**Item 2.02. Results of Operations and Financial Condition.**

On November 1, 2004, Allergan, Inc. ( Allergan ) issued a press release announcing its operating results for the third quarter ended September 24, 2004. A copy of the press release is furnished as Exhibit 99.1 to this Current Report.

In its press release Allergan included historical non-GAAP financial measures, as defined in Regulation G promulgated by the Securities and Exchange Commission, with respect to the three and nine month periods ended September 24, 2004, as well as the corresponding periods for 2003. Allergan believes that its presentation of historical non-GAAP financial measures provides useful supplementary information to investors. The presentation of historical non-GAAP financial measures is not meant to be considered in isolation from or as a substitute for results prepared in accordance with accounting principles generally accepted in the United States.

In the press release, Allergan reported the non-GAAP financial measures adjusted earnings and related adjusted diluted earnings. Allergan uses adjusted earnings to enhance the investor's overall understanding of the financial performance and prospects for the future of Allergan's core business activities. Specifically, Allergan believes that a report of adjusted earnings provides consistency in its financial reporting and facilitates the comparison of results of core business operations between its current, past and future periods. Adjusted earnings is one of the primary indicators management uses for planning and forecasting in future periods. Allergan also uses adjusted earnings for evaluating management performance for compensation purposes.

In the press release, Allergan also reported sales performance using the non-GAAP financial measure of constant currency sales. Constant currency sales represent current period reported sales adjusted for the translation effect of changes in average foreign exchange rates between the current period and the corresponding period in the prior year. Allergan calculates the currency effect by comparing adjusted current period reported amounts, calculated using the monthly average foreign exchange rates for the corresponding period in the prior year, to the actual current period reported amounts. Management refers to growth rates at constant currency so that sales results can be viewed without the impact of changing foreign currency exchange rates, thereby facilitating period-to-period comparisons of Allergan's sales. Generally, when the dollar either strengthens or weakens against other currencies, the growth at constant currency rates will be higher or lower, respectively, than growth reported at actual exchange rates. Constant currency sales as defined and presented by Allergan may not be comparable to similar measures reported by other companies.

Allergan is also holding a webcast and investor conference beginning at 8:00 a.m. Pacific Time on Monday, November 1, 2004 to disclose its financial results for the quarter ended September 24, 2004. The webcast can be accessed live through the Allergan website, [www.allergan.com](http://www.allergan.com). Replays of the webcast will also be available from Monday, November 1, 2004 at 11:00 a.m. Pacific Time until Thursday, November 4, 2004 at 9:00 p.m. Pacific Time, and can be accessed through [www.allergan.com](http://www.allergan.com) or by calling 1-866-466-0581 for domestic locations, or 1-203-369-1440 for international locations. A passcode will not be required.

This information and the information contained in the press release shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that Section. The information in this Current Report is not incorporated by reference into any filings of Allergan made under the Securities Act of 1933, as amended, whether made before or after the date of this Current Report, regardless of any general incorporation language in the filing unless specifically stated so therein.
