**Item 8.01. Other Events.**

In connection with Invesco Mortgage Capital Inc.'s (the Company) plans to make a public offering of its common stock, the Company disclosed in its preliminary prospectus, dated August 17, 2011, that its book value per share of common stock at July 31, 2011 was \$18.39, compared to \$19.34 at June 30, 2011, in each case on a fully diluted basis. The July 31, 2011 book value includes the Company's retained earnings for the month of July 2011. This decline in the Company's book value was primarily due to the change in the valuation of the Company's interest rate hedges. Since July 31, 2011, swap rates have experienced further declines and the markets in which the Company participates have experienced increased volatility, which could negatively impact the Company's book value.
