PART I

ITEM 1. BUSINESS.

Overview

Lawson Products, Inc. (Lawson , the Company , we or us) was incorporated in Illinois in 1952, and reincorporated in Delaware in 1982. Lawson is a North American distributor and marketer of systems, services and products to the industrial, commercial, institutional, and governmental maintenance repair and operations (MRO) marketplace. The Company also manufactures, sells and distributes production and specialized component parts to the original equipment marketplace (OEM) including the automotive, appliance, aerospace, construction, and transportation industries. Please see Note O *Segment Reporting* in the Notes to the Consolidated Financial Statements, included elsewhere in this Annual Report on Form 10-K, for further information regarding financial results related to the Company s geographical and business segments. (Such information is incorporated herein by reference.)

MRO Segment

Industry and competition

The MRO industry consists of companies that buy and stock products in bulk and supply these products to customers on an as needed basis. The customer benefits from lower costs and convenience of ordering. We estimate the MRO industry in North America to exceed \$100 billion in revenues.

We encounter intense competition from several national distributors and manufacturers and a large number of regional and local distributors. Some competitors have greater financial and personnel resources, handle more extensive lines of merchandise, operate larger facilities and price some merchandise more competitively than we do. We compete for business delivering on our proposition of vendor managed inventory, technical expertise and highly engineered products.

Operations

We participate in the MRO industry through our Lawson Products business unit and through our Rutland Tools subsidiary (Rutland) which together represented 83% of our overall net sales for the year ended December 31, 2008.

The majority of our sales are generated through a network of approximately 1,500 independent sales agents. These agents deliver value to the customer by offering vendor managed inventory, technical expertise and highly engineered products. Sales agents receive education in the best uses of our products enabling them to provide solutions customized to our customers needs. This includes on-site visits to help manage customer inventories, introducing cost savings and improving their profitability. Regular inventory analysis and replenishment is conducted to prevent unnecessary purchases and unplanned downtime. Additionally, we provide customized storage systems for improved organization and a more efficient workflow. Product demonstrations that can improve our customers productivity are regularly given by our agents.

We distribute printed catalogs to two primary markets. One is the retail market where business is done with the end user of the product. The other is the wholesale market where the distributor resells our product to an end customer. In 2008, we delivered printed catalogs to approximately 70,000 retail customers and approximately 62,000 wholesale customers. We also have showrooms located in Whittier, California; City of Industry, California; San Jose, California;

Santa Ana, California; Chatsworth, California; Phoenix, Arizona; and Houston, Texas.

We receive product orders in various ways. Customers can place orders with our customer service team via fax or phone, orders can be placed directly through the on-line catalog on our web site and agents enter orders directly into an electronic ordering system.

Our engineering department provides technical support as part of our value proposition for our extensive product line and on-site problem solving. Material Safety Data Sheets are maintained electronically and are available to our customers seven days a week, 24 hours a day. Additionally, product certifications and material test

Table of Contents

reports are available by contacting the engineering department at engineering@lawsonproducts.com. Our engineering department also develops and presents product safety and technical training seminars tailored to meet our customers needs.

We sell products in all 50 states, the District of Columbia, and Canada. An important factor in attracting and retaining customers is our ability to process orders promptly. We normally ship to customers within one to two days of order placement. This rapid shipment is facilitated by automated order entry and inventory control systems. Products are stocked in and processed from strategically placed general distribution centers in Des Plaines, Illinois; Addison, Illinois; Vernon Hills, Illinois; Reno, Nevada; Fairfield, New Jersey; Dallas, Texas; Suwanee, Georgia; and Mississauga, Ontario.

We carry a significant amount of inventories to ensure product availability and rapid processing of customer orders. We depend on accurate forecasting of customer demand to establish the proper level of inventory for each product. Inventory levels need to be sufficient to meet customer demand while avoiding the costs of stocking excess items. Technology is critical to provide management with timely information related to our current inventory on hand in relation to customer demand, vendor pricing and purchase lead times to order the replenishment of the optimal number of parts at the proper time at the best price. We are seeking to improve and upgrade the quality of our information technology to maximize the efficiency of our supply chain.

Products

We offer approximately 240,000 different products for sale of which approximately 180,000 products are maintained in inventory. Sales percentages by broad categories of our product mix are as follows:

Product Category	Percent of Total MRO Sales
Fastening systems	20%
Specialty chemicals	13
Cutting tools and abrasives	13
Fluid power	11
Aftermarket automotive supplies	9
Electrical	9
Welding and metal repair	6
Other	19
	100%

Substantially all of our products are manufactured by others, purchased in bulk and repackaged in smaller quantities for sale to our customers. During 2008, our Lawson Products business unit purchased products from over 1,100 suppliers and our Rutland business unit purchased products from approximately 600 suppliers. We generally do not engage in long-term or fixed-price contracts. No single supplier accounted for more than three percent of our purchases in 2008 and we believe that the loss of any single supplier would not significantly affect our operations.

We actively participate in the design and development of products with our manufacturers. Technology has helped us to develop new items that are application specific. We review applications and recommend alternative products that could prove beneficial to the customer. Our quality control department tests our product offerings to assure they meet our specifications. We also conduct failure analysis and recommend solutions to help customers maximize product

performance and avoid costly product failures. To promote brand loyalty, we sell products using various private labels and tradenames including Lawson Products, Kent Automotive, Cronatron, and Drummond, among others.

Customers

Our customers include a wide range of purchasers of industrial supply products from small repair shops to large national and governmental accounts. Our customers operate in a wide variety of industries including

Table of Contents

automotive repair, transportation, governmental including the military, manufacturing, construction, mining, wholesale, service and others.

During 2008, our Lawson Products business unit sold products to approximately 140,000 customers and our Rutland business unit sold products to approximately 30,000 customers. No customer accounted for more than two percent of net sales. In 2008, 94% of our net sales came from customers in the United States and 6% came from customers in Canada.

OEM Segment

Two of our subsidiaries, Assembly Component Systems (ACS) and Automatic Screw Machine Parts Company (ASMP) compete in the OEM marketplace. The OEM marketplace generally consists of large manufacturing companies with multiple supply chain needs. ACS and ASMP accounted for 13% and 4% of the Company s net sales for the year ended December 31, 2008.

ACS specializes in providing OEM manufacturers with just-in-time delivery of fasteners, components and fittings to maximize the efficiency of the customers supply chain. ACS seeks long-term agreements with companies to identify product needs and parameters of use, offer engineering expertise, provide product sourcing and manage inventory replenishment. Sales support and dedicated warehousing is provided, enabling partnered companies to focus on manufacturing operations while affording them a reduction in financial obligations associated with inventory housing and usage. ACS operates a distribution network that includes Des Plaines, Illinois; Lenexa, Kansas; Cincinnati, Ohio; and Memphis, Tennessee. Inventory supply rooms staffed by dedicated ACS sales personnel located close to, or within a company s operating space, are used to facilitate the selection and transfer of goods that are called for during a production schedule. Additional sales support is available through sales calls, special needs requests, and pre-determined replenishment schedules.

ASMP manufactures and distributes components, fasteners and fittings for use by OEM manufacturers. Based in Decatur, Alabama, ASMP manufactures components specific to the customer s production needs including various nondependent or interdependent components. ASMP seeks to obtain long-term commitments to enable proper support of the customers supply chain. ASMP manufactures products developed for high strength critical applications and also sources externally produced items if applications call for such goods.

Employees and Sales Agents

As of December 31, 2008, we employed approximately 1,350 full time workers, consisting of approximately 340 sales and marketing employees, 760 operations and distribution employees and 250 management and administrative staff. Approximately 12% of our workforce is represented by four collective bargaining agreements. We believe that our relations with our employees and their collective bargaining organizations are good.

Additionally, sales in our MRO segment are made primarily through a network of approximately 1,500 independent sales agents. Independent sales agents are compensated on a commission only basis and are responsible for repayment of commissions on any uncollectible accounts.

ITEM 1A. RISK FACTORS.

In addition to the other information in this Annual Report on Form 10-K for the fiscal year ended December 31, 2008, the following factors should be considered in evaluating Lawson's business. Our operating results depend upon many factors and are subject to various risks and uncertainties. The material risks and uncertainties known to us which may cause the operating results to vary from anticipated results or which may negatively affect our operating results are as follows:

Our results of operations may continue to be adversely impacted by the current worldwide economic recession. As a result, demand for our products may significantly decline or the market price of our common stock may decline.

In late 2007, the U.S. and world economies entered into a severe economic recession due to the effects of the subprime lending crisis, general credit market crisis, collateral effects on the finance and banking industries, volatile energy and commodity costs, concerns about inflation, slower economic activity, decreased consumer confidence, reduced corporate profits and capital spending, adverse business conditions and liquidity concerns. These conditions make it difficult for our customers and us to accurately forecast and plan future business activities, and have caused U.S. and foreign businesses to slow spending on products throughout our industry, which adversely impacts our revenues and our ability to manage inventory levels, collect customer receivables and ultimately our profitability. We cannot predict the duration of the recession or the timing or strength of a subsequent economic recovery. Additionally, our stock price could decrease if investors have concerns that our business, financial condition, results of operations and capital requirements will be negatively impacted by a continued worldwide recession. A decrease in our stock price reduces the market value of the Company compared to the book value of our net assets, which may lead to further impairment of our assets.

Our Deferred Prosecution Agreement with the U.S. Attorney's Office for the Northern District of Illinois, and any potential breach of such agreement, may adversely affect our business, financial condition, results of operations and stock price.

We entered into a Deferred Prosecution Agreement (the "DPA") in August 2008 with the U.S. Attorney's Office for the Northern District of Illinois (the "U.S. Attorney's Office"), which provides for the payment of \$30.0 million in penalties to resolve our liability for the actions of our representatives in improperly providing gifts or awards to purchasing agents through our then-existing customer loyalty programs. The signing of the DPA may negatively affect our ability to do business with certain customers (both government and non-government customers). In addition, under the terms of the DPA, if it is determined that we deliberately gave false, incomplete or misleading information under the DPA or have committed any federal crimes subsequent to the DPA, or otherwise knowingly, intentionally, and materially violated any provision of the DPA, we may be subject to prosecution for any federal criminal violation of which the U.S. Attorney's Office has knowledge. We cannot predict the impact, if any, of the signing of the DPA on our business, financial condition, results of operations, and stock price.

A significant portion of our inventory may become obsolete.

Our business strategy requires us to carry a significant amount of inventory in order to meet rapid processing of customer orders. If our inventory forecasting and production planning processes result in inventory levels exceeding the levels demanded by customers, our operating results could be adversely affected due to costs of carrying the inventory and additional inventory write-downs for excess and obsolete inventory.

Work stoppages and other disruptions at transportation centers or shipping ports may adversely affect our ability to obtain inventory and make deliveries to Lawson's customers.

Our ability to rapidly process customer orders is an integral component of our overall business strategy. Disruptions at transportation centers or shipping ports, due to events such as severe weather or labor interruptions or other events, affect both our ability to maintain core products in inventory and deliver products to our customers on a

Table of Contents

timely basis, which may in turn adversely affect our results of operations. In addition, severe weather conditions could adversely affect demand for our products in particularly hard hit regions.

Changes in our customers and product mix could cause our gross margin percentage to decline in the future.

From time to time, we have experienced changes in product mix and inventory costs. When our product mix changes, there can be no assurance that we will be able to maintain our historical gross profit margins. Changes in our customers, product mix, or the volume of orders could cause our gross profit margin percentage to decline.

Increases in energy costs and the cost of raw materials used in our products could impact our cost of goods and distribution and occupancy expenses, which may result in lower operating margins.

Increases in the cost of raw materials used in our products (e.g., steel) and energy costs raise the production costs of our vendors. Those vendors typically look to pass the higher costs along to us through price increases. If we are unable to fully pass these increased prices and costs through to our customers or to modify our activities, the impact would have an adverse effect on our operating profit margins.

Disruptions of our information systems could adversely affect the Company.

We depend on our information systems to process orders, to manage inventory and accounts receivable collections, to purchase, sell and ship products, to maintain cost-effective operations, and to service customers. Disruptions in the operation of information systems can occur due to a variety of factors including power outages, computer bugs and human error. Any disruption in the operation of our information systems whether over a short or an extended period of time or affecting one or multiple distribution centers could have a material adverse effect on our business, financial condition and results of operations.

A limited number of the Company's stockholders can exert significant influence over the Company.

As of January 31, 2009, members of the Port family collectively beneficially owned 55.3% of the outstanding shares of common stock. This share ownership would permit these stockholders, if they chose to act together, to exert significant influence over the outcome of stockholder votes, including votes concerning the election of directors, by-law amendments, possible mergers, corporate control contests and other significant corporate transactions. The interests of the Port family may differ from those of other stockholders.

The Company operates in highly competitive markets.

Our marketplace, although consolidating, still includes large, fragmented industries that are highly competitive. We believe that customers and competitors may continue to consolidate over the next few years, which may make the industry even more competitive. Our current or future competitors include companies with similar or greater market presence, name recognition, and financial, marketing, and other resources, and we believe they will continue to challenge the marketplace with their product selection, financial resources, and services.

Future acquisitions are subject to integration and other risks.

We anticipate that we may, from time to time, selectively acquire additional businesses or assets. Acquisitions are accompanied by risks, such as potential exposure to unknown liabilities of acquired companies and the possible loss of key employees and customers of the acquired business. In addition, we may not obtain the expected benefits or cost savings from acquisitions. Acquisitions are subject to risks associated with financing the acquisition and integrating the operations and personnel of the acquired businesses or assets. If any of these risks materialize, they may result in

disruptions to our business and the diversion of management time and attention, which could increase the costs of operating our existing or acquired businesses or negate the expected benefits of the acquisitions.

Table of Contents

An economic or other situation that affects government and tax-supported entities could negatively impact our sales and earnings.

We sell to numerous government and tax supported entities. Any situation that impacts these funded entities or our ability to sell to these entities could have a material adverse effect on the Company.

ITEM 3. *LEGAL PROCEEDINGS.*

There is no material pending litigation to which the Company, or any of its subsidiaries, is a party or to which any of their property is subject.

In December 2005, the FBI executed a search warrant for records at the Company's offices and informed the Company that it was conducting an investigation as to whether any of the Company's representatives improperly provided gifts or awards to purchasing agents (including government purchasing agents) through the Company's customer loyalty programs (the investigation). The U.S. Attorney's Office for the Northern District of Illinois (the U.S. Attorney's Office) subsequently issued a subpoena for documents in connection with the investigation.

In April 2007, thirteen people, including seven former sales agents of the Company, were indicted on federal criminal charges, including mail fraud, in connection with the investigation. These indictments alleged that, under the Company's customer loyalty programs, sales agents would provide cash gift certificates to individuals purchasing Company merchandise on behalf of their employers as a way to increase their commissions and prices paid by customers. All of the cases involved commissioned sales agents of the Company. All seven of the indicted former sales agents have entered guilty pleas to federal criminal charges.

On August 11, 2008, in connection with the investigation, the Company entered into a Deferred Prosecution Agreement (the DPA) with the U.S. Attorney's Office. An additional three people, including a former sales manager and a former sales agent were indicted on August 11, 2008 and have since pled guilty. Under the terms of the DPA, the U.S. Attorney's Office filed a one count criminal Information charging the Company with mail fraud in the U.S. District Court for the Northern District of Illinois, but agreed to defer prosecution of such charge for three years. If the Company abides by the terms and conditions of the DPA, the U.S. Attorney's Office will seek dismissal with prejudice of the Information within 30 days of the expiration of the three-year period.

Pursuant to the DPA, the Company agreed to a \$30.0 million penalty, which includes \$0.8 million of restitution, and recorded a charge of \$30.0 million in the second quarter of 2008. The penalty is payable in three equal installments. The first \$10.0 million payment was made in August 2008. The remaining \$10.0 million payments are due in August 2009 and in August 2010. If a controlling interest in the Company is sold, any unpaid amounts shall due at the closing of the sale.

Under the DPA, the Company agreed to make restitution payments to certain customers that employed individuals who received over ten thousand dollars in payments through the Winners Choice incentive program, that employed individuals who have been or later are convicted of mail fraud as a result of Winners Choice payments, or that purchased Company merchandise from sales agents who have been or later are convicted of mail fraud for providing checks to the customer's employees. Restitution payments were made to these customers from the Company's first installment payment.

In conjunction with the Company's internal investigation, several customer loyalty programs were terminated because the Company believes that these programs provided or had the potential of providing promotional considerations, such as gifts and awards, to purchasing agents that the Company deemed inappropriate. The Company has modified another customer loyalty program to limit the amount and nature of customer gifts distributed under the program. In addition, twenty-three independent agents have been terminated, a number have resigned and the Company has terminated four employees. The Company has also implemented a compliance and ethics program to prevent future abuses. Under the terms of the DPA, the Company agreed to continue to implement its compliance and ethics

program.

Stock Price Performance Chart

Set forth below is a line graph comparing the yearly change in the cumulative total stockholder return on the Company's common stock against the cumulative total return of the S&P SmallCap 600 Index and a peer group (the Peer Group) of the Company for the five prior years. The Peer Group consists of Barnes Group Inc., Fastenal Company and MSC Industrial Direct. The Company believes that the Peer Group is representative of the markets it services in terms of product sales and customers. The chart below represents the cumulative return of a hypothetical \$100 invested on December 31, 2003 in stock or index, including reinvestment of dividends.

- (5) The 2005 results include a \$7.5 million after tax loss related to discontinuation of the UK business and an after tax gain of \$12.2 million related to the gain on the sale of the Company's investment in real estate.

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.****OVERVIEW**

The two principal factors affecting our 2008 results were the one-time \$30.0 million DPA settlement penalty and the global economic recession and contraction in the credit markets that led to decreased customer demand throughout our industry. The duration of the recession is uncertain and industry demand is expected to continue to decline and create downward pressure on sales volume in 2009. Despite the negative effects of the economy, we were able to take steps to improve our financial condition during 2008. Operationally, we made progress in integrating previously separate businesses to allow our customers access to an expanded range of products from a single point of contact. We were able to generate cash by reducing our working capital requirements primarily through initiatives taken to improve inventory management. Additionally, the settlement with the United States Attorney's Office for the Northern District of Illinois substantially brings to a close the uncertainty created by the investigation initiated in 2005.

Table of Contents**RESULTS OF OPERATIONS FOR 2008 AS COMPARED TO 2007*****Sales and Gross Profit***

Sales and gross profit results for the years ending December 31, 2008 and 2007 were as follows:

	Year Ended December 31,		Change	
	2008	2007	Amount	%
	(Dollars in thousands)			
Net sales				
MRO	\$ 403,584	\$ 429,508	\$ (25,924)	(6.0)%

OEM	12,627	19,231	(6,604)	(34.3)
Consolidated	\$ 278,998	\$ 303,829	\$ (24,831)	(8.2)
Gross profit margin				
MRO	66.0%	66.3%		
OEM	15.5	23.2		
Consolidated	57.5	59.3		

The 5.3% decrease in net sales to \$485.2 million in 2008 compared to \$512.5 million in 2007 resulted from decreases in both the MRO and OEM segments as our businesses were negatively impacted by the slowdown in the global economy. Net sales of our MRO business experienced a severe decline of 14.3% in the fourth quarter of 2008 compared to 2007 as our customers, affected by overall weakness in the economy and a much more restrictive credit environment, reduced their purchasing requirements. We expect the demand level to continue to deteriorate until the credit markets recover and the global economic environment improves. Sales were also negatively impacted by a net reduction of over 100 sales agents in 2008 compared to 2007. Net sales of our OEM segment decreased \$1.4 million due to customer losses and the economic slowdown in the fourth quarter, partially offset by increased sales generated from some of our current customers.

Gross profit decreased \$24.8 million to \$279.0 million in 2008 primarily due to the reduction in net sales and a decline of 1.8 percentage points as a percent of sales. The decline was primarily attributable to higher product and commodity costs.

Selling, General and Administrative Expenses

Selling, general and administrative costs declined by 3.5% to \$256.0 million in 2008 compared to \$265.3 million in 2007 primarily due to decreases in sales commissions and compensation expenses. Selling, general and administrative costs as a percent of sales increased 1.0 percentage points to 52.8% in 2008 as fixed costs were not reduced in direct proportion to the overall decrease in net sales.

Settlement and Related Costs

Settlement costs relate to the investigation by the U.S. Attorney's Office for the Northern District of Illinois as to whether our sales representatives provided improper gifts or awards to purchasing agents (including government purchasing agents) through our customer loyalty programs. In August 2008, in connection with the investigation, we entered into the DPA with the U.S. Attorney's Office and agreed to pay a \$30.0 million penalty. In addition to the penalty, we incurred legal and other expenses of \$1.7 million in 2008 and \$5.8 million in 2007 in connection with the investigation.

Table of Contents***Severance and Other Charges***

In 2008, the Company recorded \$9.3 million of severance and other charges. Of this amount, \$5.4 million related to severance costs associated with the departure of certain executives and operational efficiency improvement initiatives and \$3.9 million related to unclaimed property liabilities primarily associated with years prior to 2003. During 2007, the Company implemented several initiatives designed to improve operating efficiencies. As a result of these initiatives, certain positions and departments were eliminated and restructured, resulting in \$12.3 million of severance costs and other charges.

Impairment of Goodwill

Annually, we assess the fair value of our goodwill for impairment. Our 2008 review resulted in a \$2.3 million non-cash charge to reflect the impairment of goodwill recorded in our OEM segment related to ACS.

Other Expense, Net

Other expense, net of \$0.5 million in 2008 was relatively unchanged compared to 2007. A \$0.2 million decrease in interest income was somewhat offset by a \$0.1 million decrease in interest expense.

Income Tax Expense

The effective tax rates for continuing operations for 2008 and 2007 were (30.7)% and 43.5%, respectively. The 2008 effective tax rate reflects the effect of \$29.2 million related to the penalty under the DPA which was non-deductible and a \$6.1 million non-deductible expense related to a decline in the cash value of life insurance. Excluding these items, the 2008 effective tax rate would have been 43.7%.

RESULTS OF OPERATIONS FOR 2007 AS COMPARED TO 2006***Sales and Gross Profit***

Sales and gross profit results for the years ending December 31, 2007 and 2006 were as follows:

	Year Ended December 31,	2006	Change	
	2007	2006	Amount	%
	(Dollars in thousands)			
Net sales				
MRO	\$ 429,508	\$ 430,815	\$ (1,307)	(0.3)%

Consolidated	\$ 512,543	\$ 514,273	\$ (1,730)	(0.3)
Gross profit				
MRO	\$ 284,598	\$ 286,519	\$ (1,921)	(0.7)%
OEM	19,231	20,207	(976)	(4.8)
Consolidated	\$ 303,829	\$ 306,726	\$ (2,897)	(0.9)

Gross profit margin		
MRO	66.3%	66.5%
OEM	23.2	24.2
Consolidated	59.3	59.6

The decrease in net sales to \$512.5 million in 2007 compared to \$514.3 million in 2006 resulted from decreases in both the MRO and OEM segments. The sales decrease for MRO businesses was primarily driven by lower sales of metalworking products due to order fulfillment problems encountered during the Reno, Nevada distribution facility expansion which was completed in December 2007. OEM sales decreased primarily due to the loss of some customer contracts.

Gross profit decreased \$2.9 million to \$303.8 million in 2007 compared to \$306.7 million in 2006 primarily due to lower overall sales in 2007. As a percent of sales, gross profit declined by 0.3 percentage points to 59.3% in 2007 from

Table of Contents

59.6% in 2006. The decline was primarily attributable to a change in sales mix and increased product and commodity costs compared to 2006.

MRO gross profit margins declined slightly to 66.3% in 2007 from 66.5% in 2006. The gross profit margins for the OEM segment decreased 1.0 percentage points to 23.2% in 2007 from 24.2% in 2006, principally, due to increased product costs.

Selling, General and Administrative Expenses

Selling, general and administrative costs declined by 4.8% to \$265.3 million in 2007 compared to \$278.5 million in 2006. As a percent of sales selling, general and administrative costs declined 2.4 percentage points to 51.8% in 2007 compared to 54.2% in 2006 primarily due to several initiatives undertaken during 2007 designed to improve operating efficiencies. The initiatives included the elimination of certain positions and restructuring of departments.

Settlement Related Costs

The Company incurred legal and other expenses of \$5.8 million in 2007 and \$3.2 million in 2006 in connection with the investigation by the U.S. Attorney's office for the Northern District of Illinois related to whether Company sales representatives provided improper gifts or awards to purchasing agents (including government purchasing agents) through the Company's customer loyalty programs.

Severance and Other Charges

The Company implemented several initiatives during 2007 designed to improve operating efficiencies. As a result of these initiatives, certain positions and departments were eliminated and restructured, resulting in \$12.3 million of severance costs and other charges. The Company incurred \$1.2 million of severance and other charges in 2006.

Other (Expense) Income, Net

The Company recorded \$0.4 million of other expense, net in 2007 compared to \$2.2 million of other income, net, in 2006. The \$2.6 million increase in other expense, net was primarily due to a higher average balance on our revolving line of credit which increased our interest expense in 2007 and lower foreign currency gains realized in 2007 compared to 2006.

Income Tax Expense

The effective tax rates for continuing operations for 2007 and 2006 were 43.5% and 45.5%, respectively. The higher effective tax rate in 2006 primarily reflects adjustments related to the deductibility of the Company's customer loyalty programs in its MRO business for tax years 2005, 2004 and 2003. Many of the customer loyalty and promotion programs in place for these years were terminated or replaced early in 2006.

LIQUIDITY AND CAPITAL RESOURCES

Cash provided by operating activities for 2008, 2007 and 2006 was \$15.7 million, \$11.6 million and \$19.9 million, respectively. The \$4.1 million increase in 2008 compared to 2007 was primarily due to improved working capital utilization which was mostly offset by a decrease in net income and the \$10.0 million payment related to the DPA penalty. The \$8.3 million decline in 2007 cash provided by operating activities from 2006 was due primarily to lower net income and increases in inventories, prepaid expenses and miscellaneous receivables.

Working capital at December 31, 2008 and 2007 was \$90.0 million and \$99.1 million, respectively. The \$9.1 million decrease in working capital is primarily attributable to a \$10.4 million reduction in inventory, and a \$10.3 million reduction in accounts receivable, partially offset by decreases in other liabilities. Initiatives taken to improve the inventory management process led to the lower inventory balance, while increased attention to collections and a reduction in sales during the fourth quarter led to the decrease in the amount of outstanding accounts receivable.

Table of Contents

Cash used to purchase property plant and equipment was \$3.5 million in 2008 compared to \$17.7 million in 2007 and \$5.3 million in 2006. 2007 included \$12.1 million related to the Reno, Nevada facility expansion. Capital spending was reduced in 2008 in response to the economic downturn that began in the second half of 2008.

Financing activities included a \$3.3 million paydown of our line of credit in 2008 compared to \$11.0 million borrowed from the line of credit in 2007. The Company paid dividends of \$6.8 million, \$6.8 million and \$7.2 million to shareholders of its common stock in 2008, 2007 and 2006, respectively.

In October 2006, we purchased 486,493 of our common shares in a Dutch Auction tender offer at a cost of \$20.9 million. We did not purchase any of our common stock in 2008 or 2007. At December 31, 2008, 202,780 shares remained available for purchase pursuant to the 2004 authorization by our Board of Directors to purchase up to 500,000 shares of our common stock.

In November 2008, we entered into a First Amended and Restated Credit Agreement (the Credit Facility) with Bank of America, N.A. The Credit Facility provides for a total commitment of \$75 million in the form of revolving loans and letters of credit and matures on November 7, 2011. The interest rate for the Credit Facility bears interest at either, LIBOR plus 0.625%, or the prime rate minus 1.0%, as elected by us. The interest rate may be adjusted based on the ratio of consolidated total debt to EBITDA calculated on the basis of our most recent annual or quarterly financial statements. We had \$7.7 million outstanding as of December 31, 2008 under the Credit Facility. The weighted average interest rate was 3.2% for the year ended December 31, 2008. The Credit Facility specifies certain financial covenants, including a fixed charge coverage and total debt to equity and minimum net worth calculations which must be met as of the end of each fiscal quarter. At December 31, 2008 we were in compliance with all covenants.

In March 2009 we amended the Credit Facility (the Amended Credit Facility), reducing the amount of the facility, adjusting the covenants and providing additional security to Bank of America, N.A. The Amended Credit Facility provides for a total commitment of \$55 million. The maturity date remains November 7, 2011. The interest rate is LIBOR plus a margin of 2.0% to 3.5%, based on the ratio of total debt to EBITDA. The Amended Credit Facility contains covenants for adjusted EBITDA, as defined in the agreement, for each quarter through September 30, 2009. Commencing with the quarter ending December 31, 2009, additional covenants will be in place, including fixed charge coverage, total debt to equity and minimum net worth, as defined in the credit agreement. The Amended Credit Facility places a restriction on quarterly dividends of \$0.26 million, or \$1.04 million on an annual basis. The Amended Credit Facility is secured by substantially all of the assets of the Company, excluding real property and the capital stock of the Company's subsidiaries, except for the stock of Lawson Canada. The Company paid an amendment fee of \$0.1 million.

We believe that cash provided by operations and the \$55 million revolving line of credit will be sufficient to fund our operating requirements, cash dividends and capital improvements for the upcoming fiscal year.

OFF-BALANCE SHEET ARRANGEMENTS

We have not entered into any off-balance sheet arrangements.

CRITICAL ACCOUNTING POLICIES

The Company has disclosed its significant accounting policies in Note B to the Consolidated Financial Statements. The following provides supplemental information to these accounting policies as well as information on the accounts requiring more significant estimates.

Allowance for Doubtful Accounts Methodology We evaluate the collectibility of accounts receivable based on a combination of factors. In circumstances where we are aware of a specific customer's inability to meet its financial obligations (e.g., bankruptcy filings, substantial down-grading of credit ratings), a specific reserve for bad debts is recorded against amounts due to reduce the receivable to the amount we believe will be collected. For all other customers, we recognize reserves for bad debts based on our historical experience of bad debt write-offs as a percent of accounts receivable outstanding. If circumstances change (i.e., higher than expected defaults or an unexpected material adverse change in a major customer's ability to meet its financial obligations), the estimates of the recoverability of amounts due to us could be revised by a material amount. In 2008, we recorded an allowance reserve equal to 3% of our trade receivables outstanding. A hypothetical change of one percent to our reserve allowance would have affected our annual doubtful accounts expense by approximately \$0.5 million.

Inventory Reserves We carry a significant amount of inventory as part of our strategy to fulfill the vast majority of our customers' orders the same day received. However, this strategy increases the chance that portions of the inventory have lost value through obsolescence or becoming slow-moving or excess. To reduce inventory to a lower of cost or market value, we record a reserve for slow-moving and obsolete inventory. Obsolete and slow-moving inventory is monitored by examining reports of parts which have not been sold for extended periods. If experience or market conditions change, estimates of the reserves needed could be revised by a material amount. In 2008, we have an allowance reserve of \$10.1 million equal to approximately 10% of our total inventory. A hypothetical change of one percent to our reserve allowance would have affected our selling, general and administrative expenses by approximately \$1.0 million.

Income Taxes Deferred tax assets and liabilities are determined based on the difference between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the

Table of Contents

differences are expected to reverse. We record a provision for income taxes based on domestic and international statutory income tax rates and tax planning opportunities in the jurisdictions in which we operate. Significant judgment is required in determining income tax provisions as well as deferred tax asset and liability balances, including the estimation of valuation allowances and the evaluation of tax positions.

ITEM 7A. *QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.*

Through one of our subsidiaries, we distribute products in Canada. The functional currency of this subsidiary is the Canadian dollar which is translated into U.S. dollars when included in our consolidated financial statements. Therefore, we are exposed to market risk relating to the change in the value of the Canadian dollar relative to the U.S. dollar. A hypothetical 10% change in the Canadian foreign currency exchange rate would have affected our 2008 net sales by \$3.2 million and total assets by \$2.0 million.

We are exposed to investment market risk relating to changes in the value of the \$18.0 million cash value of life insurance asset. This exposure is mostly offset by the \$10.8 million value of the deferred compensation liability. A hypothetical 10% increase or decrease in the investment portfolios of both the cash value of life insurance asset and the deferred compensation liability would have affected our net income by \$0.7 million.

At December 31, 2008, we had a \$7.7 million outstanding balance on our revolving line of credit. The market risk of a one percentage point change in the LIBOR or Prime interest rates would be immaterial to our operating results.

We are exposed to market risk relating to increased commodity and energy costs affecting the production costs of our vendors. Those vendors typically look to pass their increased costs along to us and if we are unable to fully pass these costs through to our customers or to modify our activities, the impact would have an adverse effect on our operating profit margins.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) under the Securities Exchange Act of 1934, as amended. All internal control systems have inherent limitations, regardless of how well-designed they are. Therefore, an effective internal control over financial reporting system provides only reasonable, and not absolute, assurance with respect to the preparation and/or presentation of the financial statements.

The Company's management conducted an evaluation, with the participation of the Company's chief executive officer and chief financial officer, of the effectiveness of its internal control over financial reporting as of December 31, 2008 based on the framework in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on the evaluation described above and using the COSO criteria, the Company's management concluded that our internal control over financial reporting was effective as of December 31, 2008.

Ernst & Young LLP, the Company's independent registered public accounting firm, has audited the Consolidated Financial Statements included in this Annual Report on Form 10-K and, as part of its audit, has issued an attestation report, which is included herein, on the effectiveness of the Company's internal control over financial reporting as of December 31, 2008.

**Report of Independent Registered Public Accounting Firm
on Internal Control Over Financial Reporting**

To the Stockholders and Board of Directors
Lawson Products, Inc.

We have audited Lawson Products, Inc.'s (the Company) internal control over financial reporting as of December 31, 2008 based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Lawson Products, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. In our opinion, Lawson Products, Inc. maintained in all material respects, effective internal control over financial reporting as of December 31, 2008, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Lawson Products, Inc. as of December 31, 2008 and 2007 and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2008 and our report dated March 11, 2009 expressed an unqualified opinion thereon.

**Report of Independent Registered Public Accounting Firm
on Consolidated Financial Statements**

To the Stockholders and Board of Directors
Lawson Products, Inc.

We have audited the accompanying consolidated balance sheets of Lawson Products, Inc. as of December 31, 2008 and 2007, and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2008. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Lawson Products, Inc. at December 31, 2008 and 2007, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Lawson Products, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 11, 2009, expressed an unqualified opinion thereon.

Note A Description of Business

Lawson Products, Inc. (Lawson or the Company) is a North American distributor and marketer of systems, services and products to the industrial, commercial and institutional maintenance, repair and operations (MRO) marketplace. The Company also manufactures sells and distributes specialized component parts to the original equipment marketplace (OEM).

Note B Summary of Significant Accounting Policies

Principles of Consolidation The accompanying consolidated financial statements include the accounts and transactions of the Company and its wholly owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Revenue Recognition Revenue includes product sales, billings for freight and handling charges and fees earned for services provided. Sales and associated cost of goods sold are generally recognized when products are shipped and title passes to customers. We accrue for returns under the guidance of Statement of Financial Accounting Standards (SFAS) No. 48, *Revenue Recognition When Right of Return Exists*, based on historical evidence of rates of return.

Shipping and Handling Fees and Costs Costs related to shipping and handling fees are included on the Consolidated Statements of Operations in the caption Selling, general and administrative expenses . Shipping and handling fees charged to customers are included in the caption Net sales and totaled \$18,624, \$17,130 and \$16,819 in 2008, 2007 and 2006, respectively.

Cash Equivalents The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

Allowance for Doubtful Accounts Methodology The Company evaluates the collectibility of accounts receivable based on a combination of factors. In circumstances where the Company is aware of a specific customer s inability to meet its financial obligations (e.g., bankruptcy filings, substantial down-grading of credit ratings), a specific reserve for bad debts is recorded against amounts due to reduce the receivable to the amount the Company reasonably believes will be collected. For all other customers, the Company recognizes reserves for bad debts based on the Company s historical experience of bad debt write-offs as a percent of accounts receivable outstanding. If circumstances change (i.e., higher than expected defaults or an unexpected material adverse change in a major customer s ability to meet its financial obligations), the estimates of the recoverability of amounts due the Company could be revised by a material amount.

Inventories Inventories which consist principally of finished goods are stated at the lower of cost (first-in, first-out method) or market. To reduce inventory to a lower of cost or market value, the Company records a reserve for slow-moving and obsolete inventory based on historical experience and monitoring current inventory activity.

Property, Plant and Equipment Property, plant and equipment are stated at cost less accumulated depreciation and amortization. Depreciation expense is computed by the straight-line method for buildings and improvements using

useful lives of 20 to 30 years and using the double declining balance method for machinery and equipment, furniture and fixtures and vehicles using useful lives of 3 to 10 years. Amortization of capitalized leases is included in depreciation expense. Depreciation expense was \$5,357, \$4,308 and \$4,568 for 2008, 2007 and 2006, respectively. Capitalized software is amortized over estimated useful lives of 3 to 5 years using the straight-line method. Amortization expense of capitalized software was \$2,675, \$2,877 and \$2,726 for 2008, 2007 and 2006, respectively.

Stock-Based Compensation The Company adopted SFAS No. 123(R), *Share-Based Payment* (SFAS 123(R)) on January 1, 2006 using the modified prospective method. The adoption resulted in recording a \$361 Cumulative effect of accounting change, net of tax in the Consolidated Statements of Operations for the year

Table of Contents

Lawson Products, Inc.

Notes to Consolidated Financial Statements
(Dollars in thousands, except per share data) (Continued)

ended December 31, 2006. Under SFAS No. 123(R), share based compensation is valued at its fair value at the grant date and the expense is recognized over the vesting period. Fair value is re-measured each reporting period for liability classified awards.

Goodwill and Other Intangibles Goodwill represents the cost of business acquisitions in excess of the fair value of identifiable net tangible and intangible assets acquired. Intangible assets with a finite life are amortized on a straight-line basis over the asset's useful life. Goodwill and other intangible assets with indeterminate lives are assessed for impairment at least annually or more often if triggering events occur.

Income Taxes Deferred tax assets or liabilities reflect temporary differences between amounts of assets and liabilities for financial and tax reporting. Such amounts are adjusted, as appropriate, to reflect changes in tax rates expected to be in effect when the temporary differences reverse. A valuation allowance is established to offset any deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. The determination of the amount of a valuation allowance to be provided on recorded deferred tax assets involves estimates regarding (1) the timing and amount of the reversal of taxable temporary differences, (2) expected future taxable income, and (3) the impact of tax planning strategies. In assessing the need for a valuation allowance, the Company considers all available positive and negative evidence, including past operating results, projections of future taxable income and the feasibility of ongoing tax planning strategies. The projections of future taxable income include a number of estimates and assumptions regarding our volume, pricing and costs. Additionally, valuation allowances related to deferred tax assets can be impacted by changes to tax laws.

Significant judgment is required in determining income tax provisions under SFAS No. 109, *Accounting for Income Taxes* (SFAS No. 109) and in evaluating tax positions. In the normal course of business, the Company and its subsidiaries are examined by various Federal, State and foreign tax authorities. The Company regularly assesses the potential outcomes of these examinations and any future examinations for the current or prior years in determining the adequacy of our provision for income taxes. The Company continually assesses the likelihood and amount of potential adjustments and adjusts the income tax provision, the current tax liability and deferred taxes in the period in which the facts that give rise to a revision become known.

Effective January 1, 2007, the Company adopted Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), which requires that the Company recognize in the financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. In addition, FIN 48 provides guidance on the derecognition, classification, accounting in interim periods and disclosure requirements for uncertain tax positions. As a result of the implementation of FIN 48, the Company recorded at the date of adoption an additional liability of \$1,213 for unrecognized tax benefits relating to uncertain tax positions which was accounted for as a reduction to the January 1, 2007 balance of retained earnings

Earnings Per Share Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect the potential dilution from the exercise or conversion of stock options into common stock.

Foreign Currency The accounts of foreign subsidiaries are measured using the local currency as the functional currency. All balance sheet amounts have been translated into U.S. dollars using the exchange rates in effect at the applicable period end. Income statement amounts have been translated using the average exchange rate for the applicable period. The gains and losses resulting from the changes in exchange rates from the translation of subsidiary accounts in local currency to U.S. dollars have been reported as a component of Accumulated other comprehensive income in the Consolidated Balance Sheets. Foreign currency transaction gains and losses result from the effect of exchange rate changes on transactions denominated in currencies other than the functional currency. These gains and losses are included in the Consolidated Statements of Operations and were immaterial for all years presented.

Use of Estimates Preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates.

Reclassifications Certain amounts related to freight charges billed to customers and the addition of the settlement and related costs line item have been reclassified in the 2007 and 2006 financial statements to conform with the 2008 presentation. The reclassifications did not affect operating income. The following financial statement line items in the Consolidated Statements of Operations were affected by the reclassification for the years ended December 31, 2007 and 2006:

Recent Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The provisions of SFAS 157 are effective as of the beginning of our 2009 fiscal year, as it relates to fair value measurement requirements for nonfinancial assets and liabilities that are not remeasured at fair value on a recurring basis. We do not expect the adoption to have a material impact on our financial statements.

In December 2007, the FASB issued SFAS 141(R), *Business Combinations*. SFAS 141(R) establishes principles and requirements for an acquirer, which improves the relevance, representational faithfulness and comparability of information provided by a reporting entity in its financial reports about business combinations and its effects. SFAS 141(R) is effective prospectively to business combinations as of the beginning of our 2009 fiscal year. We do not expect the adoption to have a material impact on our financial statements.

In December 2007, the FASB issued SFAS 160, *Noncontrolling Interests in Consolidated Financial Statements (an amendment of ARB No. 51)*. SFAS 160 establishes accounting and reporting standards designed to improve the

relevance, comparability and transparency of the financial information provided in a reporting entity's consolidated financial statements. SFAS 160 is effective as of the beginning of our 2009 fiscal year. Currently, we do not expect the adoption to have a material impact on our financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, which is an amendment of FASB Statement No. 133. This statement requires enhanced disclosures about an entity's derivative and hedging activities and thereby improves the transparency of financial reporting. This statement is effective as of the beginning of our 2009 fiscal year. Based on current conditions, we do not expect the adoption of SFAS 161 to have a significant impact on our financial statements.

Note E Goodwill

The Company reviews goodwill annually for impairment as required by SFAS 142, *Accounting for Goodwill and Other Intangible Assets*. Goodwill impairment is deemed to exist if the carrying amount of a reporting unit exceeds its estimated fair value and the carrying amount of the goodwill exceeds its estimated fair value. In the fourth quarter of 2008 the Company determined, based on market prices of comparable businesses and forecasted discounted cash flows, that the goodwill associated with its OEM segment was impaired and recorded a non-cash charge of \$2,251 for the year ended December 31, 2008.

Goodwill by business segment consisted of the following:

	MRO	OEM	Total
Balance at December 31, 2007 and 2006	\$ 25,748	\$ 2,251	\$ 27,999

	\$ 2,400	\$ 1,387	\$ 1,013	\$ 2,400	\$ 1,137	\$ 1,263

Trademarks and tradenames are amortized over 20 years. The non-compete covenant is being amortized over 5 years. Amortization expense, all of which is included in the MRO segment, for these intangible assets was \$250 per year for 2008, 2007 and 2006 and is expected to be \$250 per year for 2009 and 2010 and \$50 per year thereafter until the trademarks and tradenames are fully amortized.

Note G Income Taxes

(Loss) income from continuing operations before income taxes and cumulative effect of accounting change for the years ended December 31, consisted of the following:

The reconciliation between the effective income tax rate and the statutory federal rate for continuing operations was as follows:

	Year Ended December 31,		
	2008	2007	2006
Statutory federal rate	35.0%	35.0%	35.0%

Non-deductible promotion expense			7.7
Other items, net	(2.6)	4.3	(2.4)
Provision for income taxes	(30.7)%	43.5%	45.5%

Income taxes paid for the years ended December 31, 2008, 2007, and 2006 amounted to \$7,008, \$13,958 and \$11,284, respectively.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company also has a \$8,154 capital loss carryforward remaining related to the 2003 sale of the Company's UK MRO business and the closure of its Mexico operations. A valuation allowance is recorded for all of the capital loss carryforward due to the uncertainty of the Company's ability to realize the capital loss against future capital gains prior to expiration in 2008.

Significant components of the Company's deferred tax assets and liabilities as of December 31 were as follows:

	December 31,	
	2008	2007
Deferred tax assets:		
Compensation and benefits	\$ 20,879	\$ 25,075

Net deferred tax assets include the tax impact of items in comprehensive income of \$382 and \$(247) at December 31, 2008 and 2007, respectively.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	December 31,	
	2008	2007
Balance at beginning of year	\$ 923	\$ 4,059
Additions for tax positions of current year	248	
Additions for tax positions of prior years	1,799	1,029
Reductions for tax positions of prior years		(2,010)
Settlements		(2,155)
Balance at end of year	\$ 2,970	\$ 923

The recognition of the \$2,970 unrecognized tax benefits would have a favorable effect on the effective tax rate. Due to the uncertainty of both timing and resolution of income tax examinations, the Company is unable to determine whether any amounts included in the December 31, 2008 balance of unrecognized tax benefits represent tax positions that could significantly change during the next twelve months.

The Company recognizes interest and penalties related to unrecognized tax benefits as a component of income tax expense. At December 31, 2008, the Company had accrued \$1,793 for the potential payment of interest and penalties related to unrecognized tax benefits.

The Company and its subsidiaries are subject to U.S. federal income tax as well as income tax of multiple state and Canadian jurisdictions. As of December 31, 2008, the Company is subject to income tax examinations for the tax years 2000 through 2007.

Note I Revolving Line of Credit

In November 2008 the Company entered into a First Amended and Restated Credit Agreement (the Credit Facility) with Bank of America, N.A. The Credit Facility provides for a total commitment of \$75 million in the form of revolving loans and letters of credit and matures on November 7, 2011. The interest rate for the Credit Facility bears interest at either, LIBOR plus 0.625%, or the prime rate minus 1.0%, as elected by the Company. The

interest rate may be adjusted based on the Company's ratio of consolidated total debt to EBITDA calculated on the basis of the Company's most recent annual or quarterly financial statements. The Credit Facility also specifies unused commitment fees that are assessed based on the average unused balance and the Company's ratio of total debt to EBITDA. The Credit Facility is secured by a pledge of 65% of the capital stock of the Company's subsidiary, Lawson Products, Inc. (Ontario) (Lawson Canada). The Credit Facility specifies certain financial covenants, including a fixed charge coverage and total debt to equity calculation which must be met as of the end of each fiscal quarter. At December 31, 2008 the Company was in compliance with all covenants.

The Company had \$7,700 outstanding under the revolving line at December 31, 2008 and paid interest of \$535, \$910 and \$150 in 2008, 2007 and 2006, respectively. The weighted average interest rate charged on the outstanding balance of the Credit Facility was 3.2% for the year ended December 31, 2008.

In March 2009 the Company amended the Credit Facility (the Amended Credit Facility), reducing the amount of the facility, adjusting the covenants and providing additional security to Bank of America, N.A. The Amended Credit Facility provides for a total commitment of \$55.0 million. The maturity date remains November 7, 2011. The interest rate is LIBOR plus a margin of 2.0% to 3.5%, based on the ratio of total debt to EBITDA. The Amended Credit Facility contains covenants for adjusted EBITDA, as defined in the agreement, for each quarter through September 30, 2009. Commencing with the quarter ending December 31, 2009, additional covenants will be in place, including fixed charge coverage, total debt to equity and minimum net worth, as defined in the credit agreement. The Amended Credit Facility places a restriction on quarterly dividends of \$260, or \$1,040 on an annual basis. The Amended Credit Facility is secured by substantially all of the assets of the Company, excluding real property and the capital stock of the Company's subsidiaries, except for the stock of Lawson Canada. The Company paid an amendment fee of \$100.

Note J Reserve for Severance

Severance charges related to management realignment and reorganization of \$5,378, \$10,886 and \$1,196 were recorded in 2008, 2007 and 2006, respectively. The severance costs are primarily related to the MRO segment. The table below shows the changes in the Company's reserve for severance and related payments.

	Year Ended December 31,		
	2008	2007	2006
Beginning balance	\$ 7,058	\$ 962	\$ 216
Charged to earnings	5,378	10,886	1,196
Cash paid	(6,264)	(4,670)	(297)
Adjustment to reserves	(61)	(120)	(153)
Ending balance	\$ 6,111	\$ 7,058	\$ 962

Accrued severance charges were included in the line items of the Consolidated Balance Sheets at December 31, 2008 and 2007 as follows:

	December 31,	
	2008	2007
Accrued severance included in:		
Accrued expenses and other liabilities	\$ 4,889	\$ 4,344
Noncurrent other	1,222	2,714
Total accrued severance	\$ 6,111	\$ 7,058

The Company anticipates the remaining benefits outstanding as of December 31, 2008 will be substantially paid out by the end of 2010.

Table of Contents**Lawson Products, Inc.****Notes to Consolidated Financial Statements
(Dollars in thousands, except per share data) (Continued)****Note K Retirement and Security Bonus Plans**

The Company has a retirement plan with a profit sharing feature for certain office and warehouse personnel. The amounts of the company's annual contributions are determined by the board of directors subject to limitations based upon operating results. Provisions for the profit sharing plan were \$2,216, \$3,997 and \$4,152 for the years ended December 31, 2008, 2007 and 2006, respectively.

The Company provides 401(k) defined contribution benefit plans to give employees a pre-tax investment vehicle to save for retirement. Matching funds contributed by the Company's subsidiaries amounted to \$169, \$160 and \$154 in the years ended December 31, 2008, 2007 and 2006.

The Company has a security bonus plan for the benefit of its independent sales agents, under the terms of which participants are credited with a percentage of their yearly earnings. The aggregate amounts credited to participants accounts vest 25% after five years and an additional 5% vests each year thereafter. For financial reporting purposes, amounts are charged to operations over the vesting period. Provisions for the security bonus plan were \$2,641, \$2,093 and \$3,364 for the years ended December 31, 2008, 2007 and 2006, respectively.

Note L Commitments and Contingencies***Lease Commitments***

Total rental expense for the years ended December 31, 2008, 2007 and 2006 amounted to \$3,479, \$4,126 and \$4,355, respectively. The Company's future minimum lease commitments, principally for facilities and equipment, as of December 31, 2008, were as follows:

Year Ended December 31,	Operating Leases	Capital Leases
2009	\$ 2,396	\$ 1,133
2010	2,055	933
2011	1,286	701

2013 and thereafter		
Total	\$ 6,446	\$ 2,904

Litigation

In December 2005, the FBI executed a search warrant for records at the Company's offices and informed the Company that it was conducting an investigation as to whether any of the Company's representatives improperly provided gifts or awards to purchasing agents (including government purchasing agents) through the Company's customer loyalty

programs (the investigation). The U.S. Attorney s Office for the Northern District of Illinois (the U.S. Attorney s Office) subsequently issued a subpoena for documents in connection with the investigation.

In April 2007, thirteen people, including seven former sales agents of the Company, were indicted on federal criminal charges, including mail fraud, in connection with the investigation. These indictments alleged that, under the Company s customer loyalty programs, sales agents would provide cash gift certificates to individuals purchasing Company merchandise on behalf of their employers as a way to increase their commissions and prices paid by customers. All of the cases involved commissioned sales agents of the Company. All seven of the indicted former sales agents have entered guilty pleas to federal criminal charges.

On August 11, 2008, in connection with the investigation, the Company entered into a Deferred Prosecution Agreement (the DPA) with the U.S. Attorney s Office. An additional three people, including a former sales manager and a former sales agent were indicted on August 11, 2008 and have since pled guilty. Under the terms of the DPA, the U.S. Attorney s Office filed a one count criminal Information charging the Company with mail fraud in

the U.S. District Court for the Northern District of Illinois, but would defer prosecution of such charge for three years. If the Company abides by the terms and conditions of the DPA, the U.S. Attorney's Office will seek dismissal with prejudice of the Information within 30 days of the expiration of the three-year period.

Pursuant to the DPA, the Company agreed to a \$30,000 penalty, which includes \$806 of restitution, and recorded a charge of \$30,000 in the second quarter of 2008. The penalty is payable in three equal installments. The first \$10,000 payment was made in August 2008. The remaining \$10,000 payments are due in August 2009 and in August 2010. If a controlling interest in the Company is sold, any unpaid amounts shall be accelerated and due at the closing of the sale.

Other

In November 2008, the Company became aware that it had not properly withheld state income tax from a small number of employees in approximately 15 states. The Company may have exposure for penalties and interest for state income taxes withholdings and payroll tax returns, however, since the amount is subject to further analysis and interpretations by state taxing jurisdictions, the Company is unable to reasonably estimate the amount of the exposure at this time.

Note M Stock Performance Plan

The Stock Performance Plan (the Plan), provides for the issuance of incentive compensation to non-employee directors, officers and key employees including in the form of stock performance rights (SPRs). The Plan is administered by the Compensation Committee of the Board of Directors.

Stock Performance Rights

The Company grants SPRs pursuant to the Plan to selected employees and outside directors. The SPRs have a ten-year life and vest ratably over three years beginning on the first anniversary of the date of the grant. The SPRs entitle the recipient to receive a cash payment equal to the excess of the market value of the Company's common stock over the SPR exercise price when the SPRs are surrendered.

Employees and non-employee directors who are retirement eligible, defined as age 65 or older, are permitted to retain their awards after retirement and exercise them during the remaining contractual life. Grants of SPRs, with the retirement eligible provision, are recognized as expense on the grant date.

As required by SFAS 123(R), the SPRs outstanding have been remeasured at fair value using the Black-Scholes valuation model. This model requires the input of subjective assumptions that will usually have a significant impact on the fair value estimate. The weighted-average estimated value of SPRs outstanding as of December 31, 2008 was \$6.12 per SPR using the Black-Scholes valuation model with the following assumptions:

Expected volatility	51.0% to 88.8%
Risk-free interest rate	0.4% to 1.6%

Expected term (in years)	1.0 to 5.4
Expected annual dividend	\$0.80

The expected volatility was based on the historic volatility of the Company's stock price commiserate with the expected life of the SPR. The risk-free rate of return reflects the weighted average interest rate offered for zero coupon treasury bonds over the expected life of the SPR. The expected life represents the period of time that options granted are expected to be outstanding and was calculated using the simplified method prescribed by the SEC Staff Accounting Bulletin No. 107. The estimated annual dividend was based on the recent dividend payout trend.

Compensation (income) expense, included in selling, general and administrative expenses for SPRs was \$(843), \$(427) and \$2,482 for the years ended December 31, 2008, 2007 and 2006, respectively. Cash paid out due to the exercise of SPRs was \$49, \$51 and \$1,236 for the years ended December 31, 2008, 2007 and 2006, respectively.

Table of Contents**Lawson Products, Inc.****Notes to Consolidated Financial Statements
(Dollars in thousands, except per share data) (Continued)**

Activity related to the Company's SPRs during the year ended 2008 was as follows:

	Number of SPRs	Average Exercise Price
Outstanding on December 31, 2007	209,250	\$ 34.17
Granted	151,500	25.82
Exercised	(28,250)	27.10

Outstanding on December 31, 2008	307,600	31.40
Exercisable on December 31, 2008	180,270	\$ 33.95

The SPRs outstanding had no aggregate intrinsic value as of December 31, 2008 since all exercise prices exceeded the market price of the Company's stock at that date. Unrecognized compensation cost related to non-vested SPRs was \$590 at December 31, 2008, which will be recognized over a weighted average period of 1.9 years. During the year ended December 31, 2008, 39,467 SPRs vested. At December 31, 2008, the weighted average remaining contractual term was 7.2 years for all outstanding SPRs and 5.9 years for the SPRs that are exercisable.

Stock Options

As of December 31, 2008 and 2007, the Company had 5,000 fully vested outstanding stock options with an average exercise price of \$23.11 and an immaterial aggregate intrinsic value. The options have a weighted average remaining contractual term of 1.3 years. There was no compensation expense related to stock options in 2008, 2007 or 2006. The Company's stock option plan expired in 2006.

The effect of future stock option exercises for the year ended December 31, 2008 would have been anti-dilutive and, therefore, was excluded from the computation of diluted earnings per share.

Note O Segment Reporting

The Company has two reportable segments: MRO and OEM. The Company's MRO segment is a distributor and marketer of systems, services and products to the industrial, commercial, institutional, and governmental maintenance repair and operations marketplace. The Company's OEM segment manufactures, sells and distributes production and specialized component parts to the original equipment marketplace. The Company's two reportable segments are distinguished by the nature of products distributed and sold, types of customers and manner of servicing them. The Company evaluates performance and allocates resources to reportable segments primarily based on operating income.

Note P Discontinued Operations

The Company closed its operations in Mexico in 2007. Accordingly, the Consolidated Balance Sheets and Consolidated Statements of Operations reflect the assets and liabilities and operating results as discontinued operations.

Note Q Loss on Sale of Equipment

In 2006, the Company incurred a loss of \$0.8 million (\$0.5 million, net of tax) on the sale of equipment related to the Company's decision to outsource the manufacturing of a product line in the Company's OEM business. Net book value for the disposed equipment was approximately \$1.0 million.

Note R Summary of Unaudited Quarterly Results of Operations

Amounts related to freight charges billed to customers that were originally recorded as a reduction to selling, general and administrative expenses have been reclassified to net sales. This reclassification had no effect on net income (loss). A reconciliation of the amounts previously reported to the reclassified amounts for the first three quarters of 2008 and the four quarters of 2007 are as follows:
