

GABELLI GLOBAL UTILITY & INCOME TRUST  
Form N-30B-2  
June 06, 2011

**The Gabelli Global Utility & Income Trust**  
First Quarter Report  
March 31, 2011

Mario J. Gabelli, CFA

**To Our Shareholders,**

During the first quarter of 2011, The Gabelli Global Utility & Income Trust's (the Fund) net asset value (NAV) total return was 5.6% compared with the Standard & Poor's (S&P) 500 Utilities Index of 2.7% and the Lipper Utility Fund Average of 5.4%. The total return for the Fund's publicly traded shares was 1.2% during the first quarter of 2011.

Enclosed is the investment portfolio as of March 31, 2011.

**Comparative Results**

**Average Annual Returns through March 31, 2011 (a) (Unaudited)**

|  | Quarter | 1 Year | 3 Year | 5 Year | Since Inception (05/28/04) |
|--|---------|--------|--------|--------|----------------------------|
| <b>Gabelli Global Utility &amp; Income Trust</b> |         |        |        |        |                            |
| <b>NAV Total Return (b)</b>                      | 5.61%   | 15.69% | 4.15%  | 6.45%  | 7.99%                      |
| <b>Investment Total Return (c)</b>               | 1.18    | 9.35   | 6.73   | 8.65   | 7.00                       |
| S&P 500 Index                                    | 5.92    | 15.65  | 2.35   | 2.62   | 4.60                       |
| S&P 500 Utilities Index                          | 2.74    | 12.32  | (1.48) | 4.70   | 8.68                       |
| Lipper Utility Fund Average                      | 5.36    | 16.99  | 0.93   | 5.76   | 9.94                       |

- (a) **Returns represent past performance and do not guarantee future results.** Investment returns and the principal value of an investment will fluctuate. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit [www.gabelli.com](http://www.gabelli.com) for performance information as of the most recent month end. Performance returns for periods of less than one year are not annualized. **Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing.** The S&P 500 Index is an unmanaged indicator of stock market performance. The S&P 500 Utilities Index is an unmanaged indicator of electric and gas utility stock performance. The Lipper Utility Fund Average reflects the average performance of open-end mutual funds classified in this particular category. Dividends are considered reinvested. You cannot invest directly in an index.
- (b) Total returns and average annual returns reflect changes in the NAV per share and reinvestment of distributions at NAV on the ex-dividend date and are net of expenses. Since inception return is based on an initial NAV of \$19.06.
- (c) Total returns and average annual returns reflect changes in closing market values on the New York Stock Exchange and reinvestment of distributions. Since inception return is based on an initial offering price of \$20.00.

We have separated the portfolio manager's commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio manager's commentary is unrestricted. The financial statements and investment portfolio are mailed separately from the commentary. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at [www.gabelli.com](http://www.gabelli.com).

- (a) Denoted in units.
- (b) Security fair valued under procedures established by the Board of Trustees. The procedures may include reviewing available financial information about the company and reviewing the valuation of comparable securities and other factors on a regular basis. At March 31, 2011, the market value of fair valued securities amounted to \$97,352 or 0.15% of total investments.
- (c) Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2011, the market value of Rule 144A securities amounted to \$106,289 or 0.16% of total investments.
- (d) Security purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. These securities cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration. At March 31, 2011, the market value of the Regulation S securities amounted to \$225,664 or 0.34% of total investments, which were valued under methods approved by Board of Trustees as follows:

| <b>Acquisition<br/>Shares</b> | <b>Issuer</b>                    | <b>Acquisition<br/>Date</b> | <b>Acquisition<br/>Cost</b> | <b>03/31/11<br/>Carrying<br/>Value<br/>Per Unit</b> |

**THE GABELLI GLOBAL UTILITY & INCOME TRUST**  
**NOTES TO SCHEDULE OF INVESTMENTS (Unaudited)**

The Fund's financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP), which may require the use of management estimates and assumptions. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

**Security Valuation.** Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market's official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board of Trustees (the Board) so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC (the Adviser).

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market conditions change significantly after the close of the foreign market, but prior to the close of business on the day the securities are being valued. Debt instruments with remaining maturities of sixty days or less that are not credit impaired are valued at amortized cost, unless the Board determines such amount does not reflect the securities' fair value, in which case these securities will be fair valued as determined by the Board. Debt instruments having a maturity greater than sixty days for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price. U.S. government obligations with maturities greater than sixty days are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued principally using dealer quotations. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board. Fair valuation methodologies and procedures may include, but are not limited to: analysis and review of available financial and non-financial information about the company; comparisons with the valuation and changes in valuation of similar securities, including a comparison of foreign securities with the equivalent U.S. dollar value ADR securities at the close of the U.S. exchange; and evaluation of any other information that could be indicative of the value of the security.

The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

Level 1 quoted prices in active markets for identical securities;

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and

Level 3 significant unobservable inputs (including the Fund's determinations as to the fair value of investments).

**THE GABELLI GLOBAL UTILITY & INCOME TRUST**  
**NOTES TO SCHEDULE OF INVESTMENTS (Continued) (Unaudited)**

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of the Fund's investments in securities and other financial instruments by inputs used to value the Fund's investments as of March 31, 2011 is as follows:

|   | Valuation Inputs            |   |  | Total<br>Market Value<br>at 3/31/11 |
|---|-----------------------------|---|--|-------------------------------------|
|   | Level 1<br>Quoted<br>Prices | Level 2<br>Other<br>Significant<br>Observable<br>Inputs | Level 3<br>Significant<br>Unobservable<br>Inputs |                                     |
| <b>INVESTMENTS IN SECURITIES:</b>                 |                             |   |  |                                     |
| <b>ASSETS (Market Value):</b>                     |                             |   |  |                                     |

(a) Please refer to the Schedule of Investments ( SOI ) for the industry classifications of these portfolio holdings.

\* Other financial instruments are derivatives reflected in the SOI, such as futures, forwards, and swaps, which are valued at the unrealized appreciation/depreciation of the instrument.

The Fund did not have significant transfers between Level 1 and Level 2 during the period ended March 31, 2011.

**THE GABELLI GLOBAL UTILITY & INCOME TRUST**  
**NOTES TO SCHEDULE OF INVESTMENTS (Continued) (Unaudited)**

The following table reconciles Level 3 investments for which significant unobservable inputs were used to determine fair value:

|  | Accrued   | Change<br>in<br>unrealized             | Transfer  | Transfers | Balance | Net<br>change in<br>unrealized<br>appreciation/<br>depreciation<br>during<br>the<br>period<br>on Level<br>3 |

The Fund's policy is to recognize transfers into and transfers out of Level 3 as of the beginning of the reporting period.

There were no Level 3 investments held at December 31, 2010.

**Foreign Currency Translations.** The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments, and other assets and liabilities are translated into U.S. dollars at the current exchange rates. Purchases and sales of investment securities, income, and expenses are translated at the exchange rate prevailing on the respective dates of such transactions. Unrealized gains and losses that result from changes in foreign exchange rates and/or changes in market prices of securities have been included in unrealized appreciation/depreciation on investments and foreign currency translations. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions, and the difference between the amounts of interest and dividends

recorded on the books of the Fund and the amounts actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gain/loss on investments.

**Foreign Securities.** The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the inability to repatriate funds, less complete financial information about companies, and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than securities of comparable U.S. issuers.

**Foreign Taxes.** The Fund may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

**THE GABELLI GLOBAL UTILITY & INCOME TRUST**  
**NOTES TO SCHEDULE OF INVESTMENTS (Continued) (Unaudited)**

**Derivative Financial Instruments.** The Fund may engage in various portfolio investment strategies by investing in a number of derivative financial instruments for the purposes of increasing the income of the Fund, hedging against changes in the value of its portfolio securities and in the value of securities it intends to purchase, or hedging against a specific transaction with respect to either the currency in which the transaction is denominated or another currency. Investing in certain derivative financial instruments, including participation in the options, futures, or swap markets, entails certain execution, liquidity, hedging, tax, and securities, interest, credit, or currency market risks. Losses may arise if the Adviser's prediction of movements in the direction of the securities, foreign currency, and interest rate markets is inaccurate. Losses may also arise if the counterparty does not perform its duties under a contract, or that, in the event of default, the Fund may be delayed in or prevented from obtaining payments or other contractual remedies owed to it under derivative contracts. The creditworthiness of the counterparties is closely monitored in order to minimize these risks. Participation in derivative transactions involves investment risks, transaction costs, and potential losses to which the Fund would not be subject absent the use of these strategies. The consequences of these risks, transaction costs, and losses may have a negative impact on the Fund's ability to pay distributions.

The Fund's derivative contracts held at March 31, 2011, if any, are not accounted for as hedging instruments under GAAP.

*Swap Agreements.* The Fund may enter into equity contract for difference swap transactions for the purpose of increasing the income of the Fund. The use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. In an equity contract for difference swap, a set of future cash flows is exchanged between two counterparties. One of these cash flow streams will typically be based on a reference interest rate combined with the performance of a notional value of shares of a stock. The other will be based on the performance of the shares of a stock. Depending on the general state of short-term interest rates and the returns on the Fund's portfolio securities at the time a swap transaction reaches its scheduled termination date, there is a risk that the Fund will not be able to obtain a replacement transaction or that the terms of the replacement will not be as favorable as on the expiring transaction.

The Fund has entered into an equity contract for difference swap agreement with The Goldman Sachs Group, Inc. Details of the swap at March 31, 2011 are reflected within the Schedule of Investments and further details are as follows:

| Notional<br>Amount           | Equity Security<br>Received<br>Market Value<br>Appreciation on: | Interest Rate/<br>Equity Security Paid<br>One month LIBOR plus 90 bps<br>plus<br>Market Value Depreciation on: | Termination<br>Date | Net Unrealized<br>Appreciation |
|------------------------------|---|--|---------------------|--------------------------------|
| \$464,654 (50,000<br>Shares) | Rolls-Royce Group<br>plc  | Rolls-Royce Group plc  | 6/27/11             | \$31,641                       |

The Fund's volume of activity in equity contract for difference swap agreements during the period ended March 31, 2011 had an average monthly notional amount of approximately \$497,984.

*Futures Contracts.* The Fund may engage in futures contracts for the purpose of hedging against changes in the value of its portfolio securities and in the value of securities it intends to purchase. Upon entering into a futures contract, the Fund is required to deposit with the broker an amount of cash or cash equivalents equal to a certain percentage of the contract amount. This is known as the initial margin. Subsequent payments (variation margin) are made or received by the Fund each day, depending on the daily fluctuations in the value of the contract, and are included in unrealized appreciation/depreciation on futures contracts. The Fund recognizes a realized gain or loss when the contract is closed.

**THE GABELLI GLOBAL UTILITY & INCOME TRUST**  
**NOTES TO SCHEDULE OF INVESTMENTS (Continued) (Unaudited)**

There are several risks in connection with the use of futures contracts as a hedging instrument. The change in value of futures contracts primarily corresponds with the value of their underlying instruments, which may not correlate with the change in value of the hedged investments. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market. During the period ended March 31, 2011, the Fund held no investments in futures contracts.

*Forward Foreign Exchange Contracts.* The Fund may engage in forward foreign exchange contracts for the purpose of hedging a specific transaction with respect to either the currency in which the transaction is denominated or another currency as deemed appropriate by the Adviser. Forward foreign exchange contracts are valued at the forward rate and are marked-to-market daily. The change in market value is included in unrealized appreciation/depreciation on investments and foreign currency translations. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of forward foreign exchange contracts does not eliminate fluctuations in the underlying prices of the Fund's portfolio securities, but it does establish a rate of exchange that can be achieved in the future. Although forward foreign exchange contracts limit the risk of loss due to a decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts. During the period ended March 31, 2011, the Fund held no investments in forward foreign exchange contracts.

The following table summarizes the net unrealized appreciation of derivatives held at March 31, 2011 by primary risk exposure:

| <b>Asset Derivatives:</b> | <b>Net<br/>Unrealized<br/>Appreciation</b> |
|---------------------------|--|
| Equity Contract           | \$ 31,641                                  |

**Tax Information.** The Fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended.
