QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
^x 1934

For the quarterly period ended March 26, 2016

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission file number 0-19882

KOPIN CORPORATION
(Exact name of registrant as specified in its charter)

Delaware 04-2833935
State or other jurisdiction of (I.R.S. Employer
incorporation or organization Identification No.)

125 North Drive, Westborough, MA 01581-3335
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code: (508) 870-5959

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each issuer's classes of common stock, as of the latest practicable date.

Class Outstanding as of
April 29, 2016

KOPIN CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements as of March 26, 2016 include the accounts of Kopin Corporation, its wholly-owned subsidiaries, Kowon Technology Co., Ltd. (Kowon), a majority owned (93%) subsidiary located in Korea, and eMDT America Inc. (eMDT), a majority owned (80%) subsidiary located in the U.S.A. (collectively, the Company). In the fourth quarter of 2015, the Company increased its investment in Kopin Software Ltd. (KSL) (formerly Intoware Ltd.) from 58% to 100%. Ownership interests of Kowon, KSL and eMDT not attributable to the Company are referred to as noncontrolling interests. All intercompany transactions and balances have been eliminated. The condensed consolidated financial statements for the three months ended March 26, 2016 and March 28, 2015 are unaudited and include all adjustments which, in the opinion of management, are necessary to present fairly the results of operations for the periods then ended. These condensed consolidated financial statements should be read in conjunction with the Company's financial statements and notes thereto, included in the Company's Annual Report on Form 10-K for the year ended December 26, 2015.

The Company ceased its production activities at its Kowon facility in 2013 and commenced offering the facility for sale. In February 2016, the Company entered into an agreement to sell the Kowon Facility for 9.5 billion KRW (approximately \$8.1 million as of March 26, 2016). Upon entering into the Purchase & Sale agreement, (P&S), the Company received a 10% deposit (approximately \$800,000 as of March 26, 2016), which is included in "Other accrued liabilities" on our Condensed Consolidated Balance Sheets. The P&S allows the buyer to cancel the transaction under certain conditions.

The Company believes the facility will be sold within the next 12 months and has classified the facility assets as held for sale.

The results of the Company's operations for any interim period are not necessarily indicative of the results of the Company's operations for any other interim period or for a full fiscal year.

During the three months ended March 26, 2016, the change in the Company's accumulated other comprehensive income was net of \$0.7 million foreign currency translation adjustments and \$0.3 million unrealized holding gains on marketable securities.

Table of Contents**2. CASH AND EQUIVALENTS AND MARKETABLE SECURITIES**

The Company considers all highly liquid, short-term debt instruments with original maturities of three months or less to be cash equivalents.

Marketable debt securities consist primarily of certificates of deposit, medium-term corporate debt, and U.S. government and agency backed securities. The Company classifies these marketable debt securities as available-for-sale in "Marketable Debt Securities". The Company records the amortization of premium and accretion of discount on marketable debt securities in the results of operations.

The Company uses the specific identification method as a basis for determining cost and calculating realized gains and losses with respect to marketable debt securities. The gross gains and losses realized related to sales and maturities of marketable debt securities were not material during the three months ended March 26, 2016 and the year ended December 26, 2015.

Investments in available-for-sale marketable debt securities are as follows at March 26, 2016 and December 26, 2015:

	Amortized Cost		Unrealized Gains		Unrealized Losses		Fair Value	
	2016	2015	2016	2015	2016	2015	2016	2015
U.S. government and agency backed securities	\$46,664,124	\$46,586,224	\$61,467	\$—	\$(121,561)		\$46,725,591	\$46,464,663
Corporate debt and certificates of deposit	16,597,702	14,534,247	—	—	(74,980)	(56,019)	16,522,722	14,478,228
Total	\$63,261,826	\$61,120,471	\$61,467	\$—	\$(74,980)	\$(177,580)	\$63,248,313	\$60,942,891

The contractual maturity of the Company's marketable debt securities is as follows at March 26, 2016:

	Less than One year	One to Five years	Greater than Five years	Total
U.S. government and agency backed securities	\$17,594,525	\$24,333,433	\$4,797,633	\$46,725,591
Corporate debt and certificates of deposit	14,136,068	2,386,654	—	16,522,722
Total	\$31,730,593	\$26,720,087	\$4,797,633	\$63,248,313

The Company conducts a review of its marketable debt securities on a quarterly basis for the presence of other-than-temporary impairment (OTTI). The Company assesses whether OTTI is present when the fair value of a debt security is less than its amortized cost basis at the balance sheet date. Under these circumstances OTTI is considered to have occurred (1) if the Company intends to sell the security before recovery of its amortized cost basis; (2) if it is "more likely than not" the Company will be required to sell the security before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not sufficient to recover the entire amortized cost basis.

The Company further estimates the amount of OTTI resulting from a decline in the credit worthiness of the issuer (credit-related OTTI) and the amount of non credit-related OTTI. Non credit-related OTTI can be caused by such factors as market illiquidity. Credit-related OTTI is recognized in earnings while non credit-related OTTI on securities not expected to be sold is recognized in other comprehensive income (loss). The Company did not record an OTTI for the three months ended March 26, 2016 and March 28, 2015.

Table of Contents**3. FAIR VALUE MEASUREMENTS**

Financial instruments are categorized as Level 1, Level 2 or Level 3 based upon the method by which their fair value is computed. An investment is categorized as Level 1 when its fair value is based on unadjusted quoted prices in active markets for identical assets that the Company has the ability to access at the measurement date. An investment is categorized as Level 2 if its fair market value is based on quoted market prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, based on observable inputs such as interest rates, yield curves, or derived from or corroborated by observable market data by correlation or other means. An investment is categorized as Level 3 if its fair value is based on assumptions developed by the Company about what a market participant would use in pricing the assets.

The following table details the fair value measurements of the Company's financial assets:

	Total	Fair Value Measurement March 26, 2016 Using:		
		Level 1	Level 2	Level 3
Cash and Equivalents	\$27,635,331	\$27,635,331	\$—	\$ —
U.S. Government Securities	46,725,591	15,547,936	31,177,655	—
Corporate Debt	5,027,952	—	5,027,952	—
Certificates of Deposit	11,494,770	—	11,494,770	—
GCS Holdings	389,715	389,715	—	—
	\$91,273,359	\$43,572,982	\$47,700,377	\$ —

	Total	Fair Value Measurement December 26, 2015 Using:		
		Level 1	Level 2	Level 3
Cash and Equivalents	\$19,767,889	\$19,767,889	\$—	\$ —
U.S. Government Securities	46,464,663	16,381,152	30,083,511	—
Corporate Debt	6,886,495	—	6,886,495	—
Certificates of Deposit	7,591,733	—	7,591,733	—
GCS Holdings	232,037	232,037	—	—
	\$80,942,817	\$36,381,078	\$44,561,739	\$ —

The corporate debt consists of floating rate notes with a maturity that is over multiple years but has interest rates which are reset every three months based on the then-current three month London Interbank Offering Rate (three month Libor). The Company validates the fair market values of the financial instruments above by using discounted cash flow models, obtaining independent pricing of the securities or through the use of a model which incorporates the three month Libor, the credit default swap rate of the issuer and the bid and ask price spread of the same or similar investments which are traded on several markets.

The carrying amounts of cash and equivalents, accounts receivable, accounts payable and accrued liabilities approximate fair value because of their short-term nature. If accrued liabilities were carried at fair value, these would be classified as Level 2 in the fair value hierarchy.

4. INVENTORY

Inventory is stated at the lower of cost (determined on the first-in, first-out) or market and consists of the following at March 26, 2016 and December 26, 2015:

	March 26, 2016	December 26, 2015
Raw materials	\$1,036,421	\$ 844,475
Work-in-process	1,411,829	1,281,891
Finished goods	257,607	386,107
	\$2,705,857	\$ 2,512,473

Table of Contents**5. NET LOSS PER SHARE**

Basic net loss per share is computed using the weighted average number of shares of common stock outstanding during the period less any non-vested restricted shares. Diluted earnings per common share, if applicable, is calculated using weighted average shares outstanding and contingently issuable shares, less weighted average shares reacquired during the period. The net outstanding shares are adjusted for the dilutive effect of shares issuable upon the assumed conversion of the Company's common stock equivalents, which consist of outstanding stock options and non-vested restricted stock units.

Weighted average common shares outstanding used to calculate basic and diluted earnings per share are as follows:

Three Months Ended	
March 26,	March 28,
2016	2015

Weighted average common shares outstanding-basic and diluted	63,978,048	63,083,652
--	------------	------------

The following were not included in weighted average common shares outstanding-diluted because they are anti-dilutive or performance or market conditions had not been met at the end of the period:

	Three months ended	
	March 26,	March 28,
	2016	2015
Non-vested restricted common stock	2,694,016	3,342,111
Stock options	—	130,000
Total	2,694,016	3,472,111

For the three month period ended March 28, 2015 warrants to purchase 148,000 shares of the Company's common stock for \$3.49 per share were not included in weighted average common shares outstanding-diluted. These warrants were fully exercised in 2015.

6. STOCK-BASED COMPENSATION

The fair value of non-vested restricted common stock awards is generally the market value of the Company's common stock on the date of grant. The non-vested restricted common stock awards require the employee to fulfill certain obligations, including remaining employed by the Company for one, two or four years (the vesting period) and in certain cases also require meeting either performance criteria or the Company's stock achieving a certain price. For non-vested restricted common stock awards which solely require the recipient to remain employed with the Company, the stock compensation expense is amortized over the anticipated service period. For non-vested restricted common stock awards which require the achievement of performance criteria, the Company reviews the probability of achieving the performance goals on a periodic basis. If the Company determines that it is probable that the performance criteria will be achieved, the amount of compensation cost derived for the performance goal is amortized over the anticipated service period. If the performance criteria are not met, no compensation cost is recognized and any previously recognized compensation cost is reversed. The Company recognizes compensation costs on a straight-line basis over the requisite service period for time-vested awards.

On February 24, 2016, the Company granted Dr. Fan 87,500 shares of restricted stock, 50% of which will vest on December 10, 2016 and 50% will vest on December 10, 2017.

Non-Vested Restricted Common Stock

A summary of the activity for non-vested restricted common stock awards as of March 26, 2016 and changes during the three month period then ended is presented below:

Table of Contents

	Shares	Weighted Average Grant Fair Value
Balance, December 26, 2015	2,192,016	\$ 3.82
Granted	504,500	1.84
Forfeited	—	—
Vested	(2,500)	1.84
Balance, March 26, 2016	2,694,016	\$ 3.45

Stock-Based Compensation

The following table summarizes stock-based compensation expense within each of the categories below as it relates to non-vested restricted common stock awards for the three months ended March 26, 2016 and March 28, 2015 (no tax benefits were recognized):

	Three Months Ended	
	March 26, 2016	March 28, 2015
Cost of component revenues	\$ 142,534	\$ 199,239
Research and development	116,895	234,406
Selling, general and administrative	(202,975)	563,819
Total	\$ 56,454	\$ 997,464

The \$0.2 million benefit in selling, general and administrative expense is primarily driven by the mark to market accounting of stock based compensation arrangements classified and recorded as liabilities.

Unrecognized compensation expense for non-vested restricted common stock as of March 26, 2016 totaled \$4.7 million and is expected to be recognized over a weighted average period of two years.

7. OTHER ASSETS AND NOTE RECEIVABLE

At December 26, 2015, the Company had recorded a \$15.0 million note receivable resulting from the sale of its III-V product line and its investment in KTC, which was received in January, 2016.

On February 25, 2015, the Company acquired approximately 251,000 shares of Vuzix Corporation (Vuzix) common stock through a cashless exercise of warrants. The Company received the warrants in August 2013 as part of a restructuring of debt owed by Vuzix to the Company. Upon receipt of the warrants, the Company should have recorded the value of the warrant of approximately \$352,000 in its consolidated financial statements. Subsequently, the Company should have marked to market the warrants at the end of each reporting period. Had the Company recorded the warrants in its consolidated financial statements and marked to market the warrants as of December 28, 2013 and December 27, 2014, the Company would have recorded gains in its statement of operations of approximately \$646,000 and \$171,000, respectively. In the first quarter of 2015, the Company recorded the warrants in its consolidated financial statements and as a result recorded a gain of approximately \$1.3 million with \$817,000 attributed to prior periods. The value of the warrants as of August 2013, December 28, 2013 and December 27, 2014 was determined using the Black-Scholes pricing model. The Company does not believe the unrecorded gains were material to the consolidated financial statements as the loss from operations for the fiscal years ended December 28, 2013 and December 27, 2014 were \$35.9 million and \$28.5 million, respectively.

Table of Contents

8. ACCRUED WARRANTY

The Company typically warrants its products against defect for 12 months. A provision for estimated future costs and estimated returns for credit relating to such warranty is recorded in the period when product is shipped and revenue recognized, and is updated as additional information becomes available. The Company's estimate of future costs to satisfy warranty obligations is based primarily on historical warranty expense experienced and a provision for potential future product failures. Changes in the accrued warranty for the three months ended March 26, 2016 are as follows:

Balance, December 26, 2015	\$518,000
Additions	267,000
Claim and reversals	(269,000)
Balance, March 26, 2016	\$516,000

9. INCOME TAXES

The Company's tax provision of approximately \$141,000 for the three month period ended March 26, 2016 represents the net movement in estimated foreign withholding on anticipated future remitted earnings of an international subsidiary and state taxes. The Company's tax provision of approximately \$12,500 for the three month period ended March 28, 2015 represents state taxes.

As of March 26, 2016, the Company has available for tax purposes U.S. federal NOLs of approximately \$89 million expiring through 2035. The Company has recognized a full valuation allowance on its domestic and certain foreign net deferred tax assets due to the uncertainty of realization of such assets. The Company has not historically recorded, nor does it intend to record the tax benefits from stock awards until realized. Unrecorded benefits from stock awards approximate \$10 million.

The Company's income tax returns have not been examined by the Internal Revenue Service and are subject to examination for all years since 2001. State income tax returns are generally subject to examination for a period of 3 to 5 years after filing of the respective return. The state impact of any federal changes remains subject to examination by various states for a period of up to one year after formal notification to the states.

10. SEGMENTS AND GEOGRAPHICAL INFORMATION

The Company's chief operating decision maker is its Chief Executive Officer. The Company has determined it has two reportable segments, FDD, the manufacturer of its reflective display products for test and simulation products, and Kopin, which is comprised of Kopin Corporation, Kowon, Kopin Software Ltd. and eMDT. The following table presents the Company's reportable segment results (in thousands):

	Three Months Ended March 26, 2016		
	Kopin	FDD	Total
Revenues	\$5,148	\$971	\$6,119
Net loss attributable to the controlling interest	(6,571)	(346)	(6,917)
Total Assets	99,811	1,512	101,323
Long lived assets from continuing operations	2,695	18	2,713
Property and Plant held for sale	861	—	861
	Three Months Ended March 28, 2015		
	Kopin	FDD	Total
Revenues	\$7,586	\$999	\$8,585
Net loss attributable to the controlling interest	(3,373)	(465)	(3,838)
Total assets	117,684	1,523	119,207
Long-lived assets from continuing operations	4,067	180	4,247

Table of Contents

The total assets of Kopin is net of \$6.1 million and \$5.2 million in intercompany loans to FDD as of March 26, 2016 and March 28, 2015, respectively.

During the three month periods ended March 26, 2016 and March 28, 2015, the Company derived its sales from the following geographies (as a percentage of net revenues):

	Three Months		
	Ended		
	March 26,	March 28,	
	2016	2015	
United States	29 %	74 %	
Others	— %	2 %	
Americas	29 %	76 %	
Asia-Pacific	51 %	16 %	
Europe	20 %	8 %	
Total Revenues	100 %	100 %	

11. LITIGATION

The Company may engage in legal proceedings arising in the ordinary course of business. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of such matters and our business, financial condition, results of operations or cash flows could be affected in any particular period.

Table of Contents

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This Quarterly Report on Form 10-Q and other reports we have filed with the Securities and Exchange Commission contain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995, including, without limitation, statements made relating to our expectation that we will continue to pursue other U.S. government development contracts for applications that relate to our commercial product applications; our expectation that we will prosecute and defend our proprietary technology aggressively; our belief that it is important to retain personnel with experience and expertise relevant to our business; our belief that our products are targeted towards the Wearable technology market that is still developing, and our competitive strength is creating new technologies; our belief that it is important to invest in research and development to achieve profitability even during periods when we are not profitable; our belief that we are a leading developer and manufacturer of advanced miniature displays; our belief that our products enable our customers to develop and market an improved generation of products; our belief that the technical nature of our products and markets demands a commitment to close relationships with our customers; our belief that our wearable industrial reference design will provide for increased worker productivity, safety and improved manufacturing quality; our belief that our Wearable technology will be embraced by consumers and commercial users and our ability to develop and expand our Wearable technologies and to market and license our Wearable technologies will be important for our revenue growth and ability to achieve profitability and positive cash flow; the impact of the timing of development of the market segment for our wearable computing products on our ability to grow revenues; our expectation that we will incur significant development and marketing costs in 2016 to commercialize our Wearable technologies; our statement that we may make equity investments in companies; our expectation that the cash and marketable debt securities held by Kowon will eventually be remitted back to the U.S.; our expectation that the U.S. government will significantly reduce funding for programs through which we sell high margin military products; our expectation that orders for our products for use in thermal weapon sights will decline for the remainder of 2016; our expectation that customers that purchase our products for Wearable applications will launch products in 2016; our expectation that orders for our products for use in DSC applications will decline for the remainder of 2016; our expectation that sales of our products for use in 3D metrology applications will increase in 2016 as compared to 2015; our belief that a strengthening of the U.S. dollar could increase the price of our products in foreign markets; the impact of new regulations relating to conflict minerals on customer demands and increased costs related to compliance with such regulations; our belief that our future success will depend primarily upon the technical expertise, creative skills and management abilities of our officers and key employees rather than on patent ownership; our belief that our extensive portfolio of patents, trade secrets and non-patented know-how provides us with a competitive advantage in the Wearable technologies market; our belief that our ability to develop innovative products enhances our opportunity to grow within our Wearable technology market; our belief that continued introduction of new products in our target markets is essential to our growth; our expectation that our display products will benefit from further general technological advances in the design and production of integrated circuits and active matrix LCDs, resulting in further improvements in resolution and miniaturization; our belief that our manufacturing process offers greater miniaturization, reduced cost, higher pixel density, full color capability and lower power consumption compared to conventional active matrix LCD manufacturing approaches; our expectation not to pay cash dividends for the foreseeable future and to retain earnings for the development of our businesses; our expectation that we will expend between \$2.0 million and \$3.0 million on capital expenditures over the next twelve months; our expectation that competition will increase; our belief that small form factor displays will be a critical component in the development of advanced wireless communications systems; our belief that wireless handset makers are looking to create products that complement or eventually replace wireless handsets; our belief that general technological advances in the design and fabrication of integrated circuits, LCD technology and LCD manufacturing processes will allow us to continue to enhance our display product manufacturing process; our belief that continued introduction of new products in our Wearable technology market is essential to our growth; our belief that our available cash resources will support our operations and capital needs for at least the next twelve months; our expectation that we will have taxes based on federal alternative minimum tax rules and on our foreign operations in 2016; our expectation

that we will have a state tax provision in 2016; our expectation that the adoption of certain accounting standards will not have a material impact on our financial position or results of operations; our belief that our business is not disproportionately affected by climate change regulations; our belief that our operations have not been materially affected by inflation; and our belief that the effect, if any, of reasonably possible near-term changes in interest rates on our financial position, results of operations, and cash flows should not be material. These forward-looking statements are based on current expectations, estimates, forecasts and projections about the industries in which we operate, management's beliefs, and assumptions made by management. In addition, other written or oral statements, which constitute forward-looking statements, may be made by or on behalf of us. Words such as "expects", "anticipates", "intends", "plans", "believes", "could", "seeks", "estimates", and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements, whether as a result of new information, future events or otherwise. Factors that could cause or contribute to such

Table of Contents

differences in outcomes and results include, but are not limited to, those discussed below in Item 1A and those set forth in our other periodic filings filed with the Securities and Exchange Commission. Except as required by law, we do not intend to update any forward-looking statements even if new information becomes available or other events occur in the future.

Critical Accounting Policies

Management's discussion and analysis of our financial condition and results of operations are based upon our unaudited condensed consolidated financial statements. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. We continually evaluate our estimates used in the preparation of our financial statements, including those related to revenue recognition under the percentage of completion method, bad debts, inventories, warranty reserves, investment valuations, valuation of stock compensation awards and recoverability of deferred tax assets. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about carrying values of assets and liabilities that are not apparent from other sources. Actual results will most likely differ from these estimates. Further detail regarding our critical accounting policies can be found in "Item 7. Management Discussion and Analysis of Financial Condition and Results of Operations" included in our Annual Report on Form 10-K for the year ended December 26, 2015.

Business Matters

We were incorporated in Delaware in 1984 and are a leading inventor, developer, manufacturer and seller of Wearable technologies which include components and systems.

Kopin Wearable technology includes component technologies which can be integrated to create products, and proprietary headset systems which use voice as the primary user interface and through the use of wireless technologies can contact other user devices in close proximity or information from the cloud.

Components

The components we offer for sale primarily consist of our displays, backlights, ASICs and optical lenses. In 2016, we also anticipate offering our proprietary noise cancellation chip which we refer to as "Whisper Chip™".

Our principal display products are miniature high density color or monochrome Active Matrix Liquid Crystal Displays (AMLCDs) with resolutions which range from approximately 320 x 240 resolution to 2048 x 2048 resolution, sold in either a transmissive or reflective format. We sell our displays individually or in combination with our other components assembled in a unit. For example, we sell a module unit which includes a single display, backlight and optics in a plastic housing, a binocular display module unit which includes two displays, backlights and optics in a plastic housing or a Higher-Level Assembly (HLA) which contains a display, light emitting diode based illumination, optics, and electronics in a sealed housing, primarily for military applications.

Our transmissive display products, which we refer to as CyberDisplay™ products, utilize high quality, single crystal silicon-the same high quality silicon used in conventional integrated circuits. This single crystal silicon is not grown on glass; rather, it is first formed on a silicon wafer and patterned into an integrated circuit (including the active matrix, driver circuitry and other logic circuits) in an integrated circuit foundry. The silicon wafer is then sent to our facilities and the integrated circuit is lifted off as a thin film and transferred to glass using our proprietary Wafer™ Engineering technology, so that the transferred layer is a fully functional active matrix integrated circuit which now resides on a transparent substrate.

Our reflective LCOS displays products are miniature high density dual mode color sequential/monochrome reflective micro displays with resolutions which range from approximately 1280 x 720 pixels (720P) resolution to 2048 x 1536 pixels (QXGA) resolution. These displays are manufactured at our facility in Scotland, U.K. Our reflective displays are based on a proprietary, very high-speed, ferroelectric liquid crystal on silicon (FLCOS) platform. Our digital software and logic based drive electronics combined with the very fast switching binary liquid crystal enables our micro display to process images purely digitally and create red, green and blue gray scale in the time domain. This architecture has major advantages in visual performance over other liquid crystal, organic light-emitting diode and MEMS based technologies: precisely controlled full color or monochrome gray scale is achieved on a matrix of

undivided high fill factor pixels, motion artifacts are reduced to an insignificant level and there are no sub-pixels, no moving mirrors and no analog conversions to detract from the quality of the image.

We offer a variety of optical lenses, some of which we have developed internally and others we license the rights to sell. We also offer a variety of backlights, some of which we have developed internally and are “off the shelf” components. Our lenses come in a variety of sizes with the smallest being our Pupil lens, followed by our Pearl lenses and then our largest being our Prism lenses. The different sizes of lenses give us and our customers design flexibility when creating headset systems. There is a trade-off between the lens size and the size of the perceived image to the viewer. For example, a Pearl lens will provide the viewer with an image approximately equivalent to what the viewer would see looking at a Smart Phone, whereas as a Prism lens will provide the viewer with an image approximately equivalent to what the viewer would see looking at a tablet.

Table of Contents

However a Pearl lens is smaller than a Prism lens which would enable a more fashionable design. Therefore a customer designing a consumer-oriented product may choose a Pearl lens but a customer designing an enterprise-oriented product might choose a Prism lens. We use third parties to manufacture these lenses.

The Whisper Chip is designed to enhance the performance of existing audio systems and speech recognition engines by allowing the speaker's voice to be clearly "heard" by the listener, whether the "listener" is a person or a machine. The Whisper chip incorporates our Voice Extraction™ Filter (VEF). VEF is a patented approach to singulating the voice signal without distorting it. The Whisper Chip is an all-digital solution that runs at 16MHz, consumes less than 12mW of power and replaces the CODEC so no ADC or DAC is needed. The Whisper Chip is 4 x 4 mm in size and accepts up to four (4) digital microphone inputs. We use third parties to manufacture the Whisper Chip.

Headset Systems

Our headset systems include:

- Consumer-oriented headsets which resemble typical eyeglasses but include voice and audio capabilities allowing the user to communicate with other users and a Pupil display module;

- Augmented reality health and fitness sunglasses, called Solos™, that have voice and audio capabilities, a Pupil display module which overlays situational information on the glasses, our Whisper Chip; and

- Industrial headset reference design, called Golden-i, which is essentially a complete head-worn computer that includes an optical pod with one of our display products, a microprocessor, battery, camera, memory and various commercially available software packages that we license.

Our headsets receive or transmit data from or to the internet by interfacing with a Smartphone or similar device via WiFi or Bluetooth. They can also receive information from devices in close proximity using ANT+. The display module or optical pod allows users to view the information such as WEB data, emails, text messages, maps or biometric data (heart rate), situational data (speed, distance traveled, Watts produced) at a "normal" viewing size because of our specialized optics. Our industrial headset Golden-i provides the capability of viewing technical diagrams, by enabling the user to zoom in to see finer details or zoom out to see a larger perspective. The Golden-i is equipped with a camera to enable a picture to be taken, video to be streamed or face-to-face communication to occur. The camera enables users to send pictures or stream live video to a remote subject matter expert so that both the user and expert can analyze an issue at the same time and collaboratively identify and implement a solution. Our headset reference designs utilize operating system software we developed. We expect to offer the Solos headset for sale in the second half of 2016.

We have three sources of revenues: component revenues, which are our primary source of revenues, research and development (R&D) revenues primarily from development contracts with agencies or prime contractors of the U.S. government and commercial enterprises and license revenues from our reference designs. To date our license revenues have been de minimis. For the three months ended March 26, 2016, R&D revenues were \$0.1 million, or 2.3% of total revenues. This contrasted with \$1.5 million, or 17% of total revenue for the corresponding period in 2015.

Results of Operations

The three month periods ended March 26, 2016 and March 28, 2015 are referred to as 2016 and 2015, respectively.

The year ended period December 26, 2015 is referred to as fiscal year 2015.

Revenues. For 2016 and 2015, our revenues, which include component sales and amounts earned from research and development contracts, were as follows (in millions):

Display Revenues by Application	Three Months Ended	
	March 26, 2016	March 28, 2015
Wearable	\$2.6	\$ 1.1
Military	1.5	4.6
Industrial	1.1	1.1
Consumer	0.8	0.3
Research & Development	0.1	1.5
Total	\$6.1	\$ 8.6

Wearable Applications primarily represents sales of our components for products that are worn on the body for other than Military Applications. The increase in Wearable Applications revenues in 2016 as compared to 2015 is primarily the result of initial sales of our products to customers that launched new wearable systems in the first quarter of 2016 and increased demand from existing customers. Sales of our products to customers that use our products for Wearable Applications is a critical part of

18

Table of Contents

our strategy to increase revenues and return to profitability and positive cash flow. Our success in selling our products for Wearable Applications will depend on the demand for our customers' new products, which we are unable to predict. Sales of our products for Military Applications decreased in 2016 as compared to 2015 because of a decrease in demand from the U.S. government for our products used in thermal weapon sights. We expect orders for these products to decline for the remainder of 2016. Industrial Applications represents customers who purchase display products for use in equipment such as 3D metrology. We expect an increase in the sales of our products for use in 3D metrology applications in 2016 as compared to 2015. For the first quarter of 2015, a substantial portion of our Research & Development (R&D) revenue was earned from customers funding development efforts associated with Wearable Applications. The decline in R&D from 2015 to 2016 is because these customers either discontinued the program or the products moved into the commercialization phase. Consumer Applications primarily represents customers who purchase our products for digital still camera (DSC) applications. We expect orders for our products for use in DSC applications to decline for the remainder of 2016.

International sales represented 71% and 26% of product revenues for the three months ended March 26, 2016 and March 28, 2015, respectively. Our international sales are primarily denominated in U.S. currency. Consequently, a strengthening of the U.S. dollar could increase the price in local currencies of our products in foreign markets and make our products relatively more expensive than competitors' products that are denominated in local currencies, leading to a reduction in sales or profitability in those foreign markets. In addition, our Korean subsidiary, Kowon, holds U.S. dollars. As a result, our financial position and results of operations are subject to exchange rate fluctuation in transactional and functional currency. We have not taken any protective measures against exchange rate fluctuations, such as purchasing hedging instruments with respect to such fluctuations, because of the historically stable exchange rate between the Japanese yen, Korean won and the U.S. dollar.

Cost of Component Revenues.

	Three Months Ended	
	March 26, 2016	March 28, 2015
Cost of component revenues (in millions):	\$4.7	\$ 5.3
Cost of component revenues as a % of net component revenues	77.7 %	74.1 %

For the three months ended March 26, 2016, cost of component revenues, which is comprised of materials, labor and manufacturing overhead related to the production of our products, increased as a percentage of revenues in 2016 as compared to 2015 due a decrease in sales of military products which have higher gross margins as compared to our other products and the under absorption of fixed costs due to lower volume of sales.

Research and Development. Research and development (R&D) expenses are incurred in support of internal development programs or programs funded by agencies or prime contractors of the U.S. government and commercial partners. In fiscal year 2016, our R&D expenditures will be related to our display products and wearable technologies. R&D revenues associated with funded programs are presented separately in revenue in the statement of operations. Research and development costs include staffing, purchases of materials and laboratory supplies, circuit design costs, fabrication and packaging of display products, and overhead. For the three months ended March 26, 2016 and March 28, 2015, R&D expense was as follows (in millions):

	Three Months Ended	
	March 26, 2016	March 28, 2015
Funded	\$0.1	\$ 1.5
Internal	3.9	3.4
Total research and development expense	\$4.0	\$ 4.9

Funded R&D expense for the three months ended March 26, 2016 decreased as compared to the prior year due to a reduction in programs with customers developing products for Wearable Applications. The decrease occurred because customers either discontinued the program or the products moved into the commercialization phase. For the three

months ended March 26, 2016, Internal R&D costs increased as compared to the same period in 2015 due to investments in Wearable product development. We expect to incur significant development costs in fiscal year 2016 to commercialize the Kopin Wearable technologies.

Selling, General and Administrative. Selling, general and administrative (S,G&A) expenses consist of the expenses incurred by our sales and marketing personnel and related expenses, and administrative and general corporate expenses.

Table of Contents

	Three Months Ended March 26, 2016		March 28, 2015
Selling, general and administration expense (in millions):	\$3.8	\$	4.4
Selling, general and administration expense as a % of revenues	61.5 %	47.4 %	

S,G&A decreased for the three months ended March 26, 2016 as compared to the same period in 2015, reflecting decrease in professional fees and stock-based compensation expenses which were partially offset by higher trade show costs.

Other Income and Expense

	Three Months Ended March 26, 2016		March 28, 2015
Other income and expense (in millions):	\$(0.3)	\$	2.1

Other income and expense, net, is primarily composed of interest income, foreign currency transaction and remeasurement gains and losses incurred by our Korean and UK-based subsidiaries and gains and losses resulting from the impairment or sale of investments. During the three months ended March 28, 2015 we sold investments and recorded \$2.1 million of gains.

During the three months ended March 26, 2016 and March 28, 2015, we recorded \$0.6 million and \$0.2 million of foreign currency losses respectively. During the three months ended March 28, 2015, we recorded a non-cash gain of \$1.3 million as a result of recording warrants determined to be derivative assets. We received the warrants in August 2013 as part of a restructuring of debt owed by Vuzix Corporation to us. Upon receipt of the warrants, we should have recorded the value of the warrants of approximately \$352,000 in our consolidated financial statements. Subsequently, we determined we should have marked to market the warrants at the end of each reporting period. Had we recorded the warrants in our consolidated financial statements and marked to market the warrants as of December 28, 2013 and December 27, 2014, we would have recorded gains in our statement of operations of approximately \$646,000 and \$171,000, respectively. In the first quarter of 2015, we recorded the warrants in our condensed consolidated financial statements and as a result recorded a gain of approximately \$1.3 million with \$817,000 attributed to prior periods. Equity Losses in Unconsolidated Affiliates. For the three months ended March 28, 2015, the equity loss in unconsolidated affiliate of \$47,000 represents our funding of the operations of one of our investments.

Tax Provision. For the three months ended March 26, 2016, we recorded a tax provision of \$141,000 for estimated state taxes and an increase in estimated foreign withholding on anticipated future remitted earnings of an international subsidiary, as compared to a tax provision of \$12,500 for the three months ended March 28, 2015.

Net Income Attributable to Noncontrolling Interest. As of March 26, 2016, we owned approximately 93% of the equity of Kowon and 80% of the equity of eMDT. Net loss attributable to noncontrolling interest on our consolidated statement of operations represents the portion of the results of operations of our majority owned subsidiaries which is allocated to the shareholders of the equity interests not owned by us. The change in net income attributable to noncontrolling interest is the result of the change in the results of operations of Kowon and eMDT for the three month period ended March 26, 2016 and Kowon, Kopin Software Ltd and eMDT for the three month period ended March 28, 2015. In October 2015, we acquired the remaining equity of Kopin Software Ltd. for £1 as part of a transaction in which we contributed two software products for 17.5% equity ownership in a new company formed to commercialize the software products.

Liquidity and Capital Resources

As of March 26, 2016, we had cash and equivalents and marketable securities of \$90.9 million and working capital of \$84.4 million compared to \$80.7 million and \$89.9 million, respectively, as of December 26, 2015. The change in cash and equivalents and marketable securities was primarily due to net outflow of cash used in operating activities of \$5.6 million, offset by cash provided by investing activities of \$13.2 million. The cash provided by investing activities was primarily from the receipt of final installment of \$15 million from the 2013 sale of our III-V product line and

investment in Kopin Taiwan Corporation.

Cash and marketable debt securities held in U.S. dollars:

20

Table of Contents

Domestic	\$77,718,040
Foreign	8,970,986
Subtotal cash and marketable debt securities	86,689,026
Cash and marketable debt securities held in other currencies and converted to U.S. dollars	4,194,618
Total cash and marketable debt securities	\$90,883,644

We have no plans to repatriate the cash and marketable debt securities held in our foreign subsidiaries FDD and Kopin Software Ltd. and, as such, we have not recorded any deferred tax liability with respect to such cash. The operations at our Korean facility, Kowon, have ceased. Kowon has approximately \$12.4 million of cash and marketable debt securities which we anticipate will eventually be remitted to the U.S. and, accordingly, we have recorded deferred tax liabilities associated with its unremitted earnings.

We lease facilities located in Westborough, Massachusetts, Santa Clara, California, San Jose, California and Scotts Valley, California under non-cancelable operating leases. The Westborough, Santa Clara, San Jose and Scotts Valley leases expire in 2023, 2016, 2021 and 2018, respectively.

We lease a facility in Dalgety Bay, Scotland which expires in 2019, and also lease two facilities in Nottingham, United Kingdom, which expire in 2016 and 2017, respectively.

We expect to expend between \$2 million and \$3 million on capital expenditures over the next twelve months. Our Kowon facility is for sale and when it is sold we anticipate that a final determination of the value of the shares held by the minority shareholders will be made and we will purchase these shares. In 2015, we entered into an agreement with the intent to purchase approximately 2% of a company for approximately \$2.5 million, subject to certain government approvals and agreement on valuation.

As of March 26, 2016, we had U.S. federal and state tax loss carry-forwards, which may be used to offset U.S. future federal and state taxable income. We also had tax loss carry-forwards generated in our foreign subsidiaries which may be used to offset future foreign taxable income. We may be subject to alternative minimum taxes, foreign taxes and state income taxes depending on our taxable income and sources of taxable income.

Historically, we have financed our operations primarily through public and private placements of our equity securities and cash generated from operations. We believe our available cash resources will support our operations and capital needs for at least the next twelve months.

Seasonality

There has been no seasonal pattern to our sales in fiscal years 2016 and 2015.

Contractual Obligations

The following is a summary of our contractual payment obligations for operating leases as of March 26, 2016:

Contractual Obligations	Total	Less than 1 year	1-3 Years	3-5 years	More than 5 years
Operating Lease Obligations	\$6,958,792	\$ 1,321,093	\$3,264,980	\$2,212,719	\$ 160,000

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We invest our excess cash in high-quality U.S. government, government-backed (i.e: Fannie Mae, FDIC guaranteed bonds and certificates of deposit) and corporate debt instruments, which bear lower levels of relative risk. We believe that the effect, if any, of reasonably possible near-term changes in interest rates on our financial position, results of operations, and cash flows should not be material to our cash flows or income. It is possible that interest rate movements would increase our unrealized gain or loss on interest rate securities. We are exposed to changes in foreign currency exchange rates primarily through our translation of our foreign subsidiaries' financial position, results of operations, and transaction gains and losses as a result of non U.S. dollar denominated cash flows related to business activities in Asia and Europe, and remeasurement of U.S. dollars to the functional currency of our U.K. and Kowon subsidiaries. We are also exposed to the effects of exchange rates in the purchase of certain raw materials which are in U.S. dollars but the price on future purchases is subject to change based on the relationship of the Japanese yen to the U.S. dollar. We do not currently hedge our foreign currency exchange rate risk. We estimate that any market risk associated with our international operations is unlikely to have a material adverse effect on our business, financial condition or results of operation. Our portfolio of marketable debt securities is subject to interest rate risk

Table of Contents

although our intent is to hold securities until maturity. The credit rating of our investments may be affected by the underlying financial health of the guarantors of our investments. We use silicon wafers but do not enter into forward or futures hedging contracts.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based on an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) were effective as of March 26, 2016, to ensure that information required to be disclosed by us in reports that we file or submit under the

Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange

Commission rules and forms and is accumulated and communicated to our management, including our Chief Executive Officer

and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that was conducted during the quarter ended March 26, 2016 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

We may engage in legal proceedings arising in the ordinary course of business. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of such matters and our business, financial condition, results of operations or cash flows could be affected in any particular period.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for our fiscal year ended December 26, 2015. The risks discussed in our Annual Report on Form 10-K could materially affect our business, financial condition and future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Sale of Unregistered Securities

In the past three years we have not sold any securities which were not registered under the Securities Act.

Use of Proceeds

The information required by this item regarding use of proceeds by the Company is reported herein in Part I, Item 2 under "Liquidity and Capital Resources".
