**Item 2. Acquisition or Disposition of Assets**

On December 12, 2002, New Plan Excel Realty Trust, Inc. (the "Company") closed on 57 community and neighborhood shopping centers from Equity Investment Group ("EIG"), a private retail focused REIT. The acquisition of one additional shopping center from EIG is expected to close in January 2003.

The aggregate purchase price for the acquisition was approximately \$437 million, consisting of the assumption of approximately \$149 million of outstanding indebtedness, the issuance of approximately \$25 million of units in a partnership controlled by the Company and approximately \$263 million in cash. The cash component of the acquisition was financed with proceeds from the sale of four factory outlet centers to Chelsea Property Group, which closed on December 19, 2002 and generated gross proceeds of approximately \$193 million, and through borrowings under the Company's existing credit facility with Fleet National Bank as lead agent.

### 2. Significant Accounting Policies

#### Revenue Recognition

Rental income is recognized on a straight-line basis over the terms of the respective lease agreements. Certain tenants are also required to pay overage rents based on sales above a stated base amount during the lease year. Overage rents are recognized as revenues based on actual reported sales for each tenant less the applicable stated base amount.

#### Recoveries

Certain operating expenses, including real estate taxes and utilities, incurred in the operation of the investment properties are reimbursable by the tenants. The reimbursable amounts (expense recoveries) not fixed by the lease are either adjusted periodically on a prospective basis or adjusted annually based on actual expenses incurred. Reimbursements are recognized as revenue in the period in which the applicable costs are incurred. Miscellaneous income consists primarily of short-term rentals in the retail properties.

Tenant credit losses are provided when they become known.

#### Use of Estimates

The preparation of the combined statements of revenue and certain expenses in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### 3. Tenant Leases

The EIG Realty Portfolio leases retail space to tenants under noncancelable lease agreements with terms ranging from 1 to 25 years. The leases generally provide for fixed annual minimum rents, contingent rents based on sales volume and reimbursement of certain operating expenses. Contingent rents based on sales volume, approximated \$763,000 for the year ended December 31, 2001 and \$548,000 (unaudited) for the nine months ended September 30, 2002 for the Properties. Approximate
