctuating rates of foreign currency exchange on inventory purchases.
- Other factors described in our Securities and Exchange Commission filings, including the Business , Risk Factors and Quantitative and Qualitative Disclosures about Market Risk sections in the Company s Annual Report on Form 10-K for the year ended December 31, 2009.

Any such forward-looking statements are not guarantees of future performances and actual results, developments and business decisions may differ from those contemplated by such forward-looking statements. The Company disclaims any duty to update any forward-looking statement, all of which are expressly qualified by the foregoing, other than as required by law.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the operation of its business, the Company has exposures to fluctuating foreign currency exchange rates, availability of purchased finished goods and raw materials, changes in material prices, foreign sourcing issues, and changes in interest rates. The Company s procurement strategy continues to emphasize an increased level of purchases from international locations, primarily China and India, which subjects the Company to increased political and foreign currency exchange risk. Changes in the Chinese government s policy regarding the value of the Chinese currency versus the U.S. dollar has not had a significant impact on our financial condition, results of operations or cash flows. However, strengthening of the Chinese currency could increase the cost of the Company s products procured from this country. These factors have not increased significantly since the beginning of 2010. Accordingly, there has been no significant change in the Company s strategies to manage these exposures during the first six months of 2010. For a complete discussion of the Company s exposure to market risk, refer to Item 7A, Quantitative and Qualitative Disclosures about Market Risk, contained in the Company s Annual Report on Form 10-K for the year ended December 31, 2009.

ITEM 4. CONTROLS AND PROCEDURES

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed under the Securities Exchange Act of 1934, as amended, the (Exchange Act) is recorded, processed, summarized and reported within the time periods specified and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

The Company carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company s disclosure controls and procedures pursuant to Exchange Act Rules 13a-15(e) and 15d-15(e), as of the end of the period covered by this report on Form 10-Q. Based upon that evaluation, each of the Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2010, the Company s disclosure controls and procedures were effective at a reasonable assurance level.

There have been no changes in the Company s internal control over financial reporting that occurred during the Company s most recently completed quarter that have materially affected, or are reasonably likely to materially affect, the Company s internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1A. RISK FACTORS

There have been no material changes in the Company s risk factors from those disclosed in the Annual Report on Form 10-K for the year ended December 31, 2009.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

ISSUER PURCHASES OF EQUITY SECURITIES

In December 2007, the Board of Directors approved a stock repurchase program and authorized the repurchase of up to $200 million of Class A and Class B Common Stock. In February 2010, the Board of Directors extended the term of this program through February 20, 2011. Depending upon numerous factors, including market conditions and alternative uses of cash, the Company may conduct discretionary repurchases through open market and privately negotiated transactions during its normal trading windows. The status of this plan is listed below:

Period	Total Number of Class B Shares Purchased (000 s)	Average Price Paid per Class B Share	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Dec. 2007 Program (000 s)
Balance as of March 31, 2010			$ 161,000
April 2010		$	161,000
May 2010			161,000
June 2010	70	41.79	158,100
Total for the quarter ended June 30, 2010	70	$ 41.79	$ 158,100

The Company did not repurchase any Class A common shares during the quarter ended, June 30, 2010.
