(1) Assumes conversion of all of the holder's Debentures at a conversion rate of 13.0259 shares of common stock per \$1,000 principal amount at maturity of the Debentures. This conversion rate is subject to adjustment as described under "Description of the Debentures -- Conversion Rights." As a result, the number of shares of common stock issuable upon conversion of the Debentures may increase or decrease in the future. Excludes shares of common stock that may be issued by us upon the repurchase of the Debentures by us at the option of the holder. In addition, excludes fractional shares. Holders will receive a cash adjustment for any fractional share amount resulting from conversion of the Debentures, as described under "Description of the Debentures -- Conversion Rights."

(2) Calculated based on 368,766,826 shares of common stock outstanding as of December 17, 2002. In calculating this amount for each holder, we treated as outstanding the number of shares of common stock issuable upon conversion of all of that holder's Debentures, but we did not assume conversion of any other holder's Debentures.

INVESTING IN THE DEBENTURES INVOLVES RISKS. SEE "RISK FACTORS" BEGINNING ON PAGE 10 OF THE PROSPECTUS.

\_\_\_\_\_

We will not receive any of the proceeds from the sale of the Debentures or the underlying shares of common stock by any of the selling securityholders. The selling securityholders may sell the Debentures or common stock either directly or through underwriters, broker-dealers or agents and in one or more transactions at market prices prevailing at the time of sale or at negotiated prices.
