**Vale 's Goro produces its first nickel metal**

Rio de Janeiro, August 9, 2010 Vale S. A. (Vale) announces that the Goro project, located in New Caledonia in the South Pacific, has successfully produced its first nickel metal product.

Commissioning at the Goro plant is now almost complete. Remaining commissioning work will continue to take place over the next few months with the refinery expected to be in production by the end of this year.

Goro is a nickel laterite project with an estimated annual nominal capacity to produce 58,000 metric tons of nickel and 4,000 metric tons of cobalt as a by-product.

This press release may include declarations about Vale 's expectations regarding future events or results. All declarations based upon future expectations, rather than historical facts, are subject to various risks and uncertainties. Vale cannot guarantee that such declarations will prove to be correct. These risks and uncertainties include factors related to the following: (a) the countries where Vale operates, mainly Brazil and Canada; (b) the global economy; (c) capital markets; (d) the mining and metals businesses and their dependence upon global industrial production, which is cyclical by nature; and (e) the high degree of global competition in the markets in which Vale operates. To obtain further information on factors that may give rise to results different from those forecast by Vale, please consult the reports filed with the Brazilian Comissão de Valores Mobiliários (CVM), the French Autorité des Marchés Financiers (AMF), and with the U.S. Securities and Exchange Commission (SEC), including Vale 's most recent Annual Report on Form 20F and its reports on Form 6K.
