Adjustment to Conversion Rate upon a Make-whole Fundamental Change:

The number of additional shares by which the applicable conversion rate for the notes will be increased for conversions in connection with a make-whole fundamental change will be determined by reference to the table below, based on the date on which the fundamental change occurs or becomes effective (the effective date) and the price paid per share of the issuer's common stock in the fundamental change in the case of a make-whole fundamental change constituting a share exchange, exchange offer, tender offer, consolidation, merger or similar transaction described in clause (2) of the definition of fundamental change (determined without regard to the parenthetical in such clause (2)) in which holders of the issuer's common stock receive only cash, or in the case of all other make-whole fundamental changes, the average of the last reported sale prices of the issuer's common stock over the five trading-day period ending on the trading day immediately preceding the effective date of such other make-whole fundamental change (the stock price).

The stock prices set forth in the first row of the table below (i.e., column headers) will be adjusted as of any date on which the base conversion rate of the notes is otherwise adjusted. The adjusted stock prices will equal the stock prices applicable immediately prior to such adjustment, multiplied by a fraction, the numerator of which is the base conversion rate in effect immediately prior to the adjustment giving rise to the stock price adjustment and the denominator of which is the base conversion rate as so adjusted. The number of additional shares will be adjusted in the same manner as the base conversion rate as set forth under Description of Notes Conversion Rights Conversion Rate Adjustments in the prospectus supplement for the offering. The following table sets forth the hypothetical stock price and the number of additional shares to be received per \$1,000 principal amount of the notes:

The exact stock prices and effective dates may not be set forth in the table above, in which case:
 if the stock price is between two stock prices in the table or the effective date is between two effective dates in the table, the number of additional shares will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, based on a 365-day year, as applicable;

if the stock price is greater than \$200 per share (subject to adjustment), no additional shares will be issued upon conversion; and

if the stock price is less than \$11.52 per share (subject to adjustment), no additional shares will be issued upon conversion.

Notwithstanding the foregoing, in no event will the total number of shares of common stock issuable upon conversion of the notes exceed 86.8056 per \$1,000 principal amount of such notes, subject to adjustments in the same manner as the base conversion rate as set forth under the heading Description of Notes Conversion Rights Conversion Rate Adjustments in the prospectus supplement for the offering.
